SUMMARY OF BILL LANGUAGE

Table Of Contents

DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

LEGISLATIVE PROVISIONS

SUBTITLE B—PROGRAM REQUIREMENTS, RESTRICTIONS, AND LIMITATIONS

Sec. 211—Budget Review and Certification for Certain Categories of Research and Development

Sec. 212—Modifications to Responsibilities of the Defense Innovation Unit

Sec. 213—Test and Evaluation Repository and Regional Test Hubs of the Test Resource Management Center

Sec. 214—Weapon System Platform Modernization and Cyber Hardening

Sec. 215—Repeal of Requirement for Secretary of Defense to Act Through a Specified Official for NATO Innovation Program

Sec. 220—Realignment of the National Strategic Research Institute to the Department of the Air Force

Sec. 221—Prize Competitions to Support the Research and Development of Biotechnology for the Department of Defense

Sec. 222—Pilot Program to Recognize Outstanding Achievements in Technology and Prototype Development

Sec. 223—Pilot Program on Forward Deployable Biomanufacturing Capabilities

SUBTITLE C—PLANS, REPORTS, AND OTHER MATTERS

Sec. 231—Policy to Guide the Development and Acquisition of Quantum Computing Systems for the Department of Defense

TITLE XV—CYBERSPACE-RELATED MATTERS

LEGISLATIVE PROVISIONS

SUBTITLE A—CYBERSECURITY

Sec. 1501—Department of Defense AI Incident and Vulnerability Reporting Program

Sec. 1502—Review and Realignment of Department of Defense Cybersecurity Responsibilities

SUBTITLE B—INFORMATION TECHNOLOGY AND ARTIFICIAL INTELLIGENCE

Sec. 1511—Software Planning, Programming, Budgeting, and Execution Reform

Sec. 1512—Artificial Intelligence Model Rapid Deployment Framework

Sec. 1513—Update of Policy on Autonomous and Artificial Intelligence-Enabled Systems

SUBTITLE C—REPORTS AND OTHER MATTERS

Sec. 1521—Roadmap for Modernization of Top Secret and Special Access Program Network Architectures

**TITLE XVIII—REVITALIZATION OF THE DEFENSE INDUSTRIAL
BASE**

LEGISLATIVE PROVISIONS

**SUBTITLE B—PROVISIONS RELATING TO DEFENSE INDUSTRIAL BASE
MANUFACTURING**

Sec. 1822—Inclusion of Biotechnology in Uses of the Industrial Base Fund

DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

LEGISLATIVE PROVISIONS

SUBTITLE B—PROGRAM REQUIREMENTS, RESTRICTIONS, AND LIMITATIONS

**Sec. 211—Budget Review and Certification for Certain Categories of Research and
Development**

This section would provide the Under Secretary of Defense for Research and Engineering (USD(R&E)) budget certification authority and require the USD(R&E) to promulgate standards on adequate levels of science and technology spending by elements of the Department of Defense.

Sec. 212—Modifications to Responsibilities of the Defense Innovation Unit

This section would amend section 4127 of title 10 United States Code to require the Defense Innovation Unit (DIU) to coordinate with the military service Portfolio Acquisition Executives (PAE) to: identify priority acquisition problems and capability gaps; identify platforms, capabilities, and solutions that could fill those gaps; and facilitate transition of technologies developed by DIU to the military service PAEs.

**Sec. 213—Test and Evaluation Repository and Regional Test Hubs of the Test
Resource Management Center**

This section would require the Test Resource Management Center to establish and maintain a central repository of test and evaluation assets throughout the United States, to include: state, local, and Federal facilities; academic facilities; non-profit facilities; and for-profit facilities that could be used by the military services, the Department of Defense, and other partners to test and evaluate weapon systems and innovative technologies more efficiently. This section would also authorize the Director of the Test Resource Management Center to establish

regional test and evaluation hubs in various geographic regions in the United States.

Sec. 214—Weapon System Platform Modernization and Cyber Hardening

This section would amend section 228 of the National Defense Authorization Act for Fiscal Year 2026 (Public Law 119-60) to expand the demonstration of near real-time monitoring capabilities by requiring at least three additional weapon platforms for participation in the demonstration. This section would also extend reporting requirements, and authorize the demonstration through September 2028. It would also direct the Secretary of Defense to evaluate and pilot the integration of these monitoring capabilities into command and control, logistics, sustainment, and maintenance systems to improve operational value.

Sec. 215—Repeal of Requirement for Secretary of Defense to Act Through a Specified Official for NATO Innovation Program

This section would remove the requirement for the Secretary of Defense to act through the Under Secretary of Defense for Research and Engineering in carrying out section 222 of the National Defense Authorization Act for Fiscal Year 2024 (Public Law 118-31), which authorizes the Secretary of Defense to provide funding support to the North Atlantic Treaty Organization's Defence Innovation Accelerator for the North Atlantic initiative.

Sec. 220—Realignment of the National Strategic Research Institute to the Department of the Air Force

This section would realign the National Strategic Research Institute University Affiliated Research Center, currently sponsored by U.S. Strategic Command, to the Department of the Air Force.

Sec. 221—Prize Competitions to Support the Research and Development of Biotechnology for the Department of Defense

This section would require the Secretary of Defense to carry out a program, pursuant to section 4025 title 10, United States Code, to award prizes to support research, development, and commercialization of biotechnology capabilities. Those prize competitions would address priority areas identified by the Secretary of Defense.

Sec. 222—Pilot Program to Recognize Outstanding Achievements in Technology and Prototype Development

This section would require the Director of the Defense Innovation Unit to carry out a pilot program to award cash prizes and other types of prizes to solve

operational problems leveraging co-investment from the military service portfolio acquisition executives.

Sec. 223—Pilot Program on Forward Deployable Biomanufacturing Capabilities

This section would authorize the Under Secretary of Defense for Research and Engineering, in coordination with the Secretary of the Army, to carry out a pilot program on forward deployable biomanufacturing.

SUBTITLE C—PLANS, REPORTS, AND OTHER MATTERS

Sec. 231—Policy to Guide the Development and Acquisition of Quantum Computing Systems for the Department of Defense

This section would require the Secretary of Defense to establish a policy to use the Defense Advanced Research Projects Agency Quantum Benchmarking Initiative to inform the development or acquisition of future Department of Defense quantum computing systems.

TITLE XV—CYBERSPACE-RELATED MATTERS

LEGISLATIVE PROVISIONS

SUBTITLE A—CYBERSECURITY

Sec. 1501—Department of Defense AI Incident and Vulnerability Reporting Program

This section would amend title 10, United States Code, and establishes a program to report, track, analyze, and remediate covered artificial intelligence incidents and vulnerabilities rising from development, testing, procurement, fielding, or operation of artificial intelligence systems within the Department of Defense.

Sec. 1502—Review and Realignment of Department of Defense Cybersecurity Responsibilities

This section would direct the Secretary of Defense to review and as needed, reorganize the Department of Defense's cybersecurity, information technology, network defense, and defensive cyber operations responsibilities to establish clear accountability, reduce duplication and fragmentation, and improve the alignment and integration of cybersecurity efforts across the Department.

SUBTITLE B—INFORMATION TECHNOLOGY AND ARTIFICIAL INTELLIGENCE

Sec. 1511—Software Planning, Programming, Budgeting, and Execution Reform

This section would amend section 2221 of title 10 United States Code and requires the Department of Defense to revise financial management regulations to allow any of the Department's primary appropriation funds to be used flexibly across the full lifecycle of software capabilities, regardless of appropriation category.

Sec. 1512—Artificial Intelligence Model Rapid Deployment Framework

This section would direct the Chief Digital and Artificial Intelligence Officer to establish an Artificial Intelligence Model Rapid Deployment Framework to enable rapid onboarding, security, authorization, deployment, and governance of artificial intelligence (AI) systems on Department of Defense enterprise AI platforms.

Sec. 1513—Update of Policy on Autonomous and Artificial Intelligence-Enabled Systems

This section would direct the Department of Defense to update its policies governing autonomous weapon systems and artificial intelligence-enabled systems that support, recommend, or materially influence operational decisions associated with the employment of force, including through revisions to the Department of Defense Directive 3000.09. The updated policies are required to establish risk-informed requirements for approval, oversight, testing, human involvement, auditability, operational use, and rapid revalidation of such systems.

SUBTITLE C—REPORTS AND OTHER MATTERS

Sec. 1521—Roadmap for Modernization of Top Secret and Special Access Program Network Architectures

This section would direct the Department of Defense to develop and begin implementing a comprehensive roadmap to modernize Top Secret and Special Access Program network architectures, to include improvements to resilience, interoperability, and artificial intelligence computing infrastructure.

TITLE XVIII—REVITALIZATION OF THE DEFENSE INDUSTRIAL BASE

LEGISLATIVE PROVISIONS

SUBTITLE B—PROVISIONS RELATING TO DEFENSE INDUSTRIAL BASE MANUFACTURING

Sec. 1822—Inclusion of Biotechnology in Uses of the Industrial Base Fund

This section would amend section 4817g of title 10, United States Code, to include biotechnology and biomanufacturing as an eligible use of authority of the Industrial Base Fund.

BILL LANGUAGE

1 **Subtitle B—Program Requirements, Restrictions, and Limitations**
2
3

4 **SEC. 211 [Log 84890]. BUDGET REVIEW AND CERTIFICATION**
5 **FOR CERTAIN CATEGORIES OF RESEARCH**
6 **AND DEVELOPMENT.**

7 Section 133a of title 10, United States Code, is
8 amended—

9 (1) in subsection (b)—

10 (A) in paragraph (4), by striking “and” at
11 the end;

12 (B) in paragraph (5), by striking the pe-
13 riod at the end and inserting “; and”; and

14 (C) by adding at the end the following new
15 paragraph:

16 “(6) in addition to the duties described in sub-
17 section (c), promulgating guidance and rec-
18 ommended standards on adequate levels of science
19 and technology spending by elements of the Depart-
20 ment of Defense with responsibilities associated with
21 basic research, applied research, and advanced tech-
22 nology development (budget activities 6.1 through
23 6.3, respectively, as set forth in the Department of
24 Defense Financial Management Regulation (DOD
25 7000.14-R), or any successor budget classification)

1 that could be incorporated into budget and planning
2 guidance of the Department as appropriate.”;

3 (2) by redesignating subsection (c) as sub-
4 section (d); and

5 (3) by inserting after subsection (b) the fol-
6 lowing new subsection:

7 “(c) BUDGET REVIEW AND CERTIFICATION.—

8 “(1) TRANSMITTAL.—The Secretary of De-
9 fense, acting through the Under Secretary of De-
10 fense (Comptroller), shall require the Secretaries of
11 the military departments and the heads of the De-
12 fense Agencies with responsibilities associated with
13 basic research, applied research, and advanced tech-
14 nology development (budget activities 6.1 through
15 6.3, respectively, as set forth in the Department of
16 Defense Financial Management Regulation (DOD
17 7000.14-R), or any successor budget classification)
18 to transmit the proposed budget for such activities
19 for a fiscal year and for the period covered by the
20 future-years defense program submitted to Congress
21 under section 221 of this title for that fiscal year to
22 the Under Secretary of Defense for Research and
23 Engineering for review under paragraph (2) before
24 submitting the proposed budget to the Under Sec-
25 retary of Defense (Comptroller).

1 “(2) REPORT AND CERTIFICATION.—The Under
2 Secretary of Defense for Research and Engineering
3 shall review each proposed budget transmitted under
4 paragraph (1) and, not later than January 31 of the
5 year preceding the fiscal year for which the budget
6 is proposed, shall submit to the Secretary of Defense
7 a report containing the comments of the Under Sec-
8 retary of Defense for Research and Engineering
9 with respect to all such proposed budgets, together
10 with the certification of the Under Secretary regard-
11 ing whether each proposed budget is adequate.

12 “(3) REPORT TO CONGRESS.—Not later than
13 15 days after the date on which the budget of the
14 President for each fiscal year is submitted to Con-
15 gress pursuant to section 1105(a) of title 31, the
16 Secretary of Defense shall submit to Congress a re-
17 port specifying each proposed budget contained in
18 the most-recent report submitted under paragraph
19 (2) that the Under Secretary of Defense for Re-
20 search Engineering did not certify to be adequate.
21 The report of the Secretary shall include the fol-
22 lowing matters:

23 “(A) A discussion of the actions that the
24 Secretary proposes to take, together with any
25 recommended legislation that the Secretary con-

1 siders appropriate, to address the inadequacy of
2 the proposed budgets specified in the report.

3 “(B) Any additional comments that the
4 Secretary considers appropriate regarding the
5 inadequacy of the proposed budgets.”.

1 **SEC. 212 [Log 84931]. MODIFICATIONS TO RESPONSIBIL-**
2 **ITIES OF THE DEFENSE INNOVATION UNIT.**

3 (a) IN GENERAL.—Section 4127(d) of title 10,
4 United States Code, is amended—

5 (1) by redesignating paragraph (11) as para-
6 graph (12); and

7 (2) by inserting after paragraph (10) the fol-
8 lowing new paragraph:

9 “(11) Coordinate with the portfolio acquisition
10 executives of the Army, Navy, Air Force, Marine
11 Corps, and Space Force to—

12 “(A) identify priority acquisition problems
13 and capability needs and gaps;

14 “(B) identify platforms, capabilities, and
15 solutions developed by entities working with the
16 Unit that have the potential to address the pri-
17 ority acquisition problems and capability needs
18 and gaps identified under subparagraph (A);
19 and

20 “(C) assist such portfolio acquisition ex-
21 ecutives in establishing and carrying out pro-
22 grams for the acquisition of such platforms, ca-
23 pabilities, and solutions.”.

24 (b) CLARIFYING AMENDMENT TO BOOST PRO-
25 GRAM.—Section 1833 of the National Defense Authoriza-
26 tion Act for Fiscal Year 2026 (Public Law 119–60; 10

- 1 U.S.C. 3453 note) is amended by striking “commercial”
- 2 each place it appears.

1 **SEC. 213 [Log 84930]. TEST AND EVALUATION REPOSITORY**
2 **AND REGIONAL TEST HUBS OF THE TEST RE-**
3 **SOURCE MANAGEMENT CENTER.**

4 (a) IN GENERAL.—Section 4173 of title 10, United
5 States Code, is amended—

6 (1) in subsection (c)(1) by adding at the end
7 the following new subparagraph:

8 “(G) To carry out the activities described in
9 subsections (j) and (k).”;

10 (2) by redesignating subsection (j) as subsection
11 (l);

12 (3) by inserting after subsection (i) the fol-
13 lowing new subsections:

14 “(j) REPOSITORY OF TEST AND EVALUATION FACILI-
15 TIES.—(1) The Director shall establish and maintain a
16 digital repository that identifies and provides relevant in-
17 formation on all testing and evaluation facilities in the
18 United States that could be made available for use by the
19 Department of Defense and qualified partners for the test-
20 ing and evaluation of weapon systems and innovative tech-
21 nologies.

22 “(2) The repository established under paragraph (1)
23 shall—

24 “(A) identify all testing and evaluation facilities
25 that meet the criteria specified in paragraph (1), in-
26 cluding—

1 “(i) facilities owned or operated by the
2 Federal Government, including—

3 “(I) facilities in the Major Range and
4 Test Facility Base;

5 “(II) facilities not included in the
6 Major Range and Test Facility Base; and

7 “(III) National Guard facilities; and

8 “(ii) facilities owned or operated by—

9 “(I) State or local governments;

10 “(II) academic institutions;

11 “(III) nonprofit organizations; or

12 “(IV) for-profit entities; and

13 “(B) with respect to each testing and evaluation
14 facility identified in the repository, provide—

15 “(i) a description of the facility, including
16 a description of the capabilities and instrumen-
17 tation available at the facility;

18 “(ii) points of contact for scheduling range
19 time at the facility; and

20 “(iii) such other information as the Direc-
21 tor determines appropriate.

22 “(3) The Director shall update the repository
23 under paragraph (1) not less frequently than annu-
24 ally.

1 “(4) The Director shall make the repository es-
2 tablished under paragraph (1) accessible to such ele-
3 ments of the Department of Defense and qualified
4 partners as the Director determines appropriate.

5 “(k) AUTHORITY TO ESTABLISH REGIONAL TEST
6 AND EVALUATION HUBS.—(1) The Director may establish
7 and maintain regional test and evaluation hubs at loca-
8 tions within and outside the United States for purposes
9 of facilitating or conducting test and evaluation activities.

10 “(2) In the event the Director exercises the authority
11 to establish and maintain regional test and evaluation
12 hubs under paragraph (1), the Director shall develop a
13 strategy and criteria for the selection of locations for such
14 hubs, which shall include consideration of whether the geo-
15 graphic region served by the hub provides an environment
16 conducive to the simulation of realistic threats and envi-
17 ronmental conditions.”; and

18 (4) in subsection (l), as so redesignated—

19 (A) in the subsection heading, by striking
20 “DEFINITION” and inserting “DEFINITIONS”;

21 (B) by striking “In this section, the term”
22 and inserting “In this section:

23 “(1) The term”; and

24 (C) by adding at the end the following new
25 paragraph:

1 “(2) The term ‘qualified partner’ means an en-
2 tity that the Director determines—

3 “(A) is engaged in the development of ca-
4 pabilities for the Department of Defense, such
5 as a contractor, academic institution, or other
6 private sector organization; and

7 “(B) is qualified to conduct test and eval-
8 uation activities at a facility described in sub-
9 section (j) or a regional test and evaluation hub
10 described in subsection (k).”.

11 (b) DEADLINE.—The Director of the Test Resource
12 Management Center shall establish the repository required
13 under section 4173(j) of title 10, United States Code (as
14 added by subsection (a) of this section), by not later than
15 180 days after the date of the enactment of this Act.

1 **SEC. 214 [Log 85244]. WEAPON SYSTEM PLATFORM MOD-**
2 **ERNIZATION AND CYBER HARDENING.**

3 Section 228 of the National Defense Authorization
4 Act for Fiscal Year 2026 (Public Law 119–60; 139 Stat.
5 786; 10 U.S.C. 4001 note) is amended—

6 (1) in subsection (b), by inserting after para-
7 graph (2) the following new paragraph:

8 “(3) The Secretary shall, not later than two
9 years after the date of the enactment of this Act, se-
10 lect not fewer than three additional weapon system
11 platforms for participation in the demonstration.”;

12 (2) by redesignating subsection (c) as sub-
13 section (d), and in such subsection—

14 (A) in paragraph (1)—

15 (i) by inserting after “2027,” the fol-
16 lowing: “and again on January 1, 2028,
17 and January 1, 2029,”; and

18 (ii) by striking “with respect to the
19 demonstration conducted pursuant to sub-
20 section (a)” and inserting “with respect to
21 the activities carried out under subsections
22 (a), (b), and (c)”;

23 (B) in each of paragraphs (2) and (3), by
24 striking “The report” and inserting “Each re-
25 port”; and

26 (C) in paragraph (2)—

1 (i) by redesignating subparagraph (B)
2 as subparagraph (C); and

3 (ii) by inserting after subparagraph
4 (B) the following new subparagraph:

5 “(B) The results of the evaluation carried
6 out under subsection (c)(1) and any pilot ef-
7 forts carried out under subsection (c)(2).”;

8 (3) by inserting after subsection (b) the fol-
9 lowing new subsection:

10 “(c) OPERATIONAL INTEGRATION.—The Secretary of
11 Defense shall—

12 “(1) evaluate opportunities to integrate data
13 collected and analyzed from the demonstration into
14 command and control, logistics, sustainment, and
15 maintenance systems of the Department of Defense,
16 prioritizing systems with the greatest operational
17 value; and

18 “(2) conduct pilot efforts to integrate the moni-
19 toring capabilities included in the demonstration into
20 the platforms included in the demonstration, as ap-
21 propriate.”; and

22 (4) by adding at the end the following new sub-
23 section:

1 “(e) DURATION OF AUTHORITY.—The authority pro-
2 vided under this section shall remain in effect until Sep-
3 tember 30, 2028.”.

1 **SEC. 215 [Log 85666]. REPEAL OF REQUIREMENT FOR SEC-**
2 **RETARY OF DEFENSE TO ACT THROUGH A**
3 **SPECIFIED OFFICIAL FOR NATO INNOVATION**
4 **PROGRAM.**

5 (a) REPEAL OF REQUIREMENT TO ACT THROUGH
6 SPECIFIED OFFICIAL.—Subsections (a) and (b) of section
7 222 of the National Defense Authorization Act for Fiscal
8 Year 2024 (Public Law 118–31; 137 Stat. 189) are
9 amended by striking “, acting through the Under Sec-
10 retary of Defense for Research and Engineering,” each
11 place it appears.

12 (b) REPEAL OF EXECUTED REQUIREMENT.—Such
13 section is further amended—
14 (1) by striking subsection (e); and
15 (2) by redesignating subsections (d) and (e) as
16 subsections (c) and (d), respectively.

1 **SEC. 220 [Log 85071]. REALIGNMENT OF THE NATIONAL**
2 **STRATEGIC RESEARCH INSTITUTE TO THE**
3 **DEPARTMENT OF THE AIR FORCE.**

4 (a) TRANSFER OF RESPONSIBILITY.—Not later than
5 two years after the date of the enactment this Act, the
6 Under Secretary of Defense for Research and Engineering
7 shall—

8 (1) designate the Air Force as the primary
9 sponsor of the National Strategic Research Institute
10 University Affiliated Research Center (referred to in
11 this section as the “Center”); and

12 (2) coordinate with the Secretary of the Air
13 Force and the Commander of the United States
14 Strategic Command to ensure that the Center re-
15 ceives the funding and other resources necessary to
16 meet the applicable requirements of the UARC Man-
17 agement Plan following such designation.

18 (b) RESOURCING PLAN.—Not later than 90 days
19 after the date on which the designation under subsection
20 (a)(1) occurs, the Secretary of the Air Force shall submit
21 to the congressional defense committees a plan for pro-
22 viding funding and other resources to the Center in ac-
23 cordance with subsection (a)(2).

24 (c) DEFINITIONS.—In this section:

25 (1) The term “prime sponsor” has the meaning
26 given that term in the UARC Management Plan.

1 (2) The term “UARC Management Plan”
2 means the publication of the Department of Defense
3 titled “Department of Defense University Affiliated
4 Research Center (UARC) Management Plan”, dated
5 July 2010 (or any successor to such plan).

1 **SEC. 221 [Log 85277]. PRIZE COMPETITIONS TO SUPPORT**
2 **THE RESEARCH AND DEVELOPMENT OF BIO-**
3 **TECHNOLOGY FOR THE DEPARTMENT OF DE-**
4 **FENSE.**

5 (a) PROGRAM REQUIRED.—

6 (1) IN GENERAL.—Pursuant to the authority
7 provided under section 4025 of title 10, United
8 States Code, the Secretary of Defense shall carry
9 out a program (referred to in this section as the
10 “Program”) to award prizes to support the research,
11 development, and commercialization of bio-
12 technology-based capabilities that address priority
13 areas identified by the Secretary under subsection
14 (b).

15 (2) ADDITIONAL REQUIREMENTS.—The Sec-
16 retary shall—

17 (A) before commencing prize competitions
18 under the Program, establish requirements for
19 the prize competition process, including—

20 (i) eligibility criteria for participants
21 consistent with paragraph (3); and

22 (ii) procedures for the testing, judg-
23 ing, and verification of submissions to the
24 competitions; and

25 (B) ensure that information on the prize
26 competitions is made available to eligible par-

1 ticipants, including by conducting outreach and
2 posting such information to a publicly accessible
3 website of the Department of Defense.

4 (3) ELIGIBLE PARTICIPANTS.—To be eligible
5 for a prize award under the Program, an individual
6 or entity shall meet the requirements described in
7 section 24(g)(3) of the Stevenson-Wydler Technology
8 Innovation Act of 1980 (15 U.S.C. 3719(g)(3)).

9 (4) JUDGES.—In accordance with section 24(k)
10 of the Stevenson-Wydler Technology Innovation Act
11 of 1980 (15 U.S.C. 3719(k)), an individual from the
12 private sector may be appointed as a judge for a
13 prize competition under the Program.

14 (5) COORDINATION.—The Secretary of Defense
15 shall carry out the Program acting through the head
16 of the Biotechnology Management Office of the De-
17 partment of Defense and in consultation with the
18 Secretaries of the military departments and relevant
19 officials from laboratories of the Armed Forces and
20 other appropriate elements of the Department of
21 Defense.

22 (6) DEADLINE.—The Secretary of Defense shall
23 commence implementation of the Program not later
24 than one year after the date of the enactment of this
25 Act.

1 (b) SELECTION OF PRIORITY AREAS.—

2 (1) IN GENERAL.—Before commencing prize
3 competitions under the Program, but not later than
4 one year after the date of the enactment of this Act,
5 the Secretary of Defense shall identify and select
6 specific, well-defined, and measurable priority areas
7 of biotechnology research and development to be ad-
8 vanced through the award of prizes under the Pro-
9 gram.

10 (2) BIOTECHNOLOGY APPLICATIONS.—In car-
11 rying out paragraph (1), the Secretary is encouraged
12 to identify and select priority areas that support the
13 following applications of biotechnology for defense
14 purposes:

15 (A) Bioenergetics.

16 (B) Biobased material, including for use in
17 existing and planned systems where such mate-
18 rials could provide improved performance over
19 traditional material.

20 (C) Biomining, including for critical min-
21 erals.

22 (D) Biomanufacturing platforms and proc-
23 esses, including for modular or deployable sys-
24 tems.

1 (E) Biotechnology convergence with other
2 technologies and subject areas, including artifi-
3 cial intelligence, advanced manufacturing, and
4 advanced computing.

5 (3) PUBLIC INPUT AND OTHER CONSIDER-
6 ATIONS.—In identifying and selecting priority areas
7 under paragraph (1), the Secretary shall—

8 (A) solicit and consider public input; and

9 (B) consider—

10 (i) relevant existing and planned pro-
11 grams and activities of Department of De-
12 fense and other research and development
13 entities of the Federal Government;

14 (ii) the likelihood of relevant research
15 or development being conducted by the pri-
16 vate sector without further support from
17 the Federal Government;

18 (iii) the likelihood that investment in
19 an area by the Department of Defense will
20 result in improved capabilities or readiness,
21 including by increasing supply chain resil-
22 ience; and

23 (iv) whether such an investment would
24 foster innovation beyond the primary goal
25 of the proposed priority area.

1 **SEC. 222 [Log 85552]. PILOT PROGRAM TO RECOGNIZE OUT-**
2 **STANDING ACHIEVEMENTS IN TECHNOLOGY**
3 **AND PROTOTYPE DEVELOPMENT.**

4 (a) PILOT PROGRAM.—The Director of the Defense
5 Innovation Unit (referred to in this section as the Direc-
6 tor) shall carry out a pilot program under which the Direc-
7 tor awards prizes, on a competitive basis, to recognize out-
8 standing achievements in technology development and pro-
9 totype development that—

10 (1) have the potential to address operational
11 problems and capability gaps identified by the Sec-
12 retary of Defense, the Secretaries of the military de-
13 partments, and combatant commanders; or

14 (2) have potential for application to the per-
15 formance of the military missions of the Department
16 of Defense.

17 (b) FORM OF PRIZES.—Prizes awarded under this
18 section may include—

19 (1) cash prizes; or

20 (2) the award of contracts or other agreements.

21 (c) INFORMATION DISSEMINATION.—The Director
22 shall carry out activities to publicize the prize competitions
23 carried out under this section and to solicit participation
24 in such competitions from eligible individuals and entities.

25 (d) PRIZE MAXIMUM AND COINVESTMENT REQUIRE-
26 MENTS.—

1 (1) MAXIMUM VALUE.—The value of a prize
2 awarded under this section may not exceed
3 \$15,000,000.

4 (2) COINVESTMENT.—The Director may award
5 a prize under this section without receiving approval
6 from the Under Secretary of Defense for Research
7 and Engineering if—

8 (A) the value of the prize is not more than
9 \$2,000,000; or

10 (B) in the case of a prize with a value ex-
11 ceeding \$2,000,000, at least half of the funds
12 for the portion of the prize in excess of
13 \$2,000,000 are provided by the portfolio acqui-
14 sition executive of an organization of the De-
15 partment of Defense outside the Defense Inno-
16 vation Unit.

17 (e) USE OF PRIZE AUTHORITY.—Use of prize author-
18 ity under this section shall be considered the use of com-
19 petitive procedures for the purposes of chapter 221 of title
20 10, United States Code.

21 (f) COMMENCEMENT AND TERMINATION.—

22 (1) DEADLINE FOR COMMENCEMENT.—The Di-
23 rector shall commence implementation of the pilot
24 program under subsection (a) not later than 90 days
25 after the date of the enactment of this Act.

1 (2) TERMINATION.—The authority to carry out
2 the pilot program under subsection (a) shall termi-
3 nate on the date that is three years after the date
4 of the enactment of this Act.

5 (g) CONGRESSIONAL NOTICE.—

6 (1) IN GENERAL.—Not later than 15 days after
7 a contract or other agreement that exceeds a fair
8 market value of \$2,000,000 is awarded under this
9 section, the Director shall submit to the congres-
10 sional defense committees written notice of such
11 award.

12 (2) CONTENTS.—Each notice submitted under
13 paragraph (1) shall include—

14 (A) the value of the relevant contract or
15 other agreement, as applicable, including all op-
16 tions;

17 (B) an identification of any portfolio acqui-
18 sition executive responsible for implementation
19 or oversight of technology development or pro-
20 totype development (as applicable) for which an
21 award was made under this section, and a brief
22 summary of lessons learned by such portfolio
23 acquisition executive in carrying out such imple-
24 mentation or oversight;

1 (C) a brief description of the technology
2 development or prototype for which such con-
3 tract or other agreement, as applicable, was
4 awarded; and

5 (D) an explanation of the benefit to the
6 performance of the military mission of the De-
7 partment of Defense resulting from the award.

8 (h) PORTFOLIO ACQUISITION EXECUTIVE DE-
9 FINED.—In this section, the term “portfolio acquisition
10 executive” has the meaning given that term in section
11 1737 of title 10, United States Code.

1 **SEC. 223 [Log 84979]. PILOT PROGRAM ON FORWARD**
2 **DEPLOYABLE BIOMANUFACTURING CAPA-**
3 **BILITIES.**

4 (a) **AUTHORIZATION.**—The Under Secretary of De-
5 fense for Research and Engineering, in coordination with
6 the Secretary of the Army, may carry out a pilot pro-
7 gram—

8 (1) to identify near-term and long-term use
9 cases for forward deployable mobile biomanufac-
10 turing capabilities; and

11 (2) to conduct demonstrations of such capabili-
12 ties.

13 (b) **ACTIVITIES.**—In carrying out the pilot program
14 under subsection (a), the Under Secretary of Defense for
15 Research and Engineering may—

16 (1) consider the use of novel manufacturing
17 processes and equipment, including automation,
18 modularity, and miniaturization of production capa-
19 bilities;

20 (2) collaborate with industry to develop forward
21 deployable mobile biomanufacturing capabilities; and

22 (3) consider the security measures required for
23 such capabilities when forward deployed.

24 (c) **REPORT.**—Not later than one year after the date
25 of the enactment of this Act, the Under Secretary of De-
26 fense for Research and Engineering shall submit to the

1 congressional defense committees a report on the status
2 of the pilot program under subsection (a). The report shall
3 include—

4 (1) an assessment of existing Department of
5 Defense capabilities related to biomanufacturing and
6 an explanation of whether and how those capabilities
7 may be used as part of the pilot program;

8 (2) identification of near-term and long-term
9 use cases for the deployment of mobile biomanufac-
10 turing;

11 (3) for each use case identified under para-
12 graph (2), a comparison of the estimated cost of ful-
13 filling such use case through domestic biomanufac-
14 turing at an industrial scale versus the cost of ful-
15 filling such use case using mobile biomanufacturing
16 at the miniaturized scale;

17 (4) an assessment of security measures required
18 to deploy forward deployable mobile biomanufac-
19 turing capabilities; and

20 (5) an assessment of the viability of
21 transitioning technology developed under the pilot
22 program into operational use within the Depart-
23 ment, including the resources needed for further de-
24 velopment and scaling of such technology and the
25 potential benefits of such technology.

1 **Subtitle C—Plans, Reports, and**
2 **Other Matters**

3 **SEC. 231 [Log 85075]. POLICY TO GUIDE THE DEVELOP-**
4 **MENT AND ACQUISITION OF QUANTUM COM-**
5 **PUTING SYSTEMS FOR THE DEPARTMENT OF**
6 **DEFENSE.**

7 (a) **POLICY REQUIRED.**—Not later than 180 days
8 after the date of the enactment of this Act, the Secretary
9 of Defense shall issue a policy to guide the development
10 and acquisition of quantum computing systems for the De-
11 partment of Defense. Under the policy, the Secretary
12 shall—

13 (1) establish a definition of “quantum com-
14 puting system” for purposes of the policy;

15 (2) establish a process for validating and
16 verifying quantum computing systems before such
17 systems are developed or acquired by the Depart-
18 ment; and

19 (3) ensure that the development and acquisition
20 of such systems is consistent with and informed by
21 the findings and processes of the Quantum
22 Benchmarking Initiative of the Defense Advanced
23 Research Projects Agency (or any successor initia-
24 tive).

25 (b) **LIMITATION AND WAIVER.**—

1 (1) LIMITATION.—Following issuance of the
2 policy under subsection (a), a quantum computing
3 system may not be developed or acquired by an ele-
4 ment of the Department of Defense unless the sys-
5 tem has been validated and verified in accordance
6 with such policy.

7 (2) WAIVER.—The Secretary of Defense may
8 waive the limitation under paragraph (1), on a case
9 by case basis, with respect to a specific quantum
10 computing system. In the event the Secretary issues
11 such a waiver, the Secretary shall provide to the
12 congressional defense committees, not later than 15
13 days after date on which the waiver was issued—

14 (A) written notice of such waiver; and

15 (B) the Secretary's justification for the
16 waiver.

1 **Subtitle A—Cybersecurity**

2 **SEC. 1501 [Log 85241]. DEPARTMENT OF DEFENSE AI INCI-**
3 **DENT AND VULNERABILITY REPORTING PRO-**
4 **GRAM.**

5 Chapter 131 of title 10, United States Code, is
6 amended by inserting after section 2224a the following
7 new section:

8 **“§ 2224b. Artificial intelligence incident and vulner-**
9 **ability reporting program**

10 “(a) IN GENERAL.—The Secretary of Defense shall
11 establish a centralized Department-wide program for the
12 reporting, tracking, analysis, and remediation of covered
13 AI incidents and covered AI vulnerabilities arising from
14 the development, testing, procurement, fielding, or oper-
15 ation of artificial intelligence systems within the Depart-
16 ment of Defense.

17 “(b) PURPOSE.—The purpose of the program estab-
18 lished under subsection (a) shall be to—

19 “(1) identify recurring risks, failure modes,
20 vulnerabilities, and systemic weaknesses in artificial
21 intelligence systems;

22 “(2) support mitigation of significant risks; and

23 “(3) inform testing, procurement, cybersecurity,
24 and deployment decisions to improve the safety, se-

1 security, reliability, and operational effectiveness of
2 such systems.

3 “(c) REQUIREMENTS FOR PROGRAM.—The program
4 shall—

5 “(1) be designed using practices drawn from es-
6 tablished safety incident reporting programs, vulner-
7 ability disclosure programs, and programs to identify
8 and develop lessons learned;

9 “(2) emphasize non-punitive reporting, protec-
10 tion of sensitive and proprietary information, and
11 dissemination of lessons learned, as appropriate; and

12 “(3) include a mechanism to enable timely ac-
13 cess to and sharing of relevant logs, system data,
14 and model information as necessary to support anal-
15 ysis and response.

16 “(d) DESIGNATION OF OFFICIAL.—The Secretary
17 shall designate an appropriate official for the reporting,
18 tracking, analysis, and remediation of covered AI incidents
19 and covered AI vulnerabilities under this section. The Sec-
20 retary, acting through such official, shall receive and
21 standardize reports, conduct trend analysis, identify recur-
22 ring risks and failure modes, and issue guidance, alerts,
23 and recommendations, as appropriate.

1 “(e) REPORTING AND CATEGORIZATION.—(1) The
2 Secretary shall require prompt reporting to the official
3 designated under subsection (d) of—

4 “(A) any covered AI incident; and

5 “(B) any covered AI vulnerability.

6 “(2) The Secretary, acting through the official, shall
7 categorize each incident or vulnerability reported to the
8 official according to whether the incident or vulnerability
9 requires—

10 “(A) a Department-wide response;

11 “(B) a response at the program level; or

12 “(C) a response at a local level.

13 “(f) DEPARTMENT-WIDE AND PROGRAM-LEVEL MAT-
14 TERS.—(1) In the case of any incident or vulnerability cat-
15 egorized under subsection (e)(2)(A) or (B), the Secretary,
16 acting through the official designated under subsection
17 (d), shall coordinate any responses that the Secretary con-
18 sidered appropriate, such as remediation, retesting, mitiga-
19 tion measures, or deployment restrictions.

20 “(2) In addition, in the case of any incident or vulner-
21 ability described in subsection (e)(2)(A), the Secretary,
22 acting through the official, shall require—

23 “(A) a documented corrective action plan; and

1 “(B) validation that the mitigation measures, if
2 any, in such plan have been implemented before con-
3 tinued operational use.

4 “(g) PROTECTION OF REPORTS.—(1) The Secretary
5 shall establish a protected disclosure process, informed by
6 established vulnerability disclosure practices, through
7 which members of the Armed Forces, civilian employees,
8 contractors, and subcontractors at any tier may report
9 covered AI incidents and covered AI vulnerabilities in good
10 faith.

11 “(2) The Secretary shall ensure that a person making
12 a report in good faith under paragraph (1) is not, on the
13 basis of that report alone, subject to adverse contract ac-
14 tion, subject to adverse personnel action, or otherwise re-
15 taliated against by the Department.

16 “(h) PROTECTION OF INFORMATION.—The Secretary
17 shall establish procedures to protect sensitive, proprietary,
18 and classified information submitted through the pro-
19 tected disclosure process under subsection (g).

20 “(i) ANNUAL REPORT.—(1) In each of years 2027
21 through 2031, the Secretary shall submit to the congres-
22 sional defense committees an annual report on the pro-
23 gram. The report shall include—

1 “(A) the number of reports made of incidents
2 and vulnerabilities and the categorizations of such
3 reports;

4 “(B) a summary of significant trends, recurring
5 risks, systemic issues, and corrective actions taken
6 in response; and

7 “(C) any recommendations for changes to test-
8 ing, procurement, cybersecurity, or deployment poli-
9 cies relating to artificial intelligence systems.

10 “(2) Each report under this subsection shall be sub-
11 mitted in unclassified form but may include a classified
12 annex.

13 “(j) DEFINITIONS.—In this section:

14 “(1) The term ‘artificial intelligence’ has the
15 meaning given such term in section 5002 of the Na-
16 tional Artificial Intelligence Initiative Act of 2020
17 (15 U.S.C. 9401).

18 “(2) The term ‘covered AI incident’ means an
19 event in which an artificial intelligence system—

20 “(A) causes unintended operational, safety,
21 or security harm;

22 “(B) operates outside approved safety,
23 legal, or mission guardrails;

1 “(C) materially degrades mission perform-
2 ance or reliability in a real-world or operation-
3 ally representative environment; or

4 “(D) operates in a manner that, under rea-
5 sonably foreseeable circumstances, could have
6 resulted in significant unintended operational,
7 safety, or security harm.

8 “(3) The term ‘covered AI vulnerability’ means
9 an exploitable weakness, vulnerability, or systemic
10 issue in an artificial intelligence system or related
11 component that could materially affect mission per-
12 formance, compromise system integrity, create safety
13 risk, or result in unauthorized or unintended behav-
14 ior.”.

1 **SEC. 1502 [Log 84973]. REVIEW AND REALIGNMENT OF DE-**
2 **PARTMENT OF DEFENSE CYBERSECURITY**
3 **RESPONSIBILITIES.**

4 (a) REVIEW AND REALIGNMENT.—

5 (1) REVIEW REQUIRED.—The Secretary of De-
6 fense shall conduct a comprehensive review of the
7 roles, responsibilities, relationships, authorities, and
8 governance structures relating to cybersecurity, in-
9 formation technology, network defense, and defen-
10 sive cyber operations within the Department of De-
11 fense in order to achieve the following goals:

12 (A) Establish clear accountability for the
13 cybersecurity of Department of Defense infor-
14 mation networks, including identification of one
15 official designated as the single accountable of-
16 ficial responsible for the cybersecurity of De-
17 partment of Defense information networks.

18 (B) Improve the operational effectiveness,
19 responsiveness, and unity of effort of Depart-
20 ment-wide cybersecurity, information tech-
21 nology, network defense, and defensive cyber
22 operations.

23 (C) Eliminate structural overlap, duplica-
24 tion, and fragmentation across organizations re-
25 sponsible for cybersecurity, information tech-

1 nology, network defense, and defensive cyber
2 operations.

3 (D) Reduce overlapping responsibilities
4 and ensure alignment of policy, strategy, budget-
5 etary oversight, and operational support nec-
6 essary for the cybersecurity of Department of
7 Defense information networks in an evolving
8 threat environment.

9 (2) SCOPE.—The review conducted under this
10 subsection shall include an assessment of the roles,
11 responsibilities, relationships, and authorities
12 among—

13 (A) the Chief Information Officer of the
14 Department of Defense;

15 (B) the Assistant Secretary of Defense for
16 Cyber Policy;

17 (C) the Principal Cyber Advisor to the Sec-
18 retary of Defense;

19 (D) the Commander of the United States
20 Cyber Command;

21 (E) the Department of Defense Cyber De-
22 fense Command; and

23 (F) such other offices, elements, or organi-
24 zations as the Secretary determines appro-
25 priate.

1 (3) REALIGNMENT.—As a result of the review,
2 and in order to achieve the goals specified in para-
3 graph (1), the Secretary may, consistent with appli-
4 cable law—

5 (A) realign, consolidate, or modify the
6 roles, responsibilities, relationships, and au-
7 thorities of the officials, offices, elements, and
8 organizations specified in paragraph (2);

9 (B) reassign functions, personnel, and re-
10 sources among such officials, offices, elements,
11 and organizations;

12 (C) eliminate duplicative functions; and

13 (D) clarify or revise reporting relationships
14 and lines of authority.

15 (b) PRESERVATION OF FUNCTIONS.—In carrying out
16 subsection (a), the Secretary shall ensure that all func-
17 tions necessary for the governance, defense, and operation
18 of Department of Defense information networks are main-
19 tained, regardless of the organizational structure to which
20 such functions are assigned.

21 (c) LIMITATION ON ESTABLISHMENT OF NEW OF-
22 FICE OR ORGANIZATION.—The Secretary may not estab-
23 lish a new office or organization for the purpose of car-
24 rying out this section unless the Secretary determines that
25 such establishment is necessary to achieve the goals speci-

1 fied in subsection (a)(1) and consistent with applicable
2 law.

3 (d) LIMITATION ON REASSIGNMENT OR ELIMINATION
4 OF FUNCTION.—The Secretary may not reassign or elimi-
5 nate a function associated with an official, office, element,
6 or organization for the purpose of carrying out this section
7 unless the Secretary submits to the congressional defense
8 committees a notification of the reassignment or elimi-
9 nation of the function and a period of 15 days has elapsed
10 after the date on which the notification was submitted.

11 (e) RULE OF CONSTRUCTION.—Nothing in this sec-
12 tion shall be construed to authorize the Secretary of De-
13 fense to modify, transfer, eliminate, or otherwise alter any
14 role, responsibility, relationship, authority, function, or
15 any other matter expressly required by law.

16 (f) REPORT.—

17 (1) IN GENERAL.—Not later than 90 days after
18 the date of the enactment of this Act, the Secretary
19 of Defense shall submit to the congressional defense
20 committees a report on the results of the review con-
21 ducted under subsection (a).

22 (2) ELEMENTS.—The report shall include—

23 (A) identification of the official designated
24 as the single accountable official responsible for
25 the cybersecurity of Department of Defense in-

1 formation networks, as specified in subsection
2 (a)(1)(A);

3 (B) a description of any realignment, con-
4 solidation, or modification made, or to be made,
5 to the roles, responsibilities, relationships, and
6 authorities of the officials, offices, elements,
7 and organizations reviewed, as specified in sub-
8 section (a)(3)(A);

9 (C) a description of any reassignment of
10 functions, personnel, and resources made, or to
11 be made, among the officials, offices, elements,
12 and organizations reviewed, as specified in sub-
13 section (a)(3)(B);

14 (D) a description of any duplicative func-
15 tions eliminated, or to be eliminated, as set
16 forth in subsection (a)(3)(C);

17 (E) a description of any clarification or re-
18 vision made, or to be made, to reporting rela-
19 tionships and lines of authority, as set forth in
20 subsection (a)(3)(D);

21 (F) a mapping of the responsibilities and
22 authorities assigned as of the date of the enact-
23 ment of this Act to each respective official, of-
24 fice, element, or organization reviewed (includ-
25 ing an identification of whether the responsi-

1 bility or authority is required by law to be as-
2 signed to such official, office, element, or orga-
3 nization, and an mapping of the responsibilities
4 and authorities as they will be assigned after
5 completion of the activities specified in sub-
6 section (a)(3);

7 (G) a timeline for implementation of the
8 activities specified in subsection (a)(3), under
9 which all such activities shall be implemented
10 not later than one year after the date of the en-
11 actment of this Act;

12 (H) identification of any legislative rec-
13 ommendations, including any provisions of law
14 requiring amendment, to fully implement the
15 goals specified in subsection (a)(1) and the ac-
16 tivities specified in subsection (a)(3); and

17 (I) a justification for the new structure, in-
18 cluding an explanation for how the new struc-
19 ture better achieves the goals specified in sub-
20 section (a)(1) than the current structure.

21 (g) BRIEFING.—Not later than 45 days after the date
22 of the enactment of this Act, the Secretary shall provide
23 a briefing to the congressional defense committees on pre-
24 liminary findings of the review.

1 **Subtitle B—Information Tech-**
2 **nology and Artificial Intel-**
3 **ligence**

4 **SEC. 1511 [Log 84971]. SOFTWARE PLANNING, PROGRAM-**
5 **MING, BUDGETING, AND EXECUTION RE-**
6 **FORM.**

7 (a) IN GENERAL.—Chapter 131 of title 10, United
8 States Code, is amended by inserting after section 2220
9 the following new section:

10 **“§ 2221. Availability of appropriations accounts for**
11 **full lifecycle of software capabilities: reg-**
12 **ulations**

13 “(a) IN GENERAL.—The Secretary of Defense shall
14 ensure that the relevant financial management regulations
15 of the Department provide guidance for the budgeting and
16 execution of funds for software capabilities. Such guidance
17 shall—

18 “(1) reflect that amounts appropriated for oper-
19 ations and maintenance, procurement, or research,
20 development, test, and evaluation may be used at
21 each stage in the lifecycle of a software capability,
22 consistent with applicable law;

23 “(2) clarify that such amounts may be used, as
24 appropriate, for all activities at each such stage in
25 the lifecycle of a software capability;

1 “(3) provide that, for any program or activity
2 of the Department that requires a new software ca-
3 pability, the appropriations account primarily avail-
4 able for that program or activity shall be available
5 for that new software capability;

6 “(4) not impose restrictions on the availability
7 of funds for software capabilities, except as required
8 by law; and

9 “(5) maintain consistency, to the maximum ex-
10 tent practicable, with Recommendation 11A of the
11 final report (dated March 2024) of the Commission
12 on Planning, Programming, Budgeting, and Execu-
13 tion Reform, as submitted under section 1004 of the
14 National Defense Authorization Act for Fiscal Year
15 2022 (Public Law 117–81; 135 Stat. 1884).

16 “(b) DEFINITION.—In this section, the term
17 ‘lifecycle’ includes stages such as development, proto-
18 typing, testing, fielding, modification, upgrading, licens-
19 ing, sustainment, and retirement.”.

20 (b) ISSUANCE OF REVISED REGULATIONS.—

21 (1) IN GENERAL.—Not later than one year
22 after the date of the enactment of this Act, the Sec-
23 retary of Defense shall issue revised regulations to
24 implement section 2221 of title 10, United States
25 Code, as added by this section.

1 (2) NOTIFICATION.—Not later than 30 days
2 after the Secretary issues the revised regulations
3 under paragraph (1), the Secretary shall notify the
4 congressional defense committees of the revisions.

5 (c) UPDATES AND REPORT.—

6 (1) WRITTEN UPDATES.—Not later than 180
7 days after the date of the enactment of this Act, and
8 every 90 days thereafter until the revised regulations
9 required by subsection (b) are issued, the Secretary
10 shall submit to the congressional defense committees
11 a written update containing—

12 (A) a description of the progress made to-
13 ward completing the revised regulations, along
14 with specific actions taken and remaining mile-
15 stones;

16 (B) the most up-to-date working draft of
17 the revised regulations, or an outline of such
18 working draft in sufficient detail to demonstrate
19 the manner in which, and the extent to which,
20 the working draft implements section 2221;

21 (C) a description of any anticipated bar-
22 riers to full and timely issuance of the revised
23 regulations and full and timely implementation
24 of such regulations;

1 (D) any recommendations for legislation to
2 fully implement such revised regulations; and

3 (E) if the Secretary has not issued such
4 revised regulations within the period described
5 in subsection (b), an explanation for the delay
6 and the anticipated timeline for issuing the re-
7 vised regulations.

8 (2) REPORT.—Not later than one year after the
9 date of the enactment of this Act, the Secretary
10 shall submit to the congressional defense committees
11 a report containing—

12 (A) the revised regulations required by
13 subsection (b); and

14 (B) any remaining barriers to full and
15 timely implementation of such revised regula-
16 tions.

1 **SEC. 1512 [Log 85276]. ARTIFICIAL INTELLIGENCE MODEL**
2 **RAPID DEPLOYMENT FRAMEWORK.**

3 (a) **FRAMEWORK REQUIRED.**—The Secretary of De-
4 fense, acting through the Chief Digital and Artificial Intel-
5 ligence Officer of the Department of Defense, shall estab-
6 lish a framework for the rapid deployment of artificial in-
7 telligence (“AI”), to be known as the Artificial Intelligence
8 Model Rapid Deployment Framework (in this section re-
9 ferred to as the “Framework”), to enable the evaluation,
10 authorization, and deployment of AI systems on Depart-
11 ment enterprise AI platforms, as appropriate. The objec-
12 tive of the Framework shall be to enable deployment of
13 such systems on such platforms within 30 days after pub-
14 lic availability.

15 (b) **ELEMENTS.**—The Framework shall include the
16 following elements:

17 (1) **VENDOR AND MODEL ONBOARDING PROC-**
18 **ESS.**—Establishment of standardized processes for
19 deploying AI systems onto Department enterprise AI
20 platforms, including security reviews, technical as-
21 sessments, and integration with other Department
22 systems and platforms.

23 (2) **SECURITY TESTING AND EVALUATION.**—Es-
24 tablishment of security testing and evaluation capa-
25 bilities to support security assessments for AI sys-
26 tems deployed on Department enterprise AI plat-

1 forms, including adversarial testing, supply chain
2 risk assessments, and other security testing appro-
3 priate for AI systems, consistent with existing cyber-
4 security and test and evaluation policies.

5 (3) MULTI-CLASSIFICATION DEPLOYMENT.—Es-
6 tablishment of capability to deploy AI systems on
7 Department enterprise AI platforms across multiple
8 classification levels, as appropriate, with appropriate
9 security controls and data isolation.

10 (4) STREAMLINED SYSTEM AUTHORIZATION
11 PROCESSES.—In coordination with the Chief Infor-
12 mation Officer of the Department, establishment of
13 streamlined processes for authorization of AI sys-
14 tems deployed on Department enterprise AI plat-
15 forms, including reuse of authorization artifacts,
16 common control inheritance, and continuous moni-
17 toring capabilities.

18 (5) REGISTRY AND GOVERNANCE SYSTEMS.—
19 Implementation of registry and governance processes
20 to track version history, performance, security sta-
21 tus, and compliance for AI systems deployed on De-
22 partment enterprise AI platforms.

23 (c) INTEGRATION WITH OTHER FRAMEWORKS.—The
24 Secretary shall ensure that the rapid deployment of AI
25 systems under the Framework is achieved in a manner

1 that maintains security standards through integration
2 with other relevant frameworks, including—

3 (1) the plans, strategies, and other matters re-
4 lating to AI required by section 1544 of the Na-
5 tional Defense Authorization Act for Fiscal Year
6 2024 (10 U.S.C. 4001 note);

7 (2) the Defense-wide policy required by section
8 1512 of the National Defense Authorization Act for
9 Fiscal Year 2026 (10 U.S.C. 394 note); and

10 (3) the framework and other requirements re-
11 quired by section 1513 of the National Defense Au-
12 thorization Act for Fiscal Year 2026 (10 U.S.C.
13 2224 note).

14 (d) COMPLIANCE WITH REQUIREMENTS.—The Sec-
15 retary shall ensure that the Framework complies with all
16 applicable requirements for test and evaluation of Depart-
17 ment systems in accordance with applicable law, policy,
18 and guidance.

19 (e) METRICS AND REPORTING.—The Chief Digital
20 and Artificial Intelligence Officer shall—

21 (1) establish metrics to measure the time re-
22 quired to evaluate, authorize, deploy, and update AI
23 systems on Department enterprise AI platforms; and

24 (2) in each of fiscal years 2027, 2028, 2029,
25 and 2030, submit an annual report to the congress-

1 sional defense committees on progress toward
2 achieving the objective stated in subsection (a).

3 (f) DEFINITION.—In this section, the term “Depart-
4 ment enterprise AI platform” means a centrally managed
5 platform that hosts or provides AI services or applications
6 for use across multiple elements of the Department, rather
7 than for a single program, system, or mission application.

1 **SEC. 1513 [Log 85788]. UPDATE OF POLICY ON AUTONO-**
2 **MOUS AND ARTIFICIAL INTELLIGENCE-EN-**
3 **ABLED SYSTEMS.**

4 (a) **POLICY UPDATE REQUIRED.**—Not later than 1
5 year after the date of the enactment of this Act, the Sec-
6 retary of Defense shall update policies and guidance of
7 the Department of Defense, including by revising Depart-
8 ment of Defense Directive 3000.09 (relating to Autonomy
9 in Weapon Systems) and establishing or revising such ad-
10 ditional Department policies and guidance as may be ap-
11 propriate, governing—

12 (1) autonomous and semi-autonomous weapon
13 systems; and

14 (2) artificial intelligence-enabled systems in-
15 tended to support, recommend, or materially influ-
16 ence operational decisions associated with the em-
17 ployment of force, including systems used for oper-
18 ational planning, target development, weaponeering,
19 or engagement recommendation.

20 (b) **REQUIRED POLICY ELEMENTS.**—In updating the
21 policies and guidance required by subsection (a), the Sec-
22 retary shall ensure such policies and guidance include—

23 (1) criteria for categorizing systems according
24 to such factors as mission context, autonomy,
25 human involvement, and operational consequence;

1 (2) appropriate and operationally responsive re-
2 quirements for approval, validation, oversight, and
3 authorized operational use applicable to categories of
4 systems identified pursuant to the criteria in para-
5 graph (1);

6 (3) realistic and combat-effective requirements
7 for operator intervention, override mechanisms, and
8 operational resilience;

9 (4) appropriate requirements for auditability,
10 traceability, and accountability;

11 (5) criteria and procedures for rapidly fielding
12 capabilities following material changes to software,
13 models, data, or operational context;

14 (6) requirements for appropriate and operation-
15 ally responsive risk mitigation measures and notifi-
16 cations applicable to systems granted conditional or
17 temporary operational use;

18 (7) requirements for operational testing, evalua-
19 tion, and human training commensurate with mis-
20 sion risk and operational consequence; and

21 (8) processes and timelines for periodic review
22 and reevaluation of approved systems and oper-
23 ational use cases.

24 (c) COMPLIANCE WITH LAW.—The Secretary shall
25 ensure that the policies and guidance required by sub-

1 section (a) are consistent with applicable provisions of
2 Federal law and applicable Department policies and regu-
3 lations.

4 (d) CONTINUITY OF OPERATIONS.—This section does
5 not require the Secretary to suspend or terminate any on-
6 going operations, activities, or programs pending comple-
7 tion of the updates required by subsection (a).

8 (e) INTERIM REPORT.—Not later than 180 days after
9 the date of the enactment of this Act, the Secretary shall
10 provide a report to the congressional defense committees
11 describing the progress of the Department toward comple-
12 tion of the updates required by subsection (a), including
13 a preliminary assessment of the matters described in sub-
14 section (b).

15 (f) FINAL POLICY BRIEFING.—Not later than 30
16 days after the completion of the updates required by sub-
17 section (a), the Secretary shall provide a briefing to the
18 congressional defense committees on—

19 (1) the updates completed under subsection (a);

20 (2) the rationale supporting the updates, in-
21 cluding the assessment of the Secretary with respect
22 to each matter described in subsection (b); and

23 (3) any recommendations for authorities, re-
24 sources, or statutory changes.

1 (g) SEMIANNUAL REPORTS.—Not less frequently
2 than semiannually through December 31, 2032, the Sec-
3 retary of Defense shall provide a report to the congres-
4 sional defense committees regarding the implementation
5 of the updates required by subsection (a), including—

6 (1) systems and use cases reviewed under the
7 updates required by subsection (a), including wheth-
8 er such systems and use cases were approved, re-
9 stricted, suspended, or subject to additional review;
10 and

11 (2) any significant acquisition, resourcing,
12 sustainment, or programmatic impacts resulting
13 from implementation of the updates required by sub-
14 section (a).

1 **Subtitle C—Reports and Other**
2 **Matters**

3 **SEC. 1521 [Log 85463]. ROADMAP FOR MODERNIZATION OF**
4 **TOP SECRET AND SPECIAL ACCESS PROGRAM**
5 **NETWORK ARCHITECTURES.**

6 (a) IN GENERAL.—Not later than 180 days after the
7 date of the enactment of this Act, the Secretary of Defense
8 shall develop and submit to the congressional defense com-
9 mittees, and begin implementation of, a roadmap for the
10 modernization of Department of Defense networks that
11 process, store, or transmit information that is classified
12 at the level of top secret or is designated as being within
13 a special access program.

14 (b) ELEMENTS.—The roadmap required under sub-
15 section (a) shall include the following elements:

16 (1) An assessment of the current architecture,
17 capacity, security posture, and technical limitations
18 of such networks, including identification of major
19 capability gaps, cybersecurity risks, infrastructure
20 limitations, and technical debt.

21 (2) Target or reference architectures for mod-
22 ernized environments for such networks, including
23 enterprise-level and component-level networks, as ap-
24 propriate.

1 (3) Milestones and timelines for transition from
2 current environments to the target or reference ar-
3 chitectures.

4 (4) Plans to improve resilience, survivability,
5 and operations of such networks in contested, de-
6 graded, or disconnected environments.

7 (5) Plans to improve interoperability and data
8 sharing across such networks and relevant mission
9 partner environments, as appropriate.

10 (6) An assessment of high-performance com-
11 puting and distributed computing requirements,
12 whether locally or in cloud environments, necessary
13 to support real-time sensor data fusion, advanced
14 analytics, and artificial intelligence capabilities.

15 (7) An assessment of the extent to which such
16 networks support the operational requirements of
17 combatant commands, including the ability to enable
18 integration with joint and mission partner environ-
19 ments.

20 (8) Identification of governance, roles, and re-
21 sponsibilities for modernization of such networks
22 across the Department.

23 (9) Estimated resource requirements necessary
24 to implement the roadmap.

1 (c) ANNUAL REPORT.—Not later than one year after
2 the date of the enactment of this Act, and annually there-
3 after for each of the next five years, the Secretary shall
4 submit to the congressional defense committees a report
5 on progress in implementing the roadmap required under
6 subsection (a).

7 (d) REPORT ELEMENTS.—Each report submitted
8 under subsection (c) shall include the following:

9 (1) Progress made toward roadmap milestones
10 and modernization goals.

11 (2) Updates to the roadmap, as appropriate.

12 (3) Major risks, delays, or challenges affecting
13 implementation.

14 (4) Budgetary resources requested and obli-
15 gated for modernization of such networks.

16 (5) Any recommendations that the Secretary
17 considers appropriate for legislative or funding ac-
18 tions to implement the roadmap.

19 (e) FORM OF ROADMAP AND REPORTS.—The road-
20 map required by subsection (a) and the reports required
21 by subsection (c) shall be submitted in classified form, but
22 may include an unclassified summary.

1 **SEC. 1822.**[Log 85280]. **INCLUSION OF BIOTECHNOLOGY IN**
2 **USES OF THE INDUSTRIAL BASE FUND.**

3 (a) **IN GENERAL.**—Section 4817(g)(1) of title 10,
4 United States Code, as amended by section **[18xx]** *[log*
5 *85238]*, is further amended by adding at the end the fol-
6 lowing new subparagraph:

7 “(Q) Biotechnology and biomanufac-
8 turing.”.

9 (b) **LIMITATION ON USE OF CERTAIN AMOUNTS.**—
10 The Secretary of Defense may not use amounts made
11 available before the date of the enactment of this Act to
12 carry out activities under the authority of subparagraph
13 (Q) of section 4817(g)(1) of title 10, United States Code,
14 as added by this section.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY

Items of Special Interest

Advanced LIDAR Integration for Defense Systems

The committee notes the important research conducted by Army Research Lab (ARL) and Air Force Research Lab (AFRL) as it relates to light detection and ranging (LiDAR) technology. The committee is aware of the importance of LiDAR technology for autonomous navigation, perception in low-visibility areas, and three-dimensional mapping and reconnaissance. The committee is also aware that further integration of LiDAR technologies onto both ground and airborne platforms could provide warfighters with essential navigation and visibility capabilities.

Therefore, the committee directs the Secretary of the Air Force, in coordination with the Secretary of the Army, to provide a briefing to the House Committee on Armed Services, not later than December 1, 2026, on the integration of advanced LiDAR technologies into ground and airborne systems. The briefing should include:

- (1) an overview of ongoing and planned LiDAR research, development, test, and evaluation activities;
- (2) an assessment of integration into current and future ground and airborne platforms;
- (3) a description of transition pathways to operational capability;
- (4) an assessment of domestic industrial base capacity and supply chain vulnerabilities; and
- (5) a detailed assessment of the role of the AFRL, including AFRL Rome, in supporting research, prototyping, testing, validation, and integration of advanced LiDAR technologies.

Anti-Tamper and Incursion Response Technologies

The committee is aware of the Army Research Laboratory's ongoing efforts to research and explore hardware protection and anti-tamper technologies through multimodal sensing, secure radio frequency communications, and edge computing. The committee notes the growing threat to the security of critical technologies, devices, and information and recognizes the need for rapid development and implementation of anti-tamper and intrusion response technologies for supply chain assurance.

Therefore, the committee directs the Secretary of the Army to provide a report to the congressional defense committees, not later than December 1, 2026, on the Army's current and planned efforts to support the development and deployment

of advanced hardware protection and anti-tamper technologies. At a minimum, the report should include:

- (1) the timeline to resource a sustained research and development program that addresses current and future anti-tamper and protection technology gaps;
- (2) the Army's operational needs relevant to such current and future threats; and
- (3) a prioritization of current shortfalls in protection and anti-tamper technologies.

Expanding the Innovation Ecosystem at the United States Military Academies

The committee supports the ongoing research, development, test, and evaluation (RDT&E) efforts being undertaken by the United States Military Academies. For example, the committee is aware of the launch of the West Point Innovation Hub (WP Werx), an initiative that connects cadets from diverse disciplines with partners across the Department of Defense, industry, and academia to drive innovation and address complex challenges in a collaborative setting.

The committee notes the potential of such partnerships like WP Werx to help expand the role of the Military Academies in the Department of Defense's innovation ecosystem. Therefore, the committee directs the Under Secretary of Defense for Research and Engineering, in coordination with the Assistant Secretary of the Army for Acquisition, Logistics, and Technology, to submit a report to the House Committee on Armed Services not later than December 1, 2026, on the RDT&E and innovation efforts at the Military Academies. The report shall include:

- (1) an assessment of current innovation-driven project-based learning and scholarly research efforts at the Military Academies;
- (2) an assessment of the feasibility, viability, and potential impacts of expansion of such efforts across academia, industry, and the Department of Defense; and
- (3) such other information as the Under Secretary deems appropriate.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, AIR FORCE

Items of Special Interest

Anti-Jam Capability Assessment

The committee is aware of supply constraints with regard to the Common Architecture for Assured Positioning, Navigation and Timing (CAAP) Application Specific Integrated Circuit (ASIC) inventory due to the planned shutdown of the 45 nanometer ASIC process line. The committee directs the Secretary of the Air Force to submit a report to the Senate Committee on Armed Services and the House Committee on Armed Services, not later than December 31, 2026, on the current and projected status of its CAAP ASIC inventory. The report should include:

- (1) the anticipated rate of consumption of the chips, by system, over the next decade in support of United States and allied requirements;
- (2) any emerging additional demand, including from new systems, for the existing stock of ASICs;
- (3) the available capacity and necessary timelines needed for the industrial base to manufacture a new configuration; and
- (4) potential opportunities for an updated architecture, including with regard to emergent demand for affordable mass munitions.

Reusable Hypersonics Development and Transition

The committee supports the Defense Advanced Research Projects Agency (DARPA)'s development of reusable hypersonic aircraft, including efforts to produce a Next Generation Responsive Strike (NextRS) prototype aircraft and transition the platform to the Air Force for flight test and fielding. However, the committee is concerned with delays to the planned transition schedule. The committee notes that initiation of novel development activities, rather than the use of propulsion and other technologies already developed under previous and ongoing development activities, can significantly increase schedule risk.

The committee directs the Secretary of the Air Force, in coordination with the Director of DARPA, to submit a report to the House Committee on Armed Services not later than December 1, 2026, on efforts to leverage ongoing and past Air Force Research Lab activities, including those associated with or managed by DARPA, into the fielding of NextRS. The report shall include:

- (1) expected timelines for NextRS transition;
- (2) expected funding required to maintain the current roadmap;
- (3) any funding, administrative, or technology development obstacles anticipated to cause delay or that pose significant schedule or cost risk; and
- (4) such other information as the Secretary deems appropriate.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, DEFENSE-WIDE

Items of Special Interest

Analytical Tools to Improve Department of Defense Research Security

The committee remains concerned that research conducted or sponsored by the Department of Defense is the target of ongoing efforts by multiple foreign influence groups to access sensitive research processes, data, and results. Given this concern, the committee has included several provisions in previous National Defense Authorization Acts to better secure Department-sponsored research at universities and the defense industrial base.

The committee also recognizes that existing disclosure and compliance standards in place by the Department and academia may not consistently identify the full scope of foreign influence risks associated with Department of Defense–

funded research and that modern analytical tools could assist in improving these processes. Therefore, the committee directs the Under Secretary of Defense for Research and Engineering, in coordination with the Under Secretary of Defense for Intelligence and Security, to provide a report to the House Committee on Armed Services, not later than March 15, 2027, on how the Department could adopt a risk-based approach to strengthening research security screening and oversight across Department of Defense research activities, including consideration of appropriate analytical capabilities to improve visibility into existing and future high-risk foreign affiliations and evolving foreign influence threats over time.

Commercialization Potential of Shelf-Stable Blood

The committee supports the Defense Advanced Research Projects Agency's (DARPA) research and prototyping of shelf-stable blood through the Fieldable Solutions for Hemorrhage with bio-Artificial Resuscitation Products (FSHARP) program. Utilizing biotechnology, this technology has the potential to save warfighters' lives by enabling rapid access to blood at the front lines. Therefore, the committee directs the Under Secretary of Defense for Research and Engineering to provide a briefing to the House Committee on Armed Services, not later than March 1, 2027, on the status of the shelf-stable blood program. The briefing should include:

- (1) the current status of the research and prototyping efforts;
- (2) efforts to commercialize the research, including identification of transition partners within the Department of Defense and broader Federal Government and industry;
- (3) challenges to commercialization and a plan to address those challenges;
- (4) the known and anticipated benefits of fielding shelf-stable blood, including cost savings and a quantitative assessment of warfighter lives saved; and
- (5) a plan for deployment and operational fielding of the shelf-stable blood product.

Countering Biotechnology Threats from Foreign Adversaries

The committee notes the rapid advancements in biotechnology made by potential foreign adversaries, and believes that such advancements could threaten national security. The committee remains concerned that the United States may face gaps both in its ability to keep pace with its biotechnology capability development and its ability to defend against biotechnology threats from adversaries.

Therefore, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services not later than March 1, 2027, on current biotechnology threats. The briefing should include, at a minimum:

- (1) an examination of existing gaps in biotechnology threat defense;
- (2) an analysis of foreign adversaries' likely use of biotechnology capabilities against the United States; and

(3) a proposed strategy to counter biotechnology threats from foreign adversaries, including recommended interagency actions.

Defense Innovation Unit Collaboration with Service Portfolio Acquisition Executives

The committee supports the efforts of the Defense Innovation Unit (DIU) to bring commercial, dual-use technologies to the Department of Defense. The committee remains concerned, however, that gaps still exist between DIU and the military services, which inhibits the timely transition of technologies into service programs. Accordingly, the committee includes a provision elsewhere in this Act that would modify DIU's statutory authorities to enable more robust collaboration with the military service Portfolio Acquisition Executives (PAEs). The committee also directs the Director of DIU, in coordination with the service PAEs, to provide a report to the House Committee on Armed Services, not later than December 1, 2026, on efforts to formalize collaboration mechanisms between DIU and the services. The report shall include:

(1) a plan for how the services and DIU plan to formalize and standardize collaboration and transition efforts between each service and DIU, to include enabling budgetary resourcing in current and future fiscal years;

(2) a plan for service allocation of appropriate billets to DIU positions and for a standardized and consistent process for the services to assign personnel with appropriate military occupational specialties, skillsets, and technical expertise; and

(3) a description of current and planned co-funding and co-development mechanisms, including any additional required authorities.

Hypersonic Test and Evaluation Workforce Development Partnerships

The committee notes the increasing importance of hypersonic systems to the national security of the United States, and understands the rapid pace at which it must develop such capabilities. The committee remains concerned that the speed of Department of Defense test and evaluation (T&E) of hypersonic systems is not keeping pace with adversary development programs and believes that coordinated, systemic effort is required. In particular, the committee believes that sustained funding for university-based T&E workforce development is critical to building and maintaining technology advantage in hypersonics.

The committee is aware of various efforts across academic research institutions, such as the joint Hypersonics T&E Workforce Development Partnership, that leverage advanced facilities at multiple institutes of higher education to more effectively provide and coordinate testing for hypersonic systems. The committee also notes that collaboration between these institutions could accelerate U.S. capabilities in high-temperature materials, advanced manufacturing, and system-level testing.

Therefore, the committee directs the Secretary of Defense, in coordination with the Secretary of the Army and the Secretary of the Air Force, to provide a

briefing to the House Committee on Armed Services, not later than March 1, 2027, on the Department's plan for hypersonic T&E workforce development and investment. The briefing should include the following:

(1) the current funding level and scope of the Hypersonics T&E Workforce Development Partnership and other relevant partnerships across academia, including funding and other support provided by the Department of Defense;

(2) a description of current and projected gaps in the national hypersonic T&E workforce and infrastructure relative to current and projected program requirements;

(3) the Department's plan to sustain and expand university-based hypersonic T&E partnerships in fiscal year 2028 and beyond; and

(4) such other information as the Secretary deems appropriate and relevant.

Privately Funded Dual-Use Innovation Exchanges

The committee recognizes that the transition of commercially developed technologies into defense applications remains a persistent challenge for the Department of Defense. The committee is also aware that several privately funded dual-use innovation exchange organizations have been established to help facilitate collaboration between the Department of Defense and nontraditional defense contractors, manufacturing and infrastructure partners, and private capital providers. The committee encourages the Department to continue to leverage these relationships to help enable and accelerate technology transition.

Accordingly, the committee directs the Secretary of Defense, in coordination with the Under Secretary of Defense for Research and Engineering, to provide a briefing to the House Committee on Armed Services not later than March 1, 2027, on the Department's current and planned engagement with privately funded dual-use innovation exchange organizations. The briefing shall include the following:

(1) a description of existing Department relationships with privately funded dual-use innovation exchange organizations and the supported technology areas or programs;

(2) an assessment of statutory, regulatory, or policy barriers to increased or more consistent Department engagement with these organizations; and

(3) recommendations for policy changes that would allow the Department to more effectively leverage privately funded dual-use innovation infrastructure without duplicating existing Department manufacturing, acquisition, or industrial base activities.

Protecting Defense Innovation from Adversaries

The committee remains concerned about ongoing efforts by foreign adversaries to exploit defense-relevant innovation, critical technologies, and trusted supplier networks in the United States. The committee believes that safeguarding

both academia and the defense industrial base are essential to maintaining the technological advantage of the Department of Defense.

Accordingly, the committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than March 15, 2027, that assesses vulnerabilities in defense supply chains, outbound investment, and development activities that could enable adversarial exploitation. The report shall include, but not be limited to:

(1) an assessment of risks associated with foreign ownership, control, or influence within the defense industrial base and programs supporting major defense acquisition efforts;

(2) an evaluation of standards applicable to Department-funded contractors, subcontractors, and research and development institutions with foreign partnerships or investment exposure that may present national security risk; and

(3) recommendations for legislative or policy changes necessary to strengthen protections for Department-funded development activities and critical supply chains.

Ultra Short Reach Interconnect and Advanced Packaging for Defense Systems

The committee recognizes that size, weight, and power (SWaP) constraints remain critical drivers for ground, airborne, and space-based defense systems. The committee further notes that heterogeneous integration and chiplet-based architectures could offer a path to increased performance, resilience, and manufacturability without sole reliance on lower technical readiness level (TRL) semiconductor process technology nodes.

The committee is aware that Ultra Short Reach (USR) interconnect technologies may enable the Department of Defense to leverage mature-node semiconductor technologies in combination with advanced packaging to accelerate deployment timelines and reduce program cost and technical risk. The committee encourages the Department to explore investment in USR-enabled heterogeneous integration technologies, including chiplet-based architectures, as part of broader microelectronics modernization efforts. Such investments could support applications across ground, airborne, and space missions where SWaP constraints are paramount.

Therefore, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services not later than January 31, 2027, on the Department's strategy to mature USR interconnect technologies and integrate them into defense-relevant advanced packaging programs, including activities conducted under the Defense Advanced Research Projects Agency's Next-Generation Microelectronics Manufacturing program.

TITLE XV—CYBERSPACE-RELATED MATTERS

ITEMS OF SPECIAL INTEREST

Accelerating Agentic Artificial Intelligence for Joint Planning and Decision Advantage

The committee supports recent Department of Defense actions to accelerate the development and integration of agentic artificial intelligence systems to improve the speed and quality of military decision-making. The committee notes the Defense Innovation Unit's establishment of Project Thunderforge designed to integrate artificial intelligence (AI) agents to assist military planning, simulation, and operational decision-making. As the military importance of agentic AI grows, the committee encourages the Department to adopt and integrate commercial software technologies, wherever possible, to improve military decision advantage and accelerate responsible human-machine teaming.

Therefore, the committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than March 1, 2027, on an evaluation of Project Thunderforge, incorporating inputs from all participating Combatant Commands regarding:

- (1) the overall impact of the program on the quality and speed of joint military planning;
- (2) the ability to discover non-obvious strategies or constraints in plans by analyzing large volumes of simulation inputs and outputs;
- (3) the ability of the program to accelerate the joint operational planning process by leveraging AI agents to manipulate simulated courses of action directly and test new strategies without manual configuration; and
- (4) the proposed plan to transition Project Thunderforge out of prototyping, provide enduring funding and program management, and scale the capability across the joint force.

Competition of Autonomous Software Capabilities for Weapon Systems

The committee recognizes progress made by the Department of Defense in developing and fielding autonomous control software capabilities across a range of weapon systems. However, the committee remains concerned that the use of proprietary or tightly coupled software architectures may limit competition, reduce interoperability, and slow the adoption of improved capabilities over time.

Therefore, the committee encourages the Department to maximize competition for autonomous software capabilities to the greatest extent practicable, including through approaches that enable autonomy software to be developed, integrated, and competed separately from platform-specific hardware and software.

Accordingly, the committee directs the Under Secretary of Defense for Acquisition and Sustainment to provide a briefing to the House Committee on Armed Services not later than June 30, 2027, on the Department's plan to promote competition for autonomous software capabilities across a variety of weapon programs. The briefing shall include:

- (1) a strategy for promoting competition in autonomous software capabilities, including approaches to enable autonomy software to be developed and competed independently from the underlying weapon platform;
- (2) a list of candidate weapon programs for which competing autonomous software capabilities may be appropriate;
- (3) a list of weapon programs for which competing autonomous software capabilities may not be appropriate, including the rationale for such determinations;
- (4) the methodology for evaluating autonomy software efficacy; and
- (5) the estimated impact on cost and schedule of competing autonomy software capabilities.

Defense Industrial Base Cybersecurity

The committee remains concerned by increasingly sophisticated malicious cyber activity from actors affiliated with China, including the pre-positioning of capabilities intended to disrupt critical defense infrastructure within the United States and degrade military readiness during a potential crisis or conflict. The committee notes such activity often targets the Defense Industrial Base (DIB) and frequently employs "living-off-the-land" techniques to maintain undetected persistence on these networks.

The committee is aware of the National Security Agency Cybersecurity Collaboration Center attack surface management (ASM) program, which provides DIB entities with asset discovery and vulnerability assessments to proactively prevent compromise of mission-critical systems and Department of Defense data.

The committee directs the Chief Information Officer of the Department of Defense, in coordination with the Director of the National Security Agency, to provide a briefing to the House Committee on Armed Services not later than March 1, 2027, on the ASM program. The briefing shall include the following:

- (1) an assessment of the program's effectiveness in reducing the DIB attack surface over the preceding fiscal year;
- (2) a plan to scale ASM coverage to additional priority DIB entities; and
- (3) milestones and resource requirements associated with the proposed scaling.

Department of Defense Zero Trust Implementation

The committee welcomes the Department of Defense's recent updates to its zero trust implementation strategy, which reflect a modernized approach to continuous, automated security and platform consolidation. The committee is concerned, however, that fragmented point solutions and manual processes may continue to impede the Department's progress in achieving target-level zero trust maturity. To evolve from passive visibility to automated detection and response, the Department must accelerate adoption of architectures that unify data models and enable artificial intelligence (AI)-driven security operations.

The committee urges the Department to deploy modern, scalable architectures that ensure zero trust controls are enforced continuously across the enterprise, including within Disconnected, Intermittent, and Low-Bandwidth and browser-based environments. Such architectures should reduce latency, ease network defender workload, and ensure policies can dynamically adapt to emerging threats without extensive manual reconfiguration.

The committee directs the Chief Information Officer of the Department of Defense to provide a briefing to the House Committee on Armed Services not later than March 1, 2027, on the implementation of the Department's zero trust strategy. The briefing should include the following:

- (1) how acquisition efforts align with AI-driven security operations; and
- (2) the estimated cost savings and operational efficiencies achieved through capability consolidation and automation.

Edge-Based Artificial Intelligence and Supporting Infrastructure in Denied Environments

The committee recognizes the strategic importance of artificial intelligence (AI) capabilities that operate in communications-denied and contested environments. The committee notes that connectivity in operational environments is often constrained, including through adversary actions that target communications infrastructure. While the Department has begun advancing edge-based AI capabilities, the committee believes additional emphasis is warranted on systems capable of autonomous operation without persistent network connectivity, as well as rapid and reliable deployment of supporting infrastructure at the tactical edge. This includes the development and integration of agentic AI, automation, and infrastructure-as-code approaches. The committee further notes that such technologies may reduce deployment timelines, human error, and onsite support requirements in operational environments.

Therefore, the committee directs the Chief Digital and Artificial Intelligence Officer, in coordination with the Under Secretary of Defense for Acquisition and Sustainment, to provide a report to the congressional defense committees not later than March 31, 2027, on the Department's strategy for identifying, evaluating, and rapidly fielding edge-based AI capabilities for use in disconnected and contested environments. The report shall include:

- (1) the Department's approach to identifying and prioritizing edge-based AI and supporting infrastructure technologies;
- (2) how such technologies are being evaluated, including in operationally relevant environments;
- (3) the extent to which automation, including infrastructure-as-code, can improve the speed, consistency, and scalability of deploying edge capabilities and reduce support requirements;
- (4) a plan for integrating such capabilities into existing tactical networks and operations;

(5) barriers to adoption, including acquisition, deployment, and integration challenges; and

(6) identification of at least three commercially available edge AI platforms suitable for evaluation in operationally relevant exercises.

Enterprise and Operational Integration of Agentic Artificial Intelligence

As the Department of Defense implements its recently released Artificial Intelligence (AI) strategy to transform into an AI-first force, maintaining security and control over the Department's data and workflows is critical. Likewise, ensuring interoperability and scalability of these technologies will be imperative to keep pace with rapid technical innovation. The committee further recognizes that agentic AI systems have the potential to support a range of joint operational functions and deliver decision advantage across mission areas.

Therefore, the committee directs the Chief Digital and Artificial Intelligence Officer to provide a briefing to the House Committee on Armed Services not later than March 31, 2027, on the Department's agentic AI strategy and its operational integration. The briefing shall include:

(1) the status and initial demonstration results of the Enterprise Agents Pace-Setting Project identified in the Department's January 2026 AI Strategy;

(2) identification of priority use cases for agentic AI, including those aligned to joint functions such as command and control, intelligence, fires, movement and maneuver, protection, information, and sustainment;

(3) an assessment of the security, scalability, cost, interoperability, and data sovereignty considerations for all cloud computing deployment options, including private, hybrid, and public cloud environments;

(4) identification of not fewer than five efforts employing agentic AI capabilities in support of joint functions, including the supported combatant command, military department, or defense agency; and

(5) identification of any barriers to rapid deployment and operational adoption, including challenges related to lifecycle management and sustainment, with recommendations for remediation.

Interoperable Multi-Cloud Solutions Across the Defense Enterprise

The committee is aware that the Department of Defense's current approach to cloud infrastructure has led to a proliferation of stove-piped systems, limiting the Department's ability to move data, integrate across systems, and operate in contested or degraded environments. The committee believes the Department's mission is best served by an interoperable multi-cloud environment that enables flexibility, resilience, and competition while reducing dependence on any single provider.

Therefore, the committee directs the Secretary of Defense to provide a report to the congressional defense committees not later than March 1, 2027, that includes the following:

- (1) a description of the Department’s current multi-cloud architecture and its approach to interoperability across cloud environments;
- (2) case studies of the War Data Platform and the GenAI.mil platform, including the extent to which data, applications, and artificial intelligence workloads can be moved across cloud environments without significant reengineering, along with the time, costs, and technical effort required;
- (3) a summary of security challenges regarding multi-cloud implementation, including issues related to reciprocity of authorizations to operate and differences in security controls and authorization timelines across cloud environments;
- (4) a description of barriers to interoperability and data portability, including licensing, propriety services, data formats, and application dependencies; and
- (5) a description of the technical, acquisition, governance, and policy changes necessary to transition to a vendor-agnostic multi-cloud architecture.

Open-Source Software Supply Chain Security

The committee recognizes that modern software applications used throughout the Department of Defense rely extensively on open-source software (OSS) components developed and maintained by globally distributed contributors. While OSS provides significant innovation and cost advantages, the committee is concerned that the Department lacks sufficient visibility into the origins, maintenance, and security of OSS applications and software dependencies. The committee notes that some Department organizations, such as the Space Development Agency, have begun efforts to improve OSS supply chain visibility and risk mitigation, but believes a coordinated Department-wide strategy is required to scale secure OSS supply chain practices.

Therefore, the committee directs the Department of Defense Chief Information Officer, in consultation with the Chief Information Officers of the military departments, to provide a report to the congressional defense committees not later than December 1, 2026, containing a plan to scale secure OSS supply chain practices across the Department of Defense. The report shall include:

- (1) an assessment of current Department-wide visibility into OSS components and software dependencies used in Department systems, including identification of adversarial foreign ownership, control, or influence;
- (2) a plan to improve traceability, risk identification, and mitigation within OSS supply chains;
- (3) recommendations for policies, standards, and acquisition requirements necessary to ensure secure use and maintenance of OSS components;
- (4) identification of implementation pathways and the capabilities required to scale secure OSS supply chain practices across the Department; and
- (5) an estimate of resources required to execute this plan.

Phased Implementation of Operational Technology Cybersecurity

The committee notes that the Department of Defense does not expect to achieve "target level" zero trust for operational technology (OT) systems until fiscal year 2030 and finds that this timeline creates unacceptable risk to mission readiness given the threats to Defense Critical Infrastructure. The committee is further concerned that current implementation approaches do not sufficiently prioritize foundational capabilities needed to reduce near-term risk and enable progress toward zero trust outcomes.

Therefore, the committee directs the Chief Information Officer of the Department of Defense to submit a report to the congressional defense committees not later than March 1, 2027, on a phased and operationally sustainable approach to improving OT cybersecurity across the Department. The report shall include:

- (1) a prioritized implementation framework for OT cybersecurity, aligned to the Department's zero trust framework, that breaks "target level" zero trust outcomes into sequenced increments with defined objectives, timelines, and metrics;
- (2) a plan to achieve enterprise-wide visibility into OT assets and network communications, including system dependencies and external connections;
- (3) a plan to implement foundational cybersecurity practices across OT environments, including configuration management, risk-informed patching, passive monitoring, and other measures necessary to reduce risk; and
- (4) an assessment of the feasibility of accelerating OT cybersecurity measures for Tier 1 Mission Assurance installations to not later than fiscal year 2028, including associated resource requirements and barriers to implementation.

Real-time Audit Capabilities Using Software and Artificial Intelligence

The committee recognizes the Department of Defense's growing adoption of advanced software and artificial intelligence capabilities across operational and administrative functions. The committee notes that the Department of the Navy, in particular, has demonstrated successful implementation of digital tools for shipbuilding, logistics, and program management.

The committee believes these technological capabilities present a significant opportunity to transform the Department of Defense's financial management and auditability. Despite years of effort and billions of dollars invested, the Department of Defense has yet to achieve a clean financial audit, and traditional periodic audit approaches have proven insufficient to address the scale and complexity of defense financial operations. The committee believes that continuous transaction validation and asset tracking to improve financial visibility may provide a more effective path toward achieving a clean audit.

Therefore, the committee directs the Secretary of Defense to provide a report to the congressional defense committees not later than December 1, 2026, on plans to implement real-time audit capabilities using software and artificial intelligence technologies. The report shall include:

- (1) an assessment of existing software and artificial intelligence platforms that could be expanded to support continuous financial monitoring and auditability;

- (2) a roadmap for implementing real-time audit capabilities to enable continuous transaction validation and asset tracking;
- (3) identification of integration requirements necessary to provide enterprise-wide financial visibility across Department financial systems;
- (4) an assessment of how real-time audit capabilities could improve financial decision-making, fraud detection, and waste reduction; and
- (5) identification of any policy, regulatory, or contractual barriers that may impede implementation of real-time audit capabilities.

Resilient Command, Control, and Communications for Taiwan

The committee recognizes that resilient communications between the United States and Taiwan are essential to support effective coordination during both steady-state operations and crisis scenarios. The committee is concerned that disruption or degradation of communications infrastructure in a contested environment could significantly limit Taiwan's ability to communicate with United States forces and partners. The committee believes it is necessary to assess current capabilities and address gaps now to ensure continuity of communications under stressed conditions.

Therefore, the committee directs the Secretary of Defense to provide a report to the congressional defense committees not later than March 1, 2027, assessing the extent to which mobile ad hoc networking and commercially derived communications systems in Taiwan support United States operational requirements in contested or degraded environments. The report shall include:

- (1) key Taiwan communications networks across civil and military organizations necessary to support United States and coalition operations;
 - (2) connectivity and integration of Department of Defense systems with such networks;
 - (3) gaps in Taiwan's ability to communicate with United States forces under contested conditions;
 - (4) network architectures enabling resilient, infrastructure-independent communications, including secure, segmented data transmission;
 - (5) opportunities to rapidly field and scale solutions, including through the use of existing equipment;
 - (6) cybersecurity and supply chain risks affecting such communications;
- and
- (7) prioritized potential actions to improve resilient and interoperable communications, including continued progress on coalition information sharing.
