“(2) received training, under regulations prescribed by the Secretary concerned, designed to develop a proficiency in such a foreign language;

“(3) is assigned to duties requiring a proficiency in such a foreign language; or

“(4) is proficient in a foreign language for which the uniformed service may have a critical need, as determined by the Secretary concerned.

“(b) **AVAILABILITY OF BONUS.**—Subject to subsection (c), the Secretary concerned may pay an annual bonus under this section to a

member of a reserve component who satisfies the eligibility requirements specified in paragraph (1), (2), (3), or (4) of subsection (a).

“(2) If a member of a reserve component serving on active duty receives special pay under subsection (a) for any month occurring during a certification period in which the member received, or is receiving, a bonus under subsection (b), the amount of the special pay paid to the member for the month shall be reduced by an amount equal to $\frac{1}{12}$ of the bonus amount.

“(2) For purposes of providing an annual bonus to a member under the authority of this subsection, the Secretary concerned may treat the date on which the member was assigned to duty in connection with the contingency operation as equivalent to a certification date. In the case of a member whose certification will expire during such a duty assignment, the Secretary shall commence the next one-year certification period on the date on which the prior certification period expires.

“(3) A member who is paid special pay or a bonus under the authority of this subsection shall complete the certification required by subsection (c) for the foreign language for which the special pay or bonus was paid not later than the end of the 180-day period beginning on the date on which the member is released from the assignment in connection with the contingency operation. “(2) An obligation to repay the United States imposed under paragraph (1) or subsection (f)(4) is for all purposes a debt owed to the United States. A discharge in bankruptcy under title 11 that is entered for the member less than five years after the expiration of the certification period does not discharge the member from a debt arising under this paragraph. This paragraph applies to any case commenced under title 11 after the date of the enactment of this section.

“(h) **REGULATIONS.**—This section shall be administered under regulations prescribed by the Secretary of Defense for the armed forces under the jurisdiction of the Secretary, by the Secretary of Homeland Security for the Coast Guard when the Coast Guard is not operating as a service in the Navy, by the Secretary of Health and Human Services for the Commissioned Corps of the Public Health Service, and by the Secretary of Commerce for the National Oceanic and Atmospheric Administration.”

Subtitle D—Matters Relating to Museums and Commemorations

SEC. 1031. RECOGNITION OF THE LIBERTY MEMORIAL MUSEUM, KANSAS CITY, MISSOURI, AS AMERICA'S NATIONAL WORLD WAR I MUSEUM.

(a) *FINDINGS.*—Congress makes the following findings:

(1) The Liberty Memorial Museum in Kansas City, Missouri, was built in honor of those individuals who served in World War I in defense of liberty and the United States.

(2) The Liberty Memorial Association, the nonprofit organization that originally built the Liberty Memorial Museum, is re-

sponsible for the finances, operations, and collections management of the Liberty Memorial Museum.

(3) *The Liberty Memorial Museum is the only public museum in the United States that exists for the exclusive purpose of interpreting the experiences of the United States and its allies in the World War I years (1914–1918), both on the battlefield and on the home front.*

(4) *The Liberty Memorial Museum project began after the 1918 Armistice through the efforts of a large-scale, grass-roots civic and fundraising effort by the citizens of the Kansas City metropolitan area, including veterans of World War I. After the conclusion of a national architectural design competition, ground was broken in 1921, construction began in 1923, and the Liberty Memorial Museum was opened to the public in 1926.*

(5) *In 1994, the Liberty Memorial Museum closed for a massive restoration and expansion project. The restored museum reopened to the public on Memorial Day in 2002 during a gala rededication ceremony.*

(6) *Exhibits prepared for the original museum buildings presaged the dramatic, underground expansion of core exhibition gallery space, with over 30,000 square feet of new interpretive and educational exhibits currently in development. The new exhibits, along with an expanded research library and archives, will more fully utilize the many thousands of historical objects, books, maps, posters, photographs, diaries, letters, and reminiscences of World War I participants that are preserved for posterity in the collections of the Liberty Memorial Museum. The new core exhibition is scheduled to open on Veterans Day in 2006.*

(7) *The City of Kansas City, the State of Missouri, and thousands of private donors and philanthropic foundations have contributed millions of dollars to first build and later restore the Liberty Memorial Museum. The Liberty Memorial Museum continues to receive the strong support of residents from the States of Missouri and Kansas and across the United States.*

(8) *Since its restoration and rededication in 2002, the Liberty Memorial Museum has attracted thousands of visitors from across the United States and many foreign countries.*

(9) *There remains a need to preserve in a museum setting evidence of the honor, courage, patriotism, and sacrifice of those Americans who offered their services and who gave their lives in defense of liberty during World War I, evidence of the roles of women and African Americans during World War I, and evidence of other relevant subjects.*

(10) *The Liberty Memorial Museum seeks to educate a diverse group of audiences through its comprehensive collection of historical materials, emphasizing eyewitness accounts of the participants on the battlefield and the home front and the impact of World War I on individuals, then and now. The Liberty Memorial Museum continues to actively acquire and preserve such materials.*

(11) *A great opportunity exists to use the invaluable resources of the Liberty Memorial Museum to teach the “Lessons*

of Liberty” to schoolchildren in the United States through on-site visits, classroom curriculum development, distance-learning activities, and other educational initiatives.

(12) *The Liberty Memorial Museum should remain the foremost museum in the United States regarding the national experience in the World War I years, which people can visit to learn about World War I and where the history of this monumental struggle will be preserved so that current and future generations may understand the role played by the United States in the preservation and advancement of democracy, freedom, and liberty in the early 20th century.*

(13) *The work of the Liberty Memorial Museum to recognize and preserve the history of the Nation’s sacrifices in World War I will take on added significance as the centennial observance of the war approaches.*

(14) *It is fitting and proper to refer to the Liberty Memorial Museum as “America’s National World War I Museum”.*

(b) **CONGRESSIONAL RECOGNITION.**—Congress—

(1) *recognizes the Liberty Memorial Museum in Kansas City, Missouri, including the museum’s future and expanded exhibits, collections, library, archives, and educational programs, as “America’s National World War I Museum”;*

(2) *recognizes that the continuing collection, preservation, and interpretation of the historical objects and other historical materials held by the Liberty Memorial Museum will enhance the knowledge and understanding of the experiences of the United States and its allies in the World War I years (1914–1918), both on the battlefield and on the home front;*

(3) *commends the ongoing development and visibility of the “Lessons of Liberty” educational outreach programs prepared by the Liberty Memorial Museum for teachers and students throughout the United States; and*

(4) *encourages present generations of Americans to understand the magnitude of World War I, how it shaped the United States, other countries, and later world events, and how the sacrifices made by Americans then helped preserve liberty, democracy, and other founding principles of the United States for generations to come.*

(1) *The Department of Defense, since 1991, has relied on a policy of no media coverage of the transfers of the remains of deceased members of the Armed Forces—*

(A) *at Ramstein Air Force Base, Germany;*

(B) *at Dover Air Force Base, Delaware, and the Port Mortuary Facility at Dover Air Force Base; and*

(C) *at interim stops en route to the point of final destination in the transfer of the remains.*

(2) *The principal focus and purpose of the policy is to protect the wishes and the privacy of families of deceased members of the Armed Forces during their time of great loss and grief and to give families and friends of the dead the privilege to decide whether to allow media coverage at the member's duty or home station, at the interment site, or at or in connection with funeral and memorial services.*

(3) *In a 1991 legal challenge to the Department of Defense policy, as applied during Operation Desert Storm, the policy was upheld by the United States District Court for the District of Columbia, and on appeal, by the United States Court of Appeals for the District of Columbia in the case of JB Pictures, Inc. v. Department of Defense and Donald B. Rice, Secretary of the Air Force on the basis that denying the media the right to view the return of remains at Dover Air Force Base does not violate the first amendment guarantees of freedom of speech and of the press.*

(4) *The United States Court of Appeals for the District of Columbia in that case cited the following two key Government interests that are served by the Department of Defense policy:*

(A) *Reducing the hardship on the families and friends of the war dead, who may feel obligated to travel great distances to attend arrival ceremonies at Dover Air Force Base if such ceremonies were held.*

(B) *Protecting the privacy of families and friends of the dead, who may not want media coverage of the unloading of caskets at Dover Air Force Base.*

(5) *The Court also noted, in that case, that the bereaved may be upset at the public display of the caskets of their loved ones and that the policy gives the family the right to grant or deny access to the media at memorial or funeral services at the home base and that the policy is consistent in its concern for families.*

(b) **SENSE OF CONGRESS.**—*It is the sense of Congress that the Department of Defense policy regarding no media coverage of the transfer of the remains of deceased members of the Armed Forces—*

(1) *appropriately protects the privacy of the families and friends of the deceased; and*

(2) *is consistent with United States constitutional guarantees of freedom of speech and freedom of the press.*

SEC. 3170. SENSE OF CONGRESS ON RESOURCE CENTER FOR ENERGY EMPLOYEES UNDER ENERGY EMPLOYEE OCCUPATIONAL ILLNESS COMPENSATION PROGRAM IN WESTERN NEW YORK AND WESTERN PENNSYLVANIA REGION.

(a) FINDINGS.—Congress makes the following findings:

(1) New York has 36 current or former Department of Energy facilities involved in nuclear weapons production-related activities statewide, mostly atomic weapons employer facilities, and 14 such facilities in western New York. Despite having one of the greatest concentrations of such facilities in the United States, western New York, and abutting areas of Pennsylvania, continue to be severely underserved by the Energy Employees Occupational Illness Compensation Program under the Energy Employees Occupational Illness Compensation Program Act of 2000 (title XXXVI of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (as enacted into law by Public Law 106–398); 42 U.S.C. 7384 et seq.).

(2) The establishment of a permanent resource center in western New York would represent a substantial step toward improving services under the Energy Employees Occupational Illness Compensation Program for energy employees in this region.

(3) The number of claims submitted to the Department under subtitle B of the Energy Employees Occupational Illness Compensation Program Act of 2000 from the western New York region, including western Pennsylvania, exceeds the number of such claims filed at resource centers in Hanford, Washington, Portsmouth, Ohio, Los Alamos, New Mexico, the Nevada Test Site, Nevada, the Rocky Flats Environmental Technology Site, Colorado, the Idaho National Engineering Laboratory, Idaho, and the Amchitka Test Site, Alaska.

(4) Energy employees in the western New York region, including western Pennsylvania, deserve assistance under subtitle B of the Energy Employees Occupational Illness Compensation Program Act of 2000 commensurate with the assistance provided energy employees at other locations in the United States.

(b) *SENSE OF CONGRESS.*—It is the sense of Congress that the Secretary of Labor should—

(1) review the availability of assistance under subtitle B of the Energy Employees Occupational Illness Compensation Program Act of 2000 for energy employees in the western New York region, including western Pennsylvania; and

(2) recommend a location in that region for a resource center to provide such assistance to such energy employees.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF
CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4200), to authorize appropriations for fiscal year 2005 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment that is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SUMMARY STATEMENT OF CONFERENCE ACTIONS

The Conferees recommend authorization of appropriations for fiscal year 2005 for the Department of Defense for procurement; research and development; test and evaluation; operation and maintenance; working capital funds; military construction and family housing; and for weapons and environmental restoration programs of the Department of Energy; that have a budget authority implication of \$445.6 billion for the national defense function.

Summary table of authorizations

The defense authorization act provides authorizations for appropriations but does not generally provide budget authority. Budget authority is provided in the appropriations act.

In order to relate the conference recommendations to the budget resolution, matters in addition to the dollar authorizations contained in this bill must be taken into account. A number of programs in the national defense function are authorized in other legislation.

The following table summarizes authorizations included in the bill for fiscal year 2005 and, in addition, summarizes the implications of the conference action for the budget authority totals for national defense (budget function 050).

ITEMS OF SPECIAL INTEREST

Joint surveillance and target attack radar system re-engining

The conference report accompanying the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136) included a requirement for the Secretary of Defense to submit a report to the congressional defense committees by February 13, 2004, that provides an economic analysis of options for maintaining engines for the E–8C joint surveillance and target attack radar system (JSTARS) aircraft. In the Senate report accompanying S. 2400 (S. Rept. 108–260), the committee noted that although the required report had not yet been received from the Department of Defense, the committee encouraged the Air Force to take into account the recommendations of the report when deciding what to do with the JSTARS fleet.

The congressional defense committees received the required report on July 8, 2004. The report states that there are both economic and operational advantages to acquiring new engines for the JSTARS aircraft, but the letter accompanying the report states that the Department's preferred solution is to maintain the current engines while carefully considering the need for JSTARS re-engining in the fiscal year 2006 budget request. Since the current engines have significant operational shortfalls and since maintaining the current engines would be more costly in terms of total life cycle costs than any option that would acquire new engines, the conferees encourage the Secretary to reevaluate the decision to maintain the current engines in the JSTARS fleet of aircraft.

Halvorsen loaders

The conferees are aware that as a result of the global war on terrorism, the Air Force has been required to significantly expand its expeditionary logistics capability. The conferees note Halvorsen 25K loaders play a significant role in material handling and are currently in use around the world, including Iraq and Afghanistan.

The Commander, U.S. Transportation Command (USTRANSCOM) has a stated mobility requirement for 618 Halvorsen 25K loaders, of which 316 have been acquired between the fiscal years 2000–2004. Given the high operational tempo in air mobility missions and heavy use of the Air Force's mobility and material handling equipment (MHE) fleet, the Congress increased funding for this program in fiscal year 2004 and fiscal year 2005 to help meet the requirements for USTRANSCOM.

The conferees encourage the Air Force to continue its effort to modernize its MHE to include planning and funding for the Halvorsen 25K loader program.

The House bill contained a provision (sec. 116) that would authorize the Secretary of the Air Force to enter into a multiyear procurement contract for 80 tanker aerial refueling aircraft beginning in fiscal year 2005, for a period of up to eight years. The provision would also repeal section subsection (b) of 135 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136). The provision would prohibit this multiyear procurement from being executed under the authority of either section 135 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–36) or section 8159 of the Department of Defense Appropriations Act, 2002 (division A of Public Law 107–117).

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would amend section 135 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136) to: (1) provide that no tanker aircraft can be leased under the multiyear aircraft lease pilot program previously established under section 8159 of the Department of Defense Appropriations Act for Fiscal Year 2002; (2) authorize a multiyear procurement of up to 100 aerial refueling aircraft, for a period not to exceed ten program years; (3) prohibit the use of incremental funding for the multiyear contract; and (4) remove reference to leasing of aircraft throughout the provision.

Advanced battery technology initiative

The budget request included \$41.2 million in PE 62705A for applied research in electronics and electronic devices.

The House bill would authorize an increase of \$20.0 million in PE 62705A for an advanced battery technology initiative.

The Senate amendment contained no similar authorization.

The conferees agree to authorize an increase of \$15.6 million in PE 62705A for an advanced battery technology initiative, which would fund programs selected on the basis of technical merit, cost effectiveness, and potential to meet service requirements, including the following areas: alkaline cylindrical cells; cylindrical zinc air batteries; high capacity nickel/zinc rechargeable cells; lithium battery technologies; lithium carbon monofluoride cells; and proton exchange membrane fuel cells.

The conferees note that in a recent study, "Meeting the Energy Needs of Future Warriors," the National Research Council highlighted the importance of Army research on soldier power technologies, and indicated that "energy to power soldier systems, . . . must now be viewed on par with the other critical logistics commodities—ammunition, fuel, food, and water."

Medical technology applied research initiative

The budget request included \$60.9 million in PE 62787A for medical technology.

The House bill would authorize an increase of \$25.0 million in PE 62787A for a medical technology applied research initiative.

The Senate amendment contained no similar authorization.

The conferees agree to authorize an increase of \$7.05 million for an applied initiative in medical technologies of specific military application and value, including: dermal phase meter; gene delivery technology; fibrin bandages from non-mammalian sources; nano-fabricated bioartificial kidney; and rapid bio-pathogen detection technology. Projects are to be selected on the basis of technical merit, cost effectiveness, and potential to meet service requirements.

Lightweight Structures Initiative

The budget request included \$203.1 million in PE 63005A for combat vehicle and automotive technology.

The House bill would authorize an increase of \$9.0 million in PE 63005A for the Lightweight Structures Initiative.

The Senate amendment would authorize an increase of \$7.5 million for components of the Lightweight Structures Initiative including: \$3.0 million for advanced titanium armor systems; \$1.5 million for Future Combat System common chassis design; and \$3.0 million for non-line of sight cannon structure design.

The conferees agree to authorize an increase of \$7.9 million in PE 63005A for the Lightweight Structures Initiative.

Mobile tactical high energy laser

The budget request included \$53.5 million in PE 63305A for Army missile defense systems integration, of which \$39.0 million was for the mobile tactical high energy laser (MTHL).

The House bill would authorize the budget request.

The Senate amendment would authorize an increase of \$15.0 million for MTHEL.

The conferees agree to authorize an increase of \$8.0 million in PE 63305A for MTHEL.

The conferees are aware of successful tests of the Army's heat capacity solid state laser and believe that laser weapons could play an important role in future missile, air, and counter-mortar defenses. The conferees direct that the increase be used to accelerate development of a 100 kilowatt solid state laser and to initiate a system demonstration using a solid state laser.

The conferees note that the Joint Technology Office (JTO) plays a key role in maturing a range of laser technologies. The JTO was established pursuant to subtitle E, title II, of the National Defense Authorization Act for Fiscal Year 2001 (Public Law 106-398) with the intent of establishing an office that would accelerate progress in high energy laser technology and provide incentives to services to invest in such technologies. The conferees are concerned that the JTO may not be effective in accomplishing the goals defined in subtitle E or transitioning laser technology to the services. The conferees direct the Secretary of Defense to provide a report to the congressional defense committees by January 15, 2005 on the effectiveness of the JTO in achieving the objectives of subtitle E, the impact of shifting funding responsibility for JTO efforts to the Air Force, and the effectiveness of the JTO structure in transitioning laser technologies to the warfighter. The conferees further direct the Comptroller General to review this assessment and to report the results of this review to congressional defense committees no later March 15, 2005.

NAVY

Research, Development, Test and Evaluation, Navy Overview

The budget request for fiscal year 2005 included an authorization of \$16,346.4 million in Research, Development, Test and Evaluation, Navy for the Department of Defense.

The House bill would authorize \$16,052.8 million.

The Senate amendment would authorize \$16,690.4 million.

The conferees recommend an authorization of \$16,200.6 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Littoral Combat Ship

The budget request included \$352.1 million in PE 63581N for the Littoral Combat Ship (LCS), including \$244.4 million for LCS development and \$107.7 million for construction.

The House bill would authorize \$244.4 million in PE 63581N for LCS development, a decrease of \$107.7 million, delaying construction of the first LCS until fiscal year 2006.

The Senate amendment would authorize the budget request.

The conferees agree to authorize \$350.1 million, a decrease of \$2.0 million for phase one design of the Flight One LCS design.

The conferees note the concerns expressed in the House report accompanying H.R. 4200 (H. Rept. 108–491) regarding whether the LCS program schedule provides sufficient time and opportunities for experimentation and evaluation of the operational concepts for LCS in Flight Zero before committing to major serial production of the ship with Flight One. The program plan provided with the fiscal year 2005 budget request had construction starting on Flight One ships before delivery and evaluation of Flight Zero ships. This concurrency could require expensive retrofit to Flight One ships after lessons have been learned from operating Flight Zero ships.

The conferees are concerned with a potential industrial impact induced by making fiscal year 2006 a gap year in LCS production, which could lead to increased ship costs or technology insertion challenges. However, the conferees agree with the rationale of section 8092 of the Department of Defense Appropriations Act for Fiscal Year 2005 (section A of Public Law 108–287), which directs that no funds be obligated for construction of a third vessel in the fiscal year 2006 budget request. The conferees expect that the Navy will include a plan that reduces the risk of concurrency in the LCS justification submitted as part of the fiscal year 2006 budget request.

Land attack technology

The budget request included \$82.0 million in PE 63795N for land attack technology. This included \$28.9 million for the affordable weapons system (AWS) and \$11.3 million for the continued development of the extended range guided munition (ERGM).

The House bill would authorize \$105.0 million in PE 63795N for land attack technology. This included \$51.9 million for AWS, an increase of \$23.0 million, and would authorize the budget request for ERGM.

The Senate amendment would authorize \$53.1 million in PE 63795N for land attack technology. This would authorize no funding for AWS, and would authorize the budget request for ERGM.

The conferees agree to authorize \$95.2 million in PE 63795N for land attack technology. This includes an authorization of \$48.9 million for AWS, an increase of \$20.0 million. This also includes an authorization of \$4.5 million for ERGM, a decrease of \$6.8 million.

The conferees are aware of past testing problems in the ERGM program, but have supported fielding of ERGM capability as soon as possible. The conferees are also aware that the Navy has issued a notice to industry stating that it will issue a solicitation for a capability to mirror that of ERGM. While supportive of this risk-reduction strategy, the conferees also expect that funds appropriated

for the ERGM program be applied to continued developmental testing of ERGM.

Open architecture

The budget request included \$146.5 million in PE 64307N for surface combatant combat system engineering and \$48.2 million in PE 64755N for ship self-defense (detect and control).

The House bill would authorize an increase of \$21.8 million in PE 64307N for open architecture systems and would also authorize an increase of \$21.8 million in PE 64755N for open architecture warfare systems.

The Senate amendment would authorize the budget request.

The conferees agree to authorize an increase of \$4.3 million in PE 64307N and an increase of \$3.4 million in PE 64755N for open architecture warfare systems.

The conferees concur with the Navy's decision to move to open architecture (OA)-based warfare systems, and recognize OA as an enabling step to modernizing warfighting capabilities at an affordable cost. Similarly, given the rapid rate that commercial, off-the-shelf computing equipment and software is becoming obsolescent, delaying the implementation of OA will result in military systems falling further and further behind the commercial sector's capability. While an OA approach to development and fielding requires increased cooperation at all levels, it also creates interdependencies among programs as a result of design and development components that will be used in multiple systems. With this approach, the impact of a delay or funding cut in a program implementing OA could have impact on other programs.

The Navy identified the implementation of OA into Navy surface forces as its highest unfunded priority in fiscal year 2005. Under the Navy's plan, modernization of existing forces (cruiser modernization and DDG modernization) and recapitalization of the surface fleet (DD(X), CVN-21, and the Littoral Combat Ship) are all inextricably linked to the overall execution of the OA initiative. The conferees believe that there could be serious, cascading effects on these programs unless the Navy ensures that the OA initiative is fully funded, and urge the Navy to pursue any shortfalls through supplemental submissions for fiscal year 2005. The conferees also believe the Navy should consider grouping various OA efforts in a separate program element, so that: (1) the Navy can coordinate its efforts more efficiently; and (2) difficulties with individual platform programs do not jeopardize the entire effort.

AIR FORCE

Research, Development, Test and Evaluation, Air Force Overview

The budget request for fiscal year 2005 included an authorization of \$21,114.7 million in Research Development, Test and Evaluation, Air Force for the Department of Defense.

The House bill would authorize \$21,533.0 million.

The Senate amendment would authorize \$21,264.3 million.

The conferees recommend an authorization of \$20,432.9 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Transformational satellite communications

The budget request included \$674.8 million in PE 63845F for transformational military satellite communications (TSAT).

The House bill would authorize a decrease of \$100.0 million in PE 63845F.

The Senate amendment would authorize a decrease of \$100.0 million in PE 63845F.

The conferees agree to authorize \$374.8 million in PE 63845F, a decrease of \$300.0 million.

The conferees strongly support the objectives of the TSAT program, including much higher communications capacity, assured connectivity for a much larger number of mobile and fixed forces, and the ability to protect these capabilities against emerging threats. The conferees, however, have had continuing concerns related to the risk of the current acquisition approach and potential program delays, which the conferees believe could elevate operational risks resulting from gaps in the military satellite communications (MILSATCOM) architecture.

The conferees are aware of program options that could leverage both current MILSATCOM program investments and TSAT development efforts. The conferees believe that such an approach could accelerate the deployment of advanced communications capabilities, provide the opportunity to incrementally demonstrate advanced satellite communications technology, and provide a lower risk path to meeting TSAT requirements. The conferees believe that such an approach is potentially more consistent with spiral development and capabilities-based acquisition.

The conferees direct the Secretary of Defense to evaluate modified TSAT acquisition strategies that streamline the program structure and leverage current MILSATCOM investment, and to provide a report to the congressional defense committees on that evaluation by March 1, 2005.

Space based radar

The budget request included \$327.7 million in PE 63858F for space based radar (SBR).

The House bill would authorize the budget request.

The Senate amendment would authorize the budget request.

The conferees agree to authorize \$75.0 million in PE 63858F for SBR, a decrease of \$252.7 million.

The conferees believe that the United States must continue to improve its space-based and airborne intelligence, reconnaissance, and surveillance (ISR) systems; and believe that persistent surveillance will be critical to future U.S. military and intelligence capabilities. The conferees note that space based radar can make a significant contribution to persistent surveillance and that radars provide the only all weather, day/night ISR capabilities.

While strongly supportive of radar satellites, the conferees are concerned that the Air Force cost estimates for the notional SBR architecture that served as the basis for the fiscal year 2005 budget request were very high. If accurate, these estimates could render the system unaffordable.

The conferees believe that affordability will be critically dependent on the development and deployment of a single radar sat-

elite system to meet both military and intelligence community needs and the thorough integration of space based radar ISR capabilities into a system of systems architecture that includes air assets, other national technical means, responsive space assets, and possibly near-space assets. Such an integration will have direct and significant implications for the capabilities needed in any one element of a system of systems. The conferees believe that an integrated architecture, that leverages and evolves existing architectures as well as innovative technologies, will provide greater capabilities earlier and at a more affordable cost.

Consequently, the conferees believe that the number of satellites and technical capabilities needed in an SBR system, and how an SBR system might evolve over time, is critically dependent on a more complete understanding of an integrated ISR system. The conferees direct that the SBR effort be restructured to focus on continued technology maturation (including satellite integration), architectural analysis, and system evolution. The conferees further direct the Secretary of Defense to submit a report to the congressional defense committees no later than March 1, 2005, outlining the key features and programmatic implications of an ISR system of systems architecture that includes national technical means and other space, air, responsive space, near-space and terrestrial systems.

Space based infrared system

The budget request included \$508.4 million in PE 64441F for the space based infrared system (SBIRS).

The House bill would authorize the budget request.

The Senate amendment would authorize the budget request.

The conferees agree to authorize an increase of \$35.0 million in PEG 4441F.

The conferees remain concerned with continued SBIRS cost increases, schedule delays, and technical problems. The conferees note that the initial 1996 cost estimate for SBIRS was \$3.6 billion; that estimate has increased by nearly \$4 billion in the last three years and is now \$10.0 billion. While strongly supportive of the development of next generation early warning capabilities, the conferees do not believe that continuation of this program can be justified if such increases continue in the future. The conferees direct the Secretary of Defense to provide a report in classified and unclassified form to the congressional defense committees no later than February 1, 2005 on the cause of the most recent SBIRS cost increases, schedule delays, and technical problems; the most recent Defense Support Program gap analysis and any effect that further delays will have on U.S. early warning, technical intelligence, and missile defense capabilities; steps taken to address the most recent SBIRS technical difficulties; any adjustments in management and contract arrangements with the contractor to reflect the most recent program challenges; remaining risk areas; and an assessment of the confidence level in the SBIRS schedule and cost estimates current as of October 1, 2004.

DEFENSE—WIDE

Research, Development, Test and Evaluation, Defense-wide Overview

The budget request for fiscal year 2005 included an authorization of \$20,739.8 million in Research, Development, Test and Evaluation, Defense-wide for the Department of Defense.

The House bill would authorize \$20,721.3 million.

The Senate amendment would authorize \$20,654.4 million.

The conferees recommend an authorization of \$20,252.9 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Chemical and biological defense basic research program

The budget request included \$36.8 million in PE 61384BP for chemical and biological defense program basic research.

The House bill would authorize an increase of \$15.0 million in PE 61384BP for a chemical and biological defense basic research initiative.

The Senate amendment would authorize the budget request.

The conferees agree to authorize an increase of \$11.0 million in PE 61384BP for a chemical and biological defense basic research initiative. The conferees note that projects and technologies to be considered for funding under the chemical and biological defense basic research initiative should be selected on the basis of technical merit and potential operational utility. The conferees recommend that the projects and technologies to be considered for funding under the chemical and biological defense basic research initiative should include, but not be limited to, the following: engineered pathogen identification and countermeasures, multipurpose bio-defense immunoarrays and fluorescence activated sensing technologies.

Chemical and biological defense applied research program

The budget request included \$104.4 million in PE 62384BP for chemical and biological defense program applied research.

The House bill would authorize an increase of \$25.0 million in PE 62384BP for a chemical and biological defense applied research initiative.

The Senate amendment would authorize an increase of \$8.9 million in PE 62384BP, including \$3.0 million for mustard gas antidotes; \$2.0 million for bioinformatics; \$2.0 million for neurotoxin mitigation research; and \$2.9 million for chemical agent persistence models.

The conferees agree to authorize an increase of \$33.4 million in PE 62384BP for chemical and biological defense program applied research, including \$3.0 million for mustard gas antidote; \$2.0 million for bioinformatics; \$1.0 million for neurotoxin mitigation research; \$2.9 million chemical agent persistence models; and \$24.5 million for a chemical and biological applied research initiative.

The conferees note that projects and technologies to be considered for funding under the chemical and biological defense program applied research initiative should be selected on the basis of technical merit and potential operational utility. The conferees recommend that the projects and technologies to be considered for funding under the chemical and biological defense applied research initiative should include, but not be limited to, the following: air contamination monitoring systems; hand-held detectors; heat shock protein vaccine creation processes; low-cost chemical-biological protective shelters; membrane research for next generation chemical-biological protective suits; rapid anti-body based biological countermeasures; and rapid decontamination systems for nerve agents.

Stimulated isomer energy release

The budget request included \$339.2 million in PE 62702E for tactical technology applied research, including \$4.0 million for the

Defense Advanced Research Project Agency's (DARPA) stimulated isomer energy release (SIER) project.

The House bill and the Senate amendment would reduce the budget request for the SIER project by \$4.0 million. The House bill also directed the Secretary of Defense to terminate the project.

The conferees agree to authorize no funds for continuation of the DARPA SIER project and direct that the DARPA project be terminated.

Combating terrorism technology support

The budget request included \$46.7 million in PE 63122D8Z for combating terrorism technology support programs.

The House bill would authorize an increase of \$27.5 million in PE 63122D8Z for combating terrorism technology support programs, including \$25.0 million for advanced combating terrorism technology support.

The Senate amendment would authorize an increase of \$10.0 million in PE 63122D8Z for blast mitigation research. The conferees agree to authorize an increase of \$13.5 million in PE 63122D8Z for combating terrorism technology support, including \$7.0 million for blast mitigation; \$5.0 million for advanced combating terrorism technology support; and \$1.5 million for combating terrorism intelligence, surveillance, and reconnaissance research.

Chemical and biological defense program advanced technology development

The budget request included \$117.3 million in PE 63384BP for the chemical and biological defense program for advanced technology development.

The House bill would authorize an increase of \$35.0 million in PE 63384BP for a chemical and biological defense program advanced technology initiative.

The Senate amendment would authorize an increase of \$9.5 million for chemical and biological defense program advanced technology development, including \$6.0 million for anthrax and plague oral vaccine development; and \$3.5 million for water quality sensors.

The conferees agree to authorize an increase of \$38.3 million for chemical and biological defense program for advanced technology development, including \$32.9 million for an advanced technology development initiative; \$2.8 million for anthrax and plague oral vaccine development; and \$2.6 million for water quality sensors.

The conferees note that projects and technologies to be considered for funding under the chemical and biological defense advanced technology development initiative should be selected on the basis of technical merit and potential operational utility. The conferees recommend that the projects and technologies to be considered for funding under the chemical and biological defense basic research initiative should include, but not be limited to, the following: hand-held biological detection systems; immuno biological/chemical threat agent detectors; non-invasive vectored vaccine development; and recombinant protein vaccines.

Airborne laser

The budget request included \$474.3 million in PE 63883C for the airborne laser (ABL).

The House bill would authorize the budget request.

The Senate amendment would authorize the budget request.

The conferees agree to authorize the budget request.

The conferees remain convinced of the importance of boost phase intercept in the ballistic missile defense architecture, and note that ABL has potentially revolutionary capabilities. The conferees also note that, in response to consistent cost overruns and schedule delays, the program has been restructured to reflect these difficulties and its developmental nature. The conferees applaud this restructuring and are aware of progress in recent months toward achieving key milestones in the ABL program, particularly first light from conjoined laser modules. The conferees note that demonstrated progress in these areas will be critical to the continuation of the ABL effort.

The conferees direct the Secretary of Defense to provide a report to the congressional defense committees by February 15, 2005 that provides the status of ABL laser tests and the beam control/fire control system and recommendations on the future of the ABL program.

Kinetic energy interceptor

The budget request included \$511.3 million in PE 63886C for the kinetic energy interceptor (KEI) and associated boost phase intercept efforts.

The House bill authorized a decrease of \$75.0 million in PE 63886C.

The Senate amendment authorized a decrease of \$200.0 million in PE 63886C.

The conferees agree to authorize \$348.3 million in PE 63886C, a decrease of \$163.0 million.

The conferees remain convinced that the KEI could be an important aspect of the overall ballistic missile defense architecture, potentially contributing intercept capabilities in boost, midcourse, and terminal phases of the threat missile flight. The conferees are concerned, however, with the lack of progress in defining basing modes. The conferees note that:

(1) Recent justifications for the KEI ground-based variant suggest that it might serve as the basis for midcourse intercept capability in Europe. At the same time, however, the budget request included \$35.0 million for additional ground-based interceptors (GBI) for the ground-based midcourse defense element that could be deployed in Europe; and

(2) Consideration of sea-based concepts of operations and platforms do not appear to be progressing.

The conferees direct the Director of the Missile Defense Agency to provide a report to the congressional defense committees by February 1, 2005 that includes planned ground- and sea-basing modes for KEI (including specific sea-based platforms) and the concept of operations for each basing mode; how KEI will enhance ballistic missile defense system capabilities; the role KEI may play in European missile defense and how that role relates to the fielding of ad-

ditional GBIs; and a comparison of anticipated sea-based KEI capabilities with other sea-based missile defense options.

Operationally responsive space

The budget request included \$19.6 million in PE 65799D8Z for the force transformation directorate, but no funds for operationally responsive satellite payloads and busses.

The House bill would authorize an increase of \$25.0 million in PE 65799D8Z for operationally responsive satellite payloads.

The Senate amendment would authorize \$25.0 million in a new program element for operationally responsive satellite payloads.

The conferees believe that smaller, less expensive satellites may provide a means of achieving more rapid and effective deployment of space-based military capabilities than is now possible. The conferees are encouraged by Air Force efforts to develop small, low-cost space launch vehicles as an essential step for enabling the launch of such satellites, but are concerned that the effort to develop viable payloads for these rockets is not adequately funded. The conferees note that the Office of Transformation is working with the Air Force Research Laboratory to develop lightweight, experimental tactical satellites (TACSATs), but that this effort lacks dedicated funding. The conferees also believe that the development of standards, protocols, and interfaces for common satellite bus components will be key to producing affordable small satellites. The conferees agree to authorize \$39.6 million in PE 65799D8Z, an increase of \$20.0 million, for further development of TACSATs and common small satellite bus components. The conferees expect, consistent with section 913 of this Act, that future funding requests for operationally responsive payloads will be forwarded in a separate and dedicated program element.

TEST AND EVALUATION

Operational Test and Evaluation, Defense Overview

The budget request for fiscal year 2005 included an authorization of \$305.1 million in Operational Test and Evaluation, Defense for the Department of Defense.

The House bill would authorize \$305.1 million.

The Senate amendment would authorize \$309.1 million.

The conferees recommend an authorization of \$304.1 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

ITEMS OF SPECIAL INTEREST

Department of Defense—National Aeronautics and Space Administration coordination

The conferees note that in the areas of aeronautics and space research technology development, the Department of Defense and the National Aeronautics and Space Administration (NASA) must coordinate closely in order to ensure that the nation continues its global leadership in these technologies.

The conferees believe that as NASA evaluates its future plans for aeronautics, it is essential that the Department and NASA provide for the continued availability of unique wind tunnels and other research, test, and evaluation facilities and services critical to the development of military systems. The conferees direct the Under Secretary of Defense for Acquisition, Technology and Logistics to identify and analyze aeronautics facilities currently managed by NASA that are considered by the Department to be critical to the accomplishment of defense missions and to the maintenance of U.S. leadership in aeronautics.

The conferees also endorse the Secretary of Defense's emphasis on transformational technologies. One of the more promising technologies under development is hypersonic propulsion, which when further developed will provide significantly improved operational capabilities for both manned and unmanned flight, missile defense and a single-stage-to-flight capability that could provide rapid access to space. Unfortunately, due to changing priorities within both the Air Force and NASA, funding for such efforts has been reduced to insignificant levels.

The conferees direct the Secretary of Defense to submit a report to the congressional defense committees by March 15, 2005, which details the Department's plans to provide the required funding to pursue a development program for transition of hypersonic technologies to an integrated demonstration system that validates their affordability and effectiveness to support prompt global strike and assured space access missions. The report should analyze the results and technological advances enabled by the X-43 series of programs and other efforts to develop a detailed technology roadmap and investment strategy consistent with meeting future military needs in hypersonics. The conferees believe the capabilities to be realized through a successful hypersonic development program justify the sustained and full support of the Department and NASA.

Enterprise Resource Planning for Army Combat Logistics

The Army logistics systems arm, fuel, repair, move, and sustain combat forces. The Army's goals for modernization of its legacy logistics systems include improved sustainment of combat forces using fewer soldiers, increased readiness and operational availability, and significantly lowering cost. The Army plans to modernize its logistics systems using enterprise resource planning systems, which will provide essential information for timely decision making and accurate performance measurement. They use no custom software code and only commercial, off-the-shelf computer technology. They are also web-based with a robust telecommuni-

cations infrastructure and have been tested at thousands of sites outside the Army.

The conferees encourage the Army to leverage existing Army information technology assets and expertise to augment funds within the Global Combat Support System account to complete the blueprinting and accelerate fielding of the system, wherever feasible, to replace 20-year-old systems which are unable to fully support combat operations.

Patriot air and missile defense system

The conferees note that the Patriot air and missile defense system destroyed all nine theater ballistic missiles launched at coalition forces during Operation Iraqi Freedom (OIF) for which intercept was attempted. The conferees also note, however, that the Patriot was also involved in three "friendly fire" incidents during that conflict and that electromagnetic interference (EMI) between Patriot and other systems contributed to these incidents. Similar interference problems with the Patriot occurred during the Gulf War in 1991.

The conferees strongly support the Patriot system, note with approval that the Army has reprogrammed funding to fix the known "friendly-fire" problems associated with the Patriot, and are encouraged at the level of attention given to this problem since the OIF incidents. The conferees expect, however, that as more radars, communications systems, and other emitting systems are added to the battlefield in the future, EMI problems will continue to grow in complexity.

The conferees direct the Secretary of Defense to submit a report to the congressional defense committees by March 1, 2005 summarizing the tests, exercises, and changes to operational procedures and requirements that are planned or being implemented to prevent or reduce future EMI problems with the Patriot system. The conferees also direct the Director of Operational Test and Evaluation to include an assessment of the Department's plans to reduce EMI problems with the Patriot system in his Annual Report to Congress, required by section 139 of title 10, United States Code.

Russian-American missile defense cooperation

The conferees understand that the Secretary of Defense desires to explore opportunities for missile defense cooperative programs with the Russian Federation that build upon the experience gained in the Russian-American Observation Satellite (RAMOS) program that was terminated earlier this year. The conferees recognize the potential importance of such cooperative efforts, both to the technical success of the U.S. missile defense effort and to the establishment of a cooperative strategic relationship with the Russian Federation.

The conferees urge the Secretary to engage in serious negotiations with the Russian Federation as soon as possible on joint missile defense programs. The conferees believe that previous efforts under the RAMOS program, including Russian Presidential and Government decrees and the U.S.-Russian Federation technical agreement, should be leveraged to help ensure the successful initiation of such efforts.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Authorization of Appropriations

Authorization of appropriations (sec. 201)

The House bill contained a provision (sec. 201) that would authorize the recommended fiscal year 2005 funding levels for the Research, Development, Test and Evaluation accounts for the Army, Navy, Marine Corps, Air Force, Defense-wide activities and the Director of Operational Test and Evaluation.

The Senate amendment contained a similar provision (sec. 201).

The conference agreement includes this provision.

Amount for defense science and technology (sec. 202)

The budget request included \$10,550.3 million for Department of Defense science and technology (S&T) programs.

The House bill would authorize \$11,067.7 million for defense S&T programs.

The Senate amendment would authorize \$11,012.4 million for defense S&T programs.

The conferees agree to authorize \$11,191.6 million for S&T programs, an increase of \$641.3 million over the request. The increase provided by the conferees brings the Department closer to 3 percent of total spending, the goal stated by the Department and outside experts as the desired investment for these programs. In recognition of the key role played by S&T in maintaining the best equipped, best protected fighting force in the world, the conferees have targeted increases to project areas which improve current capabilities, while focusing on basic research and long-term projects that ensure future innovation.

The conferees note that current operations in Iraq, Afghanistan, and elsewhere continue to demonstrate how technologies transitioned from the Department's S&T programs are enhancing the combat effectiveness of warfighters, reducing casualties, and improving the efficiency and flexibility of our military forces. The conferees commend the Department for mobilizing its technical capabilities in the science and technology community to support these current global operations.

The conferees expect to see an increased commitment by the Department to robustly fund S&T in the fiscal year 2006 budget, along with an appropriate balance within the accounts that acknowledges the importance of long-term research in an era of immediate and pressing needs.

Conferees also urge continued attention to a key component of ensuring the U.S. military's technological edge—development, recruitment and retention of skilled scientists and engineers.

Subtitle B—Program Requirements, Restrictions, and Limitations

Future Combat Systems program strategy (sec. 211)

The House bill contained a provision (sec. 211) that would direct the Secretary of the Army to establish and implement a program strategy for the Future Combat Systems (FCS) acquisition

program. The provision limits authorization of appropriations for FCS in fiscal year 2005 to \$2.2 billion until the Secretary of the Army certifies that elements of the program strategy includes certain technical and performance criteria before production facilitization and long lead items are placed on contract. The provision also requires the Under Secretary of Defense for Acquisition, Technology and Logistics (USD(AT&L)) to submit to the Congress: (1) an independent program cost estimate; (2) a report, prepared by an independent panel, on the maturity levels of critical technologies; (3) a report on the status of the network and command, control, communications, computers, intelligence, surveillance, and reconnaissance components; and (4) key performance parameters, prior to the Milestone B update required by the FCS acquisition decision memorandum.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that limits the authorization of appropriations for FCS in fiscal year 2005 to \$2.2 billion until the Secretary of the Army certifies that elements of the program strategy includes certain technical and performance criteria before production facilitization and long lead items are placed on contract. The amendment requires the USD(AT&L) to submit to Congress: (1) a program cost estimate; (2) a report, prepared by an independent panel, on the maturity levels of critical technologies; (3) a report on the status of the network and command, control, communications, computers, intelligence, surveillance, and reconnaissance components; and (4) key performance parameters, prior to the Milestone B update required by the FCS acquisition decision memorandum. The amendment also requires the USD (AT&L) submit to Congress an independent cost estimate of the FCS program not later than March 1, 2005.

The conferees continue to support FCS and believe that the Army has made a sound decision to restructure the FCS program. With this restructure, the Army will reduce FCS program risk while providing increased capabilities for the current force.

Collaborative program for research and development of vacuum electronics technologies (sec. 212)

The House bill contained a provision (sec. 212) that would require the Secretary of Defense to establish a program for research and development in advanced vacuum electronics technology to meet Department of Defense requirements.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Director, Defense Research and Engineering to submit a report on establishment of a collaborative vacuum electronics research and development program that: identifies a department lead to carry out the effort; assesses the role of investing in vacuum electronics technologies as part of the overall strategy of the Department's investments to meet electronic technology needs; provides a management plan and schedule for the program; identifies required funding and a list of program capability goals and objectives; outlines the role of basic and applied research in support of the program; and assesses global capabilities in the technology area.

The conferees note that vacuum electronics are utilized in a variety of the Department's systems, particularly many legacy systems. While there is a trend toward solid state electronics in most defense systems, the Department must ensure that systems which depend on the use of vacuum electronics will have access to the most advanced technologies available.

Annual Comptroller General report on Joint Strike Fighter program (sec. 213)

The House bill contained a provision (sec. 213) that would require the Comptroller General to conduct an annual review of the Joint Strike Fighter (JSF) aircraft program, and submit a report of that review to Congress by March 15 of each year from fiscal year 2005 through fiscal year 2009.

Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the annual report to be submitted to the congressional defense committees.

The conferees are aware of the recently conducted study by a senior independent review team on the JSF program, and believe that the first report submitted by March 15, 2005 should place emphasis on the degree to which the program office and contractor have incorporated the recommendations of that team.

Amounts for U.S. Joint Forces Command to be derived only from Defense-wide accounts (sec. 214)

The House bill contained a provision (sec. 214) that would transfer funding for the joint warfare experimentation programs of U.S. Joint Forces Command (JFCOM) from Research, Development, Test and Evaluation (RDT&E), Navy accounts to an RDT&E, Defense-wide account.

The Senate amendment contained a similar provision (sec. 216).

The Senate recedes with an amendment that would require, beginning in fiscal year 2007, all RDT&E funds for JFCOM be derived from Defense-wide RDT&E funds, and that this be clearly reflected in the budget request.

The conferees note that this provision does not take effect until fiscal year 2007. The conferees direct, however, that the amounts requested for JFCOM joint warfare experimentation programs be separately identified in the fiscal year 2006 budget request, and distinguished within any executive agent account in which they are included. The conferees also note that JFCOM is responsible for a number of critical efforts directly related to increasing the joint warfighting capability of the military services, and that funding those efforts through executive agents does not provide Congress with clear visibility into the amounts dedicated to those key joint initiatives. The practice of requesting funding through executive agents also distorts the amount of funding for military service activities that carry funding for joint initiatives. The conferees have strong interest not only in joint experimentation, which is addressed by this provision, but in JFCOM joint training initiatives as well. Therefore the conferees direct the Department of Defense, when submitting its fiscal year 2006 budget request, to clearly

identify funding for joint training activities in Defense-wide and executive agent accounts to enhance congressional visibility into funding dedicated to joint training in future budgets.

The conferees further note the unique, important role that JFCOM plays in developing doctrine and capabilities for other combatant commanders, and in developing and monitoring joint training standards for elements of the Armed Forces and coalition partners. The conferees believe that the Department should consider the establishment of a major force program or similar consolidation of related budget activities for joint experimentation, procurement, and training activities.

Global Positioning System III satellite (sec. 215)

The Senate amendment contained a provision (sec. 212) that would prohibit the obligation or expenditure of any more than 80 percent of the funds authorized to be appropriated for the Global Positioning System III (GPS) until the Secretary of Defense completes an analysis of alternatives and submits a report on that analysis to the congressional defense committees.

The House bill contained no similar provision.

The House recesses.

The conferees expect the analysis of alternatives to include an assessment of architectures that take advantage of smaller, lighter weight, and potentially less expensive GPS satellites.

Initiation of concept demonstration of Global Hawk high altitude endurance unmanned aerial vehicle (sec. 216)

The Senate amendment contained a provision (sec. 213) that would amend section 221(c) of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (Public Law 106-398) by changing the date by which the Secretary of Defense is to initiate the demonstration of the Global Hawk high altitude endurance unmanned aerial vehicle from March 1, 2001 to March 1, 2005.

The House bill contained no similar provision.

The House recesses.

Joint unmanned combat air systems program (sec. 217)

The Senate amendment contained a provision (sec. 214) that would require the Secretary of Defense to establish an executive committee, which would provide guidance and recommendations for the management of the joint unmanned combat air systems program to the Director of the Defense Advanced Research Projects Agency (DARPA) for as long as the program is managed by DARPA.

The House bill contained no similar provision.

The House recesses.

Subtitle C—Missile Defense Programs

Fielding of ballistic missile defense capabilities (sec. 231)

The House bill contained a provision (sec. 221) that would authorize the Department of Defense to use Research, Development, Test and Evaluation funds appropriated in fiscal years 2005 and

2006 for the Missile Defense Agency to develop and field ballistic missile defense capabilities.

The Senate amendment contained a similar provision (sec. 231) that would authorize the use of Research, Development, Test and Evaluation funds appropriated in fiscal year 2005 for the development and fielding of an initial set of missile defense capabilities.

The Senate recesses.

Integration of Patriot Advanced Capability-3 and Medium Extended Air Defense System into ballistic missile defense system (sec. 232)

The Senate amendment contained a provision (sec. 232) that would require the Secretary of the Army to obtain approval of the Director of the Missile Defense Agency (MDA) prior to making changes to system level specifications or establishing new system level specifications for the combined Patriot Advanced Capability-3 (PAC-3) and Medium Extended Air Defense System (MEADS) program. It would also require such approval prior to making any significant change in procurement quantities or the baseline schedule for the PAC-3/MEADS combined program.

The House bill contained no similar provision.

The House recesses with an amendment that would define the PAC-3/MEADS air and missile defense program as part of the integrated ballistic missile defense system (BMDS), and require that the Director of MDA, in consultation with the Secretary of the Army (acting through the Assistant Secretary of the Army for Acquisition, Logistics and Technology), ensure that any configuration change to the PAC-3/MEADS program is subject to MDA's configuration control processes. The amendment would also require that the Secretary of the Army (acting through the Assistant Secretary of the Army for Acquisition, Logistics and Technology) make significant changes to the baseline technical specifications and schedule for the PAC-3/MEADS program only with the concurrence of the Director of the Missile Defense Agency. The amendment would further require the Secretary of Defense to establish procedures to determine the effect of significant changes proposed by the Secretary of the Army to planned PAC-3/MEADS procurement quantities on BMDS capabilities; to provide for reviews of the proposed procurement changes by all relevant Department of Defense commands and agencies; to obtain the concurrence or nonconcurrence of those commands and agencies with the proposed procurement changes; and to submit a report to the congressional defense committees on the procedures the Secretary of Defense establishes.

Comptroller General assessments of ballistic missile defense programs (sec. 233)

The Senate amendment contained a provision (sec. 233) that would require assessments by the Comptroller General of the extent to which missile defense programs met their cost, schedule, test, and performance goals for the years 2004 through 2009. The provision also requires the Comptroller General to submit reports on those assessments to the congressional defense committees.

The House bill contained no similar provision.

The House recedes with an amendment that would require assessments by the Comptroller General of the extent to which missile defense programs met their cost, schedule, test, and performance goals for the years 2004 through 2006.

Baselines and operational test and evaluation for ballistic missile defense system (sec. 234)

The Senate amendment contained a provision (sec. 234) that would require: (1) the Secretary of Defense, in consultation with the Director of Operational Test and Evaluation (DOT&E), to prepare appropriate criteria for operationally realistic testing of the ballistic missile defense system (BMDS); (2) the conduct of a test consistent with those criteria not later than October 1, 2005; (3) the conduct of tests consistent with those criteria for each block configuration of the BMDS; (4) evaluation of those tests by the DOT&E; (5) the establishment of baselines for each block configuration of the BMDS; and (6) the Director of the Missile Defense Agency to report variances in program performance from those baselines to Congress and the reasons for any changes made to the baselines.

The House bill contained no similar provision.
The House recedes.

Subtitle D—Other Matters

Annual report on submarine technology insertion (sec. 241)

The Senate amendment contained a provision (sec. 241) that would require the Secretary of Defense to submit an annual report on available or potentially available technologies for insertion into submarines for each of fiscal years 2006, 2007, 2008, and 2009.

The House bill contained no similar provision.
The House recedes.

Sense of the Congress regarding funding of the Advanced Shipbuilding Enterprise under the National Shipbuilding Research Program of the Navy (sec. 242)

The Senate amendment contained a provision (sec. 242) that would express the sense of the Senate in support of continued funding for the Advanced Shipbuilding Enterprise under the National Shipbuilding Research Program of the Navy, citing it as a method for exploring and collaborating on innovation in shipbuilding and ship repair that collectively benefits all components of the industry.

The House bill contained no similar provision.

The House recedes with an amendment that would change the provision to a sense of the Congress.

LEGISLATIVE PROVISIONS NOT ADOPTED

Program increases

The House bill contained a provision (sec. 203) that would authorize an increase of \$5.0 million in PE 25633N for Research, Development, Test and Evaluation, Navy, for nano composite hard-coat for aircraft canopies, and an increase of \$5.0 million in PE

27443F for Research, Development, Test and Evaluation, Air Force, for command and control service-level management.

The Senate amendment contained no similar provision.

The House recesses.

The conferees agree to authorize an increase of \$2.3 million in PE 25633N for nano composite hard-coat for aircraft canopies, and an increase of \$3.8 million in PE 27443F for command and control service-level management. DD(X)-class destroyer program.

The Senate amendment contained a provision (sec. 211) that would authorize the Secretary of the Navy to fund the second destroyer of the DD(X)-class with Research, Development, Test and Evaluation, Navy funds, and would direct that \$99.4 million be authorized for detail design of the second ship.

The House bill contained no similar provision.

The Senate recesses.

The conferees agree to authorize a total of \$1,471.5 million in PE 64300N for the DD(X) destroyer, including \$84.4 million to begin detail design of the second ship of the class.

The conferees have strongly supported both the DD(X) program and the Navy's acquisition strategy, which uses the construction and test of engineering development models (EDMs) to mitigate technical risk.

The conferees are aware of the assessment by the Government Accountability Office (GAO) of the maturity of 12 technologies critical to DD(X), as the program entered the system development and demonstration (SDD) phase, and the GAO's further assessment that DD(X) technology maturity and design stability will not be demonstrated before the Milestone B decision scheduled for March 2005. Many of the tests to demonstrate technical maturity will occur around the time of the critical design review (CDR) late in fiscal year 2005. Program officials acknowledge the risks associated with the advanced technologies, but the conferees believe that taking such risks is warranted to ensure that the DD(X) technologies are not obsolete, and that the Navy has taken adequate steps to mitigate the risks before ship construction begins. These steps include the identification of fall back options if new technologies are not available.

In particular, the conferees note the concerns expressed in the House report (H. Rept. 108-491) regarding the schedule for land-based testing of the integrated power system and advanced gun system EDMs. These two system EDMs are not scheduled to complete land-based testing until late in fiscal year 2005, coincident with the DD(X) CDR.

The conferees agree that the integrated power system and advanced gun system are key elements which drive much of the DD(X) design, and that land-based testing of these systems should be essentially complete prior to the DD(X) CDR. The conferees direct the Secretary of the Navy, in coordination with the Under Secretary of Defense for Acquisition, Technology and Logistics, to report to the congressional defense committees following completion of the DD(X) CDR. That report should include the results of the CDR and an assessment of the readiness of the program to proceed beyond the SDD phase of the program.

The conferees share the concerns raised in the Senate Report (S. Rept. 108–260) regarding maintaining the viability of a competitive industrial base for the design and construction of Navy surface combatants. As noted in that report, the Navy had originally planned to compete the construction phase of the DD(X), but made a decision to award that contract on a sole-source basis to the shipyard with lead design responsibility. The conferees expect the Navy to take all actions necessary to ensure the viability of the second shipyard in order to maintain a healthy and competitive industrial base for surface combatants.

Joint Strike Fighter aircraft program

The Senate amendment contained a provision (sec. 215) that would require the Secretary of Defense to have the Defense Science Board (DSB) conduct a study of the Joint Strike Fighter (JSF) aircraft program, which would be delivered to the congressional defense committees with the budget request for fiscal year 2006. This study would focus primarily on the issue of excess weight in the aircraft, the potential performance penalties that would be incurred, and the technical approaches to solve these issues.

The House bill amendment contained no similar provision.

The Senate recedes.

The conferees have been made aware of the results of a recently completed study by a senior-level independent review team which reviewed almost identical areas of the JSF program, and believe another study by the DSB would be redundant at this time.

Space based radar

The House bill contained a provision (sec. 215) that would prohibit the Department of Defense from proceeding to Milestone B in the Space Based Radar program until 30 days after meeting a requirement to provide the congressional defense committees and intelligence committees a report that includes independent cost and technology maturity and readiness assessments and the system design concept for the program.

The Senate amendment contained no similar provision.

The House recedes.

Mark-54 torpedo product improvement program

The House bill contained a provision (sec. 216) that would make available \$2.0 million of the funds in PE 64610N for Research, Development, Test, and Evaluation, Navy for the Mark-54 torpedo product improvement program.

The Senate amendment contained no similar provision.

The House recedes.

The conferees agree to authorize an increase of \$1.5 million in PE 64610N for the Mark-54 torpedo product improvement program.

Infrastructure system security engineering development for the Navy

The Senate amendment contained a provision (sec. 217) that would authorize an increase of \$3.0 million in PE 26313M for Research, Development, Test and Evaluation, Navy, for infrastructure system security engineering development.

The Senate recesses.

The conferees agree to authorize an increase of \$1.0 million in PE 62384BP for neurotoxin mitigation research.

Spiral development of Joint Threat Warning System maritime variants

The Senate amendment contained a provision (sec. 219) that would authorize an increase of \$2.0 million in PE 116405BB for the development of maritime variants for the Joint Threat Warning System (JTWS), to be offset by a decrease of \$2.0 million of the amount authorized to be appropriated for military personnel (sec. 421), with the amount of the reduction to be derived from excess amounts provided for military personnel of the Air Force.

The House bill contained no similar provision.

The Senate recesses.

The conferees agree to authorize an increase of \$2.0 million in PE116405BB for spiral development of maritime variants for JTWS.

Advanced ferrite antenna

The Senate amendment contained a provision (sec. 220) that would authorize an increase of \$3.0 million in PE 26313M for Research, Development, Test, and Evaluation, Navy, for advanced ferrite antenna development.

The House bill contained no similar provision.

The Senate recesses.

The conferees agree to authorize an increase of \$3.3 million in PE 64503N for the design, development, and testing of a prototype littoral array system for operating submarines.

Advanced manufacturing technologies and radiation casualty research

The Senate amendment contained a provision (sec. 222) that would authorize an increase of \$2.0 million in PE 78011S for advanced manufacturing technologies and \$3.0 million in PE 63002D8Z for radiation casualty research.

The House bill contained no similar provision.

The Senate recesses.

The conferees agree to authorize an increase of \$4.5 million in PE 78011S for advanced manufacturing technologies.

Research and development for improved prevention of leishmaniasis

The Senate amendment contained a provision (sec. 328) that would authorize an increase of \$0.5 million in the Defense Health Program and \$4.5 million in PE 64807A for research and development for improved prevention of leishmaniasis.

TITLE III—OPERATION AND MAINTENANCE

Operation and Maintenance Overview

The budget request included an authorization of \$121,874.6 million in Operation and Maintenance, \$20,109.6 million in Other Programs, and \$2,955.1 million in Working Capital Fund accounts for the Department for Defense.

The House bill would authorize \$119,758.9 million in Operation and Maintenance, \$20,229.8 million in Other Programs, and \$2,767.1 million in Working Capital Fund accounts.

The Senate amendment would authorize \$120,522.3 million in Operation and Maintenance, \$20,529.0 million in Other Programs, and \$2,894.9 million in Working Capital Fund accounts.

The conferees recommend an authorization of \$121,520.2 million in Operation and Maintenance, \$20,086.9 million in Other Programs, and \$2,896.1 million in Working Capital Fund accounts. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

ITEMS OF SPECIAL INTEREST

Navy Marine Corps Intranet

The conferees note that the Navy Marine Corps Intranet (NMCI) program is working to transfer legacy applications and networks into the NMCI environment. The conferees note that the scope of this process is large and the original goals relating to termination or migration of legacy applications have not been achieved. The conferees understand that there may be valid operational reasons for not migrating some legacy applications into the NMCI environment. The Secretary of the Navy should accelerate the migration or termination of legacy applications and networks, and the conferees direct the Secretary to report to the Congress on the progress in this area, as well as on a plan for the future funding of any legacy systems support by September 30, 2005. The conferees take no position on matters of NMCI contract administration and direct the Secretary to resolve any matters in contractual arrangements relating to legacy application termination, transition, and support in a manner consistent with established procedures and acquisition policies.

Transforming the Department of the Army's logistics maintenance information

The conferees support the Department of the Army's recent decision to allocate funds to reduce the cost, while increasing the speed of transforming its logistics maintenance information into modern and usable formats. The conferees urge the Army to continue these efforts as a means to improve maintenance support tools available to soldiers.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Authorization of Appropriations

Authorization of appropriations (secs. 301–303)

The House bill contained provisions (sec. 301–303) that would authorize fiscal year 2005 funding levels for all operation and maintenance accounts, working capital funds, and other Department of Defense programs, including the Defense Inspector General, the Chemical Demilitarization Program, Drug Interdiction and Counter-Drug Activities, and the Defense Health Program.

The Senate amendment contained similar provisions (secs. 301–303).

The conference agreement includes these provisions.

Chemical Agents and Munitions Destruction, Defense (sec. 303b)

The budget request included \$1,372.0 million in Chemical Agents and Munitions Destruction, Army for the Department of Defense.

The House bill contained a provision (sec. 303(b)) that would provide a total of \$1,372.0 million in Chemical Agents and Munitions Destruction, Defense (CAMD,D) for the Department of Defense.

The Senate amendment contained a provision (sec. 303(b)) that would provide a total of \$1,519.0 million for CAMD,D, including an increase of \$147.0 million to restore the funding for the chemical demilitarization research and development program at the Pueblo Chemical Agent Disposal Facility, Pueblo, Colorado, to the original estimates developed by the Department's Cost Analysis Improvement Group, which were provided in the Future Years Defense Program submitted with the fiscal year 2004 budget request.

The House recedes with an amendment that would authorize \$1,372.0 million for CAMD,D, as follows: \$1,088.8 million for Operation and Maintenance; \$204.2 million for Research and Development, (an increase of \$50.0 million to the budget request to be used for the chemical demilitarization research and development program at Pueblo); and \$79.0 million for Procurement.

Elsewhere in this report the conferees recommend an authorization of \$81.9 million for military construction for the Chemical Agents and Munitions Destruction program.

The conferees note the reduction in the fiscal year 2005 budget request from the fiscal year budget estimate for the chemical demilitarization program, particularly for the Pueblo facility, and concerns raised in the Senate report accompanying S. 2400 (S. Rept. 108-260) regarding the need to provide sufficient funding in the program for the United States to meet its obligations under the Chemical Weapons Convention. The conferees also note the views expressed in the House report accompanying H.R. 4200 (H. Rept. 108-491) that the United States proceed as rapidly as possible in destroying the stockpile of bulk VX nerve agent stored at Newport Chemical Depot, Indiana, in order to ensure maximum safety and to meet international treaty commitments, while proceeding objectively and deliberately in ensuring that the disposal of the hydrolysate hazardous waste, which results from neutralization of the VX agent, in a commercial hazardous water treatment facility does not compromise the public health and safety of the citizens or the environment near such a facility.

Elsewhere in this report the conferees have recommended a provision that would require the Under Secretary of Defense for Acquisition, Technology and Logistics and the Secretary of the Army to jointly prepare and annually update a strategic report for future activities and funding of the chemical demilitarization program.

Section 1421 of the Department of Defense Authorization Act, 1986 (section 1521 of title 50, United States Code, Public Law 99-145) requires that funds for the chemical demilitarization program, including those for military construction, shall be set forth in the budget of the Department for any fiscal year as a separate account and shall not be included in the budget accounts for any military department. Section 141 of the National Defense Authorization Act for fiscal year 2003 (Public Law 107-314) requires that the Under Secretary of Defense (Comptroller) annually certify to the congressional defense committees that the budget request for the chemical agents and munition destruction program has been submitted in accordance with the requirements of section 1421. The Department submitted the fiscal year 2005 budget request for chemical demilitarization in an Army account, contrary to the law. The conferees

expect the Department to comply with the law in future budget requests by submitting the budget request for chemical agents and munitions destruction in a Department of Defense account.

Subtitle B—Environmental Provisions

Satisfaction of Superfund audit requirements by the Inspector General of the Department of Defense (sec. 311)

The Senate amendment contained a provision (sec. 323) that would allow the Inspector General of the Department of Defense the discretion to audit Superfund financial transactions on a periodic basis.

The House bill contained no similar provision.

The House recedes with a technical amendment.

The conferees expect that a periodic review would result in an audit at least every three years.

Reimbursement of Environmental Protection Agency for certain costs in connection with Moses Lake Wellfield Superfund Site, Moses Lake, Washington (sec. 312)

The Senate amendment contained a provision (sec. 322) that would provide discretionary authority to the Secretary of Defense to transfer not more than \$524,927 to the Moses Lake Wellfield Superfund Site (Moses Lake), 10–6J Special Account, formerly the home of Larson Air Force Base. This payment would be for reimbursement to the Environmental Protection Agency for costs and interest incurred to perform a remedial investigation and feasibility study at Moses Lake, where the groundwater is apparently contaminated with trichloroethylene.

The House bill contained no similar provision.

The House recedes.

Increase in authorized amount of environmental remediation, Front Royal, Virginia (sec. 313)

The Senate amendment contained a provision (sec. 325) that would amend section 591(a)(2) of the Water Resources Development Act of 1999 (Public Law 106–53) by increasing the authorized level by \$10.0 million for environmental remediation in Front Royal, Virginia.

The House bill contained no similar provision.

The House recedes.

Small Boat Harbor, Unalaska, Alaska (sec. 314)

The conferees agree to include a provision that requires the Secretary of the Army to carry out the small boat harbor project in Unalaska, Alaska. The conferees note that the total estimated cost is \$23.2 million, with an estimated federal cost of \$11.5 million and an estimated non-federal cost of \$11.7 million. The project shall be carried out in accordance with the plans and subject to the conditions recommended in a final report of the Chief of Engineers, if a favorable final report of the Chief for the project is completed not later than December 31, 2004.

Report regarding encroachment issues affecting Utah Test and Training Range, Utah (sec. 315)

The House bill included a provision (sec. 311) that would require the Secretary of the Air Force to submit a report to the Committees on Armed Services of the Senate and the House of Representatives that outlines current and anticipated encroachments on the use of the special use airspace of the Utah Test and Training Range (UTTR). The Senate amendment included a similar provision (sec. 329). The Senate amendment also confirmed a prohibition on ground military operations in the covered wilderness study area within UTTR. The Senate amendment further clarified that nothing in the provision would prevent required maintenance of existing communications, instrumentation, or electronic tracking systems necessary for effective testing and training to meet military requirements in UTTR.

The House recedes with a technical amendment.

Comptroller General Study and report on Alternative Technologies to decontaminate groundwater at Department of Defense installations (sec. 316)

The Senate amendment contained a provision (sec. 326) which would require the Comptroller General of the United States to conduct a study to determine whether or not cost-effective technologies are available to the Department of Defense for the cleanup of groundwater contamination at Department installations in lieu of traditional methods.

The House bill contained no similar provision.

The House recedes with an amendment clarifying the scope of the study.

Comptroller General study and report on drinking water contamination and related health effects at Camp Lejeune, North Carolina (sec. 317)

The Senate amendment contained a provision (sec. 324) that would require the Comptroller General of the U.S. to conduct a study of the history of drinking water contamination at the United States Marine Corps (USMC) base at Camp Lejeune, North Carolina.

The House bill contained no similar provision.

The House recedes with an amendment clarifying the scope of the study.

Sense of Congress regarding perchlorate contamination of ground and surface water from Department of Defense activities (sec. 318)

The Senate amendment contained a provision (sec. 327) that would express the sense of the Senate that the Department of Defense should develop a national plan to remediate perchlorate contamination specifically to: (1) ensure the Department is prepared to respond quickly and appropriately once a drinking water standard is established; (2) continue remediation at those sites where perchlorate contamination poses an imminent and substantial endangerment to public health; (3) develop a plan to remediate perchlorate contamination in cases in which such contamination from

the Department's activities is present in ground or surface water at levels the Department determines pose a hazard to human health; and (4) continue the process of evaluating and prioritizing sites without waiting for the development of a federal standard.

The House bill contained no similar provision.

The House recesses with an amendment clarifying the scope of the sense of the Congress.

Subtitle C—Workplace and Depot Issues

Simplification of annual reporting requirements concerning funds expended for depot maintenance and repair workloads (sec. 321)

The House bill contained a provision (sec. 321) that would amend section 2466(d) of title 10, United States Code, to require the Secretary of Defense to submit to Congress a report on the percentage of funds expended or expected to be expended for depot maintenance and repair workloads in the public and private sectors.

The Senate amendment contained a similar provision (section 331) that would simplify and improve the two separate annual reports required by section 2466(d) of title 10, United States Code, that the Department of Defense prepares relating to the percentage of funds expended or projected to be expended for depot maintenance and repair workloads in the public and private sectors.

The House recesses with a technical amendment.

Repeal of annual reporting requirement concerning management of depot employees (sec. 322)

The House bill contained a provision (sec. 322) that would repeal section 2472(b) of title 10, United States Code, which currently requires the Secretary of Defense to report annually to the Committees on Armed Services of the Senate and the House of Representatives the number of Department of Defense employees employed and expected to be employed during that fiscal year to perform depot level maintenance and repair of materiel.

The Senate amendment contained a similar provision (sec. 332).

The Senate recesses.

Extension of special treatment for certain expenditures incurred in the operation of Centers of Industrial and Technical Excellence (sec. 323)

The Senate amendment contained a provision (sec. 333) that would extend for three years section 2474(f) of title 10, United States Code. Section 2474(f) excludes all work performed by non-federal personnel at designated Centers of Industrial and Technical Excellence from the 50 percent limitation on contracting for depot maintenance in section 2466(a) of title 10, United States Code, if the personnel are performing the work pursuant to a public-private partnership.

The House bill contained no similar provision.

The House recesses.

Temporary authority for contractor performance of security-guard functions (sec. 324)

The Senate amendment contained a provision (sec. 362) that would extend for two years the authority granted in section 332 of the Bob Stump National Defense Authorization Act for Fiscal Year 2003 (Public Law 107-314) to hire contract security guards on a temporary basis to fill positions that would otherwise be filled by members of the Armed Forces.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to submit a report on the use of this authority no later than December 1, 2005.

Pilot program for purchase of certain municipal services for Army installation (sec. 325)

The Senate amendment contained a provision (sec. 363) that would authorize a pilot program under which the secretary of a military department could provide for the purchase of local governmental services at a Department of Defense installation from the local government responsible for serving the area.

The House bill contained no similar provision.

The House recedes with an amendment that would limit the pilot program to two Department of Army installations located in the United States.

Bid protests by federal employees in actions under Office of Management and Budget Circular A-76 (sec. 326)

The House bill contained a provision (sec. 325) that would express the sense of Congress that Department of Defense civilian employees (or their representatives) and contractors (or their representatives) should receive comparable treatment regarding legal standing to challenge the way in which a public-private competition has been conducted before the Government Accountability Office (GAO) or in the U.S. Court of Federal Claims.

The Senate amendment contained a provision (sec. 1107) that would provide such legal standing, in GAO bid protests only, to both: (1) the official who submits an agency tender in a public-private competition (the Agency Tender Official (ATO)); and (2) a person representing a majority of the employees of the federal agency who are engaged in the performance of the activity or function that is subject to the competition. The Senate amendment also authorized the ATO or a person representing a majority of the employees to intervene in protests filed in the U.S. Court of Federal Claims.

The House recedes with an amendment providing the ATO legal standing in GAO bid protests of public-private competitions for functions performed by more than 65 full-time federal employees.

Under the conference agreement, the ATO would be required to file a protest at the request of a majority of the employees of the federal agency who are engaged in the performance of the activity or function that is subject to the competition unless the ATO determines that there is no reasonable basis for the protest. A determination by the ATO would not be subject to judicial or administrative appeal, but would be reported to the congressional defense

committees. A person representing a majority of the employees would not have standing to file a protest, but would have the right to intervene in a protest filed by an interested party, including the ATO. The conference agreement would not address protests that are filed in the United States Court of Federal Claims.

Limitations on conversion of work performed by Department of Defense civilian employees to contractor performance (sec. 327)

The House bill contained a provision (sec. 323) that would: (1) codify the prohibition on converting an activity or function to private sector performance unless the conversion would result in savings of at least 10 percent or \$10.0 million; (2) prohibit the Department from breaking up a function to avoid applicable thresholds for conducting a public competition; (3) ensure that a public competitor is not disadvantaged by the offer of a private competitor to reduce costs by reducing health care benefits for its employees; and (4) require the Department to conduct a competition, including an agency tender, a most efficient organization plan, and a formal cost comparison for any function performed by 10 or more civilian employees.

The Senate amendment contained a similar provision (sec. 851).

The Senate recedes with an amendment that would: (1) codify the prohibition on converting an activity or function to private sector performance unless the conversion would result in savings of at least 10 percent or \$10.0 million when conducting a public-private competition under OMB circular A-76 dated May 29, 2003; and (2) prohibit the Department of Defense from breaking up a function to avoid applicable thresholds for conducting a public-private competition under A-76 Circular A-76, May 29, 2003.

The conferees agree to exclude the pilot program for best-value source selection authorized by section 336 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 103-136) from the requirement to apply a price differential of 10 percent or \$10.0 million. The conferees expect the Secretary of Defense to utilize the price differential in the cost or price component of an evaluation under the pilot program, but understand that cost or price alone is not determinative in a best value competition.

The conferees note that the Department of Defense Appropriations Act for Fiscal Year 2005 (Public Law 108-257) includes a provision that would require the Department to ensure, in fiscal year 2005, that a public competitor is not disadvantaged by the offer of a private competitor to reduce costs by reducing health care benefits for its employees and that the Department must conduct a competition, including an agency tender, a most efficient organization plan, and a formal cost comparison for any function performed by 10 or more civilian employees.

The conferees direct the Comptroller General to review the implementation and impact of the Appropriations provision with regard to health care costs and competition of small agency functions. The Comptroller General's review should also address the full range of benefits provided by public and private sector employers, the manner in which these benefits are considered in a public-private competition, the impact of any benefit changes on employees

who transition to private sector employment as a result of a public-private competition, and steps that could be taken to ameliorate any adverse impact of such a transition.

The conferees direct the Comptroller General to provide a preliminary report on this review to the congressional defense committees by no later than May 1, 2005, and a final report by no later than three months after the end of fiscal year 2005.

Competitive sourcing reporting requirement (sec. 328)

The House bill contained a provision (sec. 326) that would require the Inspector General of the Department of Defense to submit to Congress a report addressing whether the Department has implemented a comprehensive and reliable system to track and assess the results of public-private competitions. The House provision would establish a number of specific elements to be addressed in the tracking system.

The Senate amendment contained a compatible provision (sec. 853). The Senate provision would not establish the specific reporting elements to be addressed in the tracking system.

The House recesses.

The conferees note that section 354 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (Public Law 106–398) and section 385 of the National Defense Authorization Act for Fiscal Year 1998 (Public Law 105–85) required the Department to maintain a system for tracking the results of public-private competitions and established the specific elements to be addressed in the tracking system.

Subtitle D—Information Technology

Preparation of Department of Defense plan for transition to Internet Protocol version 6 (sec. 331)

The House bill contained a provision (sec. 331) that would require the Secretary of Defense to prepare a transition plan to evaluate how the Department of Defense’s information technology systems may be affected by the Department’s decision to transition from the current protocols to Internet Protocol version 6 (IPv6). The provision would also direct the Secretary to conduct and manage tests of IPv6 and the global information grid to ensure the needs of the warfighter will continue to be met.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would require the Secretary to include cost estimates in the IPv6 transition plan.

The conferees expect that any testing will be performed under the direction and review of the Director of Operational Test and Evaluation, who shall identify the most appropriate facilities and organizations to perform the testing. The conferees direct the Director to provide an update on the ongoing test program and test results no later than September 30, 2005.

Defense business enterprise architecture, system accountability, and conditions for obligation of funds for defense business system modernization (sec. 332)

The House bill contained a provision (sec. 332) that would require the Department of Defense to develop a comprehensive architecture for all business systems of the Department. The provision would also prohibit significant investments in new business systems or upgrades to existing business systems that would be inconsistent with the new architecture.

The Senate amendment contained a similar provision (sec. 1004).

The Senate recedes with an amendment that would: (1) clarify the criteria for approving business system modernization expenditures; (2) provide that a covered expenditure for a business system that has not been approved is a violation of the Anti-Deficiency Act (31 U.S.C., section 1341); (3) provide additional detail on the composition of the enterprise architecture and transition plan; (4) clarify that domain managers have responsibility for the review, approval, and oversight of defense business system acquisition and operation, but not for the execution of such requirements; (5) clarify the budget justification material to be provided by the Secretary of Defense in support of the President's budget; (6) require the Secretary to appoint a Vice Chairman of the Defense Business System Management Committee; (7) clarify the responsibilities of the Committee; and (8) require the Comptroller General to assess the Department's compliance with the requirements of the provision.

Report on maturity and effectiveness of the Global Information Grid Bandwidth Expansion (GIG-BE) (sec. 333)

The Senate amendment contained a provision (sec. 142) that would require the Secretary of Defense to submit a report to the congressional defense committees on a test program to demonstrate the maturity and effectiveness of the Global Information Grid-Bandwidth Expansion (GIG-BE).

The House bill amendment contained no similar provision.

The House recedes with a technical amendment.

Subtitle E—Extensions of Program Authorities

Two-year extension of Department of Defense telecommunications benefit (sec. 341)

The Senate amendment contained a provision (sec. 341) that would extend until September 30, 2006 the Department of Defense telecommunications benefit authorized in section 344 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108-136).

The House bill contained no similar provision.

The House recedes.

The conferees are concerned that the Department has not competitively awarded a contract under this section, relying instead on an existing contract. The conferees expect that the Secretary of Defense will, as soon as possible, award a contract to a commercial firm for the purposes of this provision through competitive procedures.

Extension of Arsenal Support Program Initiative (sec. 342)

The House bill contained a provision (sec. 351) that would amend Section 343 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (Public Law 106–398), to authorize the Secretary of the Army to extend the Arsenal Support Initiative Program through fiscal year 2008. This section would also require the Secretary to report to the Committees on Armed Services of the Senate and the House of Representatives by March 1, 2007, the benefits of the program, the extent to which the program met its goals, and whether the program should be made permanent.

The Senate amendment contained a similar provision (sec. 342) that would extend the Arsenal Support Program Initiative through the end of fiscal year 2006.

The Senate recedes.

Two-year extension of warranty claims recovery pilot program (sec. 343)

The Senate amendment contained a provision (sec. 343) that would extend, through September 30, 2006, the warranty claims recovery pilot program authorized in section 391 of the National Defense Authorization Act for Fiscal Year 1998 (Public Law 105–85).

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to submit a report on the commercial use of warranty recovery services, and to determine whether the pilot should be made permanent or extended beyond 2006.

Subtitle F—Other Matters

Reimbursement for certain protective, safety, or health equipment purchased by or for members of the Armed Forces deployed in contingency operations (sec. 351)

The House bill contained a provision (sec. 304) that would authorize the Secretary of Defense to reimburse service members who purchased protective body armor for use while deployed in connection with Operation Noble Eagle, Operation Enduring Freedom, or Operation Iraqi Freedom, if the service member did not receive the protective body armor before engaging in such operations where such body armor might be necessary. Reimbursement would be available to service members who purchased the body armor between September 1, 2003 and December 31, 2003.

The Senate amendment contained a provision (sec. 1072) that would direct the Secretary to reimburse service members, a relative of the service member, a nonprofit organization, or a community group, who purchased any protective, safety, or health equipment for use by such service member while deployed in connection with Operation Noble Eagle, Operation Enduring Freedom, or Operation Iraqi Freedom, provided that the unit commander of the service member certifies that such equipment was critical to the protection, safety, or health of the service member. The provision also stated that the type of protective, safety, or health equipment would include personal body armor, collective armor or protective equipment (including armor or protective equipment for high mo-

bility multi-purpose wheeled vehicles), and items provided through the Rapid Fielding Initiative of the Army such as the advanced (on-the-move) hydration system, the advanced combat helmet, the close combat optics system, a Global Positioning System (GPS) receiver, and a solder intercommunication device. Non-military equipment would be treated as protective, safety, and health equipment only if such equipment provides protection, safety, or health benefits, as the case may be, such as would be provided by equipment meeting military specifications. Reimbursement would be available for armor or protective equipment purchased for high mobility multi-purpose wheeled vehicles between September 11, 2001 and July 31, 2004, and for any other protective, safety, and health equipment purchased between September 11, 2001 and December 31, 2003 or any date thereafter as determined by the Secretary. The provision would further establish a limit on the amount of reimbursement, and provide authority for the Secretary to assume title or ownership of any protective, safety, or health equipment for which a service member was reimbursed.

The House recedes with an amendment that would direct the Secretary to reimburse service members who purchased, or had another person purchase on their behalf, any protective, safety, or health equipment for use while deployed in connection with Operation Noble Eagle, Operation Enduring Freedom, or Operation Iraqi Freedom, provided that: (1) the Secretary certifies that the equipment was critical to the protection, safety, and health of the service member; (2) the equipment was not issued to the service member before the service member was on duty in an area in which the service member was in imminent danger of being exposed to hostile fire; and (3) the equipment was purchased between September 11, 2001 and July 31, 2004. The amendment would also limit the amount of reimbursement to \$1,100 per item, establish a one-year period for the submission of claims for reimbursement, and direct the Secretary to establish rules not later than 120 days after date of enactment of this Act to expedite reimbursements, to include addressing circumstances under which the United States will assume title or ownership of any protective, safety, or health equipment for which a service member was reimbursed.

The conferees direct the Secretary to consult with the appropriate chain of command to ensure all criteria for reimbursement are attained. The conferees also note that the type of protective, safety, or health equipment for which a reimbursement is made may include personal body armor, collective armor or protective equipment (including armor or protective equipment for high mobility multi-purpose wheeled vehicles), and items provided through the Rapid Fielding Initiative of the Army such as the advanced (on-the-move) hydration system, the advanced combat helmet, the close combat optics system, a Global Positioning System (GPS) receiver, and a solder intercommunication device. Non-military equipment for which a reimbursement could be made should be treated as protective, safety, and health equipment only if such equipment provides protection, safety, or health benefits, as the case may be, such as would be provided by equipment meeting military specifications.

Limitation on preparation or implementation of Mid-Range Financial Improvement Plan pending report (sec. 352)

The House bill contained a provision (sec. 352) that would prohibit the Secretary of Defense from obligating operation and maintenance funds to implement the Mid-Range Financial Improvement Plan until the Secretary provides to the Committees on Armed Services of the Senate and the House of Representatives an explanation of how the operation and maintenance funds are to be utilized in fiscal year 2005 and the estimated cost for this plan in future years.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would also require the Secretary to provide a written determination that the Department has developed an enterprise architecture and transition plan for its business systems that meets the requirements of section 2222 of title 10, United States Code (as added by section 332).

Pilot program to authorize Army working-capital funded facilities to engage in cooperative activities with non-Army entities (sec. 353)

The Senate amendment contained a provision (sec. 364) that would authorize Army industrial activities that operate under the working capital fund to enter into public-private partnerships with non-Army entities, and allow the proceeds to be retained by the entity engaged in the partnership.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize such contracts or cooperative arrangements, but would not direct that the facility involved retain the proceeds.

Transfer of excess Department of Defense personal property to assist firefighting agencies (sec. 354)

The House bill contained a provision (sec. 1079) that would amend section 2576b of title 10, United States Code, to modify the recipients of the Department of Defense excess personal property to assist rural firefighting agencies. The provision would require the Secretary of Defense to enter into an agreement with the Secretary of Agriculture to facilitate the reutilization of the Department's excess personal property by firefighting agencies in rural areas. The agreement between the Secretary of Defense and Secretary of Agriculture would include a prohibition on the transfer of the Department's aircraft until the end of a one-year period beginning on the date that the Secretary of Agriculture submits a report to the House Committee on Agriculture, the Senate Committee on Agriculture, Nutrition and Forestry, and the Committee on Armed Services of the Senate and the House of Representatives on the measures taken by the U.S. Forest Service in response to National Transportation Safety Board Recommendations A-04-29 through A-04-33. The provision would also require that personal property being transferred for reutilization by firefighting agencies in rural areas be afforded a property disposal priority at least equal to the priority given to the military departments and other entities within the United States.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would amend section 2576b of title 10, United States Code, to direct the Secretary of Defense to transfer to a firefighting agency in a State any personal property of the Department that the Secretary determines is excess to the needs of the Department and suitable for use in providing fire and emergency medical services, including personal protective equipment and equipment for communications and monitoring.

The Senate amendment contained no similar provision.
The House recesses.

Public-private competition pilot program

The House bill contained a provision (sec. 324) that would require the Secretary of Defense to establish a pilot program to examine the use of public-private competition process on new requirements and functions currently being performed by contractors that could be performed by civilian employees. Under the pilot program, the Secretary would be required to allow civilian employees to compete through the standard competitive process of Office of Management and Budget Circular A-76 for: (1) approximately one-tenth of the new requirements of the Department of Defense; and (2) functions currently being performed by a number of contractor employ-

ees that is approximately one-tenth of the number of civilian employees subject to public-private competition during the same period.

The Senate amendment contained a provision (sec. 852) that would require the Secretary to prescribe guidelines and procedures for ensuring that fair consideration is given to using federal government employees to perform new work and functions that are currently performed by contractors. The provision would provide that no public-private competition may be required before assigning government employees to perform new work or work that was previously performed by contractors.

The conference report does not include either provision.

The conferees believe that the Department's workforce of civilian employees is an important resource that the Department should fully utilize. The National Security Personnel System gives the Secretary broad authority to hire new civilian employees and to develop new competencies within the Department's civilian workforce. The conferees believe that Department of Defense managers must have flexibility not only to assign work to civilian employees, but also to build and structure the civilian workforce to perform appropriate tasks, free of artificial or unneeded regulatory constraints.

The conferees direct the Secretary to work with the Director of the Office of Management and Budget and other appropriate officials to ensure that the Department has the flexibility that it needs to assign work to its civilian workforce and to build needed capabilities in that workforce.

Establishment of joint program office to improve interoperability of battlefield management command and control systems

The House bill contained a provision (sec 333) that would establish a joint program office to improve interoperability of battlefield management command and control systems.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that the Department of Defense has struggled for many years to develop and field command, control, communications, computers, and intelligence, surveillance, and reconnaissance systems that interoperate effectively across all of the military services and with coalition forces. The conferees note that there are a number of current efforts throughout the Department to develop portions of a "Family of Interoperable Operating Pictures", including the Single Integrated Air Picture, the Single Integrated Ground Picture, the Single Integrated Maritime Picture, the Special Operations Forces Picture, and the Single Integrated Space Picture. The conferees are concerned that without proper management, oversight, and coordination, as well as a single over-arching architecture that controls all systems, these efforts could become redundant and wasteful, and lack the interoperability required to effectively support joint warfighting missions.

Therefore, the conferees direct the Secretary of Defense to provide to the congressional defense committees a report no later than March 15, 2005 that identifies all funds for research and procure-

ment activities related to the development of joint battlefield management command and control systems in the Department.

This report shall also include baselines for the Family of Interoperable Pictures, including a baseline for the Single Integrated Air Picture, the Single Integrated Ground Picture, the Single Integrated Maritime Picture, the Special Operations Forces Picture, and the Single Integrated Space Picture. The baselines shall be consistent with those required for major defense acquisition programs under Department regulations, and shall include a description of the overall systems architecture, specific milestones and performance measures for each developmental block, the schedule for achieving those performance goals, the estimated total and annual costs to meet that schedule, and a description of the management approach being used to achieve program goals.

The House bill contained a provision (sec. 353) that would direct the Secretary of the Navy to consider proposals for the follow-on Department of the Navy contracts to operate five *Champion*-class T-5 tank vessels only from an entity that is a citizen under section 2 of the Shipping Act, 1916 (46 App. U.S.C. 802).

These provisions would also authorize corresponding active-duty Army and Marine Corps end strengths for fiscal years 2006 and 2007 and prescribe corresponding minimum end strengths under section 691(b) of title 10, United States Code.

The Senate amendment contained a provision (sec. 402) that would authorize a temporary increase in the Army's active-duty end strength of up to 30,000 during fiscal years 2005 through 2009. The provision would require that if the Secretary of Defense plans to increase the Army active-duty end strength above the levels authorized for fiscal year 2004, then the budget for the Department for such fiscal years as submitted to Congress shall specify the amounts necessary for funding the active duty end strength of the Army in excess of 482,400.

The House recedes with an amendment that would authorize a temporary increase in the Marine Corps' active-duty end strength of up to 9,000 over 175,000, the level set forth in section 401 of the National Defense Authorization Act for Fiscal Year 2004 during fiscal years 2005 through 2009. The amendment would also require that if the Secretary of Defense plans to increase the Army or Marine Corps active-duty end strength for a fiscal year, then the budget for the Department for such fiscal years as submitted to Congress shall specify the amounts necessary for funding the active duty end strength of the Army or Marine Corps in excess of 482,400 and 175,000 respectively.

Accounting and management of Reserve component personnel performing active duty or full-time National Guard duty for operational support (sec. 416)

The House bill contained a provision (sec. 404) that would establish the requirement for an annual congressional authorization of the maximum number of Reserve component personnel to be on active duty or full-time National Guard duty providing operational support. This provision would eliminate the current 180-day strength accounting metric that requires all reservists on active duty beyond that limit to count against Active component end strengths. In its place, the section would authorize Reserve component members who are voluntarily on active duty for up to three years, or a cumulative three years over a four-year period, to not be counted against Active component end strengths. The section would also exempt Reserve component personnel, authorized by this section, from certain officer and enlisted grade limits.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

Subtitle C—Authorization of Appropriations

Military personnel (sec. 421)

The House bill contained a provision (sec. 421) that would authorize a total of \$104,647.6 million for military personnel for the Department of Defense in fiscal year 2005.

The Senate amendment contained a similar provision (sec. 421) that would authorize a total of \$104,535.5 million for military personnel for the Department of Defense in fiscal year 2005. The Senate amendment also contained \$57.5 million in military personnel reductions in other titles of the amendment that were not reflected in the total contained in section 421. Therefore, the net amount authorized to be appropriated to the Department by the Senate amendment was \$104,478.0 millions.

The House recedes with an amendment that would authorize \$106,543.0 million for military personnel for the Department of Defense in fiscal year 2005, an increase of \$1,731.4 million above the budget request.

The conferees note that in addition to the amounts shown below, \$1,250.0 million was made available in title XV of this act for the additional costs of military personnel associated with ongoing operations in Iraq and Afghanistan. The conferees provide the following itemization of the increases from the budget request related to the military personnel accounts:

[Additions in millions]	
Add AGR strength for WMD—CST teams	\$ 14.7
Imminent Danger Pay	92.5
Family Separation Allowance	135.0
Eliminate SBP—Social Security Offset (Accrual Payment)	439.0
Enhanced Reserve Education Benefit (Accrual Payment)	222.0
Additional military personnel costs	828.2
Total	1,731.4

Armed Forces Retirement Home (sec. 422)

The House bill contained a provision (sec. 422) that would authorize \$61.2 million to be appropriated for the operation of the Armed Forces Retirement Home during fiscal year 2005.

The Senate amendment contained an identical provision (sec. 422).

The conference agreement includes this provision.

TITLE V—MILITARY PERSONNEL POLICY

ITEMS OF SPECIAL INTEREST

Space cadre

The conferees appreciate the submission by the Secretary of Defense of the human capital resources strategy for space personnel, as required in section 547 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–87). The conferees note, however, that the strategy lacks a detailed implementation plan and direct the Secretary to develop such an implementation plan. The conferees further direct the Secretary of Defense to submit this plan and the Secretary of the Air Force to submit the detailed career planning guidance for the Air Force space cadre, consistent with direction in the Senate report accompanying S. 2400 (S. Rept. 108–260).

The conferees believe that a comprehensive view of the military space community must also consider competencies and skills embodied in academia and industry. These institutions have valuable tools, expertise, and a skill base that contribute to the military space community, as well as unique organizational cultures with which the military space cadre must interact. The conferees are concerned that the human capital resources strategy lacks breadth and depth with respect to the relationship of academia and industry to the development, education, and training of the space cadre.

The conferees direct the Secretary of Defense to provide the Committees on Armed Services of the Senate and the House of Representatives an interim report by March 15, 2005, and a full report concurrent with the Department of Defense fiscal year 2007 budget submission that: (1) assess the ability in academia, industry, and government to educate and train a community of space professionals, and (2) recommend corrective actions to address any shortfalls identified in these education and training activities. The reports should also address the definition and development of key competencies and skill levels in the areas of systems engineering, program management, financial management, operations and tactics, and any other areas deemed necessary by the Secretary of Defense as they relate to military space systems.

Time for holding grade of general, admiral, lieutenant general, or vice admiral

The conferees are aware of the legislative proposal affecting senior military officers in the grades of admiral, general, vice admiral, and lieutenant general. This proposal would give authority to the Secretary of Defense to exempt senior officers in these grades who are on terminal leave from counting against applicable grade limits and would enable senior military officers, after Senate confirmation and upon the assumption of the duties of a position of

importance and responsibility under section 601 of title 10, United States Code, to be promoted. It would repeal the authority to “frock” these officers, or allow them, in advance of their actual promotion to a higher grade, to wear the insignia of the higher rank of the position that they are assigned to. The conferees have long sought to limit the practice of frocking, but also have had concerns about continuing efforts by the Department to waive senior general and flag officer grade limits. The conferees believe this proposal would benefit from more time for consideration to better understand the implications of the changes in law contained in the informal legislative proposal. The conferees urge the Secretary of Defense to formally submit a legislative proposal for the conferees’ consideration during the next defense authorization budget request.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Officer Personnel Policy

Transition of active-duty list officer force to a force of all regular officers (sec. 501)

The House bill contained a provision (sec. 511) that would authorize the Secretary of Defense to commission all new officer accessions as Regular officer and transition all officers on the active-duty list to regular status. The provision would implement the recommendation of the Defense Science Board Task Force on Human Resources Strategy that all new officers, regardless of their commissioning source, be given regular commissions in order to enhance professionalism, esprit de corps, and retention.

The Senate amendment contained a similar provision (sec. 511).

The House recedes with an amendment that would repeal the requirement that a member serve the last six years in a Reserve component before being eligible for nonregular service retirement.

The House bill contained a provision (sec. 502) that would eliminate the requirement that officers serving in the positions of Deputy Chief of Naval Operations and Assistant Chief of Naval Operations be line officers. This provision would expand the pool of officers who may be considered for assignment in these highly responsible positions within the Office of the Chief of Naval Operations, to include officers of the Navy staff corps.

The Senate amendment contained an identical provision (sec. 512).

The conference agreement includes this provision.

Limitation on number of officers frocked to major general and rear admiral (sec. 503)

The Senate amendment contained a provision (sec. 514) that would provide that the total number of brigadier generals and rear admirals (lower half) on the active-duty list who are authorized to

be frocked to the grade of major general or rear admiral (upper half) may not exceed 30.

The House bill contained no similar provision.

The House recesses.

Distribution in grade of Marine Corps Reserve officers in an active status in grades below brigadier general (sec. 504)

The House bill contained a provision (sec. 513) that would correct a technical discrepancy in the existing grade table for the Marine Corps Reserve that could unnecessarily limit the overall numbers of Marine Corps Reserve officers in an active status under section 12005 of title 10, United States Code.

The Senate amendment contained a similar provision (sec. 415).

The Senate recesses.

Authority for Federal recognition of National Guard commissioned officers appointed from former Coast Guard personnel (sec. 505)

The House bill contained a provision (sec. 588) that would make current and former officers and enlisted members of the U.S. Coast Guard, as well as graduates of the U.S. Coast Guard Academy, eligible for federal recognition after becoming commissioned officers of the National Guard.

The Senate amendment contained no similar provision.

The Senate recesses.

Study regarding promotion eligibility of retired officers recalled to active duty (sec. 506)

The Senate amendment contained a provision (sec. 515) that would require the Secretary of Defense to carry out a study to determine whether it would be equitable for retired warrant officers on active duty, but not on the active-duty list by reason of section 582(2) of title 10, United States Code, to be eligible for consideration for promotion under section 573 of such title. The Secretary would be required to submit a report on the results of the study not later than 180 days after the date of enactment of this Act.

The House bill contained no similar provision.

The House recesses with a clarifying amendment that would extend the scope of the study to include all retired officers.

Succession for office of Chief, National Guard Bureau (sec. 507)

The House bill contained a provision (sec. 507) that would establish a chain of succession when there is a vacancy in the Office of the Chief of the National Guard Bureau or in the event that the Chief is unable to perform the duties of the office. In such cases, the more senior officer of either the Army National Guard or of the Air National Guard on duty with the National Guard Bureau would assume responsibility as the Acting Chief.

The Senate amendment contained a similar provision (sec. 903).

The Senate recesses with a technical amendment.

Redesignation of Vice Chief of the National Guard Bureau as Director of the Joint Staff of the National Guard Bureau (sec. 508)

The House bill contained a provision (sec. 508) that would change the title of the Vice Chief of the National Guard Bureau to the Director of the Joint Staff of the National Guard Bureau.

The Senate amendment contained a similar provision (sec. 904).

The House recedes with a technical amendment.

Subtitle B—Reserve Component Policy Matters

Modification of stated purpose of the Reserve components (sec. 511)

The House bill contained a provision (sec. 521) that would clarify the purpose of the Reserve components. By eliminating statutory reference to planned mobilizations, the provision would more accurately reflect the operational mission, responsibilities, and contributions of National Guard and Reserve members and the manner in which Reserve forces will be employed in the future.

The Senate amendment contained a similar provision (sec. 901).

The Senate recedes with a technical amendment.

Homeland defense activities conducted by the National Guard under authority of title 32 (sec. 512)

The House bill contained a provision (sec. 529) that would amend title 32, United States Code, to authorize the Secretary of Defense to provide funds to the governor of a State to employ National Guard units and personnel to conduct operational activities that the Secretary determines to be in the national interest. This provision would also establish a process by which the governor of a State may request funding from the Secretary for the operational activities of that State's National Guard.

The Senate amendment contained a similar provision (sec. 906).

The Senate recedes with an amendment that would authorize the Secretary to provide funds to a governor of a State to employ National Guard units or members to conduct homeland defense activities. Homeland defense activities include those undertaken for the military protection of the territory or domestic population of the United States, or of infrastructure or other assets of the United States determined by the Secretary as being critical to national security, from a threat or aggression against the United States. National Guard personnel could perform homeland defense activities under this provision for up to 180 days, which could be extended for an additional 90 days to meet extraordinary circumstances.

Commission on the National Guard and Reserves (sec. 513)

The Senate amendment contained a provision (sec. 902) that would establish a Commission on the National Guard and Reserves. The commission would study the roles and missions of the National Guard and Reserve and the compensation and other benefits that are provided to members of the Reserve components. Among the issues the commission would be required to assess are the following: (1) the current and future roles and missions of the

Reserve components; (2) the capabilities of the Reserve components and the manner in which the Reserve components may be best used to support the military operations of the Armed Forces and the achievement of national security objectives, including homeland defense; (3) the current and future organization and structure of the National Guard and Reserve; (4) the organization and funding of training for the Reserve; and (5) options for improving compensation and benefits. The provision would also require the establishment of an independent review board in 2006, following the termination of the commission, to annually review the roles and missions of the Reserve components and the compensation and other benefits provided for members of the Reserve components.

The House bill contained no similar provision.

The House recedes with an amendment that would require an annual review by the Secretary of Defense of the roles and missions of the Reserve components and the compensation and benefits provided for members of the Reserve components beginning in fiscal year 2006.

Repeal of exclusion of active duty for training from authority to order Reserves to active duty (sec. 514)

The House bill contained a provision (sec. 522) that would authorize units and members of the Reserve components to be involuntarily mobilized for the purpose of training. This would provide the Department of Defense with improved access to Reserve component personnel during war or national emergency for the purpose of individual or collective skill training required to meet deployment standards and timelines for emergent missions or contingencies. The provision would also require that the time spent in such training be counted against the mobilization timelines that are established in law.

The Senate amendment contained a similar provision (sec. 521).

The House recedes with a technical amendment.

Army program for assignment of Active component advisers to units of the Selected Reserve (sec. 515)

The House bill contained a provision (sec. 530) that would reduce from 5,000 to 3,500 the minimum number of Army Active component advisers that are required to be assigned to support the training and readiness of Selected Reserve units of the Army. This provision would prohibit the Secretary of the Army from making any reductions in the numbers of Active component advisers until the Secretary reports, as required by March 31, 2005, to the Committees on Armed Services of the Senate and the House of Representatives on the support by the Active component of the Army for training and readiness of the Army National Guard and Army Reserve.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

Authority to accept certain voluntary services (sec. 516)

The House bill contained a provision (sec. 1078) that would authorize the secretaries concerned to accept voluntary services to

support programs of the National Committee for Employer Support of the Guard and Reserve as authorized by the Secretary of Defense.

The Senate amendment contained no similar provision.

The Senate recesses.

Authority to redesignate the Naval Reserve as the Navy Reserve (sec. 517)

The Senate amendment contained a provision (sec. 905) that would authorize the Secretary of the Navy, with the approval of the President, to redesignate the Naval Reserve as the "Navy Reserve" effective 180 days after the date on which the Secretary submits recommended legislation.

The House bill contained no similar provision.

The House recesses with a technical amendment.

Comptroller General assessment of integration of Active and Reserve components of the Navy (sec. 518)

The House bill contained a provision (sec. 528) that would require the Comptroller General to review the Navy's implementation plans for the integration of the service's Active and Reserve components. This provision would require the Comptroller General to submit a report on the results of that assessment to the Committees on Armed Services of the Senate and the House of Representatives by March 31, 2005.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that eliminates the provision that would prohibit appropriated funds being made available for the decommissioning of any Naval Reserve or Marine Corps Reserve aviation squadrons until the report required by this section is completed.

Limitation on number of STARBASE academies in a State (sec. 519)

The House bill contained a provision (sec. 527) that would authorize the Secretary of Defense to support the establishment of more than two STARBASE academies in a State under criteria to be established by the Secretary.

The Senate amendment contained no similar provision.

The Senate recesses with a clarifying amendment that would provide that waivers granted by the Secretary for the establishment and operation of additional STARBASE academies in a State should be based on the availability of appropriated funds for that purpose.

The conferees believe that limiting the number of STARBASE academies eligible for Department of Defense financial support to two per State could lead to inequities, particularly in states with several military installations located in separate communities. The conferees urge the Secretary to develop criteria for waivers that will appropriately balance increased program costs associated with establishment and operation of additional STARBASE academies with anticipated measurable gains in realizing the mission of the program.

Recognition items for certain Reserve component personnel (sec. 520)

The conferees agree to include a provision that would authorize the use of official funds by the Army National Guard, Air National Guard, and Army Reserve in order to recognize and retain Guardsmen and Reservists, family members, and other individuals who have served and supported members of the National Guard and Army Reserve. The provision would permit procurement of recognition items of nominal or modest value such as coins, medals, trophies, flags, posters, or other similar items that are valued at less than \$50 per item. The authorization would be effective as of November 24, 2003, and would expire on December 31, 2005.

Subtitle C—Reserve Component Personnel Matters

Status under disability retirement system for Reserve members released from active duty due to inability to perform within 30 days of call to active duty (sec. 521)

The House bill contained a provision (sec. 523) that would clarify that mobilized Reserve members who, within 30 days of being called to active duty, are unable to serve the full period for which they were mobilized due to pre-existing medical conditions, which were not aggravated while on active duty, may be separated. Such members would be considered as serving under an order to active duty for a period of 30 days or less.

The Senate amendment contained no similar provision.

The Senate recesses with a technical amendment.

Requirement for retention of Reserves on active duty to qualify for retired pay not applicable to nonregular service retirement system (sec. 522)

The House bill contained a provision (sec. 512) that would clarify that section 12686 of title 10, United States Code, does not require that reservists serving on active duty with over 18 years of reserve service be retained on active duty for the purpose of qualifying the member for reserve retirement.

The Senate amendment contained a similar provision (sec. 522).

The Senate recesses with a technical amendment.

Federal civil service military leave for Reserve and National Guard civilian technicians (sec. 523)

The House bill contained a provision (sec. 524) that would eliminate the restriction on the use of military leave specified in section 6323 of title 5, United States Code, during a war or national emergency declared by the President, for Reserve and National Guard civilian technicians who are federal employees.

The Senate amendment contained no similar provision.

The Senate recesses.

Expanded educational assistance authority for officers commissioned through ROTC program at military junior colleges (sec. 524)

The House bill contained a provision (sec. 525(a), (b), and (d)), that would allow commissioned officers who graduate from military

junior colleges to receive additional financial assistance to complete their baccalaureate degree requirements. Individuals who participate in this program would be attached to a Senior Reserve Officers' Training Corps unit to ensure that they maintain their military training, bearing, and education as they complete their post-secondary education.

The Senate amendment contained no similar provision.

The Senate recesses with a technical amendment.

Repeal of sunset provision for financial assistance program for students not eligible for advanced training (sec. 525)

The House bill contained a provision (sec. 525(c)) that would repeal section 2103a(d) of title 10, United States Code. This section provided that after December 31, 2006 contracts by members of the Senior Reserve Officers' Training Corps program, under the authority of section 2103a, could no longer be entered into force.

The Senate amendment contained no similar provision.

The Senate recesses.

Effect of appointment or commission as officer on eligibility for selected Reserve education loan repayment program for enlisted members (sec. 526)

The House bill contained a provision (sec. 526) that would authorize the Secretary of Defense to continue to repay educational loans for enlisted members in a Reserve component after they are commissioned as officers, if the members continue to serve the period specified in the original loan repayment agreement.

The Senate amendment contained no similar provision.

The Senate recesses with a technical amendment.

Educational assistance for certain Reserve component members who perform active service (sec. 527)

The conferees agree to include a provision that would authorize a new educational assistance benefit for members of the reserve components who have been ordered to active service in support of a contingency operation or in response to a war or national emergency. The provision would be effective on or after September 11, 2001, and would authorize: (1) payment of 40 percent of the amount of basic educational assistance provided under section 3015 of title 38 for a member whose entitlement is based on completion of an obligated period of active duty of three years for reservists who perform active service for a period of 90 days to one year; (2) payment of 60 percent of the amount of basic educational assistance in the case of a member who performed active service for one continuous year but less than two continuous years; and (3) payment of 80 percent of the amount of basic educational assistance for those members who serve for two continuous years or more. The maximum number of months of educational assistance that would be permitted under this provision would be 36, or the equivalent thereof in part-time educational assistance. Eligible reservists would remain entitled to educational assistance under this provision while serving in the Selected Reserve, in the case of members who were ordered to active duty while serving in the Selected Reserve, or in the Ready Reserve, in the case of a member who was

ordered to active duty while serving in the Ready Reserve other than the Selected Reserve.

Sense of Congress on guidance concerning treatment of employer-provided compensation and other benefits voluntarily provided to employees who are activated reservists (sec. 528)

The Senate amendment contained a provision (sec. 1075) that would express the sense of the Senate that the Internal Revenue Service should provide guidance consistent with the goal of promoting and ensuring the validity of differential pay arrangements, benefits payments, and contributions to retirement savings plans made by employers of reservists who have been called to active duty.

The House bill contained no similar provision.

The House recedes with a technical amendment.

The conferees note that employers of reservists called up for active duty are required under the Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA) to treat their reservist-employees as if they are on a leave of absence or furlough and are not required to pay their salaries. Many patriotic employers, however, have paid their reservist-employees who have been mobilized the difference between their military pay and their civilian salaries, and have allowed deductions from these differential payments for contributions to employer-provided retirement savings plans. The conferees believe that insufficient guidance exists for the tax status of these payments for both reservist-employees and employers under existing Internal Revenue Service regulations and that additional guidance should be provided.

Subtitle D—Joint Officer Management and Professional Military Education

Strategic plan to link joint officer development to overall missions and goals of Department of Defense (sec. 531)

The House bill contained a provision (sec. 531) that would require the Secretary of Defense, with the advice of the Chairman of the Joint Chiefs of Staff, to develop a strategic plan for joint officer management and joint professional military education. This strategic plan would link future requirements for Active and Reserve military personnel, who are trained and educated in joint matters, to the resources required to develop those persons in terms of manpower, formal education, practical experience, and other requirements. Additionally, the strategic plan would identify the methods the Secretary would use to fulfill those requirements.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that, among other data elements, would call for assessment of emerging issues related to joint officer management, including problems stemming from linkage of qualification as a joint specialty officer to eligibility for promotion, expected rates of promotion, and prescribed tour lengths.

Improvement to professional military education in the Department of Defense (sec. 532)

The House bill contained a provision (sec. 541) that would establish a new chapter 107 in title 10, United States Code, consisting of eight new sections that would consolidate sections of law related to joint professional military education. The provision would define the term “joint professional military education,” as well as “intermediate” and “senior level” schools. It would require the secretaries of the military departments to use a written examination as a portion of the evaluation criteria in selecting officers for full-time attendance at intermediate level service schools and would require phasing of joint professional military education and student to faculty ratios. The provision would also require that the length of the principal course of instruction at the Joint Forces Staff College could not be less than 10 weeks.

The Senate amendment contained a provision (sec. 505) that would repeal the minimum period requirement for phase II joint professional military education in section 663 of title 10, United States Code.

The Senate recedes with an amendment that would reduce and consolidate the number of subjects that joint professional military education must include. The amendment would specify that the Chairman of the Joint Chiefs of Staff will advise and assist the Secretary of Defense in designating and certifying certain courses of instruction and would delete the requirement for a written examination as a portion of the evaluation criteria in selecting officers for full-time attendance at intermediate level service schools.

Although the conferees did not establish a statutory minimum length for the duration of the principal course of instruction offered at the primary resident campus of each intermediate level service school and each senior level service school, the conferees believe that such courses should consist of not less than 10 months of resident instruction, except in times of war or national emergency. The conferees will continue to review this matter with each of the military services as changes and modifications to such courses are proposed.

Joint requirements for promotion to flag or general officer grade (sec. 533)

The House bill contained a provision (sec. 532) that would extend from September 30, 2007 to September 30, 2008, the date after which an officer must be selected for the joint specialty before promotion to the grade of brigadier general or rear admiral (lower half). The provision would also eliminate the requirement that an officer serve in a joint assignment at least 180 days prior to the convening of a promotion board for selection to the grade of brigadier general or rear admiral (lower half).

The Senate amendment contained a provision (sec. 501) that would also eliminate the requirement for 180 days of service in a joint duty assignment before an officer may be considered for promotion to flag or general officer rank.

The Senate recedes.

Clarification of tours of duty qualifying as a joint duty assignment (sec. 534)

The House bill contained a provision (sec. 533) that would modify the definition of the term “tour of duty” in section 668(c) of title 10, United States Code, to allow officers to continue accumulating joint credit if they serve consecutive joint duty assignments, even if those assignments are not within the same organization.

The Senate amendment contained a similar provision (sec. 506).

The Senate recedes with an amendment that would insert the term “joint duty assignment list” in section 668 of title 10, United States Code.

Two-year extension of temporary standard for promotion policy objectives for joint officers (sec. 535)

The Senate amendment contained a provision (sec. 503) that would require the military departments to ensure that an adequate number of officers are eligible for promotion to brigadier general and rear admiral (lower half) to meet joint qualification requirements under section 619a of title 10, United States Code. The provision would also make permanent the temporary authority regarding promotion comparison standards for joint specialty officers under section 662 of title 10, United States Code.

The House bill contained no similar provision.

The House recedes with an amendment that would extend the temporary authority regarding promotion comparison standards for officers with the joint specialty under section 662 of title 10, United States Code, until December 27, 2006.

Two-year extension of authority to waive requirement that Reserve Chiefs and National Guard Directors have significant joint duty experience (sec. 536)

The House bill contained a provision (sec. 509) that would extend for two years, until December 31, 2006, the authority of the Secretary of Defense to waive the requirement that the chiefs of the Reserves and the directors of the Army and Air National Guard must have significant joint duty experience to be eligible for appointment. The provision would also require that the Secretary develop a plan to ensure that officers selected after December 31, 2006, to be the chiefs of the Reserves and the directors of the Army and Air National Guard, have significant joint duty experience in order to ensure a concerted effort to develop a system to eliminate the need for this waiver.

The Senate amendment contained a provision (sec. 513) that would extend the Secretary’s waiver authority for one year.

The Senate recedes.

Subtitle E—Military Service Academies

Revision to conditions on service of officers as service academy superintendents (sec. 541)

The House bill contained a provision (sec. 557) that would repeal the requirement that the superintendents of the military service academies retire upon completion of their assignments. The pro-

vision would also require that an officer serve at least a three-year tour of duty as superintendent, and that if the officer is re-assigned before that period elapses, the secretary of the military department concerned must notify the Committees on Armed Services of the Senate and the House of Representatives of the reasons for the re-assignment.

The Senate amendment contained a provision (sec. 535) that would repeal the requirement under sections 8921 and 9333a of title 10, U.S. Code, that the Superintendent of the U.S. Air Force Academy retire upon termination of his or her assignment.

The Senate recedes with an amendment that would retain the requirement that the superintendents retire upon completion of their tours of duty. It would, however, authorize the Secretary of Defense to waive this requirement for good cause, and would require written notification to Congress of the President's intent to nominate a superintendent of a service academy for re-assignment.

Academic qualifications of the Dean of the Faculty of United States Air Force Academy (sec. 542)

The House bill contained a provision (sec. 559) that would require that a person selected to be the Dean of the Faculty at the U.S. Air Force Academy, who is not an officer on active duty, must be either a retired or former officer of the Armed Forces. Furthermore, the provision would prohibit the appointment or assignment of a person to be the Dean unless that person holds the highest academic degree in their academic field.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would delete the requirement that the Dean of the Faculty at the U.S. Air Force Academy must be either a retired or former officer of the Armed Forces.

Board of Visitors of United States Air Force Academy (sec. 543)

The House bill contained a provision (sec. 560A) that would modify section 9355 of title 10, United States Code, to change the composition of the Board of Visitors of the U.S. Air Force Academy. The provision would also prescribe: (1) procedures for when a member of the Board dies, resigns, or is absent from meetings; (2) four meetings of the Board and reports to Congress each year; and (3) candid and complete disclosure by the Secretary of the Air Force and the Superintendent of the Air Force Academy of all institutional problems.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would retain the current criteria in section 9355 of title 10, United States Code, for designation of U.S. Senators to serve on the Board of Visitors. The amendment would also modify the conditions for termination of board members who are members of Congress, assigning discretion to designating authorities to take appropriate action if Board of Visitors meetings are unattended without good cause. The amendment would further require semiannual reports from the Board of Visitors to Congress.

Appropriated funds for service academy athletic and recreational extracurricular programs to be treated in same manner as for military morale, welfare, and recreation programs (sec. 544)

The Senate amendment contained a provision (sec. 1005) that would authorize the service academies to treat funds appropriated for morale, welfare, and recreation athletics and extracurricular programs as non-appropriated funds in order to achieve uniform funding and management of those funds.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Codification of prohibition on imposition of certain charges and fees at the service academies (sec. 545)

The House bill contained a provision (sec. 558) that would codify section 553 of the National Defense Authorization Act for Fiscal Year 1995 (Public Law 103-337). This provision would prohibit the imposition of charges or fees for tuition, room, or board for attendance by cadets and midshipmen at the service academies.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

Subtitle F—Other Education and Training Matters

College First delayed enlistment program (sec. 551)

The House bill contained a provision (sec. 551) that would permanently authorize the Army College First Pilot Program, and extend the authority to implement the program to the other service secretaries.

The Senate amendment contained a provision (sec. 531) that would extend for one year the duration of the Army's College First Pilot Program.

The Senate recedes with a technical amendment.

Senior Reserve Officer Training Corps and recruiter access at institutions of higher education (sec. 552)

The House bill contained a provision (sec. 596) that would: (1) require that military recruiters be given access to campuses and students at institutions of higher education that is at least equal in quality and scope to the access provided to any other employer; (2) require the Secretary of Defense to obtain an annual verification from colleges and universities which already support the Senior Reserve Officers' Training Corps (ROTC) program that they will continue to do so in the upcoming academic year; (3) specify that federal funding that is provided to an institution of higher education, or to an individual, to be available solely for student financial assistance is exempt from the stricture of section 983 of title 10, United States Code; and (4) add additional defense-related funding sources to include: the Department of Homeland Security, the Central Intelligence Agency, and the National Nuclear Security Administration of the Department of Energy, and would restore the funds of the Department of Transportation to the list of covered funds that potentially could be terminated if an institution is determined to prevent recruiter access or maintains anti-ROTC policies.

The Senate amendment contained two provisions (sec. 532 and 533) that would require colleges and universities to give equal treatment to military recruiters, and specify that federal funding for student financial assistance may be used for the purpose for which the funding is provided.

The Senate recesses with an amendment that would delete the requirement for the Secretary to obtain an annual verification from colleges and universities that they would continue to support Senior ROTC.

Tuition assistance for officers (sec. 553)

The House bill contained a provision (sec. 514) that would authorize the secretaries of the military departments to waive for Reserve component officers the two-year Active-Duty service obligation required as a condition for receipt of tuition assistance while on active duty. The provision would also allow an increase in tuition assistance authorized for Army officers in the Selected Reserve.

The Senate amendment contained no similar provision.

The Senate recesses.

Increased maximum period for leave of absence for pursuit of a program of education in a health care profession (sec. 554)

The House bill contained a provision (sec. 554) that extends from two to three years the educational leave of absence authorized for members of the Armed Forces in section 708 of title 10, United States Code.

The Senate amendment contained a provision (sec. 651) that would extend from two to three years the period of time that a military member may take educational leave of absence for a health profession education program.

The House recesses.

Eligibility of cadets and midshipmen for medical and dental care and disability benefits (sec. 555)

The House bill contained a provision (sec. 555) that would provide the capability to effectively respond to injuries and illness sustained during accession training by cadets and midshipmen. The provision would authorize service academy cadets and midshipmen to be eligible for disability evaluation and retirement under chapter 61 of title 10, United States Code, and cadets and midshipmen participating in the Senior Reserve Officers' Training Corps (ROTC) to be eligible for medical and dental care for injuries and illness sustained in the line of duty and not due to gross negligence or misconduct.

The Senate amendment contained a similar provision (sec. 717).

The House recesses with a technical amendment.

The conferees were greatly assisted by the Department of Defense's report on health and disability benefits for pre-accession training and education programs required by section 546 of the National Defense Authorization Act for Fiscal Year 2002 (Public Law 107-107). This report proved essential in gaining an understanding of the origins of current law and the steps that are needed to be

taken to ensure equitable treatment of cadets and midshipmen and their families.

The conferees urge the Department to continue to identify ways to improve the treatment of Senior ROTC cadets and midshipmen who have experienced illness or injury and whose continued participation in ROTC is jeopardized as a result. The conferees, for example, are aware that under current service regulations cadets in Army ROTC and midshipmen in Naval ROTC who become ill or who are injured through no fault of their own are involuntarily being placed on “leave of absence” and denied scholarship payments and monthly stipends, even when it is apparent that these cadets and midshipmen will recover fully and they continue to attend classes and participate fully in ROTC activities. The conferees urge the Department and the services to act expeditiously, but no later than April 1, 2005, to revise Departmental regulations to achieve uniformity among the services in responding to medical conditions to avoid unnecessary hardships on ROTC cadets, midshipmen, and their families.

Transfer of authority to confer degrees upon graduates of the Community College of the Air Force (sec. 556)

The House bill contained a provision (sec. 552) that would authorize the Commander of the Air University to confer associate level academic degrees on graduates of the Community College of the Air Force. This change would align the Community College with all other Air University programs by ensuring that only the Commander of the Air University is responsible for conferring degrees.

The Senate amendment contained a similar provision (sec. 534).

The House recedes with a technical amendment.

Change in titles of leadership positions at the Naval Postgraduate School (sec. 557)

The House bill contained a provision (sec. 553) that would change the title of the Superintendent of the Naval Postgraduate School from Superintendent to President. This provision would also establish a new civilian position of Provost and Academic Dean, and revise the procedures to fill this position.

The Senate amendment contained a similar provision (sec. 913).

The House recedes with a technical amendment.

Subtitle G—Assistance to Local Educational Agencies for Defense Dependents’ Education

Continuation of impact aid assistance on behalf of dependents of certain members despite change in status of member (sec. 558)

The House bill contained a provision (sec. 590) that would temporarily adjust the process for computing the amount of funding provided by the Department of Education to certain local educational agencies heavily impacted by dependents of military personnel. The adjustment, limited to school year 2004–2005, would require that certain children continue to be counted as a child en-

rolled in school when computing the average daily attendance. Such children include those who attend the school but no longer live on a military base because both parents are deployed, or are children who temporarily reside in military base housing following the death of a military parent on active duty.

The Senate amendment contained no similar provision.

The Senate recesses with a technical amendment.

Assistance to local educational agencies that benefit dependents of members of the Armed Forces and Department of Defense civilian employees (sec. 559)

The House bill contained a provision (sec. 595) that would provide \$50.0 million in Operation and Maintenance, Defense-wide activities, for assistance to local educational agencies that benefit dependents of members of the Armed Forces and Department of Defense civilian employees.

The Senate amendment contained a similar provision (sec. 351) that would authorize \$30.0 million for assistance to local educational agencies.

The House recesses.

Impact aid for children with severe disabilities (sec. 560)

The Senate amendment contained a provision (sec. 352) that would authorize \$5.0 million in Operation and Maintenance, Defense-wide, for impact aid payments for children with disabilities under section 8003(d) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7703(d)), using the formula set forth in section 363 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (Public Law 106-398), for continuation of the Department of Defense's assistance program to local educational agencies that benefit dependents with severe disabilities.

The House bill contained no similar provision.

The House recesses.

Subtitle H—Medals and Decorations and Special Promotions and Appointments

Award of medal of honor to individual interred in the Tomb of the Unknowns as representative of casualties of a war (sec. 561)

The Senate amendment contained a provision (sec. 541) that would clarify that the posthumous award of a medal of honor to the deceased member of the Armed Forces who is interred in the Tomb of the Unknowns at Arlington National Cemetery is awarded to that member as a representative of the unknown members of the Armed Forces who died in such war or other armed conflict, and not to the individual personally.

The House bill contained no similar provision.

The House recesses.

Plan for revised criteria and eligibility requirements for award of the combat infantryman badge and combat medical badge for service in Korea after July 28, 1953 (sec. 562)

The House bill contained a provision (sec. 565) that would revise the criteria and eligibility requirements for award of the com-

bat infantry badge and combat medical badge to Army personnel for service in the Republic of Korea after July 28, 1953.

The Senate amendment contained a provision (sec. 543) that would require the Secretary of the Army to submit a plan not later than 90 days after the date of enactment of this Act for the revision of the criteria and eligibility requirements for these badges for service in Korea.

The House recedes.

The conferees note that the mutual purpose of the House and Senate provisions is to ensure modification of the eligibility requirements, which over time have become inequitable for soldiers who are serving or have served in Korea. The Commander, U.S. Forces Korea, has expressed his support for this initiative. The conferees expect the Secretary to promptly and equitably revise the criteria for the award of the combat infantryman and combat medical badges, and act upon applications from veterans of Korea service who qualify for these awards.

Authority to appoint Brigadier General Charles E. Yeager, United States Air Force (retired), to the grade of major general on the retired list (sec. 563)

The House bill contained a provision (sec. 563) that would authorize the President, by and with the advice and consent of the Senate, to appoint Brigadier General Charles E. Yeager U.S. Air Force (retired), to the grade of major general on the retired list of the U.S. Air Force.

The Senate amendment contained no similar provision.

The Senate recedes.

Posthumous commission of William Mitchell in the grade of major general in the Army (sec. 564)

The House bill contained a provision (sec. 564) that would authorize the President, by and with the advice and consent of the Senate, to issue a posthumous commission in the grade of major general in the Army to William Mitchell, formerly a colonel in the U.S. Army. A commission issued under this authority would become effective as of the date of the death of William Mitchell on February 19, 1936.

The Senate amendment contained no similar provision.

The Senate recedes.

Subtitle I—Military Voting

Federal write-in ballots for absentee military voters located in the United States (sec. 566)

The Senate amendment contained a provision (sec. 572) that would amend section 1973ff of title 42, United States Code, to authorize military voters and their dependents, who are stationed in the United States but absent from their home states, to use federal write-in absentee ballots. Operational requirements and the mobility of military personnel may prevent them from receiving state-provided absentee ballots in the mail in time for an election. Allowing absentee military voters and their dependents to use the fed-

eral write-in ballots, even while stationed in the United States, would serve to remedy these problems.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Repeal of requirement to conduct electronic voting demonstration project for the federal election to be held in November 2004 (sec. 567)

The House bill contained a provision (sec. 592) that would repeal the requirement in section 1604 of the National Defense Authorization Act for Fiscal Year 2002 (Public Law 107–107) for the Secretary of Defense to conduct a demonstration project to permit absentee uniformed service voters to cast their ballots through an electronic voting system.

The Senate amendment contained a provision (sec. 1065) that would authorize delay in carrying out an electronic voting demonstration project until November 2006.

The House recedes with an amendment that would delay the electronic voting demonstration project until the first regularly scheduled general election for federal office that occurs after the Election Assistance Commission notifies the Secretary that the commission has established electronic absentee voting guidelines and certifies that the commission will assist the Secretary in carrying out the project.

The conferees recognize the magnitude of the technical challenge associated with ensuring the security of electronic voting using the Internet. The Department of Defense's Secure Electronic Registration and Voting Experiment (SERVE) was an important prototype for electronic voting that should not be abandoned. The conferees encourage the Secretary to provide funding to the Election Assistance Commission and the National Institute of Standards and Technology to advance electronic absentee voting by U.S. voters located overseas and Uniformed Services voters.

Reports on operation of Federal Voting Assistance Program and military postal system (sec. 568)

The Senate amendment contained a provision (sec. 1026) that would require the Secretary of Defense to submit reports to Congress on: (1) the actions that the Secretary has taken to ensure that the Federal Voting Assistance Program functions effectively to support absentee voting; (2) the actions that the Secretary has taken to ensure that the military postal system functions effectively to support the morale of military members and their ability to vote by absentee ballot; and (3) the actions taken to implement the recommendations of the Military Postal Service Agency Task Force of August 28, 2000.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Subtitle J—Military Justice Matters

Review on how sexual offenses are covered by Uniform Code of Military Justice (sec. 571)

The House bill contained a provision (sec. 571) that would require the Secretary of Defense to review the Uniform Code of Military Justice and the Manual for Courts-Martial to determine what changes are required to improve the ability of the military justice system relating to sexual assault, and to conform the Code and the Manual more closely to other federal laws and regulations that address such issues. The Secretary is to report on the review to the Committees on Armed Services of the Senate and the House of Representatives by March 1, 2005. The report is to include the Secretary's recommendations for revisions to the Code.

The Senate amendment contained no similar provision.

The Senate recesses.

The conferees understand that the Department of Defense is already undertaking such a review. The conferees expect that the Department's legislative proposal for fiscal year 2006 will include any suggestions for revisions in the Code provisions dealing with sexual assault that are determined to be desirable.

Waiver of recoupment of time lost for confinement in connection with a trial (sec. 572)

The Senate amendment contained a provision (sec. 552) that would amend section 972 of title 10, United States Code, to require the Secretary concerned to waive time lost when a member is confined by military or civilian authorities for more than one day in connection with a trial, if the charge is thereafter dismissed, the trial results in an acquittal, a conviction is thereafter set aside (other than for clemency), or a judgment of acquittal or dismissal is entered upon a reversal of the conviction or on appeal.

The House bill contained a similar provision.

The House recesses.

Processing of forensic evidence collection kits and acquisition of sufficient stocks of such kits (sec. 573)

The House bill contained a provision (sec. 306) that would require the Secretary of Defense to take steps to eliminate the current backlog in the processing of forensic evidence collection kits, to shorten the time period between the use of such kits and their processing, and to ensure that there is an adequate supply of rape kits for all domestic and overseas U.S. military installations.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would require the Secretary to ensure that the United States Army Criminal Investigation Laboratory has the personnel and resources to effectively process forensic evidence used by the Department of Defense within 60 days of its receipt, and that military personnel are properly trained in the use of forensic evidence collection kits and in procedures to ensure protection of the chain of custody of the kits once used.

Authorities of the Judge Advocates General (sec. 574)

The Senate amendment contained a provision (sec. 915) that would amend the title 10, United States Code, provisions relating to the Judge Advocates General (TJAG) of the services and the General Counsels (GC) of the military departments to make the TJAGs the legal advisers of the service secretaries, the service chiefs and their staffs, and the offices and agencies of the military departments, provide for TJAG direction and supervision of judge advocates and of civilian attorneys outside the offices of the service general counsels, provide for the responsibilities of the TJAGs under the Uniform Code of Military Justice (UCMJ), provide for other duties as may be directed by the service secretaries, and provide that the TJAGs shall be appointed in the grade of lieutenant general or vice admiral, as appropriate.

The House bill contained no similar provision.

The House recedes with an amendment that would prohibit any officer or employee of the Department of Defense from interfering with the ability of the TJAGs to provide independent legal advice to their service secretaries and service chiefs, or of judge advocates assigned, attached, or performing duty with military units to provide such advice to commanders. The provision would also require the Secretary of Defense to appoint an independent panel to conduct a study of the relationships between the legal elements of each service and transmit the panel's recommendations as to statutory, regulatory, and policy changes which it believes to be desirable, together with the Secretary's comments, to the Committees on Armed Services by May 1, 2005. The conferees expect that this panel will be truly independent, expert, and disinterested. They will examine the panel's findings and recommendations with care in the fiscal year 2006 authorization process.

The conferees note that this is the second time in 12 years that attempts to consolidate legal services in the Department of Defense have led to congressional action. In 1992, the Deputy Secretary of Defense issued a memorandum that would have moved substantially in the direction of centralization under the General Counsel of the Department of Defense. In response, the Senate version of the National Defense Authorization Act for Fiscal Year 1993 contained a provision directing that the memorandum be rescinded. After the memorandum was rescinded, the provision was dropped in conference.

In May 2003, the Secretary of the Air Force issued an order subordinating the Judge Advocate General to the General Counsel of the Department of the Air Force as her military deputy. The order also stated that the General Counsel had "full legal authority to . . . become involved in . . . any particular case or matter within the Department." Thereafter the General Counsel issued a draft operating instruction in which she asserted the right to exercise legal oversight and review over virtually every legal issue arising in the Department of the Air Force, including the field of military justice which is statutorily reserved to the TJAGs. The Air Force situation, while the most aggravated, is not unique.

Consistent with the legislative provision included in the conference report, the conferees direct the Secretary of the Air Force to rescind his order of May 15, 2003, "Functions and Duties of the

General Counsel and the Judge Advocate General.” The conferees further direct the General Counsel of the Department of the Air Force to rescind all internal operating instructions and memoranda issued in reliance on the Secretary’s May 15, 2003, order.

Subtitle K—Sexual Assault in the Armed Forces

Examination of sexual assault in the Armed Forces by the defense task force established to examine sexual harassment and violence at the military service academies (sec. 576)

The House bill contained a provision (sec. 593) that would require the Secretary of Defense to expand the mission of the Task Force on Sexual Harassment and Violence at the Military Service Academies that was established in the National Defense Authorization Act for Fiscal year 2004 (Public Law 108–136). Upon completion of its current work, the task force would be renamed the Defense Task Force on Sexual Assault in the Military Services and would be extended for at least 18 months. It would examine matters relating to sexual assault in the Armed Forces and would be required to report its findings and recommendations to the Secretary of Defense within 12 months of its initial meeting. The Secretary of Defense would be required to provide the report, together with an evaluation of it, to the Committees on Armed Services of the Senate and the House of Representatives, along with an assessment of the effectiveness of the corrective actions being taken by the Department of Defense and the military services as a result of various investigations and reviews into matters involving sexual assault.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment to expand the scope of the task force report to include: a report on the use of data relating to sexual assault by senior military and civilian leaders; development of measures of effectiveness for responding to victim needs by sexual assault programs; progress in developing means to investigate and prosecute assailants who are foreign nationals; the adequacy of Department resources supporting sexual assault prevention and victim advocacy programs, particularly for deployed units and personnel; training of military and civilian personnel responsible for implementation of sexual assault policies; and programs and policies, including those related to confidentiality, designed to encourage victims to seek services and report offenses.

The Senate amendment also would authorize the Secretary to change the composition of the Defense Task Force on Sexual Assault in the Military Services as appropriate, but remaining consistent with the qualifications required by section 526(f) of Public Law 108–136, and not before the task force established to examine sexual harassment and violence at the service military academies has completed its statutorily mandated functions.

The conferees intend to closely monitor the development and implementation of uniform policies and programs on sexual assault required elsewhere in this Act. Given the urgency of the need for effective action to prevent and resolve sexual assault offenses against military members, the conferees expect that the task force, re-designated as the Task Force on Sexual Assault in the Military

Services, will provide an independent assessment of the effectiveness of policies and programs developed by the Department, as well as the success of the military services at all levels in achieving their implementation.

Department of Defense policy and procedures on prevention and response to sexual assaults involving members of the Armed Forces (sec. 577)

The House bill contained a provision (sec. 598) that would require the Department of Defense to promulgate a uniform Department of Defense policy for the prevention of and response to sexual assaults involving members of the Armed Forces, and would require service secretaries to prescribe regulations on policies and procedures to prevent and respond to sexual assaults involving members of the Armed Forces. The provision would also require the secretaries of the military departments to prescribe programs throughout each service designated for victim advocacy and intervention, both at home and in deployed locations, and provide an annual assessment of the implementation of sexual assault prevention policies and procedures during the preceding year. Additionally, the provision would require the Secretary to develop a definition of sexual assault that is uniform for all the Armed Forces. The provision would require an annual report to Congress by the Secretary of Defense on the number of sexual assaults, rapes, and other sexual offenses involving military personnel; a synopsis of disciplinary action taken in substantiated cases; the policies and programs implemented by the Secretary to respond to sexual assault and violence against military members; and a plan for future actions to be taken.

The Senate amendment contained a similar provision (sec. 553).

The Senate recedes with an amendment that would clarify reporting requirements by the Secretary and service secretaries, and would require a definition of sexual assault that is uniform for all the Armed Forces.

Subtitle L—Management and Administrative Matters

Three-year extension of limitation on reductions of personnel of agencies responsible for review and correction of military records (sec. 581)

The House bill contained a provision (sec. 581) that would extend through September 30, 2008 the prohibition precluding the secretaries of the military departments from reducing the number of military and civilian personnel assigned to duty within the boards for correction of military records until 90 days after the secretary of the military department concerned submits a report to Congress that describes the proposed reduction, provides the rationale for the reduction, and specifies the number of personnel that will be assigned to the board after the reduction is complete.

The Senate amendment contained no similar provision.

The Senate recedes.

Staffing for Defense Prisoner of War/Missing Personnel Office (DPMO) (sec. 582)

The House bill contained a provision (sec. 582) that would establish specific, permanent minimum levels of military and civilian personnel assigned to the Defense Prisoner of War/Missing Personnel Office (DPMO). The provision would require that the number of permanent positions and full-time Department of Defense personnel permanently assigned or detailed to the DPMO would not be less than 46 military members and 69 civilian employees of the Department.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would modify section 1501(a)(5) of title 10, United States Code, to provide that the number of military and civilian personnel, whether temporary or permanent, who are assigned or detailed to the DPMO may not be less than the number requested in the President's budget for fiscal year 2003. The conferees note that the budget request for fiscal year 2003 provided for 46 military personnel and 69 civilian personnel and included a budget request for \$16.0 million.

The Senate amendment would also require a study by the Government Accountability Office in order to provide a comprehensive examination of trends in staffing and funding levels of the DPMO compared to mission requirements and the Comptroller General's assessment of the adequacy of current manning and funding levels of the DPMO in light of current mission requirements.

Permanent ID cards for retiree dependents age 75 and older (sec. 583)

The House bill contained a provision (sec. 583) that would require the service secretaries to issue permanent identification cards to dependents of military retirees and survivors of military retirees eligible for benefits for periods after the dependent or survivor attains age 75.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would establish the age for issuance of permanent military identification cards to dependents and survivors of military retirees at 75 years of age.

Authority to provide civilian clothing to members traveling in connection with medical evacuation (sec. 584)

The House bill contained a provision (sec. 584) that would authorize the secretaries of the military departments to furnish members, who have been medically evacuated, civilian clothing at a cost not to exceed \$250 or to reimburse the member for the purchase of civilian clothing in an amount not to exceed \$250.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to provide civilian clothing to members traveling in connection with medical evacuation. This authority is a continuation of the authority provided in section 1319 of the Emergency Wartime Supplemental Appropriations Act, 2003 (Public Law 108-11) and later in section 1103 of the Emergency Supplemental Appropriations Act for Defense and for the Reconstruction of Iraq and Afghanistan, 2004 (Public Law 108-106).

Authority to accept donation of frequent traveler miles, credits, and tickets to facilitate rest and recuperation travel of deployed members of the Armed Forces and their families (sec. 585)

The House bill contained a provision (sec. 585) that would authorize the Secretary of Defense to accept the donation of frequent traveler miles, credits, and tickets for the purpose of facilitating the travel of members of the Armed Forces who are deployed away from their permanent duty station and are granted leave, to include rest and recuperative leave, emergency leave, convalescent leave, or another form of leave authorized for the member, and for facilitating the travel of family members to be reunited with such a member.

The Senate amendment contained a similar provision (sec. 653) that, in addition, would authorize the Secretary, in an exceptional case, to permit a person who is not a family member to use frequent traveler miles, credits, and tickets, if that person has a notably close relationship with the member. The Senate amendment also contained a provision that would authorize the Secretary to enter into an agreement with a nonprofit organization to assist in administering the collection, distribution, and use of donated frequent traveler miles, credits, and tickets.

The House recedes with an amendment that would eliminate a requirement that the Secretary encourage air and surface carriers to participate in the donation of frequent traveler miles, credits, and tickets. The amendment would also amend section 134 of the Internal Revenue Code of 1986 to exempt recipients of frequent traveler miles, credits, and tickets authorized in this Act from tax liability for receipt of such frequent traveler miles, credits, or tickets.

Annual report identifying reasons for discharges from the Armed Forces during preceding fiscal year (sec. 586)

The House bill contained a provision (sec. 587) that would require the Secretary of Defense to report annually to the Committees on Armed Services of the Senate and the House of Representatives detailed information regarding the numbers of persons discharged from each of the military services in the preceding fiscal year.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment that would authorize the use of generic interservice separation codes providing similar, consistent data across the services in this report, and that would terminate the authority for this report after 1 March 2011.

Study of blended wing concept for the Air Force (sec. 587)

The House bill contained a provision (sec. 589) that would require the Secretary of the Air Force to submit by March 1, 2005 a report on matters related to the Air Force's current implementation of and future plans for blended wings to the Committees on Armed Services of the Senate and the House of Representatives.

The Senate amendment contained no similar provision.

The Senate recedes.

In describing the manner in which current blended wings are functioning, the conferees request the Secretary of the Air Force to

comment on the efficacy of the provisions of section 516 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136). The Secretary should include recommendations for legislative changes, if needed, to ensure the ability of officers of the Army or Air National Guard, called to active duty for the purpose of commanding a unit composed of both active and Reserve component personnel, to successfully perform their duties.

Sense of Congress regarding return of members to active-duty service upon rehabilitation from service-related injuries (sec. 588)

The Senate amendment contained a provision (sec. 575) that would find that in cases involving combat-related injuries or other service-related injuries, it is possible, as a result of advances in technology and extensive rehabilitative services, to restore to members of the Armed Forces sustaining such injuries the capability to resume active military service, including, in a few cases, the capability to participate directly in the performance of combat missions.

The provision would express the sense of the Senate that members of the Armed Forces who, on their own initiative, are highly motivated to return to active-duty service following rehabilitation from injuries incurred in service of the Armed Forces should, after appropriate medical review and physical disability evaluation, be given the opportunity to present their case for continuing service on active duty in varied military capacities. Additionally, the provision would express the sense of the Senate that there should be no barrier in policy or law to members having the option to return to military service on active duty, and that the Secretary of Defense should develop specific protocols that include options for such members to return to active-duty service and to be retrained to perform military missions for which they are fully capable.

The House bill contained no similar provision.

The House recedes with an amendment that would express a sense of Congress.

Subtitle M—Other Matters

Protection of Armed Forces personnel from retaliatory actions for communications made through the chain of command (sec. 591)

The Senate amendment contained a provision (sec. 1069) that would amend section 1034 of title 10, United States Code, to allow a protected communication to be made to any person in the chain of command of a member of the Armed Forces making such a communication, as well as any other person or organization designated by regulations or other procedures for such communications.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Implementation plan for accession of persons with specialized skills (sec. 592)

The Senate amendment contained a provision (sec. 571) that would authorize the service secretaries to establish an alternate minimum military service obligation for accession of persons into the Armed Forces who have unique skills. The provision would also authorize establishment of expedited basic training requirements

for certain individuals in order to allow the Department of Defense to meet exigent mission requirements.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense, not later than 180 days after the date of enactment of this Act, to submit a plan for implementation of authority, if subsequently provided by law, to allow for accession into the Armed Forces of persons with specialized skills for duty involving the use of such skills. The Secretary would also be required to include a comparison of the plan submitted with an alternative plan of using civilian contractor personnel to meet the specialized skills required by the Armed Forces.

The conferees believe that there may be a valid requirement for an alternate minimum military service obligation for certain individuals and for expedited basic training that would justify exceptions under sections 651 and 671 of title 10, United States Code. The Department has not sufficiently explained, however, the manner in which such new authorities would be used and the potential effects such exceptional treatment of new accessions could have on other special or lateral entry programs. The conferees expect the Department to use the report to address these concerns.

The provision would also require the Secretary to conduct a feasibility study of how to implement a system that would make civilian volunteers, with skills determined by the Secretary to be critical, rapidly available for use in, or in support of, units of the Armed Forces on a temporary basis to meet no-notice or short-notice operational requirements. The requirement to conduct this feasibility study was included in the House bill (sec. 597) and is appropriately submitted in the context of better evaluating expedited, short-term manpower needs of the military services.

The conferees suggest that coordinating the foregoing feasibility study with the separate report required elsewhere in this Act on acceptance of voluntary services under section 1588 of title 10, United States Code, could be useful.

Enhanced screening methods and process improvements for recruitment of home schooled and National Guard Challenge program GED recipients (sec. 593)

The House bill contained a provision (sec. 594) that would reestablish the pilot program under section 571 of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261). This pilot program permitted participants in a National Guard Challenge Program who received a general education development (GED) certificate, and those who completed their high school requirements through a home schooling program to enlist in the Armed Forces as if they had received a high school diploma.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of the Army to carry out an initiative aimed at developing screening methods and process improvements for recruiting specified GED recipients. The purpose would be to achieve attrition patterns among the recruited recipients of a GED that match those of Army recruits who are high school diploma graduates and, fol-

lowing review by the Secretary of Defense, to implement such screening methods and process improvements on a test basis.

Redesignation of National Guard Challenge Program as National Guard Youth Challenge Program (sec. 594)

The Senate amendment contained a provision (sec. 573) that would change the name of the National Guard Challenge Program to the National Guard Youth Challenge Program. Additionally, the provision would phase in over three years an increase in the matching funds ratio to increase the amount of federal funds that may be provided to a State program.

The House bill contained no similar provision. The House recedes with an amendment that would redesignate the National Guard Challenge Program as the National Guard Youth Challenge Program.

The conferees were disappointed that the Secretary of Defense, in the report required by section 587 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108-136), did not provide alternatives to the current matching funds structure for the National Guard Youth Challenge Program. The conferees believe that such alternatives would provide greater flexibility in the management of the program to better respond to temporary fiscal conditions.

The conferees direct the Comptroller General to conduct a study of the National Guard Youth Challenge program to determine the effects of current fiscal constraints at the State level on the operation of individual programs. The study should assess the Department of Defense's oversight of the program, the efforts of both the Department and the States to secure alternative and supplemental funding support for the programs, and the impact of changes to the existing 60-40 DOD-to-State matching funds ratio.

Reports on certain milestones relating to Department of Defense transformation (sec. 595)

The House bill contained a provision (sec. 597) that would require the Secretary of Defense to submit reports to the Committees on Armed Services of the Senate and the House of Representatives on implementation of transformational milestones identified by the Department of Defense.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment to remove the requirement for a feasibility study on a civilian skill corps.

The conferees expect that a study on the feasibility of a civilian skill corps will be conducted under authority provided elsewhere in this Act concerning accession of persons with specialized skills.

With respect to military-to-civilian conversions in Navy medical and dental fields that are proposed for fiscal year 2005, the conferees are concerned that the specialties targeted for conversion are those most needed by military families, including pediatrics, family practice, and pharmacy. The conferees urge not only the Secretary of the Navy but also the secretaries of the other military departments to ensure that plans for military-to-civilian conversions do not adversely affect the quality and access of military health care required by military families. The conferees direct the

Secretary of Defense to provide a report to the Committees on Armed Services of the Senate and the House of Representatives not later than 90 days following enactment of this Act that describes the plans of each military department for military-to-civilian conversions of medical and dental personnel in fiscal year 2006.

Report on issues relating to removal of remains of persons interred in United States military cemeteries overseas (sec. 596)

The House bill contained a provision (sec. 599) that would authorize the Secretary of Defense, upon application of a qualifying survivor, to authorize disinterment and removal of the remains of military personnel interred in overseas military cemeteries.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of the Army, in consultation with the American Battle Monuments Commission (ABMC), to examine the history of the overseas cemeteries and the processes used to ensure that the initial disposition decision was carried out, together with a review and explanation of the existing policy and procedures regarding requests for disinterment and any exceptions that have been made. Additionally, the examination should include an analysis of potential reasons for justifying disinterment or remains from overseas cemeteries and the potential impact on the operation of U.S. overseas military cemeteries of permitting disinterment of remains from those cemeteries. Not later than September 30, 2005, the Secretary would be required to submit a report to the Committees on Armed Services of the Senate and the House of Representatives on the results of the examination, a description of the changes to policy that would be necessary to support a system for requesting and authorizing disinterment of remains, and the recommendations of the Secretary and the ABMC with respect to changes in policy and procedures with respect to such disinterments.

The conferees believe that a comprehensive examination and report on the history of the overseas military cemeteries and the reasons for the policy prohibiting disinterments is needed. Survivors of military veterans buried in the overseas military cemeteries must be assisted in every way possible in understanding the history of the overseas cemeteries and the reasons justifying the policy barring disinterments. The conferees express no opinion about this policy, however, to the extent that exceptions to the policy have been made or may be deemed warranted by the Secretary and the ABMC, survivors should have a clear understanding through the report that would be required by this provision of what burden of proof must be satisfied.

Comptroller General reports on closure of Department of Defense Dependent Elementary and Secondary Schools and commissary stores (sec. 597)

The Senate amendment contained a provision (sec. 2845) that would require the Comptroller General of the United States to submit a report to the appropriate committees of Congress which includes an assessment of the policy and criteria utilized by the Department of Defense regarding the closure of schools and commissary stores, including whether or not such policy and criteria

are consistent with policies and procedures on the preservation of the quality of life of members of the Armed Forces.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

Comptroller General report on transition assistance programs for members separating from the Armed Forces (sec. 598)

The Senate amendment contained a provision (sec. 1029A) that would require the Comptroller General to carry out a study of the programs of the Department of Defense and other departments and agencies of the Federal Government, including the Department of Veterans Affairs, under which transition assistance is provided to personnel who are separating from active-duty service in the Armed Forces. The report would include an analysis of the extent to which transition assistance programs authorized under sections 1142 and 1144 of title 10, United States Code, are adequate to meet the needs of the Reserve components, as well as recommendations by the Comptroller General to improve the content and uniformity of pre-separation counseling. The provision would also include an analysis of pre- and post-deployment health screening, and programs that are in place to identify and treat post-traumatic stress disorder and related health conditions.

The House bill contained no similar provision.

The House recedes with an amendment to clarify that the Comptroller General report will include an assessment of the quality and thoroughness of information being provided during the pre-separation briefings conducted by the Department of Veterans Affairs.

Study on coordination of job training standards with certification standards for military occupational specialties (sec. 599)

The Senate amendment contained a provision (sec. 1029B) that would require the Secretary of Defense and the Secretary of Labor to jointly carry out a study on ways to coordinate the standards applied by the Armed Forces for the training and certification of members of the Armed Forces in military occupational specialties with the standards that are applied to corresponding civilian occupations by governmental and private sector certification agencies.

The House bill contained no similar provision.

The House recedes with a technical amendment.

LEGISLATIVE PROVISIONS NOT ADOPTED

Length of service for service chiefs

The House bill contained a provision (sec. 501) that would authorize the President to extend the term of service of an officer serving as the Chief of Staff of the Army, the Chief of Naval Operations, the Commandant of the Marine Corps, or the Chief of Staff of the Air Force for a period of up to two years beyond the initial four-year appointment.

The Senate amendment contained no similar provision.

The House recedes.

Modification of conditions of eligibility for waiver of joint duty credit requirement for promotion to general or flag officer

The Senate amendment contained a provision (sec. 501) that would allow waivers of certain tour length requirements in cases in which an officer's proposed selection for promotion is based primarily upon a career field specialty, vice scientific and technical qualification, for which joint requirements do not exist. The provision would also eliminate the requirement that an officer serve in a joint duty assignment at least 180 days prior to the convening of a selection board for that officer to qualify for promotion to the rank of brigadier general or rear admiral (lower half).

The House bill had no similar provision regarding waivers of tour length requirements but a provision (sec. 532) that also repealed the requirement for 180 days service in a joint duty assignment before an officer may be considered for promotion to flag or general officer rank.

The Senate recesses.

Management of joint specialty officers

The Senate amendment contained a provision (sec. 502) that would provide that officers shall be designated as joint specialty officers upon successfully completing, in any sequence, a program accredited by the Chairman of the Joint Chiefs of Staff that is offered by a joint professional military education institution and a full tour of duty in a joint duty assignment, or after completing two full tours of duty in joint duty assignments. This provision would also specify that general and flag officer positions identified as joint duty assignments must be filled by officers with joint specialty unless the Secretary of Defense determines that the assignment of officers without the joint specialty is necessary and waives the requirement.

The House bill contained no similar provision.

The Senate recesses.

Increase in age limit for deferral of mandatory retirement for up to 10 senior general and flag officers

The House bill contained a provision (sec. 503) that would increase from 64 to 66 the mandatory retirement age for senior general and flag officers whom the President had previously retained on active duty beyond the statutory limits on either time-in-grade or age.

The Senate amendment contained no similar provision.

The House recesses.

Increased flexibility for voluntary retirement for military officers

The House bill contained a provision (sec. 504) that would require officers serving in grades above colonel or captain in the Navy to serve a minimum of one year time-in-grade before being allowed to retire in that grade. Additionally, the provision would modify existing law to give the authority to the secretary of the military department concerned to approve retirement of officers in grades above major general or rear admiral in the Navy with the concurrence of the Secretary of Defense.

The Senate amendment contained no similar provision.

The House recesses.

Length of joint duty assignments

The Senate amendment contained a provision (sec. 504) that would prescribe certain conditions under which officers would qualify to receive full credit for joint duty. The provision would also allow the Secretary of Defense to waive the applicability of section 664 of title 10, United States Code, if the Secretary determines that it is in the national security interests of the United States to do so.

The House bill contained no similar provision.

The Senate recesses.

Repeal of requirement that no more than 50 percent of active duty general and flag officers be in grades above brigadier general and rear admiral (lower half)

The House bill contained a provision (sec. 505) that would repeal the limitation in section 525 of title 10, United States Code, that no more than 50 percent of general and flag officers in a military service on active duty can be in grades above brigadier general and rear admiral (lower half).

Repeal of distribution requirements for Naval Reserve flag officers

The House bill contained a provision (sec. 510) that would amend section 12004(c) of title 10, United States Code, and repeal the existing distribution of flag officer billets for staff corps officers in the U.S. Naval Reserve.

The Senate amendment contained no similar provision.

The House recesses.

The conferees note that the allocations for flag officer billets in section 12004(c) apply to the Medical Corps, Nurse Corps, Dental Corps, Judge Advocate General's Corps, Civil Engineer Corps, Supply Corps, Chaplain Corps, and Medical Service Corps of the U.S. Naval Reserve. At a time when the Naval Reserve is engaged in an ongoing zero-based review of Reserve component force structure and development of initiatives to improve the integration of the Active and Reserve components of the Navy, the conferees question the Department of Defense's position that flag officer allocations for these vital Naval Reserve staff corps communities should be totally eliminated in order to establish additional line and restricted line Naval Reserve flag officer billets. The conferees expect the Navy to provide the Committees on Armed Services of the Senate and the House of Representatives with additional information justifying

modifications to existing allocations in section 12004(c) based on the results of its zero-based review.

Authority for Reserve officers to qualify as joint specialty officers

The House bill contained a provision (sec. 534) that would authorize the Secretary of Defense to award the joint specialty officer designation to Reserve officers who have met the prescribed requirements for such designation.

The Senate amendment contained no similar provision.

The House recesses.

The conferees strongly support the inclusion of Reserve officers in the Department of Defense planning and policies regarding designation, career development, and management of officers skilled in joint matters. The conferees anticipate that the report on the applicability of the term "joint specialty officer" to qualified reservists, required by the Senate report accompanying S. 2400 (S. Rept. 108-260), will be useful in identifying legislative and regulatory changes needed to accomplish this goal. Additionally, the conferees expect the strategic plan linking joint officer development to overall missions and goals of the Department to fully address Reserve officer matters.

Ribbons to recognize completion of joint professional military education

The House bill contained a provision (sec. 542) that would authorize the Secretary of Defense to award a military decoration to persons who have successfully completed joint professional military education phase I and to subsequently award a device to affix to the ribbon when a person has successfully completed joint professional military education phase II.

The House recesses.

Separate military campaign medals to recognize service in Operation Enduring Freedom and service in Operation Iraqi Freedom

The House bill contained a provision (sec. 561) that would require the President to establish separate campaign medals to recognize the service of members during Operation Enduring Freedom and Operation Iraqi Freedom.

The Senate amendment contained a similar provision (sec. 542).

This provision is not included in the conference report because it is unnecessary. On May 28, 2004, H.R. 3104, an Act to provide for the establishment of separate campaign medals to be awarded to members of the uniformed services who participate in Operation Enduring Freedom and Operation Iraqi Freedom, was enacted as Public Law 108-234.

Redesignation of inactive-duty training to encompass operational and other duties performed by Reserves while in inactive duty status

The Senate amendment contained a provision (sec. 561) that would redesignate the duty status applicable to members of the Reserve components of the Armed Forces known as "inactive duty training" as "inactive duty."

The House bill contained no similar provision.

The Senate recesses.

The conferees acknowledge that the intent of the Department of Defense in requesting this statutory change is to more accurately reflect the current mission, capabilities, and actual utilization of the modern Reserve component. The conferees are concerned, however, that the full implications of this extensive change on the requirement for training and the priority to be given to training are not sufficiently defined or understood. The conferees urge the Department to demonstrate in its Reserve continuum of service and corresponding proposals for legislative change, its commitment to preserving periods of training in order to maintain readiness and core capabilities.

Eligibility of all uniformed services personnel for National Defense Service Medal

The House bill contained a provision (sec. 562) that would require the President to authorize the award of the National Defense Service Medal to members of the uniformed services.

The House recesses.

Repeal of unnecessary duty status distinction for funeral honors duty

The Senate amendment contained a provision (sec. 562) that would repeal section 12503 of title 10, United States Code, relating to funeral honors duty. Section 12503, which authorizes treatment of funeral honors duty as inactive duty training, would have been unnecessary in conjunction with renaming of “inactive duty training” as “inactive duty.”

The House bill contained no similar provision.

The Senate recesses.

Conforming amendments to other laws referring to inactive-duty training

The Senate amendment contained a provision (sec. 563) that would conform certain provision in titles 5 and 38, United States Code, with the proposed change of the term “inactive duty training” to “inactive duty.”

The Senate recesses.

Clarification of authority of military legal assistance counsel to provide military legal assistance without regard to licensing requirements

The House bill contained a provision (sec. 573) that would amend section 1044 of title 10, United States Code, to provide that a judge advocate or a civilian attorney authorized to provide military legal assistance may provide such assistance in any jurisdiction, notwithstanding any law regarding the licensing of attorneys and subject to regulations to be prescribed by the Secretary concerned.

The Senate amendment contained no similar provision.
The House recesses.

The conferees note that differing responses were received from the Department of Defense and the services as to the need for and advisability of such a change in law. Concerns were expressed as to the possible effect on judge advocates and federal civilian attorneys practicing outside the legal assistance area, if such a proposal is adopted. The conferees urge the Department to develop a unified position with regard to the need for such a statutory change, and to submit a legislative proposal, if necessary.

Appearance of veterans service organizations at pre-separation counseling provided by the Department of Defense

The Senate amendment contained a provision (sec. 574) that would authorize the service secretaries to permit a representative from a veterans service organization to appear at and participate in pre-separation counseling for military members, authorized in section 1142 of title 10, United States Code. The provision would also authorize Reserve component units to meet with a veterans service organization upon release from active duty for the purpose of obtaining information and assistance.

The House bill contained no similar provision.
The Senate recesses.

The conferees expect that the matter of participation by representatives from veterans service organizations in pre-separation counseling for members in both Active and Reserve components will be addressed in the Comptroller General's report on transition assistance programs for members separating from the Armed Forces required elsewhere in this Act.

Limitation on amendment or cancellation of Department of Defense directive relating to reasonable access to military installations for certain personal commercial solicitation

The House bill contained a provision (sec. 586) that would prohibit the Secretary of Defense from cancelling or amending Department of Defense (DOD) Directive 1344.7, "Personal Commercial Solicitation on DOD Installations," for a period of one year after the Government Accountability Office (GAO) reports to Congress on the findings of an ongoing review of the financial allotment system and

the treatment of insurance agents by military finance offices and local managers and commanders at Department of Defense installations.

The Senate amendment contained no similar provision.

The House recesses.

The conferees note that the Statement of Managers accompanying the Department of Defense Appropriations Act for Fiscal Year 2005 (Public Law 108–287) prohibits the use of appropriated funds to amend or cancel DOD Directive 1344.7 until 90 days after the report of the results of the investigation regarding insurance premiums allotment processing is submitted.

In the statement of managers accompanying the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136), the conferees stated that the Department has taken appropriate steps to thoroughly consider and evaluate potential changes to personal commercial solicitation policies. The conferees believe sufficient time has elapsed for the Department to complete its evaluation. The Secretary is directed to submit a report on the status of its plans to effect changes to personal commercial solicitation policies, including any recommended changes or revisions to DOD Directive 1344.7, to the Committees on Armed Services of the Senate and the House of Representatives by May 1, 2005.

Employment preferences for spouses of certain Department of Defense civilian employees subject to relocation agreements

The Senate amendment contained a provision (sec. 1029C) that would require that information on participation in Federal Government procurement opportunities be included in pre-separation counseling authorized by section 1142 of title 10, United States Code. The provision would also authorize the secretary concerned to provide pre-separation counseling at medical centers of the De-

partment of Veterans Affairs and the Department of Defense with the consent of the member.

The House bill contained no similar provision.

The Senate recesses.

The conferees expect that this requirement will be included in the Comptroller General report on transition assistance programs for members separating from the Armed Forces required elsewhere in this Act.

The Senate amendment contained a provision (sec. 621) that would exclude the family separation allowance and special pay relating to duty subject to hostile fire or imminent danger from the calculation of household income for eligibility to receive the family supplemental subsistence allowance (FSSA). The House bill contained a provision (sec. 602) that would extend permissive authority to service secretaries to decline to pay family separation housing allowances when, in the secretaries' discretion, members' circumstances do not justify such payments.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees caution that it is not their intent that the service secretaries use the discretion provided in this provision to deny appropriate housing allowances to deserving service members and their families. The conferees intend that service members stationed

worldwide should receive a family separation housing allowance in all cases when their families are prohibited from joining them at their current duty station and government-provided quarters are unavailable to the service members at their duty locations.

Geographic basis for housing allowance during short-assignment permanent changes of station for education or training (sec. 604)

The House recedes.

One-year extension of other bonus and special pay authorities (sec. 614)

The Senate amendment contained a provision (sec. 614) that would extend for one year the authority to pay the aviation officer retention bonus, assignment incentive pay, the reenlistment bonus for Active members, the enlistment bonus for Active members, the

Reduced service obligation for nurses receiving nurse accession bonus (sec. 616)

The House bill contained a provision (sec. 612) that would reduce the service commitment required for the nurse accession bonus from four to three years of service.

The Senate amendment contained a similar amendment (sec. 615).

Assignment incentive pay (sec. 617)

The House bill contained a provision (sec. 614) that would require termination of assignment incentive pay when the member is placed on terminal leave and will not be returning to the assignment location.

The Senate amendment contained a similar provision (sec. 616) that would also delete the requirement for a written agreement between the secretary concerned and the member.

The House recedes with a technical amendment.

The conferees believe that assignment incentive pay should be a highly flexible means of providing an incentive to members to volunteer for challenging assignments. In this regard, the conferees approve of the actions of the Department of Defense and the Department of the Army in supporting the Commander, U.S. Forces Korea, in aggressively using assignment incentive pay to provide stability and enhanced readiness for soldiers and units in the Republic of Korea.

The conferees also view assignment incentive pay as a responsive means for service secretaries, on a discretionary basis when mission accomplishment so requires, to appropriately compensate members who are called on to extend their service or tours of duty or otherwise serve in demanding assignments. The requirement for a written agreement under these circumstances is not required and should not be mandatory in all cases.

Modification of active and Reserve component reenlistment and enlistment bonus authorities (sec. 618)

The House bill contained a provision (sec. 615) that would consolidate Active and Reserve Component reenlistment and enlistment bonus authorities. The provision would repeal certain special pay provisions and also extend eligibility for the reenlistment bonus through 17 years of service and authorize the use of the reenlistment bonus during war and national emergency to address unit specific retention problems without regard to critical skill eligibility requirements.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize payment of an active-duty or Selected Reserve reenlistment bonus up to 16, vice 14, years of service and increase the maximum amount of the Selected Reserve reenlistment bonus from \$5,000 to \$15,000 for a reenlistment or extension of six years, from \$2,500 to \$7,500 for a reenlistment or extension of three years, and from \$2,000 to \$6,000 for a reenlistment or extension of three years when the member has received a bonus for a previous three year enlistment. The amendment would also authorize lump sum payments of the foregoing bonuses.

The amendment would increase the maximum amount of the Selected Reserve enlistment bonus from \$8,000 to \$10,000; increase the Ready Reserve enlistment bonus for persons without prior service from \$1,000 to \$3,000; and increase the maximum amount of the prior service Ready Reserve bonus from \$1,500 to \$3,000 for a six year enlistment and from \$750 to \$1,500 for a three year enlistment. The amendment would authorize payment of the prior service enlistment bonus for the Selected Reserve for members who have not more than 16 years of total service. It would increase the maximum amount of the bonus from \$8,000 to \$15,000 for a six year enlistment, from \$4,000 to \$7,500 for a three year enlistment, and from \$3,500 to \$6,000 for a three year reenlistment or extension when the member has received a bonus for a previous three year enlistment.

Bonus for certain initial service of officers in the Selected Reserve (sec. 619)

The House bill contained a provision (sec. 618) that would modify section 324 of title 37, United States Code, to authorize Reserve component officers to be paid an accession of affiliation bonus using the same authority used to pay active-duty officers.

The Senate amendment contained a provision (sec. 620) that would authorize an affiliation or accession bonus of up to \$6,000 for certain commissioned officers in the Selected Reserve. The provision would help to access and affiliate officers in the Selected Reserve who possess or would train to acquire designated critical skills.

The House recedes with an amendment that would specify that a member entitled to a bonus under this provision who is called or ordered to active duty shall be paid, during that period of active duty, any amount of the bonus that becomes payable to the member during that period of active duty.

Revision of authority to provide foreign language proficiency pay (sec. 620)

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize the monthly rate for foreign language proficiency pay under section 316 of title 37, United States Code, to be determined by the secretary concerned but not to exceed \$1,000. Additionally, the amendment would authorize payment of a bonus of up to \$6,000 payable in a lump sum or installments for members of the Reserve component. The amendment would require that if a member of a Reserve component serving on active duty receives foreign language monthly special pay during any month for which the member receives a lump sum payment, the amount of the special pay paid to the member for the month shall be reduced by an amount equal to one-twelfth of the bonus amount.

Eligibility of enlisted members to qualify for critical skills retention bonus while serving on indefinite reenlistment (sec. 621)

The House bill contained a provision (sec. 617) that would allow Reserve component members to be paid the critical skills retention bonus under the authority of section 323 of title 37, United States Code. The provision would also extend eligibility for the bonus through 17 years of service and, clarify that enlisted members serving pursuant to an indefinite enlistment would be eligible under certain conditions for receipt of the bonus.

The Senate amendment contained a provision (sec. 618) that would authorize enlisted personnel serving on indefinite reenlistments in designated critical military skills to receive a critical skills retention bonus on the condition that they enter into a written agreement to remain on active duty for at least one year under such enlistments.

The House recedes with a technical amendment.

The conferees believe that initiatives to consolidate or extend bonus authorities in the absence of Department of Defense legislative proposals are premature. The Department has indicated that a Defense Advisory Committee on Military Compensation will be appointed by the Secretary of Defense to conduct a comprehensive review of military compensation from the perspective of both the Active and Reserve forces. This Advisory Committee on Military Compensation will perform a comprehensive review and strategic assessment of military pay and benefits with a view towards simplifying and balancing pays to maintain a competitive edge in recruiting and retention. Upon completion of its work, which is anticipated in the late summer of 2005, the advisory committee will publish its conclusions and recommendations and transmit those to the Secretary of Defense. The conferees also expect that the Commission on National Guard and Reserves will contribute to a better informed resolution of questions about potential reform to title 37, United States Code.

Eligibility of Reserve component members for incentive bonus for conversion to military occupational specialty to ease personnel shortage (sec. 622)

The House bill contained a provision (sec. 619) that would allow Reserve component members to be paid bonuses for converting to, and serving for a period of not less than three years, in military occupational specialties for which there is a shortage of trained and qualified personnel.

The House bill included a \$2.0 million ceiling on expenditures in fiscal year 2005 for this purpose.

Reimbursement for certain lodging costs incurred in connection with dependent student travel (sec. 633)

The House recedes with a technical amendment.

Subtitle D—Retired Pay and Survivor Benefits

Computation of high-36 month average for Reserve component members retired for disability while on active duty or dying while on active duty (sec. 641)

The Senate amendment contained a provision (sec. 641) that would modify the rules controlling the computation of retirement pay and survivor annuities for Reserve component members who are entitled to retired pay for physical disability under sections 1201 and 1202 of title 10, United States Code. The provision would permit more equitable treatment of these Reserve component members by calculating the average of monthly basic pay for purposes of pay and annuity payments as if they had been entitled to basic pay for the 36 months preceding their retirement, regardless of whether the member served the entire period on active duty.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Additionally, the amendment would require the President to submit draft legislation to Congress that would increase the maximum benefit provided under Servicemembers' Group Life Insurance (SGLI) to \$350,000 and allow a minimum SGLI benefit of \$100,000 at no cost for members who elect the maximum coverage. The amendment would also establish an additional set of death benefits, retroactive to October 7, 2001, for survivors of members who die in the line of duty or as a result of hostile action consisting of

the total amount of basic pay, allowances, and special pays a member would have received for one or two years respectively. The amendment would also require the budget for fiscal year 2006 to include funds for the implementation of the foregoing enhanced benefits.

The House bill contained no similar provision.

The House recedes with an amendment that would require the President, at the same time he transmits to Congress the budget for fiscal year 2006, to submit assessments and recommendations on legislation, including budgetary implications for the legislation described in the Senate amendment.

Phased elimination of two-tier annuity computation for surviving spouses under Survivor Benefit Plan (sec. 644)

The House bill contained a provision (sec. 641) that would phase in from October 2005 to March 2008 elimination of the Social Security offset under the Survivor Benefit Plan (SBP), and increase the annuities paid to survivors of military retirees who are 62 or older. The Senate amendment contained a similar provision (sec. 644) that would phase in from October 2005 to October 2014 elimination of the Social Security offset under the SBP.

The Senate recedes with an amendment that would eliminate the requirement that participating retirees continue to pay premiums for supplemental SBP coverage effective on the date of enactment of this Act. Retired members who choose supplemental SBP coverage during the open enrollment period, which would begin on October 1, 2005, would have their additional premium phased out from 2005 through 2008.

One-year open enrollment period for Survivor Benefit Plan commencing October 1, 2005 (sec. 645)

The House bill contained a provision (sec. 642) that would authorize an open enrollment period for retired members to participate in the Survivor Benefit Plan (SBP) or to increase the level of their participation if they were previously participating below the maximum allowed level. The provision would authorize the Secretary of Defense to require retirees who enroll to pay an additional premium not to exceed 4.5 percent of the retiree's base amount.

The Senate amendment contained a similar provision (sec. 645) that would authorize an open enrollment period similar to that authorized by section 642 of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261). The open enrollment period under the Senate amendment would last for one year beginning on October 1, 2005. The premium would be calculated based on the total amount of the premiums, plus interest, by which members' retired pay would have been reduced if they had elected to participate in the SBP at the first opportunity that they had been afforded.

The House recedes with a clarifying amendment that would give eligible retirees during the open enrollment period the option of purchasing temporary supplemental SBP coverage that would be phased out by 2008 when the two-tier SBP system is terminated.

Subtitle E—Commissary and Nonappropriated Fund
Instrumentality Benefits

Consolidation and reorganization of legislative provisions regarding defense commissary system and exchanges and other morale, welfare, and recreation activities (sec. 651)

The House bill contained a provision (sec. 651) that would consolidate and reorganize a wide range of sections from title 10, United States Code, and related laws concerning commissaries, exchanges and other morale, welfare, and recreation activities. The provision would define the commissary benefit; specify criteria for establishment, sizing, and closure of commissaries; and address other commissary management matters.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would define commissary and exchange systems, and clarify that the purpose of the systems is to enhance the quality of life of members of the uniformed services, retired members, and dependents of such members; and to support military readiness, recruitment, and retention. The amendment would require the designation of a senior official to oversee both systems and an executive governing body to ensure complimentary operations of both systems. The amendment would authorize the Secretary of Defense to consider the quality of life of the Reserve components whenever assessing whether to close a commissary store, and would clarify that the closure of a commissary store at an installation not closing under a base closure law would not take effect until 90 days after the Secretary notifies Congress of the reasons for such closure.

The amendment would authorize the Secretary to conduct a test program on the sale of telephone cards, film, and one-time use cameras. Within 90 days of the completion of one year of testing, the Secretary would report findings and recommendations to the Committees on Armed Services of the Senate and the House of Representatives. The amendment would require the report to include an analysis of the actual impact of the sale of such items on the exchange dividend and any recommendations for changes in legislation that may be necessary. The amendment would require the Comptroller General to conduct a study to evaluate the impact of the expansion of categories of merchandise authorized for sale in commissary stores and its impact on the exchange dividend.

The conferees expect that the oversight body established by this Act will include military members. The conferees also expect that for items procured from the exchange, any revenue above the commissary purchase price of other merchandise items, shall be accounted for and allocated as if it were a uniform sales price surcharge. Finally, the conferees expect the Secretary to maintain the decor, format, and product selection in military commissaries consistent with modern grocery store norms.

Consistent State treatment of Department of Defense Non-appropriated Fund Health Benefits Program (sec. 652)

The House bill contained a provision (sec. 652) that would clarify that the Nonappropriated Fund Uniform Health Benefits Program of the Department of Defense is not subject to State, local and territorial taxes, fees, other monetary payment, or health plan mandates.

The Senate recedes with a technical amendment.

Subtitle F—Other Matters

Eligibility of members for reimbursement of expenses incurred for adoption placements made by foreign governments (sec. 661)

The Senate amendment contained a provision (sec. 652) that would amend section 1052(g) of title 10, United States Code, to include within the definition of “qualified adoption agency” a foreign government or an agency authorized by a foreign government to place children for adoption. Section 1052 authorizes reimbursement of expenses for certain members of the Armed Forces who adopt children. Although that statute includes intercountry adoptions, the definition of qualified adoption agency does not include either foreign governments or agencies authorized by such governments to place children. Otherwise eligible members who adopt children while on duty outside the United States have been forced to re-adopt them through a domestic agency upon their return to the United States in order to be reimbursed. The provision would authorize reimbursement of expenses for such intercountry adoptions, if the child is either eligible for automatic United States citizenship or has been issued a certificate of citizenship under the Immigration and Nationality Act.

The House bill contained no similar provision.

The House recedes.

The conferees expect that the Secretary of Defense will make the necessary adjustments, including extending the period allowed under regulations for filing for reimbursement, to accommodate members who are outside the United States on military orders.

Clarification of education loans qualifying for education loan repayment program for Reserve component health professions officers (sec. 662)

The House bill contained a provision (sec. 662) that would clarify that college loans involving both a basic professional degree and graduate education would qualify for repayment under section 16302 of title 10, United States Code.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment to ensure that all sources of income are reported by the member in response to the survey.

The conferees believe that accurate information regarding loss of income is an important prerequisite to future congressional action, and acknowledge the need to better understand the impact of any such loss of income on members with skills in high demand for deployments.

Study of disability benefits for veterans of service in the Armed Forces with service-connected disabilities (sec. 666)

The conferees agree to a provision that would require the Secretary of Defense to conduct a study of the totality of all current and projected disability benefits that are available to disabled members and former members of the Armed Forces for service-connected disabilities. The study would compare the disability benefits for members of the Armed Forces with commercial and other private sector disability benefits plans, and identify the Department of Defense personnel policy changes needed to enhance the financial and nonfinancial benefits that are provided to members and former members of the Armed Forces for service-connected disabilities. The Secretary's report would include conclusions resulting from the study and recommended legislation to address the deficiencies in the system of Federal Government disability benefits for disabled members and former members of the Armed Forces.

The provision would require the Comptroller General to study the disability benefits that are available for employees of the Federal, State and local governments, especially those provided for disabilities incurred in the performance of jobs in which employees perform tasks with risks that are similar to the risks associated with military service.

LEGISLATIVE PROVISIONS NOT ADOPTED

Income replacement payments for Reserves experiencing extended mobilization for active-duty service

The House bill contained a provision (sec. 605) that would require the Secretary of Defense to pay involuntarily mobilized Reserve members on a monthly basis the amount necessary to replace the difference in income between their regular military compensation plus special pays and allowances and the average monthly income received by the member during the 12 months preceding the month in which the member was mobilized. Payments would be limited to a minimum of \$50 each month and a maximum of \$3,000 each month.

The Senate amendment contained a provision (sec. 1110) that would amend chapter 55 of title 5, United States Code, to require federal agencies to pay any difference between military and civilian compensation for federal employees who, as members of the uniformed services or National Guard, were called to active-duty service in support of a national emergency since October 11, 2002.

The House bill contained no similar provision.

The Senate recedes.

The conferees acknowledge that the Department of Defense has authority under section 1798 of title 10, United States Code, to subsidize the cost of child and youth services in the private sector, and has initiated programs to provide affordable, quality child care and youth service options for families of activated Guard and Reserve members. Such initiatives include partnerships with civilian child care referral agencies, and the Department of Defense Military One Source referral services available to all members.

TRICARE coverage for Reserves in a non-active duty status would commence following expiration of transitional health care benefits authorized in section 1145, title 10, United States Code. The amendment would not extend TRICARE eligibility to federal employees entitled to Federal Employee Health Benefits Plan coverage under chapter 89 of title 5, United States Code.

The House bill contained no similar provision.

The House recedes with an amendment to authorize TRICARE coverage for Reserves in a non-active duty status for members of Reserve components called or ordered to active duty on or after September 11, 2001 in support of a contingency operation, and who commit to continued service in the Selected Reserve after release from active duty. For each period of 90 consecutive days of extended active-duty service, the Reserve member would be entitled to one year of TRICARE coverage while in a non-active duty status under the TRICARE Standard option. The amendment would authorize one year of coverage for a member who is otherwise eligible but does not serve continuously on active duty for 90 days because of an injury, illness, or disease incurred or aggravated while deployed. The amendment would also require payment of a premium by the Reserve member equal to 28 percent of the total amount determined by the Secretary as being reasonable for TRICARE coverage, and execution by the member of a service agreement. The conferees find that with increasing requirements to repair or replace aging military treatment facilities and potential realignment of forces, the Department of Defense will be challenged to find new ways of providing enhanced health care for beneficiaries entitled to military health care.

Study of provision of travel reimbursement to hospitals for certain military disability retirees (sec. 722)

The House bill contained a provision (sec. 722) that would require the Secretary of Defense to conduct a study of the feasibility and desirability of providing retirees with combat-related disabilities travel and transportation benefits to receive medical treatment at military hospitals for two years after their retirement. The provision would also require the Secretary to report the results of the study to the congressional defense committees by March 1, 2005.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would include all military disability retirees in the study.

Study of mental health services (sec. 723)

The House bill contained a provision (sec. 723) that would require the Secretary of Defense to conduct a study of mental health services available to members of the Armed Forces, to include an evaluation of the availability and effectiveness of mental health treatment and screening resources for members before and after deployment, and for the families of deployed members. The provision would also require an assessment of obstacles that prevent members of the Armed Forces and their families from obtaining mental health services, as well as identification of mental health problems unique to members of the Reserve component.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Comptroller General to conduct the study and submit a report to Congress by March 31, 2005. The amendment would also require the report to include recommendations for removing any obstacles to obtaining mental health services for members of the Reserve component.

The conferees support the recommendations made by the Army's Mental Health Advisory Team and direct the Secretary of the Army to provide a report by March 1, 2005, on the implementation of recommendations for providing mental health assistance to soldiers wanting help and educating soldiers on how to obtain help from forward-deployed mental health units.

Policy for timely notification of next of kin of members seriously ill or injured in combat zones (sec. 724)

The Senate amendment contained a provision (sec. 367) that would require the Secretary of Defense, not later than 120 days after the date of enactment of this Act, to prescribe the policy for providing timely notification to the next of kin of the status, including health and location of members of the Armed Forces who are seriously ill or injured in a combat zone. The provision also authorized an increase of \$10.0 million in research, development, test and evaluation funding for medical equipment and combat casualty care technologies.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

The conferees honor the sacrifice of the members of the Armed Forces who have been killed or wounded while bravely serving in

ongoing military operations and the heroic efforts of the medical personnel of the Armed Forces in treating wounded military personnel and civilians under combat conditions. In view of modern communications capabilities, the conferees believe the Department of Defense's current policies relating to notification of next of kin about service members who have been seriously wounded or are gravely ill must be revised to include appropriate standards aimed at ensuring timely and ongoing communication, consistent with the desires of individual service members.

The conferees agree to an increase of \$5.3 million for combat casualty care technologies, which is reflected in the tables for title II of this Act.

Revised funding methodology for military retiree health care benefits (sec. 725)

The House bill contained a provision (sec. 1541) that would revise the process for funding the annual payments that are required to be paid into the Department of Defense Medicare-Eligible Retiree Health Care Accrual Fund. Beginning in fiscal year 2006, the Secretary of the Treasury would make the annual payments from the general fund of the Treasury.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to transmit certifications required under this Act to the Committees on Armed Services of the Senate and the House of Representatives immediately upon transmission to the Secretary of the Treasury.

The conferees expect that the transmission of funding certifications will include all determinations by the Secretary of Defense concerning the amounts required for deposit into the Medicare-Eligible Retiree Health Care Accrual Fund beginning in fiscal year 2006.

Grounds for presidential waiver of requirement for informed consent or option to refuse regarding administration of drugs not approved for general use (sec. 726)

The House bill contained no similar provision.

The House recedes.

TRICARE program regional directors (sec. 727)

The conferees agree to include a provision which would require the Secretary of Defense to develop and report to the Committees on Armed Services of the Senate and the House of Representatives by March 1, 2005 recommendations for a formal TRICARE Regional Director selection process. The selection process would require the Secretary of each military department to nominate one commissioned officer in a grade above colonel or, for the Navy in a grade above the grade of captain, or a member of the Senior Executive Service. The provision would require that the recommendations of the Secretary include the qualifications for Regional Direc-

tors, the period of assignment of a commissioned officer as a Regional Director and other requirements as prescribed by the Secretary.

The conferees expect that, among other duties as prescribed by the Secretary, the TRICARE Regional Director will be responsible for ensuring the adequacy of the number and types of civilian TRICARE providers, both in civilian networks and those who participate in the TRICARE Standard program. The conferees expect that the Regional Director will consider the requirement for the availability of TRICARE Standard providers to support members of the Reserve components and their families who are eligible to participate in TRICARE Standard, as authorized elsewhere in this Act.

Subtitle D—Medical Readiness Tracking and Health Surveillance

Medical readiness plan and Joint Medical Readiness Oversight Committee (sec. 731)

The Senate amendment contained a provision (sec. 1301) that would require the Secretary of Defense to develop a comprehensive plan to improve medical readiness, and Department of Defense tracking of the health status of members of the Armed Forces; and to strengthen medical readiness tracking before, during, and after deployment of members of the Armed Forces overseas. The provision would also require the establishment by the Secretary of a Joint Medical Readiness Oversight Committee to advise the Secretary of Defense on medical readiness and health status of the members of the Active and Reserve components of the Armed Forces and to oversee the development of the comprehensive medical readiness plan required elsewhere in this Act.

The House bill contained no similar provision.

The House recedes with an amendment to include the Vice Chiefs of the military services as members of the committee, and a requirement that each year, before the committee submits its report to Congress, that the Secretary shall provide an opportunity for representatives of veterans and military health advocacy organizations, and others the Secretary of Defense considers appropriate, to comment on the report. The amendment requires that the report submitted to Congress shall include a summary of the comments received and the Secretary's response to them.

The conferees are concerned that a report published by the Comptroller General in September 2004, entitled "DoD Needs to Address Long-term Reserve Force Availability and Related Mobilization and Demobilization Issues," continues to identify problems in the management of the health status of Reserve forces by the Department of Defense. The report finds that, "DoD's ability to effectively manage the health status of its reserve forces is limited because its centralized database has missing and incomplete health records and it has not maintained full visibility over reserve component members with medical problems." The conferees expect the committee and the comprehensive plan authorized in this Act to promptly address the ongoing issues identified by the Comptroller General for the Reserve component, as well as all those matters concerning medical readiness, health surveillance, and force health

protection for both active-duty and Reserve components delineated in this Act.

Medical readiness of Reserves (sec. 732)

The Senate amendment contained a provision (sec. 1302) that would require the Comptroller General to conduct a study of the health of members of the Reserve components who have been ordered to active duty in support of Operation Enduring Freedom and Operation Iraqi Freedom. The study would review the health and medical fitness of Reserves when they were ordered to active duty, the effects of their health status on planning and deployment schedules, and compliance by military personnel with Department of Defense policies on medical and physical fitness applicable to the reserve components. The provision would also require health assessments not less frequently than once every two years, using the pre-deployment health assessments required under section 1074f of title 10, United States Code, as the minimum standard. The provision would require the review of pre-deployment health assessments by a medical professional and any follow-up care that is required by the member. The Senate provision would further require improvement to the pre-deployment assessment form currently in use by the Department, and development of a uniform policy on deferral of medical treatment pending deployment to theaters of operations.

The House bill contained no similar provision.

The House recedes with an amendment to clarify that follow-up care and treatment provided to Reserve members is care that is otherwise authorized for medical and dental readiness.

Baseline health data collection program (sec. 733)

The Senate amendment contained a provision (sec. 1303) that would require the Secretary of Defense to collect baseline health data from each person entering the Armed Forces, and to provide for the computerized compilation and maintenance of the data. The provision would also establish interim standards for blood sampling, not less than 60 days prior to deployment and not later than 30 days after the date on which the deployment ends.

The House bill contained no similar provision.

The House recedes with an amendment to require that blood samples be drawn not earlier than 120 days before the date of deployment. The amendment would require the application of interim standards for blood sampling unless the Joint Medical Readiness Oversight Committee established elsewhere in this Act recommends, and the Secretary approves, a different standard.

The conferees expect that in the development of the health baseline data collection program required by this title, the Department of Defense will work jointly with the Department of Veterans Affairs to examine coding and terminology for all computerized medical data systems to ensure compatibility with those computerized medical data systems of the Department of Veterans Affairs. The conferees acknowledge that much progress has been made in achieving compatibility of medical information systems, both in the clinical setting, such as the Federal Health Information Exchange, and in support of field operational units, such as the Special Oper-

ations Forces Medics system. The conferees urge the Department of Defense to continue such efforts with the Department of Veterans Affairs, which are necessary to improve continuity of care.

Medical care and tracking and health surveillance in the theater of operations (sec. 734)

The Senate amendment contained a provision (sec. 1304) that would require the Secretary of Defense to establish a policy on health record keeping in the theater of operations, and to evaluate and report to Congress on the strengths and weaknesses and recommend changes to mandatory record keeping systems for military personnel in the theater. The report would also include a summary of scientific literature on blood sampling, and a recommendation for changes to regulations and standards for blood sampling. The provision would require that the Secretary develop a plan for obtaining all records of medical treatment provided to members of the Armed Forces by allies of the United States in Operation Enduring Freedom and Operation Iraqi Freedom. The provision would also require the Secretary to prescribe a policy on the collection and dissemination of in-theater individual personnel location data.

The House bill contained no similar provision.

The House recesses.

Declassification of information on exposures to environmental hazards (sec. 735)

The Senate amendment contained a provision (sec. 1305) that would require the Secretary of Defense to review and revise as appropriate the classification policies of the Department of Defense to facilitate the declassification of data that is potentially useful for monitoring and assessing the health of members of the Armed Forces who have been exposed to environmental hazards during overseas deployments.

The House bill contained no similar provision.

The House recesses.

Report on training on environmental hazards (sec. 736)

The Senate amendment contained a provision (sec. 1306) that would require a report by the Secretary of Defense to the Committees on Armed Services of the Senate and the House of Representatives on the training on environmental hazards that is provided by the Armed Forces to medical personnel who are deployed to the field in support of combat personnel. The provision would also require a report to congressional defense committees on actions taken by Department of Defense officials in response to health concerns expressed by members of the Armed Forces during post-deployment health assessments.

The House recesses with an amendment to remove the reporting requirement on actions taken by Department officials in response to health concerns expressed by members of the Armed Forces during post-deployment health assessments from this provision.

The conferees intend that the report required by this provision on actions taken by Department officials to health concerns expressed by members of the Armed Forces during post-deployment

health assessments will be addressed by a reporting requirement elsewhere in this Act.

Uniform policy for meeting mobilization-related medical care needs at military installations (sec. 737)

The Senate amendment contained a provision (sec. 1307) that would require the Secretary of Defense to prescribe through regulations a policy to ensure that anticipated health needs of members of the Armed Forces at mobilization installations can be met at those installations. The policy would include procedures for arrangements for health care provided by the Secretary of Veterans Affairs, services of local health care providers, and temporary employment of health care personnel at such installations.

The House bill contains no similar amendment.

The House recedes with an amendment to clarify the definition of the term military installation, and to require the Secretary of Defense to establish a uniform policy through the secretaries concerned and military command structure for meeting anticipated health needs at mobilization installations.

Full implementation of Medical Readiness Tracking and Health Surveillance Program and Force Health Protection and Readiness Program (sec. 738)

The Senate amendment contained a provision (sec. 1308) that would require the Secretary of Defense, acting through the Under Secretary of Defense for Personnel and Readiness and in conjunction with the secretaries of the military departments, to fully implement at all levels the Medical Readiness Tracking and Health Surveillance Program under this title, and the Force Health Protection and Readiness Program of the Department of Defense.

The House recedes.

Reports and Internet accessibility relating to health matters (sec. 739)

The Senate amendment contained a provision (sec. 1309) that would require the Secretary of Defense to submit annually to the Committees on Armed Services of the Senate and the House of Representatives a report on the Force Health Protection Quality Assurance Program. The provision would require that the report include an audit of the extent to which the serum samples required to be obtained from members of the Armed Forces before and after deployment are stored in the serum repository of the Department of Defense, and an audit of the extent to which health assessments required before and after deployment are being maintained in the electronic database of the Defense Medical Surveillance System.

The provision would also require that the annual report to the congressional defense committees include an analysis of actions taken by the Department to respond to health concerns expressed by members of the Armed Forces upon return from a deployment, and an analysis of actions taken by Department personnel to evaluate or treat members of the Armed Forces who are confirmed to have been exposed to occupational or environmental hazards deleterious to their health during a deployment.

The provision would include a requirement for an annual report on compliance by the military departments with Department policy on recording of health assessment data in military health records. The provision would also require that the Chief Information Officer of each military department ensure that information on Department policies regarding pre-deployment and post-deployment health policies are available through an online portal website of that military department.

The House bill contains no similar amendment.

The House recedes with an amendment to remove the requirement for a report on actions taken by the Department to evaluate or treat former members of the Armed Forces who are confirmed to have been exposed to occupational or environmental hazards during deployment. The amendment would also clarify that health assessment data required in section 1074(f) of title 10, United States Code, would be recorded in military health records.

LEGISLATIVE PROVISIONS NOT ADOPTED

Demonstration project on health benefits for Reserves

The House bill contained a provision (sec. 701) that would require the Secretary of Defense to conduct a three-year demonstration project to provide TRICARE coverage for Ready Reserve members not on active duty who are ineligible for employer-sponsored health benefits. The purpose of the demonstration would be to determine whether such coverage enhances medical readiness, recruiting, and retention of Reserve component members.

The Senate amendment contained a provision (sec. 701) that would direct the Secretary to carry out a demonstration project under section 1092 of title 10, United States Code, to determine the need for, and feasibility of, providing benefits under TRICARE to members of the Ready Reserve who are eligible for unemployment compensation, continuously unemployed after the expiration of such compensation, or ineligible for employer-provided health care coverage.

The conference agreement does not include these provisions.

The conferees acknowledge the preference of the Secretary to conduct a demonstration project and expect the Secretary to proceed with a demonstration project to assess the feasibility and effectiveness of providing TRICARE benefits to Reserve members without employer-provided health insurance coverage using existing authority in section 1092 of title 10, United States Code. The conferees request that the Comptroller General include in the evaluation of the needs of Reserves for health care required by section 705 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108-136) a report on actions taken by the Department to prepare for a demonstration project on the feasibility of providing TRICARE benefits to Reserve members without employer-provided health insurance.

Continuation of non-TRICARE health benefits plan coverage for certain Reserves called or ordered to active duty and their dependents

The Senate amendment contained a provision (sec. 707) that would direct the Secretary of Defense to pay private health insurance premiums for the dependents of a Reserve member ordered to extended active duty and who would then not be eligible for TRICARE.

The House bill contained no similar provision.
The Senate recesses.

Exceptional eligibility for TRICARE Prime Remote

The House bill contained a provision (sec. 713) that would authorize the Secretary of Defense to waive all restrictions with regard to TRICARE Prime Remote medical coverage for active-duty family members that reside at a remote location without regard to the sponsor's current or past assignment. Such a waiver would occur if the Secretary determines that exceptional circumstances warrant such coverage.

The Senate amendment contained no similar provision.
The House recesses.

The conferees believe that there exist today situations of extreme hardship for beneficiaries, particularly minor children, caused by exceptional circumstances through no fault of their own and beyond their control. The conferees urge the Secretary to look within existing authorities for means to remedy these extreme circumstances. If existing authorities do not allow for such remedy, the Secretary shall submit to Congress recommendations to address such exceptional situations.

Addition of certain unremarried former spouses to persons eligible for dental insurance plan of retirees of the uniformed services

The House bill contained a provision (sec. 717) that would permit certain unremarried former spouses of a member or former member to participate in the TRICARE Retiree Dental Program, if they do not have dental coverage under an employer-sponsored health plan.

The Senate amendment contained no similar provision.
The House recesses.

Vaccine Healthcare Centers Network

The Senate amendment contained a provision (sec. 720) that would require the Secretary of Defense to establish the Vaccine Healthcare Centers Network for the purpose of monitoring adverse reactions of members of the Armed Forces to vaccines and, in addition, to improve the safety and quality of vaccine administration for members of the Armed Forces.

The House bill contained no similar provision.
The Senate recesses.

The conferees acknowledge that the Vaccine Healthcare Centers in existence today have made contributions to the quality monitoring system for adverse reactions to anthrax and smallpox immunization programs conducted by the Department of Defense. The Secretary should examine the feasibility and necessity of the estab-

lishment of an expanded Vaccine Healthcare Centers Network in the context of a review of the adequacy of existing clinical immunization safety, educational, training and research programs for military members and providers involved in immunization of military service members. The Secretary should also make recommendations on improvements as necessary in submission of data to the Vaccine-related Events Reporting System, and access to clinical management services for members who experience vaccine adverse events.

The conferees strongly encourage each of the military departments to continue to provide funds required by the existing Vaccine Healthcare Centers based on each service's share of the total force vaccinated.

Use of Department of Defense funds for abortion

The Senate amendment contained a provision (sec. 721) that would authorize the use of Department of Defense funds for abortions in cases in which a pregnancy occurred as a result of an act of rape or incest.

The Senate amendment contained a provision (sec. 914) that would establish a United States Military Cancer Institute within the Uniformed Services University of the Health Sciences. The institute would conduct research on the causes, prevention, and early detection of cancer, including epidemiological features of cancer and impact of genetic and environmental factors and disparities in health among populations of various ethnic origins. The research would also include research on oncologic nursing.

The House bill contained no similar provision.

The Senate recesses.

The conferees acknowledge that the United States Military Cancer Institute continues to operate under the auspices of the Uniformed Services University of the Health Sciences, and has received appropriations since fiscal year 2002. The conferees commend the United States Military Cancer Institute for its worthy contributions to cancer research, prevention, and treatment.

Use of civilian experts as consultants

The Senate amendment contained a provision (sec. 1310) that would clarify that nothing contained in amendments to this title should be construed to limit the authority of the Secretary of Defense to procure the services of experts outside the Federal Government for performing any function to comply with requirements for readiness tracking and health surveillance.

The House bill contained no similar provision.

The conferees expect that the Secretary will use existing authority to procure the services of outside experts as needed for any of the requirements of this title.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would: (1) codify the provision in the Office of Federal Procurement Policy Act; (2) make adjustment to acquisition thresholds mandatory rather than discretionary to ensure that all thresholds are adjusted in the same way; (3) establish a petition process for thresholds omitted by the Federal Acquisition Regulatory Council; (4) supercede other inflation adjustment statutes to ensure there is no conflicting authority; and (5) address procurement thresholds enacted in law after October 1, 2000.

Under the test program, prime contractors may submit a plan designed to provide the maximum subcontracting opportunity for small, disadvantaged, and women-owned small business concerns that covers all anticipated contracts on a plant, division, or corporate basis, rather than for each Federal contract and subcontract of more than \$500,000 (or \$1.0 million in the case of construction contracts) awarded as required under section 8(d) of the Small Business Act (Public Law 85-536, as amended).

The House bill contained no similar provision.

Subtitle E—Other Acquisition Matters

Review and demonstration project relating to contractor employees (sec. 851)

The House bill contained a provision (sec. 822) that would require the Secretary of Defense to conduct a review of Department of Defense policies, procedures, and practices relating to employees of defense contractors and their subcontractors. The provision also require the Secretary to conduct a demonstration program for the

procurement of military construction, renovation, maintenance or repair service on military installations to ensure employees are properly authorized to be employed in the United States and properly qualified to perform the services required under the contract.

The Senate amendment contained no similar provision.

The Senate amendment contained a provision (sec. 868) that would provide for the continuation and completion of existing contracts (including any options) awarded to the blind and severely disabled for the operation of military troop dining facilities, military mess halls, and other similar military dining facilities.

The House bill contained no similar provision.

The House recesses with an amendment that would cover contracts awarded under the Randolph-Sheppard Act (28 U.S.C. 107).

Defense procurements made through contracts of other agencies (sec. 854)

The Senate amendment contained a provision (sec. 815) that would prohibit the Department of Defense from paying more than a 1 percent service charge for using other agency contracts to purchase goods and services.

The House bill contained no similar provision.

The House recesses with an amendment that would delete the prohibition on paying fees in excess of 1 percent of the amount charged by the contractor and substitute: (1) a requirement that the procurement is done in accordance with military department or defense agency procedures for reviewing and approving the use of non-Department contracts; and (2) a reporting requirement for all service charges imposed on purchases in amounts greater than the simplified acquisition threshold in fiscal years 2005 and 2006. Approvals of inter-agency transactions under this provision should be in writing, with supporting rationale, and retained in an official file.

The conferees expect the Department's review and approval procedures to ensure that any fees are reasonable in relation to the work actually performed by the contracting agency. The conferees do not believe that the Department should pay fees in excess of 1 percent to an outside agency that merely acts as a conduit for Department requirements. The conferees are particularly concerned that in some instances, the Department's orders appear to have

been awarded to contractors who charge their own fees for directing the work to preferred subcontractors without providing any value added.

The conferees also expect the Department's review and approval procedures to ensure that the goods or services to be procured are within the scope of the non-Department contract vehicle, and that the supplies or services to be acquired are consistent with the appropriated funding to be utilized. In addition, the Department's review and approval procedures should ensure that orders placed against non-Department contracts are in compliance with all applicable Department-unique statutes, regulations, directives, and other requirements prior to approval. The use of multiple award contracts must be consistent with the requirements of section 803 of the National Defense Authorization Act for Fiscal Year 2002 (Public Law 107-107 (Competition Requirements for Purchase of Services Pursuant to Multiple Award Contracts)); Part 8.002 of the Federal Acquisition Regulation (Priorities for Use of Government Supply Sources); Part 17.5 of the Federal Acquisition Regulation (Interagency Acquisitions under the Economy Act); and the Department of Defense Instruction 4000.19 (Interservice and Intergovernmental Support). Purchases of information technology should also be consistent with Department information security requirements and the requirements of the Department business system enterprise architecture and transition plan. Officials should be familiar with the requirements of the basic contract and should provide to the assisting agency any Department-unique requirements associated with the acquisition.

Requirements relating to source selection for integrated support of aerial refueling aircraft fleet for the Air Force (sec. 855)

The Senate amendment contained a provision (sec. 871) that would require the Secretary of Defense to prevent the Secretary of the Air Force from proceeding with the acquisition of aerial refueling aircraft, by lease or other contract, either with full and open competition or under section 135 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108-136) until 60 days after the Secretary of Defense has reviewed applicable documentation and submitted a determination to the congressional defense committees that the acquisition is in compliance with all currently applicable laws, Office of Management and Budget circulars, and regulations. The provision would also require an independent review of the acquisition by the Comptroller General and the Inspector General of the Department of Defense. The provision would also require operational testing prior to proceeding beyond low-rate initial production of the aircraft. The provision would also require a competition for the integrated support of the aircraft, and require pricing information with respect to commercial items covered by the lease or contract. The provision would also require the Secretary of the Air Force to contact the Inspector General of the Department of Defense to review and approve any Air Force use of non-Federal audit services for any lease or other contract for the acquisition of aerial refueling aircraft.

The House bill contained no similar provision.

The House recesses with an amendment to require the Department to review the costs and benefits of using federal employees or contractors for the logistics support of any new tanker aircraft and, if the Air Force chooses to use a contractor for this support, that any such contract be conducted under the procedures of the Competition in Contracting Act.

The conferees understand that the Department is working on a new aerial refueling validated capabilities document in accordance with applicable Chairman of Joint Chiefs Instructions. The conferees also note that on February 24, 2004, the Acting Undersecretary of Defense for Acquisition, Technology and Logistics directed the Secretary of the Air Force to conduct an analysis of alternatives (AOA) for recapitalizing the KC-135 fleet as required by section 134(b) of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108-136), and that the Secretary of Defense has directed that this analysis, along with a completed aerial refueling portion of the mobility capabilities study be accelerated. In addition, at the direction of the Secretary, the National Defense University, the Defense Science Board and the Department of Defense Inspector General prepared independent evaluations on various aspects of the aerial tanker refueling issue. The conferees expect that the Secretary of Defense will fully consider all of the recommendations from these studies and reports prior to proceeding with the acquisition of aerial refueling aircraft for the Air Force.

LEGISLATIVE PROVISIONS NOT ADOPTED

Responsibilities of acquisition executives and chief information officers under the Clinger-Cohen Act

The Senate amendment contained a provision (sec. 801) that would require that the Clinger-Cohen Act requirements as applied to weapons and weapon systems be administered by senior acquisition executives of the three military services and overseen by a board of senior acquisition officials.

The House bill contained no similar provision.

The Senate recesses.

The Clinger-Cohen Act (40 U.S.C. 113) establishes requirements for capital planning, investment control, and performance and results-based management processes in the acquisition of information technology. While the Clinger-Cohen Act designates that the Chief Information Officer (CIO) is responsible for information technology in general, the Act does not specify who within the Department of Defense is responsible for administering these requirements for information technology embedded in major weapon systems. The Department's current practice is to administer the requirements of the Clinger-Cohen Act through the Department's CIO, even for information technology embedded in major weapon systems that are acquired by senior acquisition executives of the military departments. This approach raises the possibility of overlapping responsibilities and inefficient and/or duplicative procedures for the acquisition of information technology embedded in major weapon systems.

Therefore, the conferees direct the Secretary of Defense to review the Department's current approach to implementing the re-

quirements of the Clinger-Cohen Act with respect to information technology embedded in major weapon systems; the conferees also direct the Secretary to identify any overlapping responsibilities and inefficient and/or duplicative procedures arising from possible dual responsibilities of the CIO and senior acquisition executives for the acquisition of such information systems. The conferees further direct the Secretary to report to the congressional defense committees and the Committee on Governmental Affairs of the Senate and the Committee on Governmental Reform of the House of Representatives no later than June 15, 2005, on the Department's strategy for addressing any such overlapping responsibilities and inefficient and/or duplicative procedures, including any legislative changes that the Secretary may choose to recommend.

The conferees recognize that improving competitiveness in the defense industrial base is an effective method of retaining domestic defense jobs and reducing the pressure to outsource jobs.

The conferees recommend that the Secretary of Defense establish a program to encourage qualified defense contractors to implement cost reduction strategies that would improve competitiveness to avoid the outsourcing of jobs. Examples of such strategies could include retraining employees, plant upgrades, technology development, and other production cost-cutting measures.

Preference for domestic freight forwarding services

The House bill contained a provision (sec. 815) that would require the Secretary of Defense to grant preferences to freight for-

The House recesses.

The Senate amendment contained a provision (sec. 816) that would express the sense of the Senate that the thresholds for the requirement for the reservation of contracts for small businesses and the use of simplified acquisition procedures should be adjusted in the same amount when adjusting these thresholds for inflation.

The House bill contained no similar provision.

The Senate recesses.

Extension of contract goal for small disadvantaged businesses and certain institutions of higher education

The Senate amendment contained a provision (sec. 821) that would extend section 2323 of title 10, United States Code, for three years.

The conferees note that section 2323, which establishes a 5 percent goal for Department of Defense contracting with small disadvantaged businesses and certain institutions of higher education, would continue to be effective until September 2006, and that a decision on whether to extend this authority will be deferred to later legislation.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would include the USD,P on the NWC, but would leave the membership of the AFPC unchanged.

The conferees believe that the addition of the USD,P should allow the other members of the NWC to become more closely involved with nuclear related policy decisions. Additionally, the change will make the decisions that flow from the NWC more responsive to policy direction. The conferees note that this is the first time an additional member has been added to the NWC since its inception in 1987. The conferees expect the next two annual reports of the NWC required by subparagraph (f) of section 179 of title 10, United States Code, will discuss implementation of this provision.

the Department. The provision would also establish minimum criteria for such information, and would require the Secretary to establish a policy for the expeditious transmission of any report or evaluation at any level of the Department that results in the identification of any such information to the Secretary and the Joint Chiefs of Staff. The guidance is to be issued by the Secretary not later than 90 days after enactment.

The Senate amendment contained no similar provision.

The Senate recesses with a clarifying amendment.

The Senate Amendment contained no similar provision.

The House recedes.

Responses to congressional inquiries

The House bill contained a provision (sec. 907) that would require the Secretary of Defense and other Department of Defense officials to respond to questions for the record from hearings of the Committees on Armed Services of the Senate and the House of Representatives within 21 days of receiving such questions.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that Department officials frequently take months to respond to questions for the record.

The two committees conduct hearings to inform Congress and the public on significant issues regarding the operations of the Department. These hearings often serve as the basis for legislative, budget, and policy positions of the two committees. Because officials of the Department are not always prepared to respond to the full range of questions at such hearings, questions for the record form an important part of the record of such hearings.

Lengthy delays in responding to questions for the record are contrary to the public interest because they delay the availability of critical information to Congress and the public. In many cases, responses are not made available until after the committees have made decisions on legislative, budget, and policy matters to which the information relates. This is not in the interest of either the Congress or the Department.

The conferees recognize that questions for the record for some hearings are extensive and that, in some instances, the compilation of answers and responses can and does require detailed research and discussion prior to their transmission to the Congress. For this reason, the conferees have determined that it would not be practical to establish a single, uniform deadline for all responses to questions for the record.

Overall, however, the Department must do a far better job of responding to questions for the record than it has in the recent past. Accordingly, the conferees direct the Secretary of Defense and other officials of the Department to respond to questions for the record within 21 days of receiving such questions, unless the Secretary or other official has informed the committee concerned in writing that he or she will be unable to meet the 21-day deadline and stated the date by which the questions will be answered.

The conferees note that the Members of the congressional defense committees frequently request information from the Department through letters, meetings, and other mechanisms. The con-

erees expect that officials of the Department will respond promptly to such inquiries as well.

Directors of Small Business Programs

The Senate amendment contained a provision (sec. 912) that would change the title of the Department of Defense's Office of Small and Disadvantaged Business Utilization to the Office of Small Business Programs.

The House bill contained no similar provision.

TITLE X—GENERAL PROVISIONS

ITEMS OF SPECIAL INTEREST

Coordination of Department of Defense Homeland Defense/Homeland Security Initiative in Support of First Responders

The conferees remain concerned about the level of planning and coordination between the Department of Defense and other federal departments and agencies that the Department might be called upon to assist in cases of natural or man-made disasters.

Therefore, the conferees direct the Secretary of Defense to provide the Committees on Armed Services of the Senate and the House of Representatives a report by March 5, 2005, detailing the Department's strategy and plans to coordinate with the Department of Homeland Security (DHS), the Department of Justice (DoJ), and state, local and tribal governments on command, control and communication problems encountered during man-made and natural disasters. Additionally, the report shall address technology developments and interoperability issues that exist or may exist between the Department and other federal departments, and state, local and tribal first responders, as well as possible solutions to resolve such issues. The conferees encourage the Department to continue its efforts to identify technologies that may serve homeland security purposes, and to make such technologies available to DHS, DoJ and the first responder community.

The resolution of ratification for the Protocol to the North Atlantic Treaty of 1949 on the Accession of Poland, Hungary, and the Czech Republic contained a provision (section 3(2)(c)(ii)) requiring a specific authorization for

U.S. payments to the common-funded budgets of NATO for each fiscal year, beginning in fiscal year 1999, that payments exceed the fiscal year 1998 total.

The amendment would also require the Secretary of Defense to submit a report to the Committees on Armed Services of the Senate and the House of Representatives by March 1, 2005 that catalogues the elements of other costs and other contracts which are currently used in justification materials of the budget request.

The conferees note that the Committees on Armed Services of the Senate and the House of Representatives will continue to work with the Department and the services to improve the information included in the annual O&B budget submissions.

Licensing of intellectual property (sec. 1004)

The House bill contained a provision (sec. 1003) that would authorize the Secretary concerned, under regulations prescribed by the Secretary of Defense, to license trademarks, service marks, certification marks, and collective marks owned by a military department, and to retain and expend fees received from such licensing. Fees received in excess of the costs of registration and licensing could be expended for recruiting and retention and morale, welfare, and recreation activities of the military department.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees intend to monitor the expenditure of funds in this account and expect the Department of Defense to provide briefings to the congressional defense committees on this issue. Although the statutory limits are being lifted, the conferees remain concerned that sufficient funding is not being requested or expended in the various categories for medical countermeasures against biological warfare threats. The conferees urge the Department to program more robust funding for biological defense programs consistent with the needs and objectives of these programs, and expect the Department to use the money authorized to develop medical countermeasures against biological warfare threats.

basis to the Taipei Economic and Cultural Office of the United States, the Anchorage-class dock landing ship *Anchorage* (LSD-36). The provision would also direct that: (1) any expense incurred by the United States in connection with a transfer on a grant basis shall be charged to the recipient; and (2) to the maximum extent possible, the President shall require, as a condition of transfer, the repair and refurbishment associated with the transfer be accomplished in a shipyard located in the United States.

The amendment would also direct that any expense incurred by the United States in connection with a transfer authorized by this provision be charged to the recipient.

Independent study to assess cost-effectiveness of the Navy ship construction program (sec. 1014)

The House bill contained a provision (sec. 1012) that would require the Secretary of Defense to have a study conducted by an entity independent of the Department of Defense on the cost-effectiveness of the ship construction program of the Navy. The study would examine various approaches for how the Navy ship construction program could be made more cost-effective in the near-term, and how the United States shipbuilding industry might be made globally competitive through a nationally integrated effort over the next decade.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to provide for a group of industrial experts to assess priorities for potential implementation of the various approaches in the near-term study, with an assessment of the return on investment. It would also require an assessment of priorities for potential implementation of the various approaches for the nationally, integrated effort, with the objective being to create a healthier and more viable U.S. shipbuilding industrial base.

The conferees believe the group chosen for this study should be five to ten industrial experts who represent an array of industrial

sectors, not just the shipbuilding industry. Many sectors of the U.S. industrial base have had to retool processes and equipment to become more competitive. Since the rate of shipbuilding is much lower, competitiveness has not provided the same incentive for this sector. The conferees are aware of and support the work of the National Shipbuilding Research Program-Advanced Shipbuilding Enterprise (NSRP-ASE), including its lean shipbuilding initiative. The conferees would expect the group of industrial experts chosen for this study to become familiar with this work, and to consider the potential for using the NSRP-ASE to implement some of the various approaches.

Limitation on disposal of obsolete naval vessel (sec. 1015)

The Senate amendment contained a provision (sec. 1012) that would not allow the Secretary of the Navy to dispose of the decommissioned destroyer *ex-Edson* (DD-946) to a nonprofit organization before October 1, 2007, unless the Secretary first determines that there is no nonprofit organization that meets the criteria for donation of that vessel under section 7306(a)(3) of title 10, United States Code.

The House bill contained no similar provision.

The House recedes.

Subtitle C—Counterdrug Matters

Use of funds for unified counterdrug and counterterrorism campaign in Colombia (sec. 1021)

The Senate amendment contained a provision (sec. 1052) that would extend through fiscal year 2006, the expanded authority for the Department of Defense to use counterdrug funds to support the Government of Colombia's unified campaign against narcotics cultivation and trafficking, and against the terrorist organizations involved in such drug trafficking activities. The provision would also change the limitation on the number of U.S. military personnel assigned to Colombia in support of Plan Colombia to 800 personnel, and the number of federally funded contractor personnel employed in support of Plan Colombia to 600 personnel.

The House bill contained similar provisions (sec. 1031 and 1032) that would extend the expanded authority through fiscal year 2006 and would increase the number of U.S. military personnel in Colombia to 500.

The House recedes.

Sense of Congress and report regarding counter-drug efforts in Afghanistan (Sec. 1022)

The Senate amendment contained a provision (sec. 1056) that would express the sense of the Senate that: (1) the President should make the substantial reduction of drug trafficking in Afghanistan a priority in the war on terror; (2) the Secretary of Defense should, in coordination with the Secretary of State, work to a greater extent with the Government of Afghanistan and international organizations involved in counter-drug activities to provide a secure environment for counter-drug personnel in Afghanistan; and (3) additional efforts should be made by the Armed

Forces of the United States, with coalition forces, to significantly reduce narcotics trafficking in Afghanistan, with particular focus on those traffickers with the closest links to known terrorist organizations. The provision also directed the Secretary of Defense to submit a report to Congress on progress made towards substantially reducing the poppy cultivation and heroin production capabilities in Afghanistan, and the extent to which profits from illegal drug activity in Afghanistan fund terrorist organizations and support groups that seek to undermine the Government of Afghanistan.

The House bill contained no similar provision.

The House recedes with an amendment that would express the sense of the Congress that: (1) the President should make the substantial reduction of illegal drug trafficking in Afghanistan a priority in the global war on terrorism; (2) the Secretary of Defense, in coordination with the Secretary of State and the heads of other appropriate federal agencies, should expand cooperation with the Government of Afghanistan and international organizations involved in the counter-drug activities to assist in providing a secure environment for counter-drug personnel in Afghanistan; and (3) the United States, in conjunction with the Government of Afghanistan and coalition partners, should undertake additional efforts to reduce illegal drug trafficking and related activities that provide financial support for terrorist organizations in Afghanistan and neighboring countries. The conferees further agree that the Secretary of Defense and the Secretary of State will jointly submit the aforementioned report.

The conferees note that there are strong, direct connections between terrorism and drug trafficking, and that the elimination of this funding source is critical to making significant progress in the global war on terror. It is clear that the military action against the Taliban in Afghanistan was designed, in part, to disrupt the activities of and financial support for terrorists. While progress in disrupting the financial links has been made, it is clear that some of the profits associated with opium harvested in Afghanistan continue to fund terrorists and terrorist organizations, including Al Qaeda, that seek to attack the United States and its interests. Additionally, the President of Afghanistan, Hamad Karzai, has stated that opium production poses a significant threat to the future of Afghanistan, and has established a plan of action to deal with this threat. It is for these and other reasons that the conferees believe that the United States, in conjunction with the Government of Afghanistan and coalition partners, should undertake additional efforts to reduce illegal drug trafficking and related activities that provide financial support for terrorist organizations in Afghanistan and neighboring countries. The conferees believe that the Department of Defense, in conjunction with other U.S. agencies and coalition partners, must have a comprehensive strategy that provides consistent funding from year to year to achieve significant progress in reducing drug cultivation, trafficking, and related activities in Afghanistan.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would add a reporting requirement for the Secretary to describe the management structure of each museum. The amendment would also add a reporting requirement for the Secretary to provide information on the prioritization process within the Department and within each military department for funds allocation and personnel support for museums.

While the conferees agree that military museums serve an important role in the preservation of the history and heritage of the U.S. military, the conferees are concerned that the proliferation of military museums nationwide may be draining fiscal resources needed for other requirements. The conferees expect that the information to be provided by the Secretary will be used as a database for future discussions with the Department about the effective management of military museums.

The provision would require that an unclassified report, with a classified annex as necessary, be submitted no later than 180 days after the date of the enactment of this Act. The conferees note their concern about potential al Qaeda activity in the Western Hemisphere, and the indirect and direct threat to United States national security that such activity represents.

This section would also repeal sections 9741, 9743, and 9746 of title 10, United States Code. These changes reflect the Secretary of Defense's role in transportation versus the individual role of the service secretaries.

Subtitle I—Other Matters

Liability protection for Department of Defense volunteers working in maritime environment (sec. 1081)

The House bill contained a provision (sec. 1075) that would modify section 1588 of title 10, United States Code, to add the training of cadets and midshipmen at the service academies to the voluntary services that may be accepted, and include chapters 20 and 22 of title 46 to the laws covered by this provision.

The Senate amendment contained a provision (sec. 1063) that would extend to volunteers working in the maritime training environment the same status and legal protections, for purposes of claims and loss, presently available to volunteers working in support of land-based programs.

The House recedes with an amendment that would modify section 1588 of title 10, United States Code, to add chapters 20 and 22 of title 46 Appendix to the provisions of law listed in subparagraph (d) with the intent of not limiting the liability protection afforded volunteers in the maritime environment only to the service academies.

The conferees appreciate the importance of voluntary services provided by individuals for the benefit of soldiers, sailors, airmen, and marines and their families. As reflected in section 1588 of title 10, United States Code, voluntary services are received in connection with a wide variety of programs and activities. Under many circumstances, the ability of the services to offer protection from personal liability is a necessary condition for the acceptance of voluntary services. This is not always the case; however, and the criteria for identifying those functions and voluntary services appropriate for inclusion in section 1588 are not evident.

The conferees direct the Secretary of Defense to submit a report by June 1, 2005, to the Committees on Armed Services of the Senate and the House of Representatives describing the manner in which the Department of Defense currently determines what voluntary services to accept, which of the accepted services warrant liability protection, and how the Department oversees their delivery under section 1588. The Secretary should prescribe the policy of the Department of Defense regarding the acceptance of voluntary services and, in consultation with the Department of Justice, submit proposals for legislative changes, if needed. The conferees urge the Department of Defense to develop policies and procedures that will enable commands and activities to appropriately accept and supervise voluntary services and, when called for, afford immunity from personal liability.

Sense of the Congress concerning media coverage of the return to the United States of the remains of deceased members of the Armed Forces from overseas (sec. 1082)

The Senate amendment contained a provision (sec. 366) that would state the sense of the Congress that the Department of Defense policy regarding no media coverage of the transfer of the remains of deceased members of the Armed Forces appropriately protects the privacy of the families and friends of the deceased, and is consistent with constitutional guarantees of freedom of speech and freedom of the press.

The provision would also authorize water or wastewater treatment projects to be conducted under an energy savings performance contract.

The House bill contained no similar provision.

The House recesses with an amendment to reauthorize this authority until October 1, 2006.

Sense of Congress and policy concerning persons detained by the United States (sec. 1091-1093)

The House bill contained a provision (sec. 906) that would require the Secretary of Defense to prescribe policies to prevent the abuse of detainees held by the United States as part of the Global War on Terrorism, and would require that the policies be transmitted, and a report on implementation be submitted, to the Committees on Armed Services of the Senate and the House of Representatives. It also contained a provision (sec. 1207) expressing the sense of Congress concerning the abuse of persons in United States custody in Iraq.

The Senate amendment contained a provision (sec. 1029F) that would require detailed reports on foreign national detainees in the custody of the Department of Defense, and the detention facilities and practices of the Department. It also contained a provision (sec. 1057) that would make findings on United States adherence to international conventions on torture and cruel or inhuman treatment or punishment; prohibit torture or cruel, inhuman, or degrading treatment or punishment that is prohibited by the Constitution,

laws, or treaties of the United States; require the Secretary of Defense to prescribe regulations to ensure compliance with the prohibition; and report twice a year on investigations of possible violations of the prohibition. The Senate amendment also contained a provision (sec. 1059C) that would set out the policy of the United States concerning torture and inhumane treatment; require reports on detainees, military commissions, and interrogation techniques; require the submission of certain reports prepared by the International Committee of the Red Cross; and require the Secretary to certify that federal and contractor personnel engaged in the handling of detainees have been trained in U.S. international obligations and the law of war.

The House recedes with an amendment that would state the sense of Congress with regard to misconduct by certain U.S. personnel at the Abu Ghraib prison in Iraq; the professionalism and morality of the vast majority of American servicemembers serving there; the law governing the treatment of detainees; and the prohibition of torture or cruel and inhumane treatment contained in applicable domestic and international law. The amendment further sets out the policy of the United States with respect to the proper treatment of detainees; the need for thorough investigation and prosecution, as appropriate, of unlawful treatment of detainees; the need to ensure that all personnel of the United States Government understand their obligations to comply with the prohibitions against torture and inhumane treatment; the need to ensure the proper status of detained persons while a determination is made as to their prisoner of war status under the applicable Geneva Convention; and the need for expeditious prosecution of detainees in U.S. custody who are alleged to have committed terrorist acts or other crimes.

The amendment would further require the Secretary of Defense to ensure that policies are prescribed, within 150 days of enactment, to ensure that detainees are treated in a humane manner consistent with the international obligations of the United States and the aforementioned policies on the treatment of detainees; would set out minimum criteria for these policies; and would require that the Secretary certify that federal employees and contractor personnel involved with handling or interrogation of detainees have fulfilled annual training requirements on the law of war and U.S. obligations under international law.

Finally, the amendment contains several reporting requirements, including a requirement that the policies prescribed be forwarded by the Secretary to the Committees on Armed Services of the Senate and the House of Representatives within 30 days. The Secretary is to report to the committees within one year after prescribing the policies on further steps taken to implement them. Nine months after enactment and annually thereafter, the Secretary would be required to submit to the committees a report giving notice of any investigations into violations of international or U.S. law regarding the treatment of detainees; and aggregate data on foreign national detainees in the custody of the Department of Defense during the prior year. The reporting provisions of this provision expire on December 31, 2007.

The House bill contained a provision (sec. 1206) that would recognize and thank U.S. Army Specialist Joseph Darby for his courageous actions in alerting his superiors to misconduct by American soldiers at Abu Ghraib prison in Iraq, and express the sense of Congress that Specialist Darby should be afforded appropriate protection and recognition by the Department of Defense.

The maximum amount that may be waived under this statute would be the micro-purchase threshold, currently \$2,500.

The Senate amendment contained no similar provision.
The House recesses.

The conferees request that the Department of Defense provide the following information: (1) proposed regulations for the purposes of this section; (2) how this authority will be used with the existing law related to claims or debt collection, including the Debt Collection Improvement Act; (3) the number of estimated transactions that will be used with this authority regarding amounts owed by members of the Armed Forces and Department civilian personnel; (4) the number of estimated transactions that will be used with this authority regarding amounts owed by contractors; and (5) the procedures that will be implemented to track debts waived for members of the Armed Forces and Department civilian personnel for tax implications.

Report on amounts remitted and reimbursed during fiscal year 2004 under section 1007 of Public Law 108-136

The House bill contained a provision (sec. 1008) that would require the Secretary of Defense to submit a report not later than 30 days after the end of fiscal year 2004 on amounts remitted and reimbursed during fiscal year 2004 under section 1007 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108-136; 117 Stat. 1585; 10 U.S.C. 2241 note).

The Senate amendment contained no similar provision.

The House recesses.

The conferees note that section 1007 of the National Defense Authorization Act for Fiscal Year 2004 permits funds appropriated to the Department of Defense to be transferred to the Department of State as payment for a fee charged by the Department of State for maintenance, upgrade, or construction of U.S. diplomatic facilities only to the extent that the amount charged in any given year exceeds the total amount of unreimbursed costs incurred by the Department of Defense during that year in providing goods and services to the Department of State. Section 8067 of the Defense Appropriations Act for Fiscal Year 2005 permits funds appropriated to the Department of Defense to be transferred to the Department of State as remittance for a fee charged by the Department of State for fiscal year 2005 for maintenance, upgrade, or construction of U.S. diplomatic facilities only to the extent that the amount of the fee so charged exceeds the total amount of the unreimbursed costs incurred by the Department of Defense during that fiscal year in providing goods and services to the Department of State.

The conferees further note that the capital security cost sharing program has not been authorized by the Congress. While the conferees recognize the need to upgrade and construct new U.S. diplomatic facilities, the conferees oppose the use of a capital cost sharing program as a means of accomplishing this goal. As currently described by the administration, the capital cost sharing program does not take into account the goods and services that other departments and agencies provide to the Department of State at no cost. The conferees urge the administration to request sufficient funds for the Department of State in future year budget requests to provide for the costs of upgrading or constructing U.S. diplomatic facilities.

Limitation on leasing of foreign-built vessels

The House bill contained a provision (sec. 1014) that would restrict the secretary of a military department from entering into a contract for a lease or charter of a vessel for a term of more than 12 months, including all options to renew or extend the contract, if the hull, a major component of the hull, or superstructure of the vessel is constructed in a foreign shipyard. The Senate recesses.

The conferees direct the Secretary of Defense to submit a report to the congressional defense committees by February 1, 2005, that assesses the availability of potential ballistic missile defense test ranges for overland intercept flight tests of defenses against ballistic missiles with a range of 750–1500 kilometers.

Sense of Congress on space launch ranges

The Senate amendment contained a provision (sec. 1035) that would express the sense of Congress that the Secretary of Defense should provide support for and continue the development of range safety systems to reduce costs and enhance technical capabilities and operational safety at U.S. space launch ranges.

The House bill contained no similar provision.

The Senate recesses.

The conferees continue to believe that safe, effective, and efficient space launch ranges are key to assured access to space. The conferees are aware of ongoing efforts to develop, test, and certify launch range technology based on Global Positioning System signals and inertial navigation that holds promise to improve down-range reentry support, increase launch support capability, lower range support costs, and improve range safety. The conferees encourage the Department of Air Force to support these efforts.

TITLE XI—CIVILIAN PERSONNEL MATTERS

ITEMS OF SPECIAL INTEREST

Fort Meade—work related illnesses

The conferees are concerned with continued reports of work related illnesses among the National Security Agency (NSA) employees at Fort Meade, Maryland. The conferees direct the Secretary of Defense to undertake an epidemiological study and health hazard evaluation related to NSA buildings at Fort Meade. The conferees believe the National Institute for Occupational Safety and Health of the Department of Health and Human Services is an appropriate federal government organization to perform such a study. The conferees expect the study to be completed by March 2006.

LEGISLATIVE PROVISIONS ADOPTED

Payment of Federal employee health benefit premiums for mobilized Federal employees (sec. 1101)

The House bill contained a provision (sec. 1101) that would authorize a federal government employee, who is a member of a Reserve component ordered to active-duty in support of a contingency operation and placed on leave without pay, to continue to receive coverage under the Federal Employee Health Benefit Program for 24 months. The provision would also authorize the agency to pay both the employee's share and the agency's share of the premiums for continued coverage up to 24 months.

The Senate amendment contained no similar provision.

The Senate recedes.

Foreign language proficiency pay (sec. 1102)

The House bill contained a provision (sec. 1102) that would eliminate the restriction in current law that foreign language proficiency pay may be paid only to those civilian employees working in support of contingency operations.

Pay and performance appraisal parity for civilian intelligence personnel (sec. 1103)

The House bill contained a provision (sec. 1103) that would require the Secretary of Defense to fix the rates of basic pay for employees within the Department's Civilian Intelligence Personnel System in relation to rates of pay provided for their counterparts

elsewhere within the Department of Defense. The provision would repeal maximum rates of pay and outline the performance appraisal system for senior executive service personnel.

The Senate amendment contained a similar provision (sec. 1103) that would also require the implementation of an appraisal system for Defense Intelligence Senior Executive Service personnel comparable to that provided for other senior executive service personnel in the Department of Defense that would make meaningful distinctions based on performance.

The House recedes with an amendment to clarify that pay rates for defense civilian intelligence personnel would be established in relation to the rates of pay provided for comparable positions in the Department of Defense, and subject to the same limitations on maximum rates of pay established for employees of Defense by law or regulation. The amendment would recede to the Senate's version of the performance appraisal system for senior executive service personnel in the Defense Intelligence Personnel System.

Pay parity for senior executives in defense nonappropriated fund instrumentalities (sec. 1104)

The House bill contained a provision (sec. 1104) that would authorize the Secretary of Defense to adjust the pay cap for Department of Defense nonappropriated fund executives to ensure that the compensation paid to such employees remains consistent with the Senior Executive Service employees.

The Senate amendment contained a similar provision (sec. 1105).

The House recedes with a technical amendment.

The conferees intend that in order to qualify for higher pay, the nonappropriated fund executives would meet performance standards established in a rigorous performance management system as required for federal civil service employees under section 5382 of title 5, United States Code.

Science, mathematics and research for transformation (SMART) defense scholarship pilot program (sec. 1105)

The Senate amendment contained a provision (sec. 1101) that would establish a pilot program within the Department of Defense to provide targeted educational assistance to individuals seeking a baccalaureate or an advanced degree in science and engineering disciplines that are critical to national security. This provision would allow individuals to acquire such education in exchange for a period of employment with the Department in the areas specified.

The House bill contained no similar provision.

The House recedes.

Report on how to recruit and retain individuals with foreign language skills (sec. 1106)

The Senate amendment contained a provision (sec. 1108) that would require the Secretary of Defense to submit a plan to the congressional defense and intelligence committees with the fiscal year 2006 budget request for expanding and improving the national se-

curity foreign language workforce of the Department of Defense, on both a near-term and a long-term basis.

The House bill contained no similar provision.

The House recedes with a technical amendment that would require the Secretary to submit the required plan to the congressional defense and intelligence committees no later than March 31, 2005, and incorporate the findings of the Senate's provision into this statement of managers.

The conferees agree that strengthening the foreign language workforce of the Department is a critical step in winning the global war on terrorism and improving the national security of the United States. The conferees find that: (1) The Federal Government has a requirement to ensure that the employees of its departments and agencies with national security responsibilities are prepared to meet the challenges of the current and future international environment; (2) According to a 2002 General Accounting Office report, federal agencies have shortages in translators and interpreters and an overall shortfall in the language proficiency levels needed to carry out their missions, which has adversely affected agency operations and hindered U.S. military, law enforcement, intelligence, counterterrorism, and diplomatic efforts; (3) Foreign language skills and area expertise are integral to, or directly support, every foreign intelligence discipline and are essential factors in national security readiness, information superiority, and coalition peacekeeping or warfighting missions; (4) Communicating in languages other than English and understanding and accepting cultural and societal differences are vital to the success of peacetime and wartime military and intelligence activities; (5) Proficiency levels required for foreign language support to national security functions have been raised, and what was once considered proficiency is no longer the case; (6) According to the Joint Intelligence Committee Inquiry into the 9/11 Terrorist Attacks, the U.S. intelligence community had insufficient linguists prior to September 11, 2001, to handle the challenge it faced in translating the volumes of foreign language counterterrorism intelligence it collected, including a readiness level of only 30 percent in the most critical languages that are used by terrorists; and (7) Because of this shortage, the Federal Government has had to enter into private contracts to procure linguist and translator services, including some positions that would be more appropriately filled by permanent federal employees or members of the U.S. Armed Forces.

The conferees expect the Secretary to formulate a comprehensive, achievable plan for improving the foreign language workforce of the Department, both military and civilian, and to work closely with other agencies of the Federal Government to ensure that the foreign language requirements of the United States are met.

Plan on implementation and utilization of flexible personnel management authorities in Department of Defense laboratories (sec. 1107)

The Senate amendment contained a provision (sec. 1109) that would require the Under Secretary of Defense for Acquisition, Technology and Logistics and the Under Secretary of Defense for Personnel and Readiness to jointly develop and submit to the Com-

mittees on Armed Services in the Senate and the House of Representatives a plan for the effective utilization of specific personnel management authorities designed to increase the mission responsiveness, efficiency, and effectiveness of Department of Defense laboratories.

The House bill contained no similar provision.

The House recesses with an amendment that would change the reporting requirements associated with the plan.

The conferees note that Secretary of the Navy Gordon England's letter to the Committee on Government Reform of the House of Representatives, dated April 26, 2004, stated that the Department "will not impose Best Practices in those laboratories that are temporarily exempt" from the National Security Personnel System. The Secretary further stated that the Department's laboratories "should be able to continue individually to refine and evolve their 'successfully tailored systems' over the next several years if they determine that such adjustments are beneficial and not disruptive to their workforce."

LEGISLATIVE PROVISIONS NOT ADOPTED

Accumulation of annual leave by intelligence senior-level employees

The Senate amendment contained a provision (sec. 1104) that would permit intelligence senior-level employees of the Department of Defense to accumulate annual leave in a manner identical to the Department's Senior Executive Service.

Prohibition of unauthorized wearing or use of civilian medals or decorations

The House bill contained a provision (sec. 1105) that would prohibit any person from merchandising or wearing a Department of Defense civilian medal or decoration without the written permission of the Secretary of Defense. The provision would also authorize the Attorney General to initiate a civil proceeding in a U.S. district court to enjoin the prohibited practice.

The Senate amendment contained no similar provision.

The House recesses.

TITLE XII—MATTERS RELATING TO OTHER NATIONS

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Matters Relating to Iraq, Afghanistan, and Global War on Terrorism

Commanders' Emergency Response Program (sec. 1201)

The House bill contained a provision (sec. 1203) that would authorize the Secretary of Defense to use, notwithstanding any other provision of law, up to \$300.0 million in operations and maintenance funding for additional costs due to Operation Iraqi Freedom and Operation Enduring Freedom for the Commanders' Emergency Response Program (CERP), under which commanders in Iraq and Afghanistan receive funds for use in small humanitarian and reconstruction projects in their areas of responsibility. The provision would require quarterly reports on the source and use of funds pursuant to this program.

The Senate amendment contained a similar provision (sec. 311), but did not include the phrase “notwithstanding any other provision of law.”

The Senate recedes with an amendment that would provide the Secretary authority to waive any provision of law that would prohibit, restrict, limit or otherwise constrain implementation of the CERP program in Iraq and Afghanistan. The provision would also require the Secretary to submit a report within 120 days to the Committees on Armed Services of the Senate and the House of Representatives identifying all provisions of law that, if not waived, would prohibit, restrict, limit or otherwise constrain implementation of the CERP program in Iraq and Afghanistan. In the event that the Secretary identifies additional such provisions of law after the report is submitted to the Committees on Armed Services of the Senate and the House of Representatives, the conferees expect the Secretary to send supplemental reports with the requested information to those committees.

Assistance to Iraq and Afghanistan military and security forces (sec. 1202)

The Senate amendment contained a provision (sec. 1053) that would authorize the Secretary of Defense, with the concurrence of the Secretary of State, to use up to \$250.0 million in operations and maintenance funding to provide assistance in fiscal year 2005 to Iraq and Afghanistan military or security forces solely to enhance their ability to combat terrorism and support United States or coalition military operations in Iraq and Afghanistan, respectively.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize the Secretary of Defense to use up to \$500.0 million in operations and maintenance funding for additional costs due to Operation Iraqi Freedom and Operation Enduring Freedom to provide assistance in fiscal year 2005 to Iraq and Afghanistan military or security forces solely to enhance their ability to combat terrorism and support United States or coalition military operations in Iraq and Afghanistan, respectively. The provision defines “military and security forces” to mean national armies, national guard forces, border security forces, civil defense forces, infrastructure protection forces, and police.

The conferees note that the authority provided by this provision would not permit the provision of assistance to nongovernmental or irregular forces such as private militias. The conferees expect the prior notifications to the congressional defense committees to include detailed information regarding the proposed amounts of funds to be spent, recipients of the funds, and the specific purposes for which the funds would be used.

Redesignation and modification of authorities relating to Inspector General of the Coalition Provisional Authority (sec. 1203)

The Senate amendment contained a provision (sec. 1059B) that would amend the Emergency Supplemental Appropriations Act for Defense and Reconstruction of Iraq and Afghanistan, 2004 (Public Law 108–106), to establish the Office of Special Inspector General for Iraq Reconstruction; to provide for the continuation in office of the individual presently serving as Inspector General of the Coalition Provisional Authority; to provide that the Inspector General shall be responsible to the Secretaries of State and Defense; to provide for support of the Inspector General at appropriate locations of the Department of State in Iraq; to provide for reporting by the Inspector General to the Secretaries of State and Defense; to provide for jurisdiction of the Inspector General over sums appropriated to the Iraq Relief and Reconstruction Fund; to provide for coordination by the Inspector General with the Inspectors General of the Departments of State and Defense and the Agency for International Development; to allow personnel of the Inspector General to carry firearms and make arrests in the line of duty with the permission of the Attorney General; and to provide for the termination of the Office of the Special Inspector General.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Presidential report on strategy for the stabilization of Iraq (sec. 1204)

The House bill contained a provision (sec. 1204) that would require the Secretary of Defense to submit a strategic plan on how the United States will achieve the goal of establishing capable Iraqi security forces to provide for the long-term security of the Iraqi people.

The Senate amendment contained a similar provision (sec. 1029E) that would require the President to submit a report on the strategy of the United States and coalition partners to stabilize Iraq, including the training and deployment of Iraqi security forces,

as well as the participation of other international police and military forces.

The House recedes with an amendment that would incorporate the House provision into the Senate provision and require a single Presidential report, followed by quarterly updates from the Secretary of Defense, in conjunction with the Secretary of State, during calendar year 2005. Each quarterly report shall address the following: the number of forces recruited, currently serving, and that have left (along with a breakdown of the reasons for leaving) by service over the period in question; progress in meeting training goals; progress in achieving other metrics as identified in the strategic plan; and a description and analysis of any training incidents and deployment successes and failures, with a discussion of how those incidents and successes will affect future efforts to achieve the goals of the strategic plan.

Guidance on contractors supporting deployed forces in Iraq (sec. 1205)

The House bill contained a provision (sec. 1205) that would require the Secretary of Defense to issue guidance and a report on contractors supporting deployed forces in Iraq.

The Senate amendment contained a similar provision (sec. 864). In addition, the Senate amendment contained a provision (sec. 865) that would require a report on contractor performance of security, intelligence, law enforcement, and criminal justice functions in Iraq.

The Senate recedes with an amendment that would provide additional detail on the guidance to be issued. The amendment would require that the Secretary's guidance address the issue of contractor performance of security, intelligence, law enforcement, and criminal justice functions. The conferees expect the guidance to address the full range of security, intelligence, law enforcement, and criminal justice functions that are being performed by contractors in support of current military operations or are anticipated to be performed by contractors in support of future military operations.

The amendment would also require that the guidance address: (1) investigating background and qualifications of contractor security personnel and organizations; and (2) ensuring proper training and compliance with rules of engagement by armed contractor security personnel. The conferees take no position as to whether such investigations and training should be conducted by Department of Defense personnel or by contractor personnel subject to Department oversight.

The conferees expect the Secretary to coordinate, as appropriate, with the heads of other departments and agencies of the Federal Government that would be affected by the implementation of the guidance.

In addition, the conferees expect the Secretary, in preparing the guidance required by this section, to address options for enhancing contractor security and reducing contractor security costs in current and future armed conflicts. The options considered should include: (1) temporary commissioning of contractor security personnel as Reserve component officers in order to subject such personnel to the military chain of command; (2) requiring con-

tractor security personnel to obtain security clearances to facilitate the communication of critical threat information; (3) establishing a contract schedule for companies furnishing contractor security personnel to provide a more orderly process for the selection, training, and compensation of such personnel; (4) establishing a contract schedule for companies to provide more cost-effective insurance for contractor security personnel; and (5) providing for U.S. indemnification of contractors to reduce the costs of insuring contractor security personnel. The report required by subsection (c) should explain the rationale for the Secretary's decision to implement or not to implement these options.

Report on contractors supporting deployed forces and reconstruction efforts in Iraq (sec. 1206)

The Senate amendment contained a provision (sec. 1021) that would require a report on contractor security in Iraq.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify the reporting requirements.

With regard to contractor casualties and fatalities, the report would include: (1) a plan for establishing and implementing a process for collecting data on casualties and fatalities; and (2) a requirement for data on casualties and fatalities that have occurred since the conclusion of major combat operations in Iraq. The conferees understand that the Department of Defense has not yet established a comprehensive system for collecting data on contractor casualties and fatalities and do not believe that the requirement to provide retrospective data should be, or needs to be, implemented in a manner that would become burdensome on the combatant command or on combat units, but should be done in a manner and to an extent that does not undermine military operations. The conferees believe that the Department should be able to collect this information accurately and comprehensively from the contractors themselves. The requirement to establish a plan for collecting contractor casualty and fatality data in the future should ensure that such data is collected routinely and uniformly.

With regard to the requirement to establish a plan for establishing and implementing a process for collecting data on contractors performing security functions in Iraq, the conferees understand that the categories of security functions performed by contractors are not mutually exclusive and expect the Department to indicate any overlap to the best of its ability.

United Nations Oil-for-Food Program (sec. 1207)

The Senate amendment contained a provision (sec. 1058) that would: (1) require the Inspector General of the Department of Defense to ensure, not later than June 30, 2004, the security of all documents relevant to the United Nations Oil-for-Food Program that are in the possession or control of the Coalition Provisional Authority; (2) require executive agencies to provide to the Senate committees of jurisdiction access to documents and information relevant to the Oil-for-Food Program; (3) call on the Secretary of State to urge the Secretary General of the United Nations to provide the United States copies of all audits and core documents related to the

Oil-for-Food Program; and (4) require the Comptroller General to conduct a review of United States oversight of the Oil-for-Food Program.

The House bill contained no similar provision.

The House recedes with an amendment that would: (1) express the sense of Congress that the Secretary of State should seek to conclude a Memorandum of Understanding with the Iraq Interim Government to ensure that the United States will have access to all documents in the possession of the Iraq Interim Government related to the United Nations Oil-for-Food Program; (2) require executive agencies to provide to congressional committees of jurisdiction access to documents and information relevant to the Oil-for-Food Program; (3) call on the Secretary of State to urge the Secretary General of the United Nations to provide the United States copies of all audits and core documents related to the Oil-for-Food Program; and (4) require the Comptroller General to conduct a review of the Oil-for-Food Program, including the role of the United States.

The conferees note their understanding that the phrase “committee of jurisdiction” includes, but is not limited to, the Committees on Armed Services of the Senate and House of Representatives, and the Permanent Subcommittee on Investigations of the Committee on Governmental Affairs of the Senate.

Support of military operations to combat terrorism (sec. 1208)

The House bill contained a provision (sec. 1202) that would authorize the Secretary of Defense to expend up to \$25.0 million during fiscal years 2005 to 2007 to provide support to foreign forces, irregular forces, groups, or individuals engaged in supporting or facilitating ongoing military operations by the U.S. Special Operations Forces to combat terrorism. The provision would not, however, constitute authority to conduct a covert action. The Secretary would be required to submit a report on the support provided under this section within 30 days of the close of each fiscal year.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary to establish procedures for the exercise of such authority and to notify the congressional defense committees of these procedures prior to the exercise of authority contained in the provision. Additionally, the amendment would require the Secretary to notify the congressional defense committees expeditiously, and in any event, within 48 hours, of the use of such authority as part of an approved military operation, and would prohibit the Secretary from delegating this authority.

The conferees intend that nothing in this provision shall constitute specific statutory authorization within the meaning of section 5(b) of the War Powers Resolution (Public Law 93–148) or to supercede any requirement of the War Powers Resolution.

Report on al Qaeda activity in the Western Hemisphere (sec. 1209)

The conferees agree to include a provision that would direct the Secretary of Defense, in consultation with the Secretary of State to submit to the committees on Armed Services of the Senate and House of Representatives of Congress a report on the activities

of al Qaeda and associated groups in Latin America and Caribbean, including (1) an assessment of the extent to which such groups have established a presence in the area; (2) a description of activities of such groups in the area, including fund-raising, money laundering, narcotrafficking, and association with criminal groups; (3) an assessment of the threat posed by such groups to the peace and stability of nations in the area and to United States interests; and (4) a description of the United States policies intended to deal with such a threat. The provision would require that an unclassified report, with a classified annex as necessary, be submitted no later than 180 days after the date of enactment of this Act. The conferees note their concern about potential al Qaeda activity in the Western Hemisphere, and the indirect and direct threat to United States national security that such activity represents.

Subtitle B—Counterproliferation Matters

Defense international counterproliferation programs (sec. 1211)

The House bill contained a provision (sec. 1411) that would authorize the Secretary of Defense to expand existing programs to train foreign border and law enforcement officials in preventing the illicit transfer of weapons of mass destruction in the states of the former Soviet Union, Eastern Europe, and the Baltic States, by granting the Secretary authority to conduct those programs in any other country in which the Secretary determines a significant threat exists.

The Senate amendment contained no similar provision.

The Senate recedes.

Policy and sense of Congress on nonproliferation of ballistic missiles (sec. 1212)

The Senate amendment contained a provision (sec. 1071) that would establish the policy of the United States to develop, support, and strengthen efforts to curtail the proliferation of ballistic missiles and related technology. The provision would also express the sense of Congress that ballistic missile proliferation represents a threat to the United States and its allies and friends which has been slowed by a variety of means, and that steps to prevent such proliferation should be vigorously pursued.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

Sense of Congress on the Global Partnership against the Spread of Weapons of Mass Destruction (sec. 1213)

The Senate amendment contained a provision (sec. 1059) that would express the sense of Congress that the President should be commended for the steps taken at the G-8 summit at Sea Island, Georgia, on June 8-10, 2004, to demonstrate continued support for the Global Partnership against the Spread of Nuclear Weapons and Materials of Mass Destruction, and to expand the Global Partnership by welcoming new members and using the partnership to coordinate nonproliferation projects in Libya, Iraq, and other countries. The provision would also call on the President to take a number of specific steps to strengthen the partnership.

The House bill contained no similar provision.
The House recesses with a clarifying amendment.

Report on collaboration to reduce the risks of a launch of Russian nuclear weapons (sec. 1214)

The House bill contained a provision (sec. 1423) that makes certain findings and would require the Secretary of Defense to submit a report to Congress by November 1, 2005 on steps that might be taken to reduce the danger of unauthorized or accidental ballistic missile launches.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would require the Secretary to submit a report to Congress by November 1, 2005 on current and future collaborative efforts to reduce the risk of unauthorized or accidental launches of nuclear armed ballistic missiles.

The conferees recognize that a number of factors related to Russian Federation nuclear forces contribute to the risk of unauthorized or accidental launch of Russian ballistic missiles. These factors include: the high state of readiness of the Russian Federation intercontinental ballistic missile force; the remote location of many of these forces; shortcomings in the Russian Federation's early warning system; the short decision time available to the Russian Federation President after being informed of a possible nuclear attack; the possibility that the Russian Federation, because of concerns that its nuclear forces would not survive a nuclear attack, may have a nuclear deterrence posture that relies on launching a retaliatory strike on warning of nuclear attack; deficiencies in the security and control of Russian Federation nuclear forces; and the susceptibility of nuclear strategic command and control systems and early warning systems to an intrusion or accident that could create the false impression that a nuclear ballistic missile attack is underway. The conferees believe that collaborative measures between the United States and the Russian Federation and continued high-level discussions between U.S. and Russian Federation military leaders could be useful in reducing these risks.

Subtitle C—Other Matters

Authority for humanitarian assistance for the detection and clearance of landmines extended to include other explosive remnants of war (sec. 1221)

The Senate amendment contained a provision (sec. 1051) that would add a new section to chapter 20 of title 10, United States Code, to authorize the Secretary of Defense to provide military training, education, and technical assistance to foreign nations for the purpose of detecting and clearing landmines or other explosive remnants of war. The provision would clarify existing law by separating authority to conduct humanitarian mine clearing actions from the authority to conduct humanitarian and civic assistance, and recognize the requirement to detect and clear other explosive remnants of war, in addition to landmines.

The House bill contained no similar provision.

The House recesses with an amendment that would amend section 401 of title 10, United States Code, to include explosive rem-

nants of war, but would not establish a new category for humanitarian activity.

Expansion of entities of the People's Republic of China subject to certain Presidential authorities when operating in the United States (sec. 1222)

The House bill contained a provision (sec. 1212) that would expand the definition of a "Communist Chinese military company" as defined in the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261) to include Chinese firms owned or operated by a ministry of the People's Republic of China or an entity affiliated with the defense industrial base of the People's Republic of China.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

Assignment of NATO naval personnel to submarine safety programs (sec. 1223)

The House bill contained a provision (sec. 1211) that would authorize the Secretary of Defense to assign military personnel from NATO countries and specified other countries to U.S. commands for the purpose of working on the standardization, development, and interoperability of submarine safety and rescue systems and procedures.

The Senate amendment contained a similar provision (sec. 1054).

The Senate recedes with an amendment that would: (1) limit the authority of the Secretary of the Navy to the assignment of members of the naval services of NATO nations in connection with this program; and (2) terminate this authority after September 30, 2008.

Availability of Warsaw Initiative Funds for new NATO Members (sec. 1224)

The conferees agree to include a provision that would make available up to \$4.0 million of Warsaw Initiative Funds in fiscal year 2005 for the participation of new North Atlantic Treaty Organization (NATO) Members (Bulgaria, Estonia, Latvia, Lithuania, Romania, Slovakia, and Slovenia) in the exercises and programs of the Partnership for Peace program. This authority would be available only in fiscal year 2005.

The conferees note that Warsaw Initiative Funds are authorized for the participation of Partnership for Peace nations in the exercises and programs of NATO's Partnership for Peace program.

In a letter to the Committees on Armed Services of the Senate and the House of Representatives, the Deputy Secretary of Defense requested that \$4.0 million of these funds be available in fiscal year 2005 to new NATO members, specifically to work with remaining Partnership for Peace nations as they seek closer cooperation with NATO. The Deputy Secretary noted in his letter that in 1999, when Poland, Hungary, and the Czech Republic became NATO Members, a limited amount of Warsaw Initiative Funds continued into fiscal year 2000 for exercises and programs that had begun in fiscal year 1999, as well as for funding completion of pro-

gram audits by local-hire administrative personnel in each of these countries.

The conferees expect that the use of Warsaw Initiative Funds in fiscal year 2005 for new NATO Members will similarly be used for the purposes of completing exercises and programs that began in fiscal year 2004 and, as necessary, completing program audits in those countries.

Bilateral exchanges and trade in defense articles and defense services between the United States and the United Kingdom and Australia (sec. 1225)

The Senate amendment contained a provision (sec. 1059A) that would provide an exception from the certain requirements of subsection (j) of section 38 of the Arms Export Control Act related to bilateral agreement requirements for the transfers of defense items for the Governments of Australia and the United Kingdom.

The House contained no similar provision.

The House recedes with an amendment that would require the Secretary of State, in consultation with the Secretary of Defense, to expeditiously process any application for the export of defense items to the Governments of Australia and the United Kingdom without referral to any other Federal department of agency, except where the item is classified or exceptional circumstances apply.

Study on Missile Defense Cooperation (sec. 1226)

The Senate amendment contained a provision (sec. 1070) that would require the Secretary of State and the Secretary of Defense to establish procedures for streamlining the export licensing review process for missile defense items and examine the feasibility of providing major project authorizations for programs related to missile defense similar to those established under section 126.14 of the International Traffic in Arms Regulations.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense, in consultation with the Secretary of State, to study the advisability and feasibility of establishing procedures for streamlining the export licensing review process for missile defense items and providing major project authorizations for programs related to missile defense.

LEGISLATIVE PROVISIONS NOT ADOPTED

Documentation of conditions in Iraq under former dictatorial government as part of transition to post-dictatorial government

The House bill contained a provision (sec. 1201) that would require the Secretary of Defense to establish a process for transferring to Iraqi entities documentation on the nature of the Saddam Hussein regime, including any documents or records that have been captured by U.S. military forces in Iraq regarding the activities of the Saddam Hussein government and individuals within that government.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that the Secretary has already transferred most of the noteworthy documentation and is sharing relevant information with the Iraqi government.

Sense of Congress regarding limitation on use of funds for the reconstruction of Iraq

The House bill contained a provision (sec. 1208) that would express the sense of Congress that no U.S. funds may be used for reconstruction activities in Iraq until the President certifies that the Government of Iraq has agreed to expend a significant portion of its oil production revenues on reconstruction activities.

The Senate amendment contained no similar provision.
The House recedes.

Sense of Congress on destruction of Abu Ghraib prison in Iraq

The House bill contained a provision (sec. 1209) that would express the sense of Congress that the Secretary of Defense should assist the Government of Iraq in destroying the Abu Ghraib prison and replacing it with a modern detention facility.

The Senate amendment contained no similar provision.
The House recedes.

The conferees note that Abu Ghraib prison was one of the world's most notorious prisons during the rule of Saddam Hussein, and that recent misconduct at that prison by members of the U.S. Armed Forces have further highlighted the horrible memories associated with Abu Ghraib. The conferees further note the progress made in improving conditions at Abu Ghraib prison in recent months, combined with the limited options available to the Government of Iraq for adequate detention facilities, suggest that continued operation of the prison may be a necessity in the near-term. The conferees believe that the fate of Abu Ghraib prison is a decision for the sovereign Government of Iraq.

Report on Global Peace Operations Initiative

The House bill contained a provision (sec. 1213) that would require the President to report to Congress on the Global Peace Operations Initiative (GPOI), a new program announced by the administration after the submission of the budget request.

The Senate amendment contained no similar provision.
The House recedes.

The conferees note that, traditionally, the training of foreign peacekeeping forces has been conducted by the Department of State under title 22 of the United States Code. The conferees further note that the administration has the necessary authority under title 22 to conduct GPOI as a foreign assistance program.

Procurement sanctions against certain foreign persons that transfer certain defense articles and services to the People's Republic of China

The House bill contained a provision (sec. 1214) that would make it the policy of the United States to prevent destabilizing arms transfers to the People's Republic of China by denying Department of Defense procurement contracts to foreign companies that sell to China items similar to those found on the U.S. Muni-

tions List. The provision would also require the Secretary of Defense to publish a list of such companies in the Federal Register.

The Senate amendment contained no similar provision.
The House recesses.

Military educational exchanges between senior officers and officials of the United States and Taiwan

The House bill contained a provision (sec. 1215) that would require the Secretary of Defense to undertake a program of senior military officer and senior official exchanges with Taiwan designed to improve Taiwan's defenses against the People's Liberation Army of the People's Republic of China.

The Senate amendment contained no similar provision.
The House recesses.

Definitions under Arms Export Control Act

The House bill contained a provision (sec. 1401) that would amend the Arms Export Control Act (22 U.S.C. 2794) to clarify the definitions of "license," "agent," and "exporting agent."

The Senate amendment contained no similar provision.
The House recesses.

Exemption from licensing requirements for export of significant military equipment

The House bill contained a provision (sec. 1402) that would amend the Arms Export Control Act (22 U.S.C. 2778(b)(2)) to prohibit the President from creating regulatory exemptions for significant military equipment that would otherwise require an export license.

The Senate amendment contained no similar provision.
The House recesses.

Cooperative projects with friendly foreign countries

The House bill contained a provision (sec. 1403) that would amend the Arms Export Control Act (22 U.S.C. 2767) to: (1) permit the Congress to block a cooperative project agreement with a friendly foreign country; and (2) require a license for the export of defense articles or defense services relating to a cooperative project.

The Senate amendment contained no similar provision.
The House recesses.

Control of exports of United States weapons technology to the People's Republic of China

The House bill contained a provision (sec. 1404) that would require the President to require exporters of militarily critical technologies to obtain an export license for the export or re-export of any item on the Militarily Critical Technologies List published by the Department of Defense.

The Senate amendment contained no similar provision.
The House recesses.

Licensing requirement for export of militarily critical technologies

The House bill contained a provision (sec. 1405) that would prohibit the export of certain technologies to individuals or coun-

tries engaged in the sale of such items to the security services of the People's Republic of China unless certain conditions are met. Such conditions would require that: a license be approved for that export; the Secretary of Defense concurs in the export; and the foreign person or country agrees in writing not to transfer title, possession of, or otherwise provide access to that item without prior written consent by the President.

The Senate amendment contained no similar provision.

The House recesses.

Strengthening international export controls

The House bill contained a provision (sec. 1406) that would make it the policy of the United States to seek continued negotiations to strengthen the international export control system for sales of arms and militarily-sensitive goods and technologies to countries of concern. The provision would require a Presidential report on progress made in strengthening international controls 180 days after enactment of this Act and every six months thereafter.

The Senate amendment contained no similar provision.

The House recesses.

Defense counterproliferation fellowship program

The House bill contained a provision (sec. 1412) that would direct the Secretary of Defense to establish a fellowship program to train and educate foreign defense policymakers and military officers in identifying and using counterproliferation tools to combat the spread of weapons of mass destruction.

The Senate amendment contained no similar provision.

The House recesses.

TITLE XIII—COOPERATIVE THREAT REDUCTION WITH
STATES OF THE FORMER SOVIET UNION

LEGISLATIVE PROVISIONS ADOPTED

*Specification of Cooperative Threat Reduction programs and funds
(sec. 1301)*

The House bill contained a provision (sec. 1301) that would define the programs and funds that are Cooperative Threat Reduction (CTR) programs and funds, define the funds as those authorized to be appropriated in section 301 of this Act, and specify that CTR funds shall remain available for obligation for three fiscal years.

The Senate amendment contained an identical provision (sec. 1201).

The conferees agree to include this provision.

Funding allocations (sec. 1302)

The House bill contained a provision (sec. 1302) that would authorize \$409.2 million for the Cooperative Threat Reduction (CTR) program. The provision would also authorize specific amounts for each CTR program element, require notification to Congress 30 days before the Secretary of Defense obligates and expends fiscal year 2005 funds for purposes other than those specifically authorized, and provide limited authority to obligate amounts for a CTR program element in excess of the amount specifically authorized for that purpose.

The Senate amendment contained a similar provision (sec. 1202).

The House recedes.

Temporary authority to waive limitation on funding for chemical weapons destruction facility in Russia (sec. 1303)

The House bill contained a provision (sec. 1303) that would provide the President authority for fiscal year 2005 to waive existing certification requirements before obligating funds for the construction of the Shchuch'ye chemical weapons destruction facility in Russia.

The Senate amendment contained a provision (sec. 1203) that would provide the President permanent authority to waive, on an annual basis for each fiscal year, existing certification requirements before obligating funds for the construction of the Shchuch'ye chemical weapons destruction facility in Russia. The Senate amendment would also clarify that funds obligated, but not expended, prior to lapse of a previously executed waiver could be expended.

The Senate recedes with an amendment that would provide the President authority through December 31, 2006, to waive, on an annual basis for each calendar year, existing certification require-

ments before obligating or expending funds for the construction of the Shchuch'ye chemical weapons destruction facility in Russia. This authority would expire on December 31, 2006, and no waiver would remain in effect after that date.

The conferees agree that providing waiver authority on a calendar year basis, rather than on a fiscal year basis, will minimize the risk of unintended interruptions in the program that could occur when fiscal year waiver authority is not renewed before the end of a fiscal year.

Inclusion of descriptive summaries in annual Cooperative Threat Reduction reports and budget justification materials (sec. 1304)

The Senate amendment contained a provision (sec. 1204) that would clarify that the Secretary of Defense should provide the specified Cooperative Threat Reduction (CTR) budgetary and programmatic information both in the CTR annual report, and in the budget justification materials that the Department of Defense provides each year as part of the President's annual budget request to Congress.

The House bill contained no similar provision.

The House recesses.

TITLE XIV—SUNKEN MILITARY CRAFT

LEGISLATIVE PROVISIONS ADOPTED

Sunken military craft (sec. 1401–1408)

The House bill contained several provisions (sec. 1021–1028) that would protect sunken U.S. military vessels, aircraft, and spacecraft, as well as the remains and personal effects of their crews from salvage, recovery, or other disturbance without authorization from the secretary of the military department concerned.

These provisions would clarify the circumstances under which such sunken craft, entitled to sovereign immunity when they sank, remain the property of the flag state until officially abandoned. They would also encourage the negotiation of international agreements to protect sunken military craft.

Finally, the provisions would authorize the secretary of the military department concerned to issue and enforce permits for activities directed at sunken U.S. military craft, including contract salvage. This system would not invalidate any permitting system currently in place nor affect any prior lawful transfer or express abandonment of title to any sunken military craft.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize the Secretary of the Navy, in consultation with the Secretary of State, to apply the permitting system established by these provisions to any foreign sunken military craft located in United States waters, if requested by the flag state of that craft. It would also authorize in rem liability against a vessel involved in a violation of these provisions, and would authorize the Secretary concerned to request the Attorney General to seek other relief in certain cases. It would establish an eight-year statute of limitations for actions to enforce violations of these provisions or any permit issued thereunder. It would also extend the prohibition on applying the law of finds to sunken military craft to foreign craft located in U.S. waters. Finally, it makes technical changes to the definitional section.

DURING FREEDOM

The Senate amendment contained a provision (sec. 1006) that would authorize \$25.0 billion for ongoing operations in Iraq and Afghanistan. The provision also contained reporting requirements.

TITLE XXVIII—GENERAL PROVISIONS

ITEMS OF SPECIAL INTEREST

Acceleration of environmental clean-up activities related to public lands, West Wendover, Nevada

Section 2843 of the Military Construction Authorization Act for Fiscal Year 2003 (division B of Public Law 107–314) authorized the Secretary of the Interior and the Secretary of the Air Force to convey certain parcels of real property totaling 14,000 acres at Wendover Air Force Base Auxiliary Field, Nevada to the City of West Wendover, Nevada and Tooele County, Utah. The purpose of the conveyance is to protect and benefit the local community by establishing aircraft accident prevention zones and developing 3,000 acres for an industrial park.

In order for the Secretary of the Interior to carry out the conveyance, the Secretary of the Air Force must identify the extent of environmental contamination on the lands and the measures to ensure the protection of the public. Currently, the Air Force has planned, based on a risk assessment and available funding, for a preliminary environmental assessment in 2006 and, if needed, subsequent environmental actions for these lands in 2011.

Establishing aircraft accident prevention zones are critical to mitigating the risk of loss of life for local residents in the vicinity of airports. The industrial park planned by the local community is vital to the economic development and the growth of commercial investment in the areas surrounding Wendover airport. Delays in the conveyance of the lands are having a detrimental impact on the safety of residents and the vitality of the local economy.

Therefore, the conferees direct the Secretary of the Air Force to give appropriate consideration to the completion of environmental remediation activities for lands at Wendover Air Force Base Auxiliary Field, Nevada so that the lands may be transferred to the Bureau of Land Management as quickly as possible.

Consideration of proposal for leased facilities supporting Headquarters, United States Southern Command, Miami, Florida

The conferees are aware of a proposal from the State of Florida to construct a building for Southern Command occupancy once the current lease expires in 2008. The conferees urge the Secretary of Defense to consider the State's proposal and update the congressional defense committees on the status of this proposal by February 1, 2005.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Military Construction Program and Military Family Housing Changes

Modification of approval and notice requirements for facility repair projects (sec. 2801)

The Senate amendment contained a provision (sec. 2802) that would amend section 2811(b) of title 10, United States Code, by raising the threshold of the cost of a construction project requiring approval in advance by a service secretary from \$5.0 million to \$7.5 million.

The House bill contained a provision (sec. 2803) that would amend section 2811(d) of title 10, United States Code, to lower the threshold at which congressional notification is required for facility repairs using operation and maintenance funds from \$10.0 million to \$7.5 million.

The House recedes with an amendment that would include in the conference agreement both amendments to section 2811 of title 10, United States Code.

Reporting requirements regarding military family housing requirements for general officers and flag officers (sec. 2802)

The House bill contained a provision (sec. 2804) that would require the Department of Defense to conduct an analysis of general and flag officer housing requirements in the national capital region by March 30, 2005. This section would also require the Department to report to Congress, by March 30, 2005, on its inventory of general and flag officer housing, including annual expenditures of each house for operations, utilities, and maintenance and repair over the past five years. Finally, this section would require the Department to provide, as part of its annual budget justification documents, by March 30 of each year a detailed list of each general and flag officer quarters for which operations, utilities, and maintenance and repair costs, in sum, are anticipated to exceed \$20,000 in the coming year.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Department to provide, as part of its annual budget justification documents, a list of general and flag officer quarters for which operations, maintenance and repair costs are anticipated to exceed \$35,000 in the budget year. The amendment would also add a reporting requirement for each dwelling unit where operations, maintenance and repair actions would exceed an annual cost of \$35,000, not included in the annual President's budget request, but required for environmental remediation or to protect the safety or security of the occupants.

In annual cost calculations, the conferees define "operations activities" to include the prorated share of costs for management of family housing, services, and furnishings. Utilities, leases, and costs related to historical preservation should not be included in the analysis of the \$35,000 threshold, but should be included in all reports.

Congressional notification of deviations from authorized cost variations for military construction projects and military family housing projects (sec. 2803)

The House bill contained a provision (sec. 2805) that would amend section 2853(c)(3) of title 10, United States Code, to shorten the notice and wait period for significant project cost increases or scope decreases from 21 days to 14 days, if notification is provided in an electronic format to Congress.

The Senate amendment contained no similar provision.

The Senate recesses.

Assessment of vulnerability of military installations to terrorist attack and annual report on military construction requirements related to antiterrorism and force protection (sec. 2804)

The House bill contained a provision (sec. 2802) that would require the Secretary of Defense to establish guidance on appropriate levels of antiterrorism and force protection requirements for facilities construction and perimeter defenses, and to certify that all major Department of Defense installations have been assessed for vulnerabilities to terrorist attack since September 11, 2001. This section also would require the Department to provide an annual list of unfunded antiterrorism and force-protection military construction requirements.

The Senate amendment contained no similar provision.

The Senate recesses with a clarifying amendment.

Repeal of limitations on use of alternative authority for acquisition and improvement of military housing (sec. 2805)

The House bill contained a provision (sec. 2806) that would amend section 2883 of title 10, United States Code, to repeal the limitation on budget authority for contracts and investments in military housing privatization projects, effective October 1, 2005.

The Senate amendment contained a provision (sec. 2804) that would amend section 2874 of title 10, United States Code, and would repeal sections 2876, 2877, and 2882 of title 10, United States Code.

The Senate recesses with an amendment that would repeal the limitation on budgetary authority for contracts and investments for the acquisition or construction of military family housing and military unaccompanied housing. These limitations would be repealed as of the date of enactment of this Act. The amendment would also repeal section 2885 of title 10, United State Code.

Additional reporting requirements relating to alternative authority for acquisition and improvement of military housing (sec. 2806)

The Senate amendment contained a provision (sec. 2803) that would amend section 2884 of title 10, United States Code, to add additional requirements for reports provided by the Secretary of Defense to congressional defense committees.

The House bill contained no similar provision.

The House recesses with a technical amendment.

Temporary authority to accelerate design efforts for military construction projects carried out using design-build selection procedures (sec. 2807)

The House bill contained a provision (sec. 2807) that would establish a demonstration program to allow the Department of Defense to enter into a design-build construction contract using design funds made available under sections 2807 and 18233 of title 10, United States Code, prior to the authorization of the project. This section would permit the Department to enter into 36 contracts through September 30, 2008, and would require a report to Congress on the value of the program by March 1, 2007.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would limit the demonstration program to 18 projects that are included in the annual President's budget request to Congress.

The conferees intend that in the case of a design-build project carried out under this authority for which construction funds are not subsequently authorized and appropriated by Congress, the design completed at the time of the government's termination for convenience would become the property of the United States Government.

Notification thresholds and requirements for expenditures or contributions for acquisition of facilities for Reserve components (sec. 2808)

The Senate amendment contained a provision (sec. 2812) that would amend sections 18231, 18232, 18233, and 18233a of title 10, United States Code, to modify and enhance definitions and authorities available to the Secretary of Defense, and to provide for the acquisition of facilities and land interests necessary for the proper development, training, operation, and maintenance of the Reserve components of the Armed Forces.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify the modifications to notification thresholds and requirements contained in section 18233a of title 10, United States Code. The conferees note that additional modifications to section 18233 of title 10, United States Code, contained in the Senate amendment have been addressed in another conference provision (sec. 2809).

Authority to exchange Reserve component facilities to acquire replacement facilities (sec. 2809)

The House bill contained a provision (sec. 2808) that would amend section 18233 of title 10, United States Code, to provide the Secretary of Defense the authority to receive facilities, cash, or a combination of facilities and cash for existing Reserve component facilities.

The Senate amendment contained a provision (sec. 2813) that would authorize the Secretary of Defense to carry out projects to assess the feasibility and advisability of obtaining new facilities for the Reserve components through the exchange or sale of existing facilities of such components.

The Senate recedes with an amendment that would amend chapter 1803 of title 10, United States Code, to clarify the author-

ity of the secretary of a military department to acquire facilities through exchanges of equal value facilities with a State, local government, local authority, or private entity, and would provide temporary authority to the secretary concerned to include cash equalization payments in the terms of the exchange.

The amendment would establish requirements for the terms of the agreement and would require the secretary of a military department to certify to the congressional defense committees, prior to carrying out an agreement, that certain conditions have been satisfied before an agreement is signed.

The amendment would also provide temporary authority to the secretary of a military department to make or accept cash payments as a part of an exchange agreement for facilities. The cash payments would be deposited in a special account and available to the Secretary concerned to be used in agreements to equalize the equitable exchange of facilities, or to cover costs related to operations, maintenance, and improvements to facilities acquired using an exchange agreement. The amendment would limit the use of the temporary authority, establish an expiration date, and require the Secretary of Defense to submit a report to the congressional defense committees on the usefulness of the temporary authority.

The conferees acknowledge that ambiguous definitions in chapter 1803, United States Code, have been interpreted by the military departments to authorize these exchange agreements. While the conferees recognize the benefit to the Department of Defense of certain transactions that would exchange sub-optimized land or deteriorated facilities for new facilities for the Reserve components, these unique agreements must be carried out with oversight from Congress.

It is the intent of the conferees that the use of this authority will satisfy, to the maximum extent possible, military construction requirements included in the Future Years Defense Plan for each Reserve component. The conferees expect that the exchange agreements will not result in additional military construction or operations and maintenance requirements imposed upon the Reserve component and that impact on current readiness and missions will be minimized during the exchange. The conferees expect that the Reserve components will consider the feasibility of addressing joint facility and land requirements within the land exchange agreements. The conferees expect the interests of the government will be protected by the use of competitive procedures, to the maximum extent practicable, in order to obtain a realistic value for the facilities to be exchanged.

The conferees expect that the military departments will use the temporary authority to use equalizing cash payments as a condition to facilitate the exchange of facilities in order to expedite agreements to replace or improve deficient Reserve facilities, and not as an opportunity to maximize the accumulation of cash proceeds. The conferees expect the military departments to be able to provide Congress with audit information to account for cash receipts and expenditures in order to retain oversight on the use of funds.

One-year extension of temporary, limited authority to use operation and maintenance funds for construction projects outside the United States (sec. 2810)

The House bill contained a provision (sec. 2809) that would extend for one year the authority provided by section 2808 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136), to permit the Secretary of Defense to utilize operation and maintenance funds to construct facilities necessary for temporary operational requirements related to a declaration of war, national emergency, or contingency.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would make the extension of the authority contingent upon receipt by Congress of all required reports contained in the original provision.

The conferees direct the Department of Defense to determine whether they require permanent authority to utilize operation and maintenance funds to construct facilities in lieu of continuing a temporary extension.

Consideration of combination of military medical treatment facilities and health care facilities of Department of Veterans Affairs (sec. 2811)

The House bill contained a provision (sec. 2810) that would direct the Secretary of Defense and the Secretary of Veterans Affairs to certify that each project to construct medical treatment facilities, included in the annual President's budget request to Congress, had been evaluated for the feasibility of carrying out a project for a combined medical facility.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would eliminate the certification requirement, but continue to require the Secretary of Defense and the Secretary of Veterans Affairs, when proposing construction of a medical facility, to consult on the feasibility of accomplishing a joint project.

Subtitle B—Real Property and Facilities Administration

Reorganization of existing administrative provisions relating to real property transactions (sec. 2821)

The Senate amendment contained a provision (sec. 2811) that would amend sections 2661 and 2679 of title 10, United States Code, to consolidate and clarify authorities available for real property administration. This provision would also repeal sections 2666, 2670, and 2673 of title 10, United States Code, that would be superseded as a result of the consolidations.

The House bill contained a similar provision (sec. 2812).

In exchange, the Navy may provide in-kind consideration, including modification of existing agreements that require payment to the Navy for real property improvements.

The Senate recesses.

The House bill contained a provision (sec. 2823) that would amend and codify the criteria that will be used by the Secretary of Defense in making recommendations for the closure or realignment of military installations inside the United States during the next base closure round.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would codify, with an amendment, the final selection criteria published by the Secretary in the Federal Register (Volume 69, Number 29) on February 12, 2004. The conferees expect that the Secretary shall adhere, to the maximum extent possible, to responses in the analysis of comments to the draft selection criteria, as published in the Federal Register on February 12, 2004, including the incorporation of elements of military value, such as research, development, test, evaluation, maintenance, and repair facilities for weapon systems; and the interaction with a highly skilled local work force and local industrial and academic institutions.

The Senate amendment contained no similar amendment.

The conferees agree to express the sense of Congress that the Department of Defense should consider the effects that the analyses used to determine military housing requirements, changes in force structure due to transformation, and overseas basing realignments will have on the number of school-aged military dependents and the need for additional educational facilities to serve such dependents. In many cases, local school districts do not have the resources or flexibility to respond quickly to changes in requirements, resulting in budget shortfalls and the use of inadequate, temporary facilities affecting the quality of education. The Department should also consider using existing authority under subchapter IV of chapter 169 of title 10, United States Code, to include the construction of educational facilities in military housing privatization initiatives.

Adherence to certain authorities on preservation of military depot capabilities during any subsequent round of base closures and realignments

The House bill contained a provision (sec. 2825) that would amend the Defense Base Closure and Realignment Act of 1990 (part A of title XXIX of Public Law 101–510, as amended) to require that base closure and realignment actions comply with provisions of title 10, United States Code, that address government-owned, government-operated depot-level maintenance, repair, and logistics capabilities within the Department of Defense.

The Senate amendment contained no similar provision.

The House recesses.

The conferees acknowledge that section 2464 of title 10, United States Code, requires the Department of Defense to maintain government-owned and operated logistics capabilities to include work force and facilities, to ensure a ready and controlled source of technical competence and resources necessary to support an effective and timely response to a mobilization, a national defense contingency situation, and other emergency requirements. Section 2466 of the same title requires that no more than 50 percent of each military department's annual funding for depot level maintenance and repair activities be performed in the private sector. While these sections are intended to preserve a certain level of depot and logistics capabilities in the Department, these sections also authorize

the Secretary of Defense to waive these provisions for reasons of national security.

The conferees believe that military base realignment and closure actions undertaken by the Department under authority provided in the Defense Base Closure and Realignment Act of 1990 (Public Law 101–510), as amended by the National Defense Authorization Act for 2002 (division B of Public Law 107–107), must be consistent with the provisions in title 10, United States Code, pertaining to the preservation of depot logistics capabilities.

Therefore, the conferees direct the Secretary of Defense to ensure that the recommendations submitted to the Commission, pursuant to the Base Closure and Realignment Act, adhere to sections 2464 and 2466 of title 10, United States Code. The conferees further direct the Secretary to ensure that the same recommendations will not result in the requirement to perpetually waive the provisions of sections 2464 and 2466 of title 10, United States Code.

Transfer of jurisdiction, Nebraska Avenue Naval Complex, District of Columbia

The House bill contained a provision (sec. 2841) that would transfer jurisdiction of the Nebraska Avenue Naval Complex in Washington, D.C., from the Navy to the Administrator of General Services for the purpose of accommodating the Department of Homeland Security.

The Senate amendment contained a similar provision (sec. 2826).

The authority for the Secretary of the Navy to transfer jurisdiction of the Nebraska Avenue Naval Complex to the Administrator of General Services for use by the Department of Homeland Security was provided by Congress in Public Law 108–268, signed on July 2, 2004. Therefore, this provision is not adopted by the conferees.

TITLE XXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS

Overview

Title XXXI authorizes appropriations for atomic energy defense activities of the Department of Energy (DOE) for fiscal year 2005, including: the purchase, construction, and acquisition of plant and capital equipment; research and development; nuclear weapons activities; defense nuclear nonproliferation; naval nuclear propulsion; environmental restoration and waste management; operating expenses; and other expenses necessary to carry out the purposes of the Department of Energy Organization Act (Public Law 95–91). The title would authorize appropriations in four categories: National Nuclear Security Administration (NNSA); defense environmental management; other defense activities; and defense nuclear waste disposal.

The budget request for atomic energy defense activities at DOE totaled \$16.8 billion, a \$483.2 million increase above the fiscal year 2004 level. Of the total amount requested, \$9.0 billion would be for NNSA, of which \$6.6 billion would be for weapons activities; \$1.3 billion would be for defense nuclear nonproliferation activities;

\$797.9 million would be for naval reactors; \$333.7 million would be for the Office of the Administrator; \$7.0 billion would be for defense environmental management, of which \$6.0 billion would be for defense site acceleration completion and \$982.5 million would be for defense environmental services; \$663.6 million would be for other defense activities; and \$131.0 million would be for defense nuclear waste disposal.

The conferees agree to authorize \$16.8 billion for atomic energy defense activities at DOE, an increase of \$483.2 million above the fiscal year 2004 level. The conferees agree to authorize \$9.1 billion for the NNSA, an increase of \$33.6 million above the budget request. Of the amounts authorized for the NNSA, \$6.6 billion would be for weapons activities, an increase of \$23.6 million; \$1.3 billion would be for defense nuclear nonproliferation activities; \$797.9 million would be for naval reactors; and \$343.7 million would be for the Office of the Administrator, an increase of \$10.0 million above the budget request. The conferees agree to authorize \$7.0 billion for defense environmental management, an increase of \$4.0 million above the budget request. Of the amounts authorized for defense environmental management, \$6.0 billion would be for defense site acceleration completion and \$986.5 million for defense environmental services. The conferees agree to authorize \$636.0 million for other defense activities, a decrease of \$27.6 million below the budget request. The conferees agree to authorize \$120.0 million for defense nuclear waste disposal, a decrease of \$11.0 million below the budget request.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—National Security Programs Authorizations

National Nuclear Security Administration (sec. 3101)

The House bill contained a provision (sec. 3101) that would authorize \$9.0 billion for the National Nuclear Security Administration (NNSA), including funds for weapons activities, defense nuclear nonproliferation programs, naval reactor programs, and the Office of the Administrator.

The Senate amendment contained a similar provision that would authorize \$9.2 billion (sec. 3101).

The conferees agree to include a provision that would authorize \$9.1 billion for NNSA.

The budget request included \$1.4 billion for directed stockpile work. The conferees agree to authorize \$1.4 billion for directed stockpile work, a decrease of \$21.5 million to be taken out of individual warhead life extension programs. The conferees note that this is a \$44.6 million increase over the amount appropriated for directed stockpile work in fiscal year 2004.

The budget request included \$301.0 million in science campaigns. The conferees agree to authorize \$281.5 million for science campaigns, a decrease of \$19.5 million. The conferees note that the reduction is without prejudice and should be taken from carry over due to the shutdown at the national laboratories in July and August.

The budget request included \$243.0 million for the engineering campaign. The conferees agree to authorize \$253.0 million for the engineering campaign, an increase of \$10.0 million, to support the microsystems and engineering sciences applications (MESA) construction project.

The budget request included \$741.3 million for the advanced simulation and computing (ASC) campaign. The conferees agree to authorize \$731.3 million for the advanced simulation and computing campaign, a decrease of \$10.0 million. The conferees note that the ASC campaign has experienced cost growth and schedule slippage.

The budget request included \$1.5 billion for readiness in technical base and facilities. The conferees agree to authorize \$1.5 billion, an increase of \$55.6 million for readiness in technical base and facilities for replacement of aging equipment, correction of deferred maintenance, and disposition of legacy materials consistent with the National Nuclear Security Administration approved 10 year comprehensive plan as follows: \$12.6 million at the Kansas City Plant in Missouri, \$6.0 million for the Lawrence Livermore National Laboratory in California, \$19.0 million for the Pantex Plant in Texas, \$9.0 million for Sandia National Laboratory in New Mexico, and \$9.0 million for the Y-12 National Security Complex in Tennessee.

The budget request included \$707.0 for safeguards and security. The conferees agree to authorize \$716.0 million for safeguards and security, a \$9.0 million increase for security upgrades at the Y-12 National Security Complex in Tennessee.

The budget request included \$1.3 billion for defense nuclear nonproliferation. The conferees agree to authorize \$1.3 billion for defense nuclear nonproliferation, the amount of the budget request. The conferees further agree to a \$25.0 million increase for nonproliferation and verification research and development, and a \$25.0 million reduction for fissile materials disposition. The conferees note that continued delays in the commencement of construction activities under the fissile materials disposition program make it unlikely that the Department will be able to fully obligate the budget request for that program in fiscal year 2005. The conferees believe that the nonproliferation and verification research and development program is doing valuable work on proliferation detection and other technologies that would benefit from additional resources.

The budget request included \$333.7 million for the Office of the Administrator. The conferees agree to authorize \$343.7 million, an increase of \$10.0 million to settle claims of Pajarito homesteaders. This account includes program direction funding for all elements of NNSA, with the exception of the Naval Reactors Program and the Secure Transportation Asset.

The conferees note that security lapses at the Los Alamos National Laboratory (LANL) concerning classified removable electronic media (CREM) this past year have been very disruptive to the nuclear weapons program. The conferees encourage the Administrator to become more involved in making sure these types of incidents are avoided in the future. The contractor has the primary day-to-day accountability for maintaining security of the laboratory, including the security of classified information. The contractor must ensure that a culture exists across the laboratory which maintains classified information in a very secure manner. However, the National Nuclear Security Administration also must be held accountable, and the Administrator must ensure the federal workforce is applying an appropriate level of oversight to avoid security lapses to the maximum extent possible.

Defense environmental management (sec. 3102)

The House bill contained a provision (sec. 3102) that would authorize \$6.9 billion for the Department of Energy for defense environmental management (EM) activities for fiscal year 2005, including funds for defense site acceleration completion and defense environmental services.

The Senate amendment contained a similar provision (sec. 3102) that would authorize \$7.0 billion for defense environmental activities.

The conferees agree to authorize \$7.0 billion for defense environmental management, the amounts of the budget request, including \$6.0 billion for defense site acceleration completion and \$986.5 million for defense environmental services, an increase of \$4.0 million. The conferees agree to authorize this \$4.0 million increase in defense environmental services for newly generated waste requirements and ground water cleanup activities at the Lawrence Livermore National Laboratory in California (Project HQ-SW-0013Y).

Of the amounts authorized to be appropriated in the defense site acceleration completion program, \$6.0 million may be available

for the Hazardous Materials Management and Emergency Response (HAMMER) Training Center. While the conferees recognize that HAMMER is an important facility for the training of emergency response personnel, the conferees note that HAMMER may be more appropriately funded and managed by the Department of Homeland Security.

Other defense activities (sec. 3103)

The House bill contained a provision (sec. 3103) that would authorize \$657.6 million for the Department of Energy (DOE) for other defense activities for fiscal year 2005.

The Senate amendment contained a similar provision (sec. 3103) that would authorize \$568.1 million for DOE for other defense activities.

The conferees agree to include a provision that would authorize \$636.0 million, a reduction of \$27.6 million below the budget request.

The budget request included \$10.6 million for energy security and assurance. The conferees recommend no funds for these activities. The operational component for this office was transferred to the Department of Homeland Security in fiscal year 2003. The conferees do not support using Atomic Energy Act funds for non-defense activities.

The budget request included \$255.1 million for the Office of Security. The conferees agree to authorize \$256.6 million for the Office of Security, an increase of \$1.5 million above the budget request for International Nuclear Analysis.

The budget request included \$34.9 million for the Office of Legacy Management. The conferees agree to authorize \$35.9 million for the Office of Legacy Management, an increase of \$1.0 million above the budget request. The conferees direct \$500,000 of this increase be added to the \$2.5 million provided for worker and community transition, for a total authorization of \$3.0 million. The remaining \$500,000 shall be used for Local Stakeholder Organizations.

The budget request included \$112.9 million for nuclear energy. The conferees agree to authorize \$114.3 million for nuclear energy, an increase of \$1.5 million over the budget request for the Lynchburg Technology Center in Virginia to inspect and repackage the spent nuclear fuel stored in aluminum canisters. The Senate amendment would authorize \$1.1 million for these activities within defense site acceleration completion. The conferees note that these activities should be addressed by the Office of Nuclear Energy, the office with primary responsibility for these materials.

The budget request included \$92.4 million for defense related administrative support (DRAS). The conferees recommend \$71.4 million for DRAS, a reduction of \$21.0 million below the budget request. The conferees are concerned that the activities conducted by DRAS are not defense activities, but instead support the general administrative responsibilities of the Department of Energy. There are many activities conducted by the defense funded programs at DOE which are paid for entirely by the defense programs that support the Department of Energy broadly. The conferees prefer not to use Atomic Energy Defense funds for nondefense activities. The

conferees encourage the Department of Energy to restrict future budget requests for Atomic Energy Defense funds to defense activities.

The budget request included \$5.0 million for the Office of Future Liabilities (FL). The conferees recommend no funds for these activities. The conferees are concerned that DOE is creating this new office to conduct essentially the same type of work being conducted by the Office of Environmental Management (EM). The conferees strongly encourage DOE to include this function in the EM program to avoid the cost and inefficiency of creating a new office.

Defense nuclear waste disposal (sec. 3104)

The House bill contained a provision (sec. 3104) that would authorize \$131.0 million for defense nuclear waste disposal (DNWD).

The Senate amendment contained a similar provision (sec. 3104) that would authorize \$108.0 million for DNWD.

The conferees agree to include a provision that would authorize \$120.0 million, a reduction of \$11.0 million below the budget request.

Subtitle B—Program Authorizations, Restrictions, and Limitations

Report on requirements for Modern Pit Facility (sec. 3111)

The Senate amendment contained a provision (sec. 3111) that would prohibit the Secretary of Energy from obligating or expending more than half of the funds available for the Modern Pit Facility (MPF) until 30 days after the Administrator of the National Nuclear Security Administrator (NNSA) submits a report to congressional defense committees setting forth the validated pit production requirements for the MPF, and one additional report on the stockpile required by the Energy and Water Development Appropriations Act, 2004 (Public Law 108–137). The requirement shall be developed in consultation with the Department of Defense.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Administrator of the NNSA to submit a report to congressional defense committees setting forth the validated pit production requirements for the MPF not later than January 31, 2005 based on certain assumptions for pit lifetimes. In addition, the provision does not restrict the Secretary's authority to obligate and expend the funds available for the MPF pursuant to section 3101.

Two-year extension of authority for appointment of certain scientific, engineering, and technical personnel (sec. 3112)

The House bill contained a provision (sec. 3111) that would extend the authority of the Secretary of Energy to appoint certain scientific, engineering, and technical personnel until September 30, 2006.

The Senate amendment contained an identical provision (sec. 3142).

The conference agreement includes this provision.

Limited authority to carry out new projects under Facilities and Infrastructure Recapitalization Program after project selection deadline (sec. 3113)

The House bill contained a provision (sec. 3112) that would amend section 3114 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136) to give the Administrator of the National Nuclear Security Administration (NNSA) greater flexibility in adding projects or updating priorities to projects within the Facilities and Infrastructure Recapitalization Program (FIRP).

The Senate amendment contained a similar provision (sec. 3113) that would amend section 3114 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136) to permit the Administrator of the NNSA to make no more than five modifications per fiscal year, and would limit each modification to a specific building, facility, or other improvement at an NNSA site. The provision would also prohibit any modifications until 60 days after the congressional defense committees receive both the report required in section 3114(c), setting forth the guidelines on the conduct of the readiness in technical base and facilities (RTBF) program, and a list of projects selected for inclusion in the FIRP program as required by section 3114(a). Nothing should delay the completion of the section 3114(c) report or the completion of the section 3114(a) project section required by the Act.

The House recedes.

Modification of milestone and report requirements for National Ignition Facility (sec. 3114)

The Senate amendment contained a provision (sec. 3114) that would modify and extend current reporting requirements for the National Ignition Facility (NIF), section 3137 of the National Defense Authorization Act for Fiscal Year 2002 (Public Law 107–107), to review all program elements necessary for both achieving ignition and enabling NIF to be a fully functioning facility.

The House bill contained no similar provision.

The House recedes.

The conferees strongly support NIF and are encouraged by the recent progress in constructing NIF, and the initiation of experiments on NIF in support of the science-based stockpile stewardship program. The purpose of this provision is to ensure there is better internal and external oversight of the project by requiring milestones on construction, ignition, and the scientific experiments.

Modification of submittal date of annual plan for stewardship, management, and certification of warheads in the nuclear weapons stockpile (sec. 3115)

The Senate amendment contained a provision (sec. 3115) that would change the due date of the annual reporting requirement for the stockpile stewardship program from March 15 to May 1.

The House bill contained no similar provision.

The House recedes.

The conferees believe that changing the due date for the report will allow the Department of Energy to submit a complete and timely report.

Defense site acceleration completion (sec. 3116)

The Senate amendment contained a provision (sec. 3116) that would authorize the Secretary of Energy to determine that, notwithstanding any other provision of law, high-level radioactive waste does not include radioactive material resulting from the reprocessing of spent nuclear fuel if (a) the radioactive material does not require permanent isolation in a deep geologic repository for spent fuel or highly radioactive waste pursuant to criteria promulgated by the Secretary in consultation with the Nuclear Regulatory Commission (NRC); (b) to the maximum extent practical, that the highly radioactive radionuclides were removed in accordance with NRC approved criteria; and (c) that materials from storage tanks are disposed of in a facility pursuant to a State-approved closure plan, or a State issued permit, authority for the approval or issuance of which is conferred on the State outside of this Act. This provision would apply to the material stored at the Savannah River Site in South Carolina.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize the Secretary of Energy to determine, in consultation with the Nuclear Regulatory Commission (NRC), that notwithstanding the provisions of the Nuclear Waste Policy Act of 1982, the requirements of section 202 of the Energy Reorganization Act of 1974 and other laws that define classes of radioactive waste, the term "high-level radioactive waste" does not include radioactive waste resulting from the reprocessing of spent nuclear fuel if: (1) the waste does not require permanent isolation in a deep geologic repository for spent fuel or high-level radioactive waste, (2) the waste has had highly radioactive radionuclides removed to the maximum extent practical and (3) the waste either does not exceed concentration limits for Class C low-level waste as set out in section 61.55 of title 10, Code of Federal Regulations (CFR), and will be disposed of in compliance with the performance objectives set out in subpart C of part 61 of title 10, CFR, pursuant to a State-approved closure plan or State-issued permit, authority for the approval or issuance of which is conferred on the State outside of this section or, if the waste does exceed concentration limits for Class C low-level waste, the waste will be disposed of in compliance with the performance objectives set out in subpart C of part 61 of title 10, CFR, pursuant to a State-approved closure plan or State-issued permit, authority for the approval or issuance of which is conferred on the State outside of this section, and pursuant to plans developed by the Secretary in consultation with the NRC. Any modification to the performance objectives in subpart C of part 61 of title 10, CFR, shall apply to actions under this section.

Section 3116 applies to material stored at a Department of Energy site at which activities are regulated by a covered State pursuant to approved closure plans or permits issued by the State. For purposes of this section, covered states are the States of South Carolina and the State of Idaho.

The NRC shall, in coordination with the covered State, monitor the disposal actions taken by the Department of Energy (DOE). If the NRC considers any disposal actions by DOE to not be in compliance with the requirements set out in this section, the NRC

shall inform DOE, the covered State, and the appropriate congressional committees. The Secretary of Energy shall reimburse the NRC for all expenses that the NRC incurs for performance under this section during fiscal year 2005. In subsequent fiscal years, the NRC shall include in the budget justification materials submitted to Congress the amounts required, not offset by revenues, for performance under subsections (a) and (b).

Section 3116, as passed by the Senate, applied “notwithstanding any other provision of law.” The conferees substitute this broad application with specific laws that are within the ambit of the “notwithstanding” clause; those laws that define classes of radioactive waste, including, but not limited to, the Nuclear Waste Policy Act, section 202 of the Energy Reorganization Act of 1974, section 2(10) of the Waste Isolation Pilot Plant Land Withdrawal Act and section 11dd. of the Atomic Energy Act of 1954, which cross-reference section 2(12) of the NWPA’s definition of “high-level waste,” section 2(9) of the Low-Level Waste Policy Act which defines low-level radioactive waste with reference to high-level radioactive waste, and the authorities stemming from the Atomic Energy Act for establishing radiation protection standards for disposal of radioactive waste that were transferred to the EPA by Reorganization Plan No. 3 of 1970. Laws like the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (Public Law 96–510) and the Resource Conservation and Recover Act of 1976 (Public Law 94–580) which do not specify or establish disposal standards based on these kinds of classifications of radioactive waste, would be unaffected, as would general environmental laws such as National Environmental Policy Act, and laws regulating radioactive waste for purposes other than disposal.

The conferees note that nothing in section 3116 shall impair, alter, or modify the full implementation of any Federal Facility Agreement and Consent Order or other applicable consent decree for a Department of Energy site. In that connection, the conferees understand that pursuant to the settlement agreement entered into by the United States with the State of Idaho in the actions captioned *Public Service Co. of Colorado v. Batt*, Civil No. 91–0035–S–EJL, and *United States v. Batt*, Civil No. 91–0054–S–EJL, in the United States District Court for the District of Idaho, and the consent order of the United States District Court for the District of Idaho dated October 17, 1995 that effectuates this settlement agreement, the Department of Energy has committed to complete solidification of the sodium-bearing waste retrieved from tanks in the Tank Farm Facility at the Idaho Nuclear Engineering and Technology Center at the Idaho National Engineering and Environmental Laboratory (INEEL) by December 31, 2012 and to treat this material so that it is ready to be moved out of Idaho for disposal by a target date of 2035, regardless of any ultimate decision on the classification of this waste. The conferees urge the Department to accelerate the final out-of-state disposal of this waste. Furthermore, the conferees direct the Secretary of Energy to submit a report to the congressional defense committees by March 1, 2005 describing the Department’s plans for the final disposal of the sodium bearing waste at INEEL. Section 3116 does not establish any precedent for and is not binding on the States of Washington, Or-

egon or any other state that is not a covered state for the management, storage, treatment, and disposition of radioactive and hazardous material.

The conferees note that the Defense Nuclear Facilities Safety Board (DNFSB) has statutory responsibilities associated with the Department's defense site acceleration completion activities. Although this provision establishes new responsibilities for the NRC, nothing in this section is intended to alter the existing statutory authority of the DNFSB in any area.

The conferees note that subsection (c) of this provision states that subsection (a) does not apply to any material transported from the state and subsection (e)(3) states that nothing in this section amends the definition of "transuranic waste". The conferees' intent is that nothing in this statute changes the disposal requirements for waste that will ultimately be disposed of at the Waste Isolation Pilot Plant. In addition, subsection (e)(5) states that nothing in this provision amends the West Valley Demonstration Project Act.

The conferees note that subsection (f) provides for judicial review of any determination or agency action by the Secretary of Energy under this section consistent with the Administrative Procedure Act's provisions for judicial review as set out in chapter 7 of title 5 of the United States Code. Failure by the Nuclear Regulatory Commission to perform its monitoring responsibilities under subsection (b) is also subject to judicial review in accordance with those provisions. The conferees intend that the Secretary of Energy's actions under section 3116 are fully subject to judicial review notwithstanding any action by the Nuclear Regulatory Commission.

The conferees note that section 3155 of the National Defense Authorization for Fiscal Year 2002 sets forth the obligations of the Department to manage and dispose of surplus plutonium shipped to the Savannah River Site. The authority granted to the Department under section 3116 to reclassify radioactive material does not extend to this plutonium nor does it relieve the Department of its obligations under Section 3155 of the 2002 Act. Subsection (e)(4) was included to clarify this limitation.

Treatment of waste material (sec. 3117)

The Senate amendment contained a provision (sec. 3120) that would authorize \$350.0 million out of defense site acceleration completion and defense environmental services to be expended for activities at the Hanford Site in Washington, the Idaho National Engineering and Environmental Laboratory in Idaho, and the Savannah River Site in South Carolina for the safe management, treatment, storage, consolidation, and emptying and cleaning of tanks or tank farms used to store waste from reprocessing activities.

The House bill would authorize \$300.0 million for defense site acceleration completion to address waste incidental to reprocessing.

The House recedes with an amendment that would authorize \$350.0 million for defense site acceleration completion activities at the Idaho National Engineering and Environmental Laboratory in Idaho, the Savannah River Site in South Carolina, and the Hanford Site in Washington.

Local stakeholder organizations for 2006 closure sites (sec. 3118)

The Senate amendment contained a provision (sec. 3121) that would direct the Secretary of Energy to establish local stakeholder organizations (LSOs) to operate in consultation with local elected officials at Department of Energy Environmental Management 2006 closure sites. This would include the Rocky Flats Environmental Technology Site, the Fernald Environmental Management Project, and the Miamisburg Environmental Management Project Mound Site.

The House bill contained no similar provision.

The House recedes with an amendment that would strike the portion of the provision which stated that the Federal Advisory Committee Act (FACA) (5 U.S.C. App.) does not apply to LSOs.

The conferees note that as the community reuse organizations comply with FACA, LSOs will also have to comply with FACA. The conferees also encourage the LSOs to work with other community organizations and groups to allow a broad view to be considered.

Report to Congress on Advanced Nuclear Weapons Concepts Initiative (sec. 3119)

The Senate amendment contained a provision (sec. 3112) that would prohibit the Secretary of Energy from obligating or expending the funds available for advanced nuclear concepts initiative (ACI) until 30 days after the Administrator of the National Nuclear Security Administration submits a report on the planned activities for fiscal year 2005 under this initiative.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Administrator of the NNSA to submit a report setting forth the planned ACI activities in fiscal year 2005 by March 1, 2005. The Secretary may fully obligate or expend the funds available for ACI.

Subtitle C—Proliferation Matters

Modification of authority to use International Nuclear Materials Protection and Cooperation Program funds outside the former Soviet Union (sec. 3131)

The Senate amendment contained a provision (sec. 3131) that would amend section 3124 of the National Defense Authorization Act for Fiscal Year 2004, to remove the \$50.0 million limitation on the authority to use International Nuclear Materials Protection and Cooperation Program funds for projects and activities outside of the former Soviet Union to meet emerging proliferation threats. The provision would also clarify that this authority applies only to projects or activities that have not previously been authorized by Congress.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Acceleration of removal or security of fissile materials, radiological materials, and related equipment at vulnerable sites worldwide (sec. 3132)

The Senate amendment contained a provision (sec. 3132) that would express the sense of Congress that the security of high-risk,

proliferation-attractive fissile materials, radiological materials, and related equipment at vulnerable sites worldwide should be a top U.S. national security priority. The provision would also express the sense of Congress that the President may establish a Department of Energy Task Force on Nuclear Materials to carry out a program to undertake an accelerated, comprehensive worldwide effort to mitigate threats posed by high-risk, proliferation-attractive fissile materials, radiological materials, and related equipment located at sites potentially vulnerable to theft or diversion. The provision would include a list of specific activities that would be authorized under such a program.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Silk Road Initiative (sec. 3133)

The House bill contained a provision (sec. 1421) that would authorize the Secretary of Energy to carry out a program known as the Silk Road Initiative to promote non-weapons-related employment opportunities for scientists, engineers, and technicians formerly engaged in activities to develop and produce weapons of mass destruction in nations of the former Soviet Union in the Caucasus and Central Asia. The provision would encourage the Secretary to begin a pilot program in the Republic of Georgia, and would authorize the Secretary to spend up to \$10.0 million on the program from funds available for nonproliferation and international security for fiscal year 2005.

The Senate amendment contained no similar provision.

The Senate recedes with technical amendments.

The conferees note that a number of independent states of the former Soviet Union have been helpful to the United States in the war on terrorism. Such states are new and struggling democracies and would benefit considerably from assistance to create sustainable jobs for their underemployed or unemployed scientists, engineers, and technicians who were formerly engaged in activities to develop and produce weapons of mass destruction. The conferees further note that it is the policy of the United States to seek to establish and promote programs to prevent the proliferation of scientific and technical expertise to develop and produce weapons of mass destruction from states of the former Soviet Union to countries of proliferation concern; and to assist independent states of the former Soviet Union that have been helpful to the United States in the war on terrorism so as to promote the creation of jobs that foster economic stability and democracy.

Nuclear Nonproliferation Fellowships for scientists employed by United States and Russian Federation (sec. 3134)

The House bill contained a provision (sec. 1422) that would authorize the Administrator for Nuclear Security to carry out a program under which the Administrator would award international exchange fellowships in the nuclear nonproliferation sciences to scientists employed at the Kurchatov Institute of the Russian Federation and the Lawrence Livermore National Laboratory of the United States. The fellowships would be known as Teller-Kurchatov Nonproliferation Fellowships. The provision would au-

thorize the Administrator to spend up to \$10.0 million on the program from funds available for nonproliferation and international security in fiscal year 2005.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize the Administrator for Nuclear Security to carry out a program under which the Administrator would award international exchange fellowships in the nuclear nonproliferation sciences to scientists employed at nonproliferation research laboratories of the Russian Federation and the United States. The fellowships would be known as Nuclear Nonproliferation Fellowships. The provision would authorize the Administrator to use funds available for nonproliferation and international security in fiscal year 2005 for this fellowship program.

Utilization of international contributions to the Elimination of Weapons Grade Plutonium Production Program (sec. 3135)

The conferees agree to include a provision that would provide the Secretary of Energy authority to accept international contributions to the Elimination of Weapons Grade Plutonium Production Program. The provision would permit the Secretary of Energy to: (1) enter into agreements, in consultation with the Secretary of State, with a person, foreign government, or international organization for this purpose; and (2) use such contributions without further authorization or appropriation. The provision would require the Secretary to notify the congressional defense committees: (1) of the receipt of any international contributions for this program within 30 days of their receipt; and (2) of the intended use of any funds received 30 days before they may be utilized. The provision would also require the Secretary to submit an annual report to the congressional defense committees on the receipt and utilization of amounts received pursuant to this authority for each fiscal year. The provision would require that any funds not used within five years be returned to the contributor. The authority provided by this provision would expire on December 31, 2011.

Subtitle D—Other Matters

Indemnification of Department of Energy contractors (sec. 3141)

The Senate amendment contained a provision (sec. 3141) that would amend section 170d(1)(A) of the Atomic Energy Act of 1954 to allow the Department of Energy to continue to enter into contracts for indemnification for an additional two years, through December 31, 2006.

The House bill contained no similar provision.

The House recedes.

Report on maintenance of retirement benefits for certain workers at 2006 closure sites after closure of sites (sec. 3142)

The Senate amendment contained a provision (sec. 3122) that would require the Assistant Secretary of Energy for Environmental Management to submit a report to the Secretary of Energy on maintenance of retirement benefits for workers at 2006 closure sites shortly before closure of those sites. The report would include

the number of workers at the closure sites which would not receive retirement benefits if the site where they work is closed early; the cost to provide benefits to these workers; and the impact on collective bargaining agreements due to the workers' loss of benefits. The Secretary of Energy would be required to send the report to the congressional defense committees.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify the scope of the report.

The conferees direct the Department of Energy to use the contracts that were in effect on September 30, 2003 as the contracts for determining the target completion date.

Report on efforts of National Nuclear Security Administration to understand plutonium aging (sec. 3143)

The Senate amendment contained a provision (sec. 3123) that would require the Administrator of the National Nuclear Security Administration (NNSA) to enter into a contract with a Federally Funded Research and Development Center for a study to assess the efforts of the NNSA to understand the aging of plutonium used in nuclear weapons.

The House bill contained no similar provision.

The House recedes.

Support for public education in the vicinity of Los Alamos National Laboratory, New Mexico (sec. 3144)

The Senate amendment contained a provision (sec. 3144) that would require the Secretary of Energy (DOE) to include in all the management and operating contracts for the Los Alamos National Laboratory (LANL), entered into after September 30, 2005, a provision that would require the contractor to provide \$8.0 million per year for support for public secondary and elementary education to the Los Alamos Public School District. The House bill contained no similar provision.

The House recedes.

Review of Waste Isolation Pilot Plant, New Mexico, pursuant to competitive contract (sec. 3145)

The House bill contains a provision (sec. 3133) that would direct the Secretary of Energy to enter into a new contract for independent reviews of the design, construction, and operations of the Waste Isolation Pilot Plant in New Mexico (WIPP).

The Senate amendment contained a similar provision (sec. 3145) that would direct the Secretary of Energy to use competitive procedures in future contracts for independent reviews of the design, construction, and operations of WIPP.

The House recedes.

National Academy of Sciences study on management by Department of Energy of certain radioactive waste streams (sec. 3146)

The House bill contains a provision (sec. 3132) that would require the Secretary of Energy to enter into an agreement with the National Research Council of the National Academy of Sciences to complete a study of the plans of the Department of Energy (DOE)

to manage certain waste streams that are not planned for disposal in a high-level repository. These streams are located at the Savannah River site, South Carolina, the Idaho National Engineering and Environmental Laboratory, Idaho, and the Hanford Reservation, Washington.

The provision would require the National Research Council to submit an interim report no later than six months after entering into the agreement with the Secretary and a final report no later than one year after entering such agreement.

The Senate amendment contained a similar provision (sec. 3117) that would authorize \$750,000 for a similar study.

The Senate recedes with an amendment which would require the Secretary of Energy to enter into an arrangement with the National Research Council of the National Academy of Sciences (NAS) to carry out a study of the plans of the Department of Energy to manage waste, from reprocessed spent nuclear fuel, which exceeds the concentration limits for Class C low-level waste set out in section 61.55 of title 10, Code of Federal Regulations (CFR). The waste that is the subject of the study is stored in tanks at the Savannah River Site, in South Carolina, the Idaho National Engineering and Environmental Laboratory (INEEL), in Idaho, and the Hanford Reservation, in Washington, and it is waste which DOE does not plan to dispose of in a repository for spent nuclear fuel and high-level waste.

The conferees note that the study shall evaluate the state of the Department's understanding of the physical, chemical, and radiological characteristics of the waste. Additionally, the study should evaluate any actions, in addition to those contained in the Department's current plans, which should be considered to ensure the plan's compliance with the performance objectives of part 61 of title 10, Code of Federal Regulations. In addition, the study shall evaluate the adequacy of the Department's plans for monitoring disposal sites to verify compliance with the performance objectives in part 61 of title 10, Code of Federal Regulations, any existing technology alternatives to these plans, and any existing technology gaps.

The National Research Council may develop recommendations it considers appropriate and directly related to the subject matter of the study. The National Research Council shall submit the reports to the Secretary of Energy and the appropriate congressional committees. Of the amounts authorized for the Department of Energy, \$1.5 million shall be available for carrying out this study.

Compensation of Pajarito Plateau, New Mexico, homesteaders for acquisition of lands for Manhattan Project in World War II (sec. 3147)

The Senate amendment contained a provision (sec. 3146) that would establish a fund to settle outstanding claims derived from the acquisition of land used in the Manhattan Project. The provision would authorize \$10.0 million to settle claims for compensation by Pajarito Plateau homesteaders.

The House bill contained no similar provision.

The House recedes with an amendment that would require the United States District Court for the District of New Mexico to ap-

point a special master to identify class members, receive claims, resolve contests, and address such other matters the Court may order. The claims to be settled from the fund are the claims pending before the court as Civil Number 00–60. In addition, the provision would establish guidelines for settling claims using the fund. Following all determinations, the Special Master would be directed to award the allocated amounts from the fund after approval by the Court. The conferees intend this fund and the payments made from it constitute full and complete settlement of these claims.

Modification of requirements relating to conveyances and transfer of certain land at Los Alamos National Laboratory, New Mexico (sec. 3148)

The conferees agree to include a provision that would authorize the Department of Energy to transfer certain parcels of land at the Los Alamos National Laboratory in New Mexico to the Los Alamos County Public Schools in New Mexico. The conferees note the financial benefits realized through this land transfer will be used to facilitate economic development for the Los Alamos County Public Schools.

Subtitle E—Energy Employees Occupational Illness Compensation Program

Improvements to the Energy Employees Occupational Illness Compensation Program Act (sec. 3161–3170)

The Senate amendment contained a series of provisions (sec. 3151–3157) that would amend section 3621 of the Energy Employees Occupational Illness Compensation Program Act (EEOICPA) of 2000 (Public Law 106–398). The primary changes that the provisions would make to the EEOICPA program would transfer claims processing under Part D of EEOICPA from the Department of Energy (DOE) to the Department of Labor (DOL), direct DOL to compute compensation payments and require DOL to make such compensation payments to the employees.

The Senate amendment would allow covered DOE contractor employees to elect to proceed under State workers' compensation systems or choose to receive compensation under EEOICPA Part D.

The Senate amendment allowed covered DOE contractor employees who have been determined to be entitled to compensation and benefits for an occupational illness contracted in the performance of duty at a DOE facility under subtitle B of EEOICPA, to be treated as having contracted the occupational illness through exposure at DOE facilities for purposes of subtitle D. Employees not previously covered under subtitle B of EEOICPA would be determined to have contracted an illness through exposure at a DOE facility for purposes of subtitle D if (1) it is at least as likely as not that exposure to a toxic substance was a significant factor in aggravating, contributing to, or causing the illnesses; and (2) it is at least as likely as not that the exposure to such toxic substance was related to employment at a DOE facility. The Secretary of Labor would make such determinations. In making these determinations, the Secretary of Labor would be allowed to use physicians to assist in making such determinations.

The amount of workers' compensation to which covered DOE contractor employees or eligible survivors would be entitled would be determined under the appropriate State workers' compensation system. Covered DOE contractor employees determined to be eligible for compensation for an occupational illness or covered illness under these provisions would also be furnished medical benefits. Covered DOE contractor employees would also be able to seek review by the Secretary of Labor of determinations concerning eligibility and levels of compensation decided against the employees.

Attorney fees for assistance on a claim under this subtitle would be available for covered DOE contractor employees to the same extent that they are currently available under Subtitle B.

The Senate amendment would transfer administration of subtitle D of EEOICPA to the Secretary of Labor, and direct the Secretary to work with the Secretary of Energy to transfer all applicable records, files and other data from DOE to DOL.

The Senate amendment would also expand the coverage of individuals employed by atomic weapons employers (AWE) who were exposed to residual radiation after DOE related work at the AWE facility stopped. Additionally, the Director of the National Institute of Occupational Safety and Health (NIOSH) would update the 2000 report on residual contamination of AWE facilities.

The Senate amendment would establish in DOL a new Office of the Ombudsman to assist individuals in making claims under subtitle D of EEOICPA and direct the Secretary of Labor to prescribe regulations necessary to carry out these provisions. The provisions would also set forth a Sense of Congress that the Secretary of Energy should adopt a policy not to oppose any final positive determinations with respect to injured workers at DOE facilities and AWE facilities under a State workers' compensation adjudication system unless such determinations are frivolous. The Senate amendment would also set forth findings that DOL establish a resource center in western New York to provide assistance to energy employees making claims under subtitle B of EEOICPA, and set forth the sense of the Senate that the Ombudsman should evaluate current assistance and recommend a site for a resource center.

The Senate amendment also included provisions that would designate under specified circumstances certain former nuclear weapons program workers as members of the Special Exposure Cohort (SEC) under section 3621 of EEOICPA. Funding for all programs created, modified or expanded under these provisions would be subject to appropriations.

The House bill contained no similar provision.

The House recesses with an amendment.

The conferees agree to repeal subtitle D of EEOICPA, establish a new compensation scheme and direct the Department of Labor (DOL) to administer the program. The new program would be established as subtitle E of EEOICPA.

Under the new subtitle E of EEOICPA, covered DOE contractor employees would be compensated based on any impairment from a covered illness resulting from exposure to a toxic substance at a DOE facility. The employee would receive additional compensation if the impairment resulted in significant wage losses. The primary goal of the conferees was to create a simple, fair and

uniform workers compensation system and avoid chronic delays and inefficiencies that workers currently encounter.

Specifically, employees would receive \$2,500 for every degree of impairment, resulting from a covered illness contracted by that employee through exposure to a toxic substance at a DOE facility. Additionally, the covered employee would be compensated for annual wage loss, defined as the average salary for the 36 months preceding the month the wage loss began, as follows: (1) \$10,000 for each calendar year where the employee's annual wage exceeded 50 percent of the employee's average annual wage at the DOE facility but did not exceed 75 percent of their average annual wage; or \$15,000 for each calendar year where the employee's annual wage did not exceed 50 percent of the employee's average annual wage at the DOE facility. The wage losses must result from the covered illness as determined by DOL.

The American Medical Association's Guides to the Evaluation of Permanent Impairment should be used in making these determinations. On the other hand, as the Guides state "Impairment assessment is a necessary *first step* for determining disability." [Emphasis in original] The new compensation regime that would be established in subtitle E of EEOICPA establishes a two part award—one for impairment and one for work loss as a result of disability. As structured in subtitle E the two part award is a unique way to compensate employees for impairments as well as compensation based upon past and present earnings losses from disability. In some cases, particularly in cases involving illnesses to long exposure to toxic substances, there may be an illness for which the AMA Guides do not provide an impairment rating. As a result, each individual employee should be evaluated individually and the determination of impairment and work disability should be through a combination of the Guides and by physicians suitably trained and qualified. Because of the unique nature of the compensation under subtitle E, the conferees do not intend the use of the Guides in this context to establish a precedent for other federal compensation programs.

The conferees also include a provision that would provide three categories of compensation for survivors of a covered DOE contractor employee. Under category one, the survivor would receive \$125,000, if the Secretary of Labor determines that the employee would have been entitled to compensation under part E of EEOICPA and it is at least as likely as not that exposure to a toxic substance at a DOE facility was a significant factor in aggravating, contributing to, or causing death. Under category two, the survivor would receive \$150,000, if he or she meets the criteria under category one, and the Secretary of Labor also determines that there was an aggregate period of not less than 10 years, before the employee attained normal retirement age, during which, as a result of any covered illness contracted by the employee through exposure of a toxic substance at a DOE facility, the employee's annual wage did not exceed 50 percent of the average annual wage of the employee. Under category three, the survivor would receive \$175,000, if he or she meets the criteria under category one, plus the Secretary of Labor also determines that there was an aggregate period of not less than 20 years, before the employee attained normal re-

tirement age, during which, as a result of any covered illness contracted by the employee through exposure of a toxic substance at a DOE facility, the employee's annual wage did not exceed 50 percent of the average annual wage of the employee. The survivor would be entitled to receive the highest category for which the survivor qualifies. The maximum aggregate benefit available under subtitle E of EEOICPA is \$250,000.

Radiation Exposure Compensation Act

The conferees also agree to make compensation under subtitle E applicable to certain uranium employees under section 5 of the Radiation Exposure Compensation Act (RECA) (42 U.S.C. 2210 note). Compensation for these employees would be determined on the same basis as it applies to a DOE contractor employee under section 3675 of subtitle E of EEOICPA.

Office of the Ombudsman

The conferees agree to include a provision similar to the Senate amendment to create an Office of the Ombudsman. The authority for the Office of the Ombudsman would expire three years after enactment. The conferees expect the Ombudsman to work with the Secretary of Labor to ensure the Ombudsman is technically proficient on subtitle E of EEOICPA to the maximum extent practicable before they begin conducting covered DOE contractor employee outreach. The conferees also expect the Ombudsman to make recommendations the Ombudsman considers appropriate for the improvement of the practices of DOL in administering subtitle E of EEOICPA. The conferees urge the Secretary to hire a director of the Office of the Ombudsman within 120 days of enactment.

Administrative Provisions

The conferees have included a series of provisions that deal with administrative and judicial review, physician services, medical benefits, attorneys fees, offsets, subrogation, exclusivity of remedy, treatment of payments, and administrative matters between DOL and DOE concerning records, files and other data.

Compensation under subtitle E would be offset by any benefits an individual receives for the same covered illness through a State workers' compensation system. The aggregate amount of compensation received on behalf of a covered employee under subtitle E, other than medical benefits, shall not exceed \$250,000.

The conferees believe the benefits available under subtitle E of EEOICPA are a fair and equitable alternative to the complexities and uncertainties that employees and their survivors may face in State workers' compensation programs. If an election is made to proceed under subtitle E of EEOICPA, the covered DOE contractor employer and survivor will not be able to bring additional actions against the United States or the DOE contractor for covered illnesses. A covered DOE contractor employee or their survivor may choose to forego benefits under subtitle E of EEOICPA and instead seek compensation through a state workers compensation system, litigation or any other available compensation mechanisms.

The benefits paid under subtitle E and the administrative costs of subtitle E will be treated for budget and accounting purposes as mandatory spending.

The Secretary is required to establish a process for administrative appeals. In developing this process, the conferees urge the Secretary to consider other administrative appeals processes for similar programs. Determining whether an illness was caused by exposure to toxic substances can be complex. Therefore, the conferees urge the Secretary to consider an appeal process whereby claimants have an opportunity to have an adverse determination reviewed by an independent physician or physician panel. The conferees note that the Secretary has the authority to hire physician panels, and urge the Secretary to hire physicians with experience and competency in diagnosing illnesses caused by exposure to toxic substances in exercising this authority.

The conferees note that included in the administrative provisions is a provision that would direct the Social Security Administration to make available to the Secretary of Labor earnings information necessary to carry out the requirements of subtitle E. The conferees expect that protections will be in place at DOL that will protect this information from unauthorized disclosure to the same extent the information was protected before being transferred to DOL.

The conferees urge the Secretary, in consultation and coordination with the Secretary of Energy, to notify all applicants of the changes in the management of this program. The conferees recommend that the Secretary, through or in coordination with the Office of the Ombudsman, explain program changes, provide guidance on changes in the processing of claims, and provide a toll free "hotline" which claimants can call for assistance.

Special Exposure Cohort

The conferees are concerned that the administrative process for designating additional special exposure cohorts (SEC) is too slow and should be accelerated. Covered DOE contractor employees from the 1940s, 50s, 60s, and 70s whose occupational illness was caused through exposure to toxic substances while working in DOE contractor facilities should receive compensation under subtitle B of EEOICPA. Unfortunately many of the records or other data has been lost or destroyed. As a result of these delays, the conferees have included several provisions that would make improvements to subtitle B of EEOICPA in an effort to accelerate the process for designating additional SECs. First, the Secretary of Energy is directed to ensure that members and staff of the NIOSH Advisory Board have an opportunity to apply for necessary security clearances. The Secretary of Energy should process these applications within 180 days after receiving a completed application. In addition, the Secretary of Energy is directed, in accordance with law, to provide the Advisory Board access to any information that the Board considers relevant to carry out its responsibilities under EEOICPA, including Restricted Data.

To ensure that applications to be a SEC member are processed promptly, new timelines have been included. Within 180 days of receipt of a petition for designation as members of a SEC, the Direc-

tor of NIOSH must submit to the Advisory Board a recommendation on that petition, including all supporting documentation. During the 180 period when NIOSH is preparing the petition for review by the Advisory Board, NIOSH should identify all deficiencies in the petition within the first 30 days. When the President receives an affirmative recommendation from the Advisory Board to designate a class to the SEC, the President shall have a period of 30 days in which to accept or reject the recommendation and notify Congress. If the President does not send a determination notice within 30 days, and if there is an affirmative Board recommendation, the class recommended to be a SEC will automatically become a SEC, subject to a 30 day notification period in Congress.

In an effort to prevent further delays for petitions already filed, the Board would be directed to convene an emergency meeting if NIOSH completes the evaluation of a petition more than ten days before a regularly scheduled Board Meeting. This emergency authority shall expire on March 1, 2005. In addition, the President is directed to submit a report to Congress by March 15, 2005 providing a status update on all petitioners who filed by October 1, 2004. The report should include, for each petition, the estimated time to complete consideration of the petition and any anticipated actions or circumstances that could preclude the Board from acting upon that petition before the end of fiscal year 2005. The conferees expect NIOSH to respond promptly throughout the process to ensure the petition and all supporting documentation is filed and processed correctly.

The conferees are concerned that auditors hired to conduct an audit of NIOSH and the Advisory Board are having a difficult time getting information and maintaining an appropriate degree of independence. The conferees expect NIOSH to work to ensure these issues are addressed in future audits.

Pursuant to a recommendation of the Comptroller General, in the September, 2004 Report (GAO-04958), to the extent the Secretary of Labor determines it useful and practicable, the Secretary of Labor shall direct the Director of NIOSH to prepare site profiles for a DOE facility based on records, files and other data provided by the Secretary of Energy.

The conferees urge the Director of NIOSH to consult with DOE contract workers and their representatives in developing these site profiles, and to update site profiles as information becomes available. The conferees have also included a provision that would direct the Secretary of Health and Human Services to submit to Congress a report setting forth the time frames for completing the site profiles.

Residual Radiation Exposure

The conferees include the provisions from the Senate amendment that expand coverage under subtitle B to include workers exposed to residual radiation contamination. In addition, the provision would add a definition of the term radiation dose applicable to employees exposed to residual radiation.

The conferees have also agreed to include a provision that would direct the director of NIOSH to update the 2003 residual radiation report.

LEGISLATIVE PROVISIONS NOT ADOPTED

Annual report on expenditures for safeguards and security

The Senate amendment contained a provision (sec. 3118) that would require the Secretary of Energy to submit an annual report describing the activities and costs of the safeguards and security program at the defense nuclear facilities across the Department of Energy (DOE). The Senate was concerned that the DOE was considering a change in budgeting for safeguards and security that would include these costs as part of the cost of each DOE program. The Senate was concerned that such an approach to budgeting, particularly during the two-year effort to comply with the new design basis threat, would mask the cost of these important requirements.

The House bill contained no similar provision.

The Senate recesses.

The conferees are satisfied that the DOE will continue to include sufficient transparency in their budget request for safeguards and security in fiscal year 2006.

Authority to consolidate counterintelligence offices of Department of Energy and National Nuclear Security Administration within the National Nuclear Security Administration

The Senate amendment contained a provision (sec. 3119) that would authorize the Secretary of Energy to consolidate the counterintelligence offices of the Department of Energy (DOE) and the National Nuclear Security Administration (NNSA) within NNSA.

The House bill contained no similar provision.

The Senate recesses.

The conferees note that the NNSA was originally set up as a semi-autonomous agency, in large part, to ensure that there would be adequate focus and priority placed on counterintelligence activities. The conferees urge the counterintelligence offices at DOE and NNSA to work together to ensure security of both DOE and NNSA programs and facilities.

Transfers and reprogrammings of National Nuclear Security Administration funds

The House bill contains a provision (sec. 3131) that would direct the Administrator of the National Nuclear Security Administration (NNSA) to specifically submit notifications and requests for reprogramming directly to the congressional defense committees, with the only role of the Department of Energy (DOE) being for the Chief Financial Officer (CFO) to certify whether funds covered by the notice or request are available.

The Senate amendment contained no similar provision.

The House recesses.

The conferees believe that there is a present need for better coordination between the Administrator of the NNSA and the CFO of DOE regarding budgetary actions.

The National Defense Authorization Act for Fiscal Year 2000 established the National Nuclear Security Administration (50 U.S.C. 2401, otherwise known as the "NNSA Act"). In passing this Act, Congress created the National Nuclear Security Administra-

tion as a semi-autonomous agency within the DOE. The mission of the NNSA is to enhance the national security through the military application of nuclear energy, to reduce global danger from weapons of mass destruction, and to promote international nuclear safety. The cornerstone of this Act is to provide significant autonomy to the NNSA.

Among the various functions assigned in the Act, the NNSA Administrator has authority over, and is responsible for, all programs and activities of the NNSA, including budget formulation, guidance and execution, and other financial matters (50 U.S.C. 2402). The NNSA Act also provides for separate treatment of NNSA's budget request in the President's budget (50 U.S.C. 2451) and for the Administrator to establish procedures for planning, programming, budgeting, and financial activities (50 U.S.C. 2452). Congress' intent was to provide autonomy for the NNSA in numerous functions, including all those functions associated with budget formulation and execution.

The conferees are deeply concerned that the overall management of the NNSA budget process may not be carried out in accordance with the full intent of the NNSA Act and that current processes have caused unnecessary delays in budget actions. Accordingly, the Secretary of Energy and the Administrator are directed, within 60 days of enactment of this Act, to develop a process that streamlines all NNSA-related budgetary actions including, but not limited to reprogramming requests to Congress, and that is in full compliance with the NNSA Act. This process should establish realistic deadlines for DOE and NNSA to complete budget-related actions, such as reprogrammings. The Secretary and the Administrator shall submit a report to the congressional defense committees by March 1, 2005 outlining the deadlines for budget-related actions that were established. Commencing on March 1, 2006, and annually thereafter on March 1, the Secretary and the Administrator shall submit a report to the congressional defense committees assessing the Department's and National Nuclear Security Administration's performance in meeting these deadlines, and if applicable, the reasons for failing to meet the established deadlines.

Additional amount for defense site acceleration completion

The House bill contained a provision (sec. 3134) that would authorize \$50.0 million for defense site acceleration completion.

The Senate amendment contained no similar provision.

The House recedes.

Improvements to Energy Employees Occupational Illness Compensation Program

The House bill contained a provision (sec. 3135) that would amend section 3661 of the Energy Employees Occupational Illness Compensation Program Act of 2000 (42 U.S.C. 785) by requiring the Secretary of Health and Human Services to select individuals to serve as panel members based on experience and competency in diagnosing occupational illness.

The Senate amendment contained a similar provision (sec. 3143) that would amend section 3661 of the National Defense Authorization Act for Fiscal Year 2001 (Public Law 106-398), part D

of the Energy Employees Occupational Illness Program Act (EEOICPA). The provision would eliminate the following three restrictions: (1) the pay cap on physicians serving on part D physicians panels; (2) the requirement that the part D physicians work only on a temporary or intermittent basis; and (3) the requirement for agreements between DOE and States.

The conferees agree not to adopt either provision.

TITLE XXXII—DEFENSE NUCLEAR FACILITIES SAFETY
BOARD

LEGISLATIVE PROVISIONS ADOPTED

Defense Nuclear Facilities Safety Board (sec. 3201)

The House bill contained a provision (sec. 3201) that would authorize \$21.3 million for the Defense Nuclear Facilities Safety Board for fiscal year 2005, an increase of \$1.0 million to fund cost-of-living pay increases for permanent staff and to hire outside consultants as needed for technical oversight of new Department of Energy projects.

The Senate amendment contained an identical provision (sec. 3201).

The conference agreement includes this provision.

TITLE XXXIII—NATIONAL DEFENSE STOCKPILE

LEGISLATIVE PROVISIONS ADOPTED

Authorized Uses of National Defense Stockpile Funds (sec. 3301)

The House bill contained a provision (sec. 3301) that would authorize \$59.7 million from the National Defense Stockpile Transaction Fund for the operation and maintenance of the National Defense Stockpile for fiscal year 2005. The provision would also permit the use of additional funds for extraordinary or emergency conditions 45 days after a notification to the Congress.

The Senate amendment contained no similar provision.
The Senate recesses.

Revision of earlier authority to dispose of certain materials in National Defense Stockpile (sec. 3302)

The Senate amendment included a provision (sec. 3302) relative to revenue requirements for certain previously authorized disposals from the National Defense Stockpile to establish a new requirement of \$870.0 million by the end of fiscal year 2014.

The House bill included a similar provision (sec. 3303) that would set revenue requirements for those same disposals of at least \$785.0 million by the end of fiscal year 2005 and \$870.0 million by the end of fiscal year 2009.

The Senate recesses.

Disposal of ferromanganese (sec. 3303)

The House bill contained a provision (sec. 3302) that would amend section 3306 of the National Defense Authorization Act for Fiscal Year 2002 (Public Law 107–107), to authorize the Secretary of Defense to dispose of 100,000 short tons of high carbon ferromanganese of the highest grade during fiscal year 2005.

The Senate amendment contained a similar provision (sec. 3301) that would authorize the Secretary to dispose of up to 50,000 tons of high carbon ferromanganese during fiscal year 2005. The provision would also authorize the disposal of an additional 50,000 tons of high carbon ferromanganese during fiscal year 2005, at 25,000 ton increments, subject to the Secretary, in consultation with the Secretary of Commerce, providing certifications to the congressional defense committees 30 days before the release of each increment.

The House recesses with an amendment that would authorize the Secretary of Defense to dispose of up to 50,000 tons of high carbon ferromanganese during fiscal year 2005. The provision would also authorize the disposal of an additional 50,000 tons of high carbon ferromanganese during fiscal year 2005, at 25,000 ton increments, subject to the Secretary of Defense certifying to the Committees on Armed Services of the Senate and the House of Rep-

representatives not later than 30 days before commencement of disposal of a 25,000 ton increment the following: the disposal of ferromanganese is in the interest of national defense; the disposal of ferromanganese under such paragraph will not cause undue disruption to the usual markets of ferromanganese producers or processors of the United States; and the disposal of ferromanganese is consistent with the requirements of the National Defense Stockpile under the Strategic and Critical Material Stock Piling Act (50 U.S.C. et seq.).

Prohibition on storage of mercury at certain facilities (sec. 3304)

The Senate amendment contained a provision (sec. 3303) that would prohibit the Secretary of Defense from storing mercury from the National Defense Stockpile at any facility that is not owned or leased by the United States.

The House bill contained no similar provision.

The House recedes with an amendment that would prohibit the Secretary from storing mercury from the National Defense Stockpile at any facility that is not owned or leased by the United States in fiscal year 2005.

TITLE XXXIV—NAVAL PETROLEUM RESERVES

LEGISLATIVE PROVISIONS ADOPTED

Authorization of appropriations (sec. 3401)

The House bill contained a provision (sec. 3401) that would authorize \$20.0 million for the operation and maintenance of the Naval Petroleum and Oil Shale Reserves.

The Senate amendment contained no similar provision.
The Senate recesses.

TITLE XXXV—MARITIME ADMINISTRATION

LEGISLATIVE PROVISIONS ADOPTED

Authorization of appropriations for Maritime Administration (sec. 3501)

The House bill contained a provision (sec. 3501) that would authorize funds to be appropriated for the Maritime Administration for expenses necessary for operations and training activities, for administrative activities under the loan guarantee program, and for ship disposal.

The Senate amendment contained no similar provision.

The Senate recesses.

Extension of authority to provide war risk insurance for Merchant Marine vessels (sec. 3502)

The House bill contained a provision (sec. 3502) that would amend section 1214 of the Merchant Marine Act, 1936 (46 U.S.C. App. 1294) to extend the authority to provide war risk insurance for Merchant Marine vessels from June 30, 2005 to December 31, 2010. The provision would also amend section 1208(a) of the same Act (46 U.S.C. App. 1288), allowing the Secretary of Transportation to request the Secretary of the Treasury to invest such portion of the fund that is not, in the judgement of the Secretary of Transportation, required to meet the current needs of the fund.

The Senate amendment contained a similar provision (sec. 1066), which would have extended the authority to provide war risk insurance to December 31, 2008, and would have allowed similar investments of a portion of the fund.

The Senate recesses.

Modification of priority afforded applications for national defense tank vessel construction assistance (sec. 3503)

The Senate amendment contained a provision (sec. 2901) that would amend section 3542(d)(2) of the Maritime Security Act of 2003 (title XXXV of Public Law 108–136). The amendment would require the Secretary of Transportation to give priority consideration to a proposal for national defense tank vessels if they had been accepted for participation in the Shipboard Technology Evaluation Program (STEP) as outlined in Navigation and Vessel Inspection Circular 01–04, issued by the Commandant of the U.S. Coast Guard on January 2, 2004.

The House bill contained no similar provision.

The House recesses with an amendment that would allow the Secretary of Transportation to give priority to subsidy proposals received after fiscal year 2005 if the vessels, which are to be constructed, have been selected to participate in the STEP.

TITLE XXXVI—ASSISTANCE TO FIREFIGHTERS

LEGISLATIVE PROVISIONS ADOPTED

Assistance to Firefighters (secs. 3601–3603)

The Senate amendment contained several provisions (sec. 3501–3513) that would reauthorize the Department of Homeland Security's Assistance to Firefighters Grant Program for fiscal years 2005 through 2010. The provision would also authorize the Secretary of Homeland Security, in consultation with the U.S. Fire Administrator, to administer the grant program; expand eligibility for the Assistance to Firefighters Grant Program to volunteer emergency medical service (EMS) organizations; reduce the matching requirements for jurisdictions with populations less than 20,000; set caps on assistance to jurisdictions based on population; and authorize \$900.0 million for the program in fiscal year 2005; \$950.0 million for fiscal year 2006; and \$1.0 billion for each of fiscal years 2007 through 2010.

The House bill contained no similar provision.

The House recedes with an amendment that would place the Director of the Federal Emergency Management Agency, acting through the U.S. Fire Administrator, in charge of administration of the program. Further, the amendment would create a funding floor for grants to EMS organizations, but set a funding ceiling for EMS organizations that are not affiliated with fire departments. The amendment would include reduced matching requirements for jurisdictions with populations less than 50,000, and modify the caps on assistance to jurisdictions based on population. The amendment would authorize \$900.0 million for fiscal year 2005; \$950.0 million for fiscal year 2006; and \$1.0 billion for each of fiscal years 2007 through 2009.

The conferees are concerned about the number of firefighters suffering fatal heart attacks each year while on duty. The conferees direct the director to work to reduce the number of on-duty firefighter fatalities by promoting life-saving policies, training, and equipment, including Automated External Defibrillator devices. As a part of this effort, the director is encouraged to examine the feasibility of prioritizing life-saving training and equipment in grant evaluation criteria.
