## DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

### TITLE I—PROCUREMENT

#### LEGISLATIVE PROVISIONS

##### SUBTITLE C—NAVY PROGRAMS

- Sec. 121—Authority to Use Incremental Funding for Long Lead-Time Components for Virginia Class Submarines
- Sec. 122—Multiyear Procurement Authority for Arleigh Burke Class Destroyers
- Sec. 123—Multiyear Procurement Authority for John Lewis Class Oilers
- Sec. 124—Procurement Authorities for Certain Amphibious Shipbuilding Programs
- Sec. 125—Contract Authority for Submarine Tender Program
- Sec. 126—Multiyear Procurement Authority For E-2D Advanced Hawkeye Aircraft
- Sec. 127—Authority to Use Incremental Funding for the Construction of a Guided Missile Destroyer (DDG)
- Sec. 128—Authority for Advance Procurement of Components for Ship-to-Shore Connector Class Craft
- Sec. 129—Limitation On Construction of Battleship Pending Certification On Technology Readiness Levels
- Sec. 130—Strategy for Iterative Development and Flight Modifications for FF(X) Class Frigates

##### SUBTITLE D—AIR FORCE PROGRAMS

- Sec. 141—Extension of Requirements Relating to C-130 Aircraft
- Sec. 142—Limitation On Availability of Funds for C-37 Aircraft Recapitalization Program
- Sec. 143—Analysis of Alternatives for Next Generation Airlift Capabilities
- Sec. 144—Report On the Feasibility of Restoring Nuclear Capability to the B-1B Lancer Bomber Aircraft

### TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

#### LEGISLATIVE PROVISIONS

##### SUBTITLE B—PROGRAM REQUIREMENTS, RESTRICTIONS, AND LIMITATIONS

- Sec. 216—Modification to Test Program for Engineering Plant of Certain Vessels
- Sec. 219—Operational Autonomy Requirements for Unmanned Surface Vessels

### TITLE X—GENERAL PROVISIONS

#### LEGISLATIVE PROVISIONS

##### SUBTITLE B—NAVAL VESSELS AND SHIPYARDS

Sec. 1011—Modification of Authority to Purchase Used Vessels with National Defense Sealift Fund

Sec. 1012—Additional Measures for Navy Strategy for Investment in and Support for the Maritime Industrial Base

Sec. 1014—Realignment of Contract Management for Polar Security Cutter Program

Sec. 1015—Requirements Relating to Unmanned Surface Vessels

Sec. 1016—Strategy for Distributed Shipbuilding

Sec. 1017—Sense of Congress Regarding Naming of Vessel for Battle of Dai Do

**SUBTITLE D—MISCELLANEOUS AUTHORITIES AND LIMITATIONS**

Sec. 1045—Domestic Sourcing of Bulk Fuel to Support Tanker Security Program

**SUBTITLE E—STUDIES AND REPORTS**

Sec. 1061—Mobility Capabilities Strategic Plan

**DIVISION C—DEPARTMENT OF ENERGY NATIONAL SECURITY AUTHORIZATIONS AND OTHER AUTHORIZATIONS**

**TITLE XXXV—MARITIME ADMINISTRATION**

**LEGISLATIVE PROVISIONS**

Sec. 3501—Authorization of Appropriations for Maritime Administration

Sec. 3502—Support for Athletic Programs of the United States Merchant Marine Academy

Sec. 3503—Enhancing United States Maritime Workforce

Sec. 3504—Enhancing United States Shipyards and Shipbuilding

---

**DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS**

**TITLE I—PROCUREMENT**

**LEGISLATIVE PROVISIONS**

**SUBTITLE C—NAVY PROGRAMS**

Sec. 121—Authority to Use Incremental Funding for Long Lead-Time Components for Virginia Class Submarines

This section would authorize the Secretary of the Navy to incrementally fund contracts for the advance procurement of long lead-time components for Virginia-class submarines.

Sec. 122—Multiyear Procurement Authority for Arleigh Burke Class Destroyers

This section would provide multi-year procurement authority for up to fifteen Arleigh Burke class destroyers.

Sec. 123—Multiyear Procurement Authority for John Lewis Class Oilers

This section would allow the Secretary of the Navy to enter into one or more multiyear contracts for the procurement of John Lewis Class Oilers and the systems, components, and long-lead time materials associated with such vessels.

Sec. 124—Procurement Authorities for Certain Amphibious Shipbuilding Programs

This section would authorize the Secretary of the Navy to enter into one or more contracts for amphibious ships. The Secretary of the Navy would also be authorized to enter into contracts for advance procurement or advance construction of systems and parts ahead of ship procurement when cost savings are achievable. To fund these contracts, the Secretary of the Navy would be authorized to incrementally fund multi-ship and advance procurement contracts.

Sec. 125—Contract Authority for Submarine Tender Program

This section would allow the Secretary of the Navy to enter into one or more contracts for the procurement of not more than two AS(X) submarine tenders. The Secretary would also be allowed to incrementally fund those contracts.

Sec. 126—Multiyear Procurement Authority For E-2D Advanced Hawkeye Aircraft

This section would authorize the Navy to enter into a multiyear procurement for the E-2D aircraft.

Sec. 127—Authority to Use Incremental Funding for the Construction of a Guided Missile Destroyer (DDG)

This section would provide the authority to use incremental funding to enter into a contract for the construction of a Guided Missile Destroyer.

Sec. 128—Authority for Advance Procurement of Components for Ship-to-Shore Connector Class Craft

This section would authorize the Secretary of the Navy to enter into one or more contracts for advance procurement of components for the Ship to Shore Connector prior to ship authorization.

Sec. 129—Limitation On Construction of Battleship Pending Certification On Technology Readiness Levels

This section would require the Secretary of the Navy to certify that the systems planned for inclusion on the BBG(X) program are at a sufficiently mature technology readiness level before award of a construction contract for the first of class vessel.

Sec. 130—Strategy for Iterative Development and Flight Modifications for FF(X)  
Class Frigates

This section would require the Secretary of the Navy to develop a strategy for iterative flight development of the new FF(X) vessel class. The Secretary of the Navy would be required to provide a briefing on the development of the strategy to congressional defense committees.

SUBTITLE D—AIR FORCE PROGRAMS

Sec. 141—Extension of Requirements Relating to C-130 Aircraft

This section would keep the C-130 total aircraft inventory at 271 with a sunset date of October 1, 2028.

Sec. 142—Limitation On Availability of Funds for C-37 Aircraft Recapitalization  
Program

This section would direct that not more than 50 percent of the funds authorized to be appropriated for C-37 aircraft procurement may be expended until 30 days after the Secretary of the Air Force submits to the congressional defense committees an acquisition strategy and a justification for using other than competitive procedures.

Sec. 143—Analysis of Alternatives for Next Generation Airlift Capabilities

This section would direct an analysis of alternatives for the next generation airlift aircraft.

Sec. 144—Report On the Feasibility of Restoring Nuclear Capability to the B-1B  
Lancer Bomber Aircraft

This section directs a report on feasibility of modernizing the B-1B aircraft to carry nuclear weapons.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

LEGISLATIVE PROVISIONS

SUBTITLE B—PROGRAM REQUIREMENTS, RESTRICTIONS, AND LIMITATIONS

Sec. 216—Modification to Test Program for Engineering Plant of Certain Vessels

This section would apply previous requirements for DDG(X) land based testing and reserve power to subsequent classes of large surface combatants.

Sec. 219—Operational Autonomy Requirements for Unmanned Surface Vessels

This section would require the Secretary of the Navy to take such actions as may be necessary to ensure that unmanned surface vessels are capable of autonomous operation during periods where communications, positioning, navigation, and timing capabilities are degraded or unavailable.

## TITLE X—GENERAL PROVISIONS

### LEGISLATIVE PROVISIONS

#### SUBTITLE B—NAVAL VESSELS AND SHIPYARDS

Sec. 1011—Modification of Authority to Purchase Used Vessels with National Defense Sealift Fund

This section would amend section 2218 of title 10, United States Code, to allow the Secretary of the Navy to purchase more than 12 used, foreign-constructed vessels if the Secretary meets certain conditions. To use the authority to buy more than 12 used, foreign-constructed vessels, the Secretary would have to procure two new vessels constructed in the United States for each used, foreign-constructed vessel after a tenth vessel is procured. Further, section 2218 of title 10, United States Code, would be amended to prohibit the procurement of used, foreign-constructed vessels that were constructed in the People's Republic of China or by a Chinese military company.

Sec. 1012—Additional Measures for Navy Strategy for Investment in and Support for the Maritime Industrial Base

This section would add additional requirements for the Navy's strategy for investment in the maritime industrial base that was required by the National Defense Authorization Act for Fiscal Year 2026 (Public Law 119-60).

Sec. 1014—Realignment of Contract Management for Polar Security Cutter Program

This section would require the Secretary of the Navy to transition contract management for the Polar Security Cutter program to the United States Coast Guard. That transition would be required no later than 180 days after enactment and the Navy may only provide advisory support after that realignment.

## Sec. 1015—Requirements Relating to Unmanned Surface Vessels

This section would require the Secretary of the Navy to certify to the congressional defense committees that concepts of operation and employment have been developed prior to acceptance of an unmanned surface vessel. The Secretary of the Navy would also be required to develop and implement a strategy for the integration of unmanned surface vessels naval force design and joint maritime operations. The Secretary of the Navy would be required to submit a report to the congressional defense committees not later than 210 days after the date of the enactment of this Act on the strategy for unmanned surface vessel integration and provide an annual brief on integration efforts thereafter.

## Sec. 1016—Strategy for Distributed Shipbuilding

This section would require the Secretary of the Navy to develop and implement a strategy to increase the construction of modules by entities independent from the final assembly yards.

## Sec. 1017—Sense of Congress Regarding Naming of Vessel for Battle of Dai Do

This section would express a sense of Congress that the Secretary of the Navy should name an amphibious or expeditionary class vessel for the Battle of Dai Do (Vietnam war).

## SUBTITLE D—MISCELLANEOUS AUTHORITIES AND LIMITATIONS

### Sec. 1045—Domestic Sourcing of Bulk Fuel to Support Tanker Security Program

This section would require the Director of the Defense Logistics Agency to seek to procure at least 10 percent of covered bulk fuel from domestic refineries with excess production capacity. That domestically procured fuel would be transported for delivery to locations outside of the United States on Tanker Security Program vessels.

## SUBTITLE E—STUDIES AND REPORTS

### Sec. 1061—Mobility Capabilities Strategic Plan

This section would direct the Secretary of the Air Force to provide a mobility roadmap report.

## **DIVISION C—DEPARTMENT OF ENERGY NATIONAL SECURITY AUTHORIZATIONS AND OTHER AUTHORIZATIONS**

## TITLE XXXV—MARITIME ADMINISTRATION

### LEGISLATIVE PROVISIONS

#### Sec. 3501—Authorization of Appropriations for Maritime Administration

This section would authorize funds for the Maritime Administration.

#### Sec. 3502—Support for Athletic Programs of the United States Merchant Marine Academy

This section would authorize the Secretary of Transportation to establish a nonprofit corporation to support the athletic programs of the United States Merchant Marine Academy.

#### Sec. 3503—Enhancing United States Maritime Workforce

This section would require the President to submit to relevant committees proposals to implement workforce provisions from the Maritime Action Plan issued by the White House.

#### Sec. 3504—Enhancing United States Shipyards and Shipbuilding

This section would require the President to submit proposals to the relevant congressional committees to implement recommendations related to domestic shipbuilding included in the Maritime Action Plan issued by the White House.

# **BILL LANGUAGE**

1           **Subtitle C—Navy Programs**

2   **SEC. 121 [Log 85548]. AUTHORITY TO USE INCREMENTAL**  
3                   **FUNDING FOR LONG LEAD-TIME COMPO-**  
4                   **NENTS FOR VIRGINIA CLASS SUBMARINES.**

5           Section 126 of the National Defense Authorization  
6 Act for Fiscal Year 2026 (Public Law 119–60; 139 Stat.  
7 755) is amended—

8                   (1) by redesignating subsections (b) through (d)  
9                   as subsections (c) through (e), respectively; and

10                  (2) by inserting after subsection (a) the fol-  
11                  lowing:

12                  “(b) **AUTHORITY TO USE INCREMENTAL FUND-**  
13 **ING.**—In exercising the authority under subsection (a), the  
14 Secretary of the Navy may enter into incrementally funded  
15 contracts for the procurement of covered components that  
16 are long lead-time items.”.

1 **SEC. 122 [Log 85434]. MULTIYEAR PROCUREMENT AUTHOR-**  
2 **ITY FOR ARLEIGH BURKE CLASS DESTROY-**  
3 **ERS.**

4 (a) **AUTHORITY FOR MULTIYEAR PROCUREMENT.**—  
5 Subject to section 3501 of title 10, United States Code,  
6 the Secretary of the Navy may enter into one or more  
7 multiyear contracts for the procurement of up to 15  
8 Arleigh Burke class Flight III guided missile destroyers.

9 (b) **AUTHORITY FOR ADVANCE PROCUREMENT.**—The  
10 Secretary of the Navy may enter into one or more con-  
11 tracts, beginning in fiscal year 2027, for advance procure-  
12 ment associated with the destroyers for which authoriza-  
13 tion to enter into a multiyear procurement contract is pro-  
14 vided under subsection (a), and for systems and sub-  
15 systems associated with such destroyers in economic order  
16 quantities when cost savings are achievable.

17 (c) **CONDITION FOR OUT-YEAR CONTRACT PAY-**  
18 **MENTS.**—A contract entered into under subsection (a)  
19 shall provide that any obligation of the United States to  
20 make a payment under the contract for a fiscal year after  
21 fiscal year 2027 is subject to the availability of appropria-  
22 tions or funds for that purpose for such later fiscal year.

23 (d) **MANDATORY INCLUSION OF PREPRICED OPTION**  
24 **IN CERTAIN CIRCUMSTANCES.**—

25 (1) **IN GENERAL.**—In the event the total base  
26 quantity of destroyers to be procured through all

1 contracts entered into under subsection (a) is less  
2 than 15, the Secretary of the Navy shall ensure that  
3 one or more of the contracts includes a prepriced op-  
4 tion for the procurement of additional destroyers  
5 such that the sum of such base quantity and the  
6 number of destroyers that may be procured through  
7 the exercise of such options is equal to 15 destroy-  
8 ers.

9 (2) DEFINITIONS.—In this subsection:

10 (A) BASE QUANTITY.—The term “base  
11 quantity” means the quantity of destroyers to  
12 be procured under a contract entered into  
13 under subsection (a) excluding any quantity of  
14 destroyers that may be procured through the  
15 exercise of an option that may be part of such  
16 contract.

17 (B) PREPRICED OPTION.—The term  
18 “prepriced option” means a contract option for  
19 a contract entered into under subsection (a)  
20 that, if exercised, would allow the Secretary of  
21 the Navy to procure a destroyer at a predeter-  
22 mined price specified in such contract.

23 (e) LIMITATION.—The Secretary of the Navy may  
24 not modify a contract entered into under subsection (a)  
25 if the modification would increase the target price of the

- 1 destroyer by more than 10 percent above the target price
- 2 specified in the original contract for the destroyer under
- 3 subsection (a).

1 **SEC. 123 [Log 85356]. MULTIYEAR PROCUREMENT AUTHOR-**  
2 **ITY FOR JOHN LEWIS CLASS OILERS.**

3 (a) **AUTHORITY FOR MULTIYEAR PROCUREMENT.**—  
4 Subject to section 3501 of title 10, United States Code,  
5 the Secretary of the Navy may enter into one or more  
6 multiyear contracts for the procurement of John Lewis  
7 class Oilers and systems, components, and long-lead time  
8 materials associated with such vessels.

9 (b) **AUTHORITY FOR ADVANCE PROCUREMENT.**—The  
10 Secretary of the Navy may enter into one or more con-  
11 tracts, beginning in fiscal year 2027, for advance procure-  
12 ment associated with the oilers for which authorization to  
13 enter into a multiyear procurement contract is provided  
14 under subsection (a), including economic order quantity  
15 purchases and advance procurement of long-lead time ma-  
16 terials, to support the continuous production of such ves-  
17 sels and to achieve cost savings.

18 (c) **CONDITION FOR OUT-YEAR CONTRACT PAY-**  
19 **MENTS.**—A contract entered into under subsection (a)  
20 shall provide that any obligation of the United States to  
21 make a payment under the contract for a fiscal year after  
22 fiscal year 2027 is subject to the availability of appropria-  
23 tions or funds for that purpose for such later fiscal year.

24 (d) **TERMINATION LIABILITY.**—A contract entered  
25 into under subsection (a) shall provide that the total liabil-  
26 ity to the Federal Government for termination of the con-

- 1 tract shall be limited to the total amount of funding obli-
- 2 gated for the contract at the time of termination.

1 **SEC. 124 [Log 85569]. PROCUREMENT AUTHORITIES FOR**  
2 **CERTAIN AMPHIBIOUS SHIPBUILDING PRO-**  
3 **GRAMS.**

4 (a) CONTRACT AUTHORITY.—

5 (1) PROCUREMENT AUTHORIZED.—The Sec-  
6 retary of the Navy may enter into one or more con-  
7 tracts for the procurement of covered ships.

8 (2) PROCUREMENT IN CONJUNCTION WITH EX-  
9 ISTING CONTRACTS.—The ships authorized to be  
10 procured under paragraph (1) may be procured as  
11 additions to existing contracts covering programs for  
12 covered ships.

13 (b) CERTIFICATION REQUIRED.—A contract may not  
14 be entered into under subsection (a) unless the Secretary  
15 of the Navy certifies to the congressional defense commit-  
16 tees, in writing, not later than 30 days before entry into  
17 the contract, each of the following, which shall be prepared  
18 by the milestone decision authority for the covered ship  
19 program concerned:

20 (1) The use of such a contract is consistent  
21 with the Commandant of the Marine Corps' pro-  
22 jected force structure requirements for amphibious  
23 ships.

24 (2) The use of such a contract will result in  
25 savings compared to the total anticipated costs of  
26 carrying out the program through annual contracts.

1 In certifying cost savings under the preceding sen-  
2 tence, the Secretary shall include a written expla-  
3 nation of—

4 (A) the estimated end cost and appro-  
5 priated funds by fiscal year, by hull, without  
6 the authority provided in subsection (a);

7 (B) the estimated end cost and appro-  
8 priated funds by fiscal year, by hull, with the  
9 authority provided in subsection (a);

10 (C) the estimated cost savings or increase  
11 by fiscal year, by hull, with the authority pro-  
12 vided in subsection (a); and

13 (D) the contractual actions that will ensure  
14 the estimated cost savings are realized.

15 (3) The Secretary of the Navy has a reasonable  
16 expectation that throughout the contemplated con-  
17 tract period funding will be available for the contract  
18 at the level required to avoid contract cancellation.

19 (4) There is a stable design for the property to  
20 be acquired and the technical risks associated with  
21 such property are not excessive.

22 (5) The estimates of both the cost of the con-  
23 tract and the anticipated cost avoidance through the  
24 use of a contract authorized under subsection (a)  
25 are realistic.

1           (6) The use of such a contract will promote the  
2 national security of the United States.

3           (7) During the fiscal year in which such con-  
4 tract is to be awarded, sufficient funds will be avail-  
5 able to perform the contract in such fiscal year.

6           (c) **AUTHORITY FOR ADVANCE PROCUREMENT.**—The  
7 Secretary of the Navy may enter into one or more con-  
8 tracts for advance procurement or advance construction  
9 associated with a ship or ships for which authorization to  
10 enter into a contract is provided under subsection (a), and  
11 for systems, sub systems, spare parts, and major shore  
12 based spares associated with such ships in economic order  
13 quantities when cost savings are achievable.

14          (d) **AUTHORITY TO USE INCREMENTAL FUNDING.**—  
15 The Secretary of the Navy may incrementally fund a con-  
16 tract entered into under subsection (a) or (c).

17          (e) **CONDITION FOR OUT-YEAR CONTRACT PAY-**  
18 **MENTS.**—A contract entered into under subsection (a)  
19 shall provide that any obligation of the United States to  
20 make a payment under the contract for a fiscal year is  
21 subject to the availability of appropriations for that pur-  
22 pose for such fiscal year.

23          (f) **TERMINATION.**—The authority of the Secretary of  
24 the Navy to enter into contracts under subsection (a) shall  
25 terminate on September 30, 2030.

1 (g) DEFINITIONS.—In this section:

2 (1) The term “covered ship” means a San An-  
3 tonio-class or America-class ship.

4 (2) The term “milestone decision authority”  
5 has the meaning given that term in section 4251(e)  
6 of title 10, United States Code.

1 **SEC. 125 [Log 85673]. CONTRACT AUTHORITY FOR SUB-**  
2 **MARINE TENDER PROGRAM.**

3 (a) **CONTRACT AUTHORITY.**—The Secretary of the  
4 Navy may enter into one or more contracts for the pro-  
5 curement of not more than two AS(X) submarine tenders.

6 (b) **USE OF INCREMENTAL FUNDING.**—With respect  
7 to a contract entered into under subsection (a), the Sec-  
8 retary of the Navy may use incremental funding to make  
9 payments under the contract.

10 (c) **LIABILITY.**—Any contract entered into under sub-  
11 section (a) shall provide that—

12 (1) any obligation of the United States to make  
13 a payment under the contract is subject to the avail-  
14 ability of appropriations for that purpose; and

15 (2) the total liability of the Federal Government  
16 for termination of the contract shall be limited to  
17 the total amount of funding obligated to the contract  
18 at the time of termination.

1 **SEC. 126 [Log 85616]. MULTIYEAR PROCUREMENT AUTHOR-**  
2 **ITY FOR E-2D ADVANCED HAWKEYE AIR-**  
3 **CRAFT.**

4 (a) **AUTHORITY FOR MULTIYEAR PROCUREMENT.**—  
5 Subject to section 3501 of title 10, United States Code,  
6 the Secretary of the Navy may enter into one or more  
7 multiyear contracts, beginning with the fiscal year 2027  
8 program year, for the procurement of twelve E-2D Ad-  
9 vanced Hawkeye aircraft.

10 (b) **AUTHORITY FOR ECONOMIC ORDER QUAN-**  
11 **TITY.**—The Secretary of the Navy may enter into one or  
12 more contracts, beginning in fiscal year 2027, for advance  
13 procurement associated with the aircraft for which author-  
14 ization to enter into a multiyear procurement contract is  
15 provided under subsection (a), which may include procure-  
16 ment of economic order quantities of material and equip-  
17 ment for such aircraft when cost savings are achievable.

18 (c) **LIABILITY.**—Any contract entered into under sub-  
19 section (a) shall provide that—

20 (1) any obligation of the United States to make  
21 a payment under the contract is subject to the avail-  
22 ability of appropriations for that purpose; and

23 (2) the total liability of the Federal Government  
24 for termination of the contract shall be limited to  
25 the total amount of funding obligated to the contract  
26 at the time of termination.

1 **SEC. 127 [Log 85565]. AUTHORITY TO USE INCREMENTAL**  
2 **FUNDING FOR THE CONSTRUCTION OF A**  
3 **GUIDED MISSILE DESTROYER (DDG).**

4 (a) **IN GENERAL.**—Amounts authorized to be appro-  
5 priated by this Act or otherwise made available for the  
6 Navy for Shipbuilding and Conversion for fiscal year 2027  
7 may be used by the Secretary of the Navy to enter into  
8 an incrementally funded contract for the construction of  
9 one Guided Missile Destroyer (DDG).

10 (b) **AVAILABILITY OF FUNDS AND TERMINATION LI-**  
11 **ABILITY.**—A contract entered into under subsection (a)  
12 shall provide that any obligation of the United States to  
13 make a payment under the contract is subject to the avail-  
14 ability of appropriations for that purpose, and that total  
15 liability to the Government for the termination of the con-  
16 tract shall be limited to the total amount of funding obli-  
17 gated at time of termination.

1 **SEC. 128 [Log 85351]. AUTHORITY FOR ADVANCE PROCURE-**  
2 **MENT OF COMPONENTS FOR SHIP-TO-SHORE**  
3 **CONNECTOR CLASS CRAFT.**

4 (a) AUTHORITY FOR ADVANCE PROCUREMENT.—The  
5 Secretary of the Navy may enter into one or more con-  
6 tracts, prior to ship authorization, for the advance pro-  
7 curement of components for Ship-to-Shore Connector class  
8 craft, including procurement of such components in eco-  
9 nomic order quantities when cost savings are achievable.

10 (b) CONDITION FOR OUT-YEAR CONTRACT PAY-  
11 MENTS.—A contract entered into under subsection (a)  
12 shall provide that any obligation of the United States to  
13 make a payment under the contract for a fiscal year is  
14 subject to the availability of appropriations for that pur-  
15 pose for such fiscal year.

1 **SEC. 129 [Log 84962]. LIMITATION ON CONSTRUCTION OF**  
2 **BATTLESHIP PENDING CERTIFICATION ON**  
3 **TECHNOLOGY READINESS LEVELS.**

4       The Secretary of the Navy may not enter into a con-  
5 tract or other agreement that includes a scope of work  
6 for the construction of the lead ship of the Battleship pro-  
7 gram until the date on which the Secretary certifies to  
8 the congressional defense committees that the weapon sys-  
9 tems planned for inclusion in such lead ship are at a suffi-  
10 ciently mature technology readiness level.

1 **SEC. 130 [Log 84961]. STRATEGY FOR ITERATIVE DEVELOP-**  
2 **MENT AND FLIGHT MODIFICATIONS FOR**  
3 **FF(X) CLASS FRIGATES.**

4 (a) STRATEGY REQUIRED.—Not later than 180 days  
5 after the date of the enactment of this Act, the Secretary  
6 of the Navy shall submit to the congressional defense com-  
7 mittees a strategy for the iterative development of the  
8 FF(X) class frigate. Such strategy shall include the fol-  
9 lowing:

10 (1) Information on the estimated timeline for  
11 each planned variant (commonly known as a  
12 “Flight”) of the FF(X) class frigate.

13 (2) Details on the integration of additional ca-  
14 pabilities for future Flights of the frigate, such as  
15 vertical launch systems or improved sensors, and im-  
16 plications for the space, weight, power, and cost of  
17 the hull form.

18 (3) Any additional mission sets or combat func-  
19 tions that may be added to the concept of operation  
20 for FF(X) class frigates.

21 (b) INTERIM BRIEFING.—Not later than 90 days  
22 after the date of the enactment of this Act, the Secretary  
23 of the Navy shall provide to the congressional defense  
24 committees a briefing on the development of the strategy  
25 required under subsection (a).

1           (c) FF(X) CLASS FRIGATE DEFINED.—In this sec-  
2 tion, the term “FF(X) class frigate” means the new class  
3 of frigate vessel under development by the Secretary of  
4 the Navy (as of the date of the enactment of this Act)  
5 based on a design derived from the Legend class Coast  
6 Guard cutter.

1           (1) The total number and variant types of C-  
2           130 aircraft in the inventory of the Air Force.

3           (2) Any planned retirements, divestments, or  
4           reductions to the fleet of such aircraft.

5           (3) Modernization and recapitalization efforts,  
6           including block upgrades and procurement sched-  
7           ules.

8           (4) Planned basing actions for fielding C-130J  
9           aircraft to recapitalize C-130H aircraft.

1 **SEC. 142 [Log 85684]. LIMITATION ON AVAILABILITY OF**  
2 **FUNDS FOR C-37 AIRCRAFT RECAPITALIZA-**  
3 **TION PROGRAM.**

4 Of the funds authorized to be appropriated by this  
5 Act or otherwise made available for fiscal year 2027 for  
6 the Air Force for the procurement of C-37 aircraft, not  
7 more than 50 percent may be obligated or expended until  
8 a period of 30 days has elapsed following the date on  
9 which the Secretary of the Air Force submits to the con-  
10 gressional defense committees—

11 (1) the acquisition strategy for such aircraft;

12 and

13 (2) a justification for using other than competi-  
14 tive procedures under section 3204 of title 10,  
15 United States Code, for the award of a contract for  
16 the procurement of such aircraft.

1 **SEC. 143 [Log 85326]. ANALYSIS OF ALTERNATIVES FOR**  
2 **NEXT GENERATION AIRLIFT CAPABILITIES.**

3 (a) IN GENERAL.—The Secretary of the Air Force,  
4 in coordination with the Commander of the United States  
5 Transportation Command, shall conduct an analysis of al-  
6 ternatives for next generation airlift capabilities.

7 (b) ELEMENTS.—In conducting the analysis of alter-  
8 natives required under subsection (a), the Secretary of the  
9 Air Force shall—

10 (1) evaluate a range of options for next genera-  
11 tion airlift capabilities, including recapitalization of  
12 existing platforms, service life extension and mod-  
13 ernization efforts, and development of new airlift  
14 platforms;

15 (2) in evaluating such options, consider oper-  
16 ational effectiveness, survivability in contested envi-  
17 ronments, fuel efficiency, lifecycle costs, connectivity,  
18 basing, and interoperability with joint and coalition  
19 forces and battle networks; and

20 (3) assess the feasibility of incorporating un-  
21 manned or optionally crewed systems and innovative  
22 concepts of operations.

23 (c) REPORT.—Not later than 180 days after the date  
24 of the enactment of this Act, the Secretary of the Air  
25 Force shall submit to the congressional defense commit-

1 tees a report on the results of the analysis of alternatives  
2 conducted under subsection (a). The report shall include—  
3           (1) the findings and conclusions of the analysis;  
4           (2) recommendations, if any, for future invest-  
5           ment in next generation airlift capabilities; and  
6           (3) such other information as the Secretary de-  
7           termines appropriate.

1 **SEC. 144 [Log 85086]. REPORT ON THE FEASIBILITY OF RE-**  
2 **STORING NUCLEAR CAPABILITY TO THE B-1B**  
3 **LANCER BOMBER AIRCRAFT.**

4 (a) IN GENERAL.—Not later than December 1, 2026,  
5 the Secretary of the Air Force, in coordination with the  
6 Commander of the United States Strategic Command,  
7 shall submit to the congressional defense committees a re-  
8 port assessing the feasibility of restoring nuclear capa-  
9 bility to the B-1B Lancer bomber aircraft.

10 (b) ELEMENTS.—The report required under sub-  
11 section (a) shall include the following:

12 (1) A description of any structural, electronic,  
13 software, and weapons-integration modifications re-  
14 quired to enable the B-1B aircraft to deliver nuclear  
15 weapons.

16 (2) An assessment of the compatibility of such  
17 aircraft with currently fielded and planned nuclear  
18 gravity bombs and air-launched cruise missiles.

19 (3) Identification of any military construction,  
20 storage, security, and certification infrastructure  
21 that would be required at forward operating loca-  
22 tions within the continental United States should  
23 nuclear capability be restored to such aircraft.

24 (4) Requirements related to aircrew certifi-  
25 cation, maintenance training, security forces train-  
26 ing, nuclear surety inspections, and personnel reli-

1 ability programs should nuclear capability be re-  
2 stored to such aircraft.

3 (5) Estimated research, development, test, eval-  
4 uation, procurement, operations, and sustainment  
5 costs over a the five-year period following the initi-  
6 ation of any efforts to restore nuclear capability to  
7 such aircraft.

8 (6) An assessment of the expected remaining  
9 service life of the B-1B aircraft fleet.

10 (7) The estimated time required to achieve ini-  
11 tial operational capability and full operational capa-  
12 bility should the Air Force pursue restoring nuclear  
13 capability to such aircraft.

14 (8) An assessment of the military utility and  
15 strategic deterrence value of restoring nuclear capa-  
16 bility to the B-1B aircraft.

17 (9) An assessment of any costs and additional  
18 requirements to restore nuclear capability across  
19 bomber bases.

20 (c) FORM.—The report required under subsection (a)  
21 shall be submitted in unclassified form but may include  
22 a classified annex.

1 **SEC. 216 [Log 84963]. MODIFICATION TO TEST PROGRAM**  
2 **FOR ENGINEERING PLANT OF CERTAIN VES-**  
3 **SELS.**

4 Section 221 of the National Defense Authorization  
5 Act for Fiscal Year 2022 (Public Law 117–81; 135 Stat.  
6 1599) is amended—

7 (1) in the section heading, by inserting “**AND**  
8 **OTHER LARGE SURFACE COMBATANT**” before  
9 “**VESSELS**”;

10 (2) in subsection (a), by inserting “or any sub-  
11 sequent class of large surface combatant vessels”  
12 after “destroyer class of vessels”;

13 (3) in subsection (b), by striking “Senior Tech-  
14 nical Authority for the DDG(X) destroyer class of  
15 vessels” and inserting “Senior Technical Authority  
16 for the class of vessels involved (as designated pur-  
17 suant to section 8669b of title 10, United States  
18 Code)”;

19 (4) in subsection (d), by striking “for the  
20 DDG(X) destroyer class of vessels” and inserting  
21 “for the class of vessels involved”;

22 (5) in subsection (e), by striking “by not later  
23 than the delivery date of the lead ship in the  
24 DDG(X) destroyer class of vessels” and inserting  
25 “for a class of vessels by not later than the delivery  
26 date of the lead ship in that class of vessels”; and

1           (6) by amending subsection (f) to read as fol-  
2       lows:

3       “(f) DELIVERY DATE DEFINED.—In this section,  
4       term ‘delivery date’ has the meaning given that term in  
5       section 8671 of title 10, United States Code.”.

1 **SEC. 219 [Log 85322]. OPERATIONAL AUTONOMY REQUIRE-**  
2 **MENTS FOR UNMANNED SURFACE VESSELS.**

3 (a) IN GENERAL.—Not later than 180 days after the  
4 date of the enactment of this Act, the Secretary of the  
5 Navy shall take such actions as may be necessary, includ-  
6 ing modification of research and development and acquisi-  
7 tion procedures as appropriate, to ensure that unmanned  
8 surface vessels are capable of autonomous operation—

9 (1) during periods in which communications ca-  
10 pabilities are denied, degraded, intermittent, or lim-  
11 ited; and

12 (2) during periods in which positioning, naviga-  
13 tion, and timing capabilities are degraded or un-  
14 available.

15 (b) BRIEFING.—Following implementation of the ac-  
16 tions required under subsection (a), but not later than 270  
17 days after the date of the enactment of this Act, the Sec-  
18 retary of the Navy shall provide to the congressional de-  
19 fense committees a briefing on such actions. The briefing  
20 shall include an explanation of each of the following:

21 (1) The ability of unmanned surface vessels to  
22 execute preauthorized mission tasks without contin-  
23 uous human control.

24 (2) The ability of such vessels to adhere to de-  
25 fined autonomy behaviors, decision logic, and safety  
26 constraints governing mission execution.

1           (3) The ability of such vessels to adapt, recover,  
2       retask, or terminate missions in accordance with  
3       preestablished operational parameters when commu-  
4       nications or positioning, navigation, and timing are  
5       degraded or unavailable.

6       (c) UNMANNED SURFACE VESSELS.—In this section,  
7       the term “unmanned surface vessels” includes—

8           (1) unmanned surface vessels in use by the  
9       Navy or Marine Corps; and

10          (2) unmanned surface vessels planned for devel-  
11       opment or procurement for the Navy or Marine  
12       Corps.

1           **Subtitle B—Naval Vessels and**  
2                           **Shipyards**

3   **SEC. 1011.[Log 84959] MODIFICATION OF AUTHORITY TO**  
4                           **PURCHASE USED VESSELS WITH NATIONAL**  
5                           **DEFENSE SEALIFT FUND.**

6           (a) EXCLUSION OF VESSELS BUILT IN CHINA.—

7                   (1) EXCLUSION.—Subsection (f)(3) of section  
8           2218 of title 10, United States Code, is amended—

9                           (A) in subparagraph (A), by striking “any  
10           used vessel, regardless of where such vessel was  
11           constructed” and inserting “any used vessel  
12           (other than an excluded vessel), regardless of  
13           where such vessel was constructed,”; and

14                           (B) in subparagraph (B), by inserting  
15           “(other than an excluded vessel)” after “a used  
16           vessel”.

17           (2) DEFINITION OF EXCLUDED VESSEL.—Sub-  
18           section (k) of such section is amended by adding at  
19           the end the following new paragraph:

20                   “(6) The term ‘excluded vessel’ means a vessel  
21           that was—

22                           “(A) constructed or substantially modified  
23           in the People’s Republic of China; or

24                           “(B) built by a Chinese military company  
25           or a Chinese owned or controlled entity.”.

1 (b) REQUIREMENT FOR PURCHASE OF TWO NEW  
2 UNITED STATES-CONSTRUCTED VESSELS FOR EACH  
3 FOREIGN-CONSTRUCTED USED VESSEL PURCHASED IN  
4 EXCESS OF 12.—Subparagraph (C) of paragraph (3) of  
5 subsection (f) of such section is amended to read as fol-  
6 lows:

7 “(C) For each foreign-constructed vessel purchased  
8 by the Secretary under the authority of this paragraph  
9 in excess of 12, the Secretary shall contract for the pur-  
10 chase of two new vessels each of which is to be constructed  
11 in a shipyard located in the United States.”.

12 (c) CLARIFYING AMENDMENT.—Such paragraph is  
13 further amended in subparagraph (D) by striking “sub-  
14 paragraph (A)” and inserting “this paragraph”.

15 (d) REPEAL OF OBSOLETE PROVISION.—Such para-  
16 graph is further amended—

17 (1) by striking subparagraph (E); and

18 (2) by redesignating subparagraph (F) as sub-  
19 paragraph (E).

20 (e) REPEAL OF 30-DAY NOTICE-AND-WAIT PERIOD  
21 BEFORE CERTAIN PURCHASES MAY BE FINALIZED.—  
22 Such paragraph is further amended by striking subpara-  
23 graph (G).

24 (f) TECHNICAL AMENDMENTS TO UPDATE CITA-  
25 TIONS.—Such section is further amended—

1           (1) in subsection (d)(3), by striking “(10  
2           U.S.C. 8661 note)” and inserting “(Public Law  
3           101–510; 10 U.S.C. 8661 note)”; and

4           (2) in subsections (f)(2) and (k)(2)(A), by strik-  
5           ing “Public Law 101–510 (104 Stat. 1683)” and in-  
6           serting “the National Defense Authorization Act for  
7           Fiscal Year 1991 (Public Law 101–510; 10 U.S.C.  
8           8661 note)”.

1 **SEC. 1012.[Log 84965] ADDITIONAL MEASURES FOR NAVY**  
2 **STRATEGY FOR INVESTMENT IN AND SUP-**  
3 **PORT FOR THE MARITIME INDUSTRIAL BASE.**

4 Section 1019 of the National Defense Authorization  
5 Act for Fiscal Year 2026 (Public Law 119–60; 139 Stat.  
6 1032; 10 U.S.C. 8661 note) is amended—

7 (1) in subsection (a), by striking “programs”  
8 and inserting “and sustainment”; and

9 (2) by adding at the end the following new sub-  
10 section:

11 “(d) **ADDITIONAL MEASURES.**—Not later than 180  
12 days after the date of the National Defense Authorization  
13 Act for Fiscal Year 2027, the Secretary shall include each  
14 of the following measures in the strategy required under  
15 subsection (a):

16 “(1) Measures to determine a total cost and  
17 schedule for investments needed to enhance the per-  
18 formance of the submarine industrial base to the ex-  
19 tent to which it can support the production of one  
20 Columbia class submarine and two Virginia class  
21 submarines each year and improve in-service sub-  
22 marine maintenance to achieve the goals of the Navy  
23 for operational availability.

24 “(2) Measures to determine a total cost and  
25 schedule for investments needed to enhance the per-  
26 formance of the surface ship industrial base to the

1 extent to which it can support the goals of the Navy  
2 for surface ship construction and sustainment.

3 “(3) Measures to identify roles, responsibilities,  
4 and mechanism for coordination and data sharing  
5 between all entities within the Department of De-  
6 fense involved in investing in and supporting the  
7 maritime industrial base.

8 “(4) Measures to conduct an analysis of the ca-  
9 pacity of the Department of Defense to effectively  
10 plan for, award, and oversee investments in the mar-  
11 itime industrial base and, if relevant offices do not  
12 have sufficient capacity, determine how to increase  
13 capacity.”.

1 **SEC. 1014.[Log 85498] REALIGNMENT OF CONTRACT MAN-**  
2 **AGEMENT FOR POLAR SECURITY CUTTER**  
3 **PROGRAM.**

4 (a) **CONTRACT MANAGEMENT ALIGNMENT.**—The  
5 Secretary of the Navy, in coordination with the Com-  
6 mandant of the Coast Guard, shall take such steps as are  
7 necessary to ensure that the Commandant of the Coast  
8 Guard is solely responsible for the contract management  
9 responsibilities for the Polar Security Cutter program.

10 (b) **LIMITATION ON NAVY CONTRACTING ACTIVI-**  
11 **TIES.**—Beginning on the date that is 180 days after the  
12 date of the enactment of this Act, the Secretary of the  
13 Navy may not maintain a separate contracting office for  
14 the Polar Security Cutter program except as required to  
15 provide advisory support requested by the Commandant  
16 of the Coast Guard.

17 (c) **BRIEFING REQUIREMENT.**—Not later than 90  
18 days after the date of the enactment of this Act, the Sec-  
19 retary of the Navy shall provide to the congressional de-  
20 fense committees a briefing describing the implementation  
21 of this section.

1 **SEC. 1015.[Log 84964] REQUIREMENTS RELATING TO UN-**  
2 **MANNED SURFACE VESSELS.**

3 (a) **LIMITATION.**—The Secretary of the Navy may  
4 not accept or take delivery of an unmanned surface vessel  
5 before the date on which the Secretary submits to the con-  
6 gressional defense committees certification in writing that  
7 the Chief of Naval Operations or the Commandant of the  
8 Marine Corps has developed both concepts of operation  
9 and concepts of employment for at least one of the fol-  
10 lowing combat functions:

- 11 (1) Anti-submarine warfare.
- 12 (2) Maritime strike.
- 13 (3) Logistics.
- 14 (4) Electronic warfare.
- 15 (5) Command and control.
- 16 (6) Intelligence.
- 17 (7) Surveillance.
- 18 (8) Reconnaissance.
- 19 (9) Targeting.
- 20 (10) Systems designed to counter any of the  
21 functions described in paragraphs (1) through (9).
- 22 (11) Any other combat function designated by  
23 the Chief of Naval Operations or the Commandant  
24 of the Marine Corps.

25 (b) **STRATEGY REQUIRED.**—Not later than 180 days  
26 after the date of the enactment of this Act, the Secretary

1 of the Navy shall develop and implement a strategy for  
2 the integration of unmanned surface vessels into naval  
3 force design and joint maritime operations. Such strategy  
4 shall include each of the following:

5 (1) A description of the role of unmanned sur-  
6 face vessels in the future force design for the De-  
7 partment of the Navy.

8 (2) The process and timelines associated with  
9 the integration of unmanned surface vessels into  
10 joint maritime operations.

11 (3) An identification of the operational authori-  
12 ties currently governing the use of unmanned sur-  
13 face vessels.

14 (4) An acquisition strategy for unmanned sur-  
15 face vessels.

16 (5) An identification of the manpower, training,  
17 and infrastructure requirements for the integration  
18 of unmanned surface vessels into naval force design  
19 and joint maritime operations.

20 (6) A description of different ownership or op-  
21 erating models for unmanned surface vessels, includ-  
22 ing ownership and operation by the Government and  
23 by contractors, and how each such model would af-  
24 fect—

1 (A) manpower and infrastructure require-  
2 ments;

3 (B) sustainment planning; and

4 (C) competition and industrial base con-  
5 cerns.

6 (7) An identification of access and basing re-  
7 quirements for unmanned surface vessels.

8 (c) REPORT.—Not later than 210 days after the date  
9 of the enactment of this Act, the Secretary of the Navy  
10 shall submit to the congressional defense committees a re-  
11 port on the strategy required under subsection (b).

12 (d) ANNUAL BRIEFING.—Not later than 90 days  
13 after the date of the submission of the report required  
14 under subsection (c), and biannually thereafter, the Port-  
15 folio Acquisition Executive established under section 1732  
16 of title 10, United States Code, shall provide a briefing  
17 to the Committees on Armed Services of the House of  
18 Representatives and the Senate. Each such briefing shall  
19 include each of the following:

20 (1) A description of any changes or refinements  
21 made to the strategy required under subsection (b)  
22 during the period by the briefing.

23 (2) A description of any planning, scenarios, or  
24 simulations carried out by the Navy during the pe-  
25 riod by the briefing that model the use of unmanned

1 surface vessels in defined environments for specific  
2 missions and tasks.

3 (3) A description of any operational gaps identi-  
4 fied during the period by the briefing that un-  
5 manned surface vessel capabilities could address.

6 (4) A description of any validated and emerging  
7 requirements of the combatant commands identified  
8 during the period by the briefing for unmanned sur-  
9 face vessels and unmanned underwater vessels, and  
10 the criteria used to validate such requirements.

11 (5) Any gaps in operational authority or re-  
12 quired changes with respect to unmanned surface  
13 vessels and unmanned underwater vessels identified  
14 during the period by the briefing.

1 **SEC. 1016.[Log 85367] STRATEGY FOR DISTRIBUTED SHIP-**  
2 **BUILDING.**

3 (a) STRATEGY.—Not later than 180 days after the  
4 date of the enactment of this Act, the Secretary of the  
5 Navy shall develop and implement a strategy to increase  
6 distributed shipbuilding.

7 (b) BRIEFING.—Not later than 270 days after the  
8 date of the enactment of this Act, the Secretary shall pro-  
9 vide to the congressional defense committees a briefing on  
10 the strategy required under subsection (a).

11 (c) DISTRIBUTED SHIPBUILDING DEFINED.—In this  
12 section, the term “distributed shipbuilding” means, with  
13 respect to a vessel, the construction of modules of the ves-  
14 sel—

15 (1) by one or more entities that are inde-  
16 pendent from the operators of the shipyard at which  
17 the final assembly of the vessel occurs; and

18 (2) at a facility that is located separately from,  
19 or that is located within but is not operated by, the  
20 shipyard at which the final assembly of the vessel  
21 occurs.

1 **SEC. 1017.[Log 85712] SENSE OF CONGRESS REGARDING**  
2 **NAMING OF VESSEL FOR BATTLE OF DAI DO.**

3 It is the sense of Congress that the Secretary of the  
4 Navy should name an amphibious or expeditionary class  
5 vessel for the Battle of Dai Do.

1 **SEC. 1045.[Log 85355] DOMESTIC SOURCING OF BULK FUEL**  
2 **TO SUPPORT TANKER SECURITY PROGRAM.**

3 (a) DOMESTIC SOURCING.—Beginning not later than  
4 180 days after the date of the enactment of this Act, the  
5 Director of the Defense Logistics Agency shall seek to pro-  
6 cure at least 10 percent of covered bulk fuel from domestic  
7 refineries with excess production capacity.

8 (b) USE OF TANKER SECURITY FLEET VESSELS.—  
9 The delivery of covered bulk fuel procured from a domestic  
10 refinery pursuant to subsection (a) shall be transported  
11 for delivery to locations outside of the United States on  
12 participating fleet vessels.

13 (c) COORDINATION.—In carrying out this section, the  
14 Director of the Defense Logistics Agency shall coordinate  
15 with the Administrator of the Maritime Administration to  
16 align procurement and delivery planning for covered bulk  
17 fuel in accordance with subsection (a) with the Tanker Se-  
18 curity Program, including by identifying opportunities to  
19 increase the use of participating fleet vessels consistent  
20 with subsection (b).

21 (d) REPORT.—Not later than 270 days after the date  
22 of the enactment of this Act, the Secretary of Defense  
23 shall submit to the congressional defense committees a re-  
24 port that includes—

1           (1) an assessment of the extent to which par-  
2           ticipating fleet vessels are expected to be used pursu-  
3           ant to subsection (b);

4           (2) a description of opportunities to increase  
5           the delivery of covered bulk fuel procured from a do-  
6           mestic refinery pursuant to subsection (a) in support  
7           of the Tanker Security Program, including opportu-  
8           nities to establish recurring shipments of such fuel  
9           to fuel depots of the Department located outside of  
10          the United States;

11          (3) an assessment of how such increase would  
12          support the availability of United States mariners  
13          and long-range fuel supply chains necessary to sus-  
14          tain military operations in contested environments;  
15          and

16          (4) any legislation, policy, or contract authority  
17          that the Secretary determines necessary to imple-  
18          ment this section.

19          (e) DEFINITIONS.—In this section:

20           (1) The term “covered bulk fuel” means avia-  
21           tion turbine fuel, marine diesel, or any other refined  
22           petroleum product procured by the Secretary of De-  
23           fense for delivery to locations outside of the United  
24           States in support of military operations or fuel de-  
25           pots of the Department of Defense.

1           (2) The term “excess production capacity”,  
2           with respect to a refinery, means a production ca-  
3           pacity of the refinery that the Secretary of Defense,  
4           in coordination with the Secretary of Energy, deter-  
5           mines is in excess of domestic consumption require-  
6           ments.

7           (3) The term “participating fleet vessel” has  
8           the meaning given such term in section 53401 of  
9           title 46, United States Code.

## 1     **Subtitle E—Studies and Reports**

### 2     **SEC. 1061.[Log 85001] MOBILITY CAPABILITIES STRATEGIC** 3                   **PLAN.**

4           (a) IN GENERAL.—Not later than January 1, 2027,  
5 the Secretary of the Air Force, in coordination with the  
6 Commander of the United States Transportation Com-  
7 mand and in consultation with the commanders of each  
8 of the geographic combatant commands, shall submit to  
9 the Committees on Armed Services of the Senate and the  
10 House of Representatives a report that includes a com-  
11 prehensive and detailed strategic plan for the development,  
12 acquisition, modernization, and integration of mobility ca-  
13 pabilities of the Department of Defense through fiscal  
14 year 2047.

15          (b) ELEMENTS.—The plan required by subsection (a)  
16 shall include each of the following:

17           (1) An operational environment assessment  
18           of—

19                   (A) contested operations across all domains  
20                   over great distances;

21                   (B) contested lines of communication ex-  
22                   tending from the United States to operational  
23                   theaters;

1 (C) adversary capabilities designed to tar-  
2 get United States mobility forces, mobility in-  
3 frastructure, and logistics networks; and

4 (D) the requirement for mobility forces to  
5 operate in degraded, contested, and highly con-  
6 tested environments including austere locations,  
7 battle-damaged airfields, degraded runways,  
8 ramps, taxiways, and other runway agnostic op-  
9 erating environments.

10 (2) An assessment of current mobility force, in-  
11 cluding—

12 (A) the ability of Air Mobility Command to  
13 support the requirements of all of the Armed  
14 Forces in competition, crisis, and conflict;

15 (B) the ability of Air Mobility Command to  
16 support agility concepts for all of the Armed  
17 Forces simultaneously in conflict, including  
18 agile combat employment, multi-domain task  
19 force operations, expeditionary advanced base  
20 operations, and distributed maritime operations;

21 (C) the vulnerability of mobility forces, mo-  
22 bility infrastructure, and global logistics net-  
23 works in contested environments; and

24 (D) the degree to which existing mobility  
25 capability and capacity meet homeland defense

1 priorities, nuclear mission obligations, and si-  
2 multaneous global operational demands.

3 (3) An identification of the attributes required  
4 of future mobility forces, including—

5 (A) secure beyond line-of-sight connectivity  
6 with—

7 (i) service and joint data links;

8 (ii) service and joint battle manage-  
9 ment networks; and

10 (iii) service and joint command and  
11 control network;

12 (B) automation and autonomous aviation  
13 capabilities;

14 (C) the ability to operate across the full  
15 spectrum of threat environments;

16 (D) flexibility across the full scale of mo-  
17 bility missions, including small and distributed  
18 missions, tactical, operational, and strategic  
19 missions, and oversized and large-volume move-  
20 ments;

21 (E) the ability to operate from runway-ag-  
22 nostic and degraded operating locations;

23 (F) fuel-resilient aviation concepts, includ-  
24 ing aircraft capable of operating on traditional

1 fuels and emerging propulsion systems, such as  
2 electric, hybrid-electric, and hydrogen;

3 (G) consideration of aircraft designed with  
4 open architecture enabling rapid integration of  
5 mission systems including palletized effects,  
6 electronic warfare, battle management, and in-  
7 telligence, surveillance, and reconnaissance ca-  
8 pabilities; and

9 (H) signature management capabilities  
10 that enable mobility aircraft to operate globally  
11 while maintaining operational security, includ-  
12 ing the ability to comply with international  
13 aviation safety requirements while limiting ex-  
14 posure of aircraft identity, position, and mission  
15 information through publicly accessible tracking  
16 systems or other unclassified means.

17 (4) An evaluation of future tanker capabilities,  
18 including—

19 (A) collaborative tanker aircraft supporting  
20 collaborative, distant, and distributed refueling  
21 operation in contested environments;

22 (B) penetrating stealth tanker aircraft ca-  
23 pable of operating in highly contested environ-  
24 ments;

1 (C) low-signature tanker concepts, includ-  
2 ing blended-wing body tanker aircraft;

3 (D) tactical tanker aircraft capable of sup-  
4 porting distributed tanker and airlift oper-  
5 ations;

6 (E) modernization of legacy tanker aircraft  
7 through connectivity and full automation;

8 (F) tanker aircraft designed with open ar-  
9 chitecture and multi-role capability, enabling  
10 complementary missions including electronic  
11 warfare, battle management, and intelligence,  
12 surveillance, and reconnaissance capabilities;

13 (G) opportunities to expand tanker capaci-  
14 ty through commercial tanker constructs in-  
15 cluding Government owned, contractor oper-  
16 ated; and

17 (H) the establishment of a Civil Reserve  
18 Air Fleet tanker capability that would enable  
19 the commercial operation of tanker aircraft to  
20 provide immediate and dependable augmenta-  
21 tion of United States tanker capacity.

22 (5) An evaluation of future airlift capabilities  
23 across mission scales, including—

24 (A) autonomous airlift platforms sup-  
25 porting small and tactical missions;

1 (B) the establishment of a distributed ma-  
2 neuver pool composed of autonomous and high-  
3 ly automated mobility platforms capable of sup-  
4 porting maneuvering units and distributed oper-  
5 ations, with mobility capabilities owned or con-  
6 trolled by lower-echelon multi-service oper-  
7 ational units and integrated into the broader  
8 mobility enterprise;

9 (C) improved and automated tactical and  
10 operational airlift capabilities supporting ma-  
11 neuver and distributed operations;

12 (D) new and improved strategic airlift ca-  
13 pabilities supporting global force flow and the-  
14 ater reinforcement, including the development  
15 of a next-generation strategic airlifter to aug-  
16 ment or replace the C-17 aircraft and estab-  
17 lishing a new standard for military airlift  
18 through improved capability, capacity, surviv-  
19 ability, connectivity, automation, and oper-  
20 ational flexibility;

21 (E) oversized and large-volume airlift sys-  
22 tems;

23 (F) vertical takeoff and landing and short-  
24 field takeoff and landing airlift platforms sup-

1 porting multi-service agility and distributed op-  
2 erations;

3 (G) delivery systems, including automated  
4 airdrop, glider, towable, and hybrid aircraft lo-  
5 gistics platforms; and

6 (H) opportunities to expand airlift capacity  
7 through commercial operation of strategic airlift  
8 aircraft, Civil Reserve Air Fleet participation,  
9 and service-based acquisition models such as ef-  
10 fects-as-a-service.

11 (6) An assessment of command and control ar-  
12 chitecture required to support mobility operations in  
13 contested environments, including—

14 (A) the use of maneuver battle manage-  
15 ment using technologies such as artificial intel-  
16 ligence, algorithmic allocation systems, and ad-  
17 vanced data architectures to integrate logistics,  
18 maneuver, and mobility operations across the  
19 Joint Force; and

20 (B) integration of distributed traditional  
21 air battle management capabilities within mobil-  
22 ity forces.

23 (7) An assessment of opportunities to expand  
24 mobility capability and capacity through commercial  
25 aviation capabilities, including—

1 (A) the expansion of the Civil Reserve Air  
2 Fleet;

3 (B) the establishment of the Civil Reserve  
4 Air Fleet tanker capability;

5 (C) the commercial operation of excess,  
6 transitioned, or Government-owned strategic  
7 airlift and tanker aircraft;

8 (D) the use of service-based acquisition  
9 models such as mobility-as-a-service or effects-  
10 as-a-service; and

11 (E) the role of nonprime aviation compa-  
12 nies in enabling the building of the future mo-  
13 bility enterprise.

14 (c) FORM.—The report required under subsection (a)  
15 shall be submitted in unclassified form, but may include  
16 a classified annex.

1 **SEC. 3501.[Log 85348] AUTHORIZATION OF APPROPRIA-**  
2 **TIONS FOR MARITIME ADMINISTRATION.**

3 (a) IN GENERAL.—There are authorized to be appro-  
4 priated to the Department of Transportation for fiscal  
5 year 2027, for programs associated with maintaining the  
6 United States Merchant Marine, the following amounts:

7 (1) For expenses necessary to support the  
8 United States Merchant Marine Academy,  
9 \$249,500,000 of which—

10 (A) \$129,500,000 shall be for Academy  
11 operations; and

12 (B) \$120,000,000 shall be for construction  
13 of facilities and infrastructure at the United  
14 States Merchant Marine Academy in accord-  
15 ance with the Campus Modernization Plan and  
16 for facilities maintenance and repair and equip-  
17 ment.

18 (2) For expenses necessary to support the State  
19 maritime academies, \$53,400,000, of which—

20 (A) \$9,400,000 shall be for the Student  
21 Incentive Payment Program;

22 (B) \$7,000,000 shall be for direct pay-  
23 ments for State maritime academies;

24 (C) \$12,000,000 shall be for training ship  
25 fuel assistance;

1 (D) \$4,000,000 shall be for offsetting the  
2 costs of training ship sharing; and

3 (E) \$21,000,000 shall be for maintenance  
4 and repair of State maritime academy training  
5 vessels.

6 (3) For expenses necessary to support the Na-  
7 tional Security Multi-Mission Vessel program, in-  
8 cluding funds for construction and necessary ex-  
9 penses to construct shoreside infrastructure to sup-  
10 port such vessels, \$75,000,000.

11 (4) For expenses necessary to support Maritime  
12 Administration operations and programs,  
13 \$105,760,000, of which—

14 (A) \$15,000,000 shall be for the maritime  
15 environmental and technical assistance program  
16 under section 50307 of title 46, United States  
17 Code;

18 (B) \$15,000,000 shall be for the United  
19 States marine highway program, including to  
20 make grants authorized under section 55601 of  
21 title 46, United States Code;

22 (C) \$2,000,000 shall be for the Office of  
23 Environment and Compliance, including to as-  
24 sist in the environmental review of grant and

1 permit programs administered by the Maritime  
2 Administration; and

3 (D) \$73,760,000 shall be for headquarters  
4 operations expenses.

5 (5) For expenses necessary for the disposal of  
6 obsolete vessels in the National Defense Reserve  
7 Fleet of the Maritime Administration, \$6,000,000.

8 (6) For expenses necessary to maintain and  
9 preserve a United States flag merchant marine to  
10 serve the national security needs of the United  
11 States under chapter 531 of title 46, United States  
12 Code, \$400,500,000.

13 (7) For expenses necessary to maintain and  
14 preserve a United States flag merchant marine to  
15 serve the national security needs of the United  
16 States under chapter 534 of title 46, United States  
17 Code, \$167,600,000.

18 (8) For expenses necessary for the loan guar-  
19 antee program authorized under chapter 537 of title  
20 46, United States Code, \$33,700,000, of which—

21 (A) \$30,000,000 may be used for the cost  
22 (as such term is defined in section 502(5) of  
23 the Federal Credit Reform Act of 1990 (2  
24 U.S.C. 661a(5)) of loan guarantees under the  
25 program; and

1 (B) \$3,700,000 may be used for adminis-  
2 trative expenses relating to loan guarantee com-  
3 mitments under the program.

4 (9) For expenses necessary to provide assist-  
5 ance to small shipyards and for maritime training  
6 programs authorized under section 54101 of title 46,  
7 United States Code, \$105,000,000.

8 (10) For expenses necessary to implement the  
9 port infrastructure development program, as author-  
10 ized under section 54301 of title 46, United States  
11 Code, subject to the limitation under subsection (b),  
12 \$550,000,000, to remain available until expended.

13 (11) For maritime incentive payments to cen-  
14 ters of excellence designated under section 51706 of  
15 title 46, United States Code, \$300,000,000.

16 (b) LIMITATION.—

17 (1) IN GENERAL.—No funds may be obligated  
18 or expended for the port infrastructure development  
19 program pursuant to subsection (a)(10) to make a  
20 grant to be used for the purchase of fully automated  
21 cargo handling equipment that is remotely operated  
22 or remotely monitored with or without the exercise  
23 of human intervention or control, if the Secretary of  
24 Transportation determines such equipment would re-

1       sult in a net loss of jobs within a port or port ter-  
2       minal.

3           (2) REPORT.—If the Secretary makes a deter-  
4       mination pursuant to paragraph (1), not later than  
5       three days after the date on which such determina-  
6       tion is made, the Secretary shall submit to the Com-  
7       mittee on Commerce, Science, and Transportation of  
8       the Senate and the Committee on Transportation  
9       and Infrastructure of the House of Representatives  
10      a report that includes the data and analysis used by  
11      the Secretary in making such determination.

1 **SEC. 3502.[Log 85617] SUPPORT FOR ATHLETIC PROGRAMS**  
2 **OF THE UNITED STATES MERCHANT MARINE**  
3 **ACADEMY.**

4 (a) IN GENERAL.—Chapter 513 of title 46, United  
5 States Code, is amended by adding at the end the fol-  
6 lowing:

7 **“§ 51329. Support for athletic programs of the United**  
8 **States Merchant Marine Academy**

9 “(a) CORPORATION FOR SUPPORT AUTHORIZED.—

10 “(1) IN GENERAL.—The Secretary may, in ac-  
11 cordance with the laws of the State of New York, es-  
12 tablish a corporation (in this section referred to as  
13 the ‘corporation’) to support the athletic programs  
14 of the United States Merchant Marine Academy. All  
15 stock of the corporation shall be owned by the  
16 United States and held in the name of and voted by  
17 the Secretary.

18 “(2) OPERATION.—The corporation shall oper-  
19 ate exclusively for charitable, educational, and civic  
20 purposes to support the athletic programs of the  
21 United States Merchant Marine Academy.

22 “(b) CORPORATE ORGANIZATION.—The corporation  
23 shall be organized and operated—

24 “(1) as a nonprofit corporation under section  
25 501(c)(3) of the Internal Revenue Code of 1986;

26 “(2) in accordance with this section; and

1           “(3) pursuant to the laws of the State of New  
2           York, its articles of incorporation, and its bylaws.

3           “(c) CORPORATE BOARD OF DIRECTORS.—

4           “(1) IN GENERAL.—The members of the board  
5           of directors of the corporation shall serve without  
6           compensation as members of the board, except for  
7           reasonable travel and other related expenses for at-  
8           tendance at meetings of the board.

9           “(2) DEPARTMENT OF TRANSPORTATION EM-  
10          PLOYEES.—The Secretary may authorize employees  
11          of the Department of Transportation to serve, in  
12          their official capacities, as members of the board of  
13          directors of the corporation, but such employees  
14          shall not hold more than one-third of the director-  
15          ships. Such authorization to participate in the man-  
16          agement of the corporation shall be without com-  
17          pensation and may be made only for the purpose of  
18          providing oversight and advice to, and coordination  
19          with, the corporation. Participation of the employee  
20          in the activities of the corporation may not extend  
21          to participation in the day-to-day operations of the  
22          corporation.

23          “(d) CONTRACTS AND COOPERATIVE AGREE-  
24          MENTS.—

1           “(1) IN GENERAL.—The Secretary may enter  
2           contract and cooperative agreements with the cor-  
3           poration for the purpose of supporting the athletic  
4           programs of the United States Merchant Marine  
5           Academy.

6           “(2) AUTHORITY.—Notwithstanding section  
7           3105 of title 41, the Secretary may enter into such  
8           contracts and cooperative agreements on a sole  
9           source basis pursuant to section 3304(a) of title 41.

10          “(3) ACQUISITIONS.—Notwithstanding chapter  
11          63 of title 31, a cooperative agreement under this  
12          section may be used to acquire property, services, or  
13          travel for the direct benefit or use of the United  
14          States Merchant Marine Academy.

15          “(e) LEASES.—For the purpose of supporting the  
16          athletic programs of the United States Merchant Marine  
17          Academy, in consultation with the General Services Ad-  
18          ministration, the Secretary may rent or lease real property  
19          located at the United States Merchant Marine Academy,  
20          under such terms and conditions as are deemed advisable,  
21          for a period not exceeding 5 years, such real property as  
22          may not be required for immediate use by the United  
23          States Merchant Marine Academy, to the corporation, and  
24          that proceeds from such a lease shall be retained and ex-  
25          pended in accordance with subsection (j).

1 “(f) SUPPORT SERVICES.—

2 “(1) AUTHORITY.—To the extent required by a  
3 contract or cooperative agreement under subsection  
4 (a), the Secretary may provide support services to  
5 the corporation while the corporation conducts sup-  
6 port activities at the United States Merchant Marine  
7 Academy only if the Secretary determines that the  
8 provision of such services is essential for the support  
9 of the athletic programs of the United States Mer-  
10 chant Marine Academy.

11 “(2) NO LIABILITY OF THE UNITED STATES.—  
12 Support services may only be provided without any  
13 liability of the United States to the corporation.

14 “(3) SUPPORT SERVICES DEFINED.—In this  
15 subsection, the term ‘support services’ includes utili-  
16 ties, office furnishings and equipment, communica-  
17 tions services, records staging and archiving, audio  
18 and video support, and security systems, in conjunc-  
19 tion with the leasing or licensing of property.

20 “(g) TRANSFERS FROM NONAPPROPRIATED FUND  
21 OPERATION.—

22 “(1) IN GENERAL.—Except as provided in para-  
23 graph (2), the Secretary may, subject to the accept-  
24 ance of the corporation, transfer to the corporation  
25 all title to and ownership of the assets and liabilities

1 of the United States Merchant Marine Academy  
2 nonappropriated fund instrumentality, the function  
3 of which includes providing support for the athletic  
4 programs of the United States Merchant Marine  
5 Academy, including bank accounts and financial re-  
6 serves in the accounts of such fund instrumentality,  
7 equipment, supplies, and other personal property.

8 “(2) LIMITATION.—The Secretary may not  
9 transfer under paragraph (1) any interest in real  
10 property.

11 “(h) ACCEPTANCE OF SUPPORT.—

12 “(1) IN GENERAL.—Notwithstanding section  
13 1342 of title 31, the Secretary may accept from the  
14 corporation funds, supplies, and services for the sup-  
15 port of the athletic programs of the United States  
16 Merchant Marine Academy.

17 “(2) EMPLOYEES OF THE CORPORATION.—For  
18 purposes of this section, employees or personnel of  
19 the corporation may not be considered to be employ-  
20 ees of the United States.

21 “(3) FUNDS RECEIVED FROM OTHER  
22 SOURCES.—The Secretary may charge fees for the  
23 support of athletic programs of the United States  
24 Merchant Marine Academy. To support the athletic  
25 programs of the United States Merchant Marine

1 Academy, the Secretary may accept funds from the  
2 National Collegiate Athletic Association, funds from  
3 athletic conferences, game guarantees from other  
4 educational institutions, fees for ticketing and licens-  
5 ing, and other consideration provided incidental to  
6 the execution of the athletic programs of the United  
7 States Merchant Marine Academy.

8 “(4) LIMITATION.—The Secretary shall ensure  
9 that contributions under this subsection and expend-  
10 iture of funds pursuant to subsection (j) do not—

11 “(A) reflect unfavorably on the ability of  
12 the Department of Transportation or any em-  
13 ployee of the Department of Transportation to  
14 carry out any responsibility or duty in a fair  
15 and objective manner; or

16 “(B) compromise the integrity or appear-  
17 ance of integrity of any program of the Depart-  
18 ment of Transportation, or any individual in-  
19 volved in such a program.

20 “(i) TRADEMARKS AND SERVICE MARKS.—

21 “(1) LICENSING, MARKETING, AND SPONSOR-  
22 SHIP AGREEMENTS.—An agreement under sub-  
23 section (d) may, consistent with section 51330, au-  
24 thorize the corporation to enter into licensing, mar-  
25 keting, and sponsorship agreements relating to

1 trademarks and service marks identifying the United  
2 States Merchant Marine Academy, subject to the ap-  
3 proval of the Secretary.

4 “(2) LIMITATIONS.—A licensing, marketing, or  
5 sponsorship agreement may not be entered into  
6 under paragraph (1) if—

7 “(A) such agreement would reflect unfa-  
8 vorably on the ability of the Department of  
9 Transportation or any employee of the Depart-  
10 ment of Transportation to carry out any re-  
11 sponsibility or duty in a fair and objective man-  
12 ner; or

13 “(B) the Secretary determines that the use  
14 of the trademark or service mark would com-  
15 promise the integrity or appearance of integrity  
16 of any program of the Department of Transpor-  
17 tation or any individual involved in such a pro-  
18 gram.

19 “(j) RETENTION AND USE OF FUNDS.—Funds re-  
20 ceived by the Secretary under this section may be retained  
21 for use to support the athletic programs of the United  
22 States Merchant Marine Academy and shall remain avail-  
23 able until expended.

1 **“§ 51330. Licensing of intellectual property**

2       “(a) **AUTHORITY.**—The Secretary may license trade-  
3 marks and service marks owned or controlled by the Sec-  
4 retary with respect to the United States Merchant Marine  
5 Academy and may retain and expend fees received from  
6 such licensing in accordance with this section.

7       “(b) **DESIGNATED MARKS.**—The Secretary shall des-  
8 ignate the trademarks and service marks regarding which  
9 the Secretary will exercise the authority to retain licensing  
10 fees under this section.

11       “(c) **USE OF FEES.**—The Secretary shall use fees re-  
12 tained under this section for the following purposes:

13               “(1) For payment of costs incurred by the Sec-  
14 retary of securing trademark registrations and of  
15 operating the licensing program under this section.

16               “(2) For support of athletic programs and re-  
17 cruiting activities of the United States Merchant  
18 Marine Academy under the jurisdiction of the Sec-  
19 retary, to the extent (if any) that the total amount  
20 of the licensing fees available under this section for  
21 a fiscal year exceed the total amount needed for  
22 such fiscal year under paragraph (1).

23       “(d) **AVAILABILITY.**—Fees received in a fiscal year  
24 and retained under this section shall be available until ex-  
25 pended.

1           “(e) DEFINITIONS.—In this section, the terms ‘trade-  
2 mark’ and ‘service mark’ have the meanings given such  
3 terms in section 45 of the Act of July 5, 1946 (commonly  
4 referred to as the Trademark Act of 1946; 15 U.S.C.  
5 1127).”.

6           (b) CLERICAL AMENDMENT.—The table of sections  
7 at the beginning of such chapter is amended by adding  
8 at the end the following new items:

“51329. Support for athletic programs of the United States Merchant Marine  
Academy.

“51330. Licensing of intellectual property.”.

1 **SEC. 3503.**[Log 85618] **ENHANCING UNITED STATES MARI-**  
2 **TIME WORKFORCE.**

3 (a) PROPOSALS.—Not later than 90 days after the  
4 date of the enactment of this Act, the President shall sub-  
5 mit to the appropriate congressional committees proposals  
6 to implement the recommendations set forth in the Mari-  
7 time Action Plan issued by the White House and dated  
8 February, 2026, with respect to—

9 (1) maximizing the credits for military training  
10 and sea service eligible to count toward merchant  
11 mariner credential endorsements and expanding as-  
12 sociated fee exemptions to all members of the Armed  
13 Forces;

14 (2) in consultation with the National Merchant  
15 Marine Personnel Advisory Committee established  
16 under section 15103 of title 46, United States Code,  
17 formalizing equivalency guidance with respect to  
18 such credits and credentials;

19 (3) continuing to approve reciprocity for mili-  
20 tary courses to meet training requirements for such  
21 credentials;

22 (4) strengthening outreach and counseling to  
23 enable members of the Armed Forces eligible for  
24 pre-separation counseling under section 1142 of title  
25 10, United States Code, to efficiently convert rel-

1       evant skills of such members to qualifications nec-  
2       essary for such credentials;

3           (5) streamlining and clarifying the processes for  
4       merchant mariner credentialing;

5           (6) streamlining training approvals for such  
6       credentials, including with respect to the approval of  
7       training involving simulators and other modern inno-  
8       vations, to safely accelerate the acquisition of skills  
9       and qualifications necessary for such credentials;  
10      and

11           (7) streamlining training requirements and pro-  
12      vider accreditation to accelerate merchant mariner  
13      credentialing.

14      (b) DEFINITIONS.—In this section:

15           (1) The term “appropriate congressional com-  
16      mittees” means—

17           (A) the Committee on Armed Services and  
18           the Committee on Transportation and Infra-  
19           structure of the House of Representatives; and

20           (B) the Committee on Armed Services and  
21           the Committee on Commerce, Science, and  
22           Transportation of the Senate.

23           (2) The term “merchant mariner credential”  
24      has the meaning given such term in section 2101 of  
25      title 46, United States Code.

1 **SEC. 3504.**[Log 85619] **ENHANCING UNITED STATES SHIP-**  
2 **YARDS AND SHIPBUILDING.**

3 (a) PROPOSALS.—Not later than 90 days after the  
4 date of the enactment of this Act, the President shall sub-  
5 mit to the appropriate congressional committees proposals  
6 to implement the recommendations set forth in the Mari-  
7 time Action Plan issued by the White House and dated  
8 February, 2026, with respect to—

9 (1) blending Federal and private resources for  
10 durable shipyards and shipbuilding component fab-  
11 rication;

12 (2) simplifying and standardizing requirements  
13 relating to applications, eligibility, and compliance  
14 across programs of the Federal Government that  
15 provide assistance or financing for shipyards or ship-  
16 building;

17 (3) employing commercially available tech-  
18 nologies and solutions in shipbuilding by the Federal  
19 Government;

20 (4) establishing a Federal Government-wide  
21 shipbuilding plan;

22 (5) expanding eligibility, improving efficiency,  
23 and streamlining program administration with re-  
24 spect to Federal funding and other incentives for  
25 shipbuilding, to align such funding and incentives

1 with modern program management and business  
2 practices; and

3 (6) promulgating, revising, or rescinding such  
4 regulations as may be necessary to prioritize ship-  
5 building in the United States and repairs at domes-  
6 tic shipyards.

7 (b) APPROPRIATE CONGRESSIONAL COMMITTEES  
8 DEFINED.—In this section, the term “appropriate con-  
9 gressional committees” means—

10 (1) the Committee on Armed Services and the  
11 Committee on Transportation and Infrastructure of  
12 the House of Representatives; and

13 (2) the Committee on Armed Services and the  
14 Committee on Commerce, Science, and Transpor-  
15 tation of the Senate.

# DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

## TITLE I—PROCUREMENT

### OTHER PROCUREMENT, ARMY

#### Items of Special Interest

#### Army Watercraft Recapitalization Strategy

The committee is aware of the Army's development of a long-awaited watercraft strategy intended to address an aging fleet through a combination of service-life extension efforts, limited procurement of new platforms, increased use of commercial and modified commercial vessels, and accelerated experimentation with autonomous systems. The committee remains concerned by the low percentage of mission ready watercraft hindering the Army's ability to meet mission requirements that reduces training opportunities for watercraft personnel. Further, the committee is concerned that the Army may not provide resourcing consistent with a realistic strategy to support the watercraft needed for operations in the Indo-Pacific area of responsibility. Therefore, the committee directs the Secretary of the Army to provide a briefing to the House Committee on Armed Services not later than February 1, 2027, on the Army's watercraft strategy. The briefing shall include, at a minimum, the following:

- (1) a clear explanation and concept of operations related to the recapitalization of the Army watercraft fleet that includes a discussion of the appropriate mix of both modern crewed vessels and unmanned systems;
- (2) the Army's strategy to meet Combatant Commander watercraft and joint logistics over-the-shore requirements, with particular emphasis on the Indo-Pacific region;
- (3) an estimate of the resources needed to address any capability shortfalls across the Future Years Defense Program;
- (4) a discussion of various acquisition models for the unmanned portion of the recapitalization plan to include both traditional procurement, and leasing opportunities including government owned-contractor operated and contractor owned-contractor operated models; and
- (5) how the Army plans to sustain these Army watercraft and resource training for Army personnel in the operation of these watercraft.

#### Unmanned Surface Vessels for Escort of Army Watercraft

The committee recognizes the increasing operational risk faced by Army watercraft conducting logistics, maneuver, and sustainment missions in joint, contested, and distributed operating environments. The committee notes that many Army watercraft possess limited organic defensive capabilities, increasing vulnerability to asymmetric threats, unmanned systems, and enemy fires.

The committee believes that manned Army watercraft may be aided by dedicated unmanned surface vessels (USV) providing enhanced force protection, early warning, sensing, and defensive effects while reducing risk to personnel. Therefore, the committee commends the Army's use of competitive experimentation and prototyping activities, including initiatives such as xTech Pacific, to evaluate autonomous watercraft and escort concepts. The committee further applauds the Army's emphasis on engaging U.S. industry to identify mature, proven autonomy solutions and encourages continued consideration of commercially available capabilities where appropriate.

To better understand the status of Army consideration of escort USVs, the committee directs the Secretary of the Army to submit a report to the House Committee on Armed Services not later than February 1, 2027. The report shall assess the feasibility, operational utility, and acquisition pathways for an indigenous USV escort capability for Army watercraft. The report shall include:

- (1) a description of operational mission sets and threat environments in which autonomous or semi-autonomous escort vessels could enhance the survivability of Army watercraft;
- (2) an assessment of existing and emerging autonomy technologies, including commercially available solutions from U.S. industry, relevant to escort, sensing, and force protection missions;
- (3) a summary of ongoing experimentation and prototyping efforts, including lessons learned from competitive events and demonstrations;
- (4) an evaluation of potential acquisition approaches to transition successful prototypes into operational use and, where appropriate, programs of record; and
- (5) an assessment of projected resource requirements and considerations for sustaining investment in autonomous escort capabilities in future budget submissions.

## SHIPBUILDING AND CONVERSION, NAVY

### Items of Special Interest

#### Advanced Manufacturing and Fabrication for the Submarine Industrial Base

The committee is aware that the submarine industrial base's efforts to scale up production is hampered by supply chain fragility. The committee notes that the industry depends on thousands of highly specialized components produced by limited networks of suppliers, many of which are single or sole source. Delays in small-part fabrication and material availability frequently create bottlenecks that

ripple across the entire production system, resulting in schedule delays and cost growth.

To better understand efforts to support the industrial base for small parts and items, the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than January 15, 2027 on its plan for addressing this particular challenge. The briefing should include, at a minimum, the following.

(1) a feasibility assessment on potential organic small parts manufacturing and fabrication capability;

(2) an update on any findings by the working group created in response to section 1843 of the fiscal year 2026 NDAA related to internal barriers to procurement;

(3) analysis regarding opportunities for incentivizing advanced manufacturing and other novel manufacturing techniques that still meet all standards and specifications; and

(3) information on potential reforms to the Navy stock number system that would enhance competition and ensure that qualified vendors can bid on parts solicitations.

#### Design for T-AH(X)

The committee is aware that the USNS Comfort and USNS Mercy have been in service for approximately forty years and are nearing the end of their service lives. The committee is concerned that without a replacement for these aging vessels, the Department of Defense may lose the ability to provide afloat mobile trauma, surgical, diagnostic, and supportive medical care in a contested environment as well as the ability to provide humanitarian assistance and disaster response services. The committee notes that in order to recapitalize the hospital ships in a timely and cost effective manner to ensure mobile hospitalization is available in forward locations, the Navy must consider existing designs and opportunities to reuse existing hull forms to the extent practicable. The committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services by December 1, 2026 on the availability of viable existing designs or alternative uses of existing hull forms to provide expeditious and affordable recapitalization of the hospital ship fleet. The report shall include, at a minimum, the following:

(1) a description of available designs that could be used or modified as the basis for the T-AH(X) hospital ship replacement to avoid a lengthy clean-sheet design process;

(2) information on the size, power, and speed requirements for such vessels and the extent to which the available designs in (1) meet this requirements;

(3) information on any existing, or easily modified, features for available designs that would facilitate operation in expeditionary environments such as roll-on roll-off capability; and

(4) an assessment on whether the use of a Vessel Contract Manager for procurement could further ensure that the T-AH(x) build schedule remains on budget and schedule.

### Domestic Production Capacity and Supply of Military-Specification Welding Wire in Shipbuilding

The committee understands the critical role that high-quality military-specification (MIL-Spec) welding wire plays in the construction of Navy submarines and surface ships, as well as other critical defense platforms, equipment, and additive manufacturing, particularly wire arc additive manufacturing, which is essential for advancing the nation's advanced manufacturing capabilities and resolving supply chain issues that hamper the defense industrial base.

However, the committee is concerned that growing demand for these materials (MIL-spec and corresponding welding wire products) will critically strain the planned expansions in Navy shipbuilding and other critical defense platforms. To reduce any dependencies on foreign sources and to build domestic industrial base resilience, the committee believes the Department of the Navy must further prioritize sustaining and expanding domestic MIL-spec welding wire production capacity.

Therefore, the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than December 30, 2026. The briefing shall include:

(1) an analysis of the projected volume of MIL-Spec welding wire needed for new construction, sustainment, and additively manufactured components, and the projected volume of domestic capacity to produce and supply it for the Fiscal Year 2027-2031 Future Years Defense Plan;

(2) identification of factors that could limit domestic capacity to produce and supply MIL-Spec welding wire, such as commercial sector demands that strain defense production, raw materials sourcing, near and long-term changes in production rates of Navy surface ships and submarines, and other relevant factors;

(3) a review of any current or planned efforts to address domestic capacity shortfalls or limitations in meeting the Navy's current or projected needs for welding wire, as well as any budget resources or authorities needed; and

(4) any other matters the Secretary deems necessary.

### Power and Propulsion Architecture for Large Surface Combatant

The committee recognizes that investing in a next generation large surface combatant ship to replace the guided missile cruiser is essential to the Navy's continued dominance in the maritime domain. The committee notes that developing the cruiser's replacement will require a significant long-term investment in both combatant capability and the power and propulsion system that will be required to ensure sufficient and adaptable power generation over the lifecycle of the vessel. The committee is aware that decisions related to propulsion system selection and

integration early in the process will greatly impact cost, schedule, sustainment, and modernization capacity throughout the ship's service life. Accordingly, the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services by December 30, 2026 on its strategy for developing power and propulsion architecture for its next large surface combatant. The briefing shall include the following:

(1) a discussion of the process the Navy is using to assess the next large surface combatant's power and propulsion requirements and the current estimate of the vessel's power and propulsion requirement;

(2) planning assumptions the Navy is using related to the amount of reserve power required to ensure the vessel remains relevant and capable of being modernized throughout its service life;

(3) how the Navy will seek to prioritize domestic design and manufacturing;

(4) an evaluation of whether the Navy can leverage DDG(X), or other recent propulsion investments, to reduce cost, schedule risk, and technical uncertainty; and

(5) an evaluation of domestic industrial-base capacity to design and manufacture the next large surface combatants power and propulsion system.

#### Submarine Construction Wage Enhancements and Impacts to Supply Chain

The committee is aware of the ongoing efforts to enhance wages for workers within the the submarine industrial base and is pleased by the positive impact they have had on workforce recruitment and retention. The committee is also aware of the complex ecosystem of subcontractors and component suppliers that is essential to the on time delivery of these complicated platforms. The committee notes that recruitment and retention issues within this supplier base can exacerbate supply chain fragility and lead to downstream delays that impact the delivery schedule. Accordingly, the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services by January 15, 2027, on its observations and proposed actions to ensure workforce stability in the submarine supply bases. The briefing should include, at a minimum, an assessment of wage competitiveness within the supply base with an emphasis on critical components and sole-source suppliers.

#### OTHER PROCUREMENT, NAVY

##### Items of Special Interest

##### Acquisition and Sustainment of Large Diameter Unmanned Undersea Vehicles

The committee recognizes the strategic importance of the Navy's Large Diameter Unmanned Undersea Vehicle (LDUUV) and Extra-Large Unmanned Undersea Vehicle (XLUUV) efforts to maintaining United States advantage in the undersea domain. The committee supports innovation and rapid prototyping,

including efforts advanced through the Defense Innovation Unit (DIU), but notes that long-term operational success will depend on whether these systems can be matured beyond prototyping efforts to be procured, sustained, and repeatedly deployed in support of combatant command requirements.

The committee is concerned that as LDUUV and XLUUV efforts transition from rapid development pathways into programs of record or sustained procurement, lifecycle readiness and industrial-base capacity may not be fully assessed as part of transition decisions. Accordingly, the committee directs the Secretary of the Navy to provide a report to the House Committee on Armed Services not later than June 1, 2027, on LDUUV and XLUUV procurement and sustainment planning. The report should include the following:

(1) an assessment of the industrial-base capacity to operate, maintain, and sustain LDUUV and XLUUV platforms across their expected lifecycle;

(2) a summary of how lifecycle sustainment, operational availability, and total ownership cost are incorporated into acquisition strategies, source-selection criteria, and DIU transition decisions;

(3) a description of how DIU-led prototype efforts for LDUUV or XLUUV platforms are evaluated for transition to sustained procurement, including any relevant key performance indicators used in such determinations;

(4) an analysis of existing domestic sustainment infrastructure for subsea systems and companies with experience operating autonomous systems at a relevant scale to fleet operations; and

(5) information on proposed actions to strengthen competition, improve transition pathways, and ensure enduring readiness outcomes as these systems scale beyond prototype development.

### Multi-Mission Reconnaissance Boat

The committee recognizes that the United States Marine Corps has an unfilled requirement for multi-mission reconnaissance boats as highlighted by a signed 2021 deliberate universal needs statement (D-UNS). The document highlights the Marine Corps' need for a platform to support organic littoral maneuver from the sea to support surveillance and reconnaissance as well as other combat functions with a reduced threat of adversary detection. The multi-mission reconnaissance boat is needed to extend the operational reach of commanders, while enabling Marine forces to execute littoral operations in contested environments and expeditionary advanced base operations concepts. As of 2026, the Marine Corps has not established a program of record that would fulfill this requirement.

To better understand efforts to meet this requirement, the committee directs the Secretary of the Navy, in coordination with the Commandant of the Marine Corps, to provide a briefing to the House Committee on Armed Services not later than March 1, 2027, that details how the Marine Corps will meet the requirement described in the signed 2021 Multi-Mission Reconnaissance Boat D-UNS.

## Payload Integration for Unmanned Surface Vessels

The committee is pleased with the progress the Navy has made in robotic and autonomous systems in the past year, prioritizing the fielding of these capabilities, especially through the Medium Unmanned Surface Vessel (MUSV) program. The committee has supported these efforts by ensuring that adequate foundational funding is available to support the development and testing of this technology. However, the committee believes the Navy must ensure minimum operational availability requirements for all ship systems in order to ensure the success of these programs. In order to ensure MUSV payload integration challenges are adequately addressed, the committee directs the Secretary of the Navy to provide a report to the House Committee on Armed Services not later than March 26, 2027 on recommended standards and qualifications that will be used to evaluate the performance of payload integration for the MUSV assets and other similar medium and large unmanned surface vessels. The report shall include information on the following:

- (1) current or planned efforts to conduct sea trials for at least 720 hours;
- (2) current or planned efforts to test at various sea states to include operational representative sea states and night/all weather conditions;
- (3) utilization of integrated modular payload bay of standard International Organization for Standardization (ISO) containers;
- (4) current or planned efforts to test a mix of Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) suites, passive and active sensors, and containerized effectors on a MUSV hull;
- (5) demonstrations of stable power, cooling, and data interfaces;
- (6) demonstrations of USV autonomous launch, recovery, refuels/recharge, and data-offload;
- (7) current or planned efforts to demonstrate launch of small USVs, Unmanned Underwater Vehicles (UUV), and Vertical Take-off and Land (VTOL) or fixed-wing Unmanned Aerial Systems (UAS) from deck-based or containerized handling systems; and
- (8) what the Navy's plan is for procuring, testing, and integrating mission payloads into USV platforms that require operational reliability at scale.

### Torpedo Tube Launch and Recovery Capability for Unmanned Undersea Vehicles

The committee recognizes the critical importance of advancing undersea warfare capabilities to maintain strategic and tactical superiority in maritime operations around the world. The deployment of Unmanned Undersea Vehicles (UUVs) from submarines using the autonomous Torpedo Tube Launch and Recovery (TTL&R) capability that has been repeatably demonstrated during Project Rattrap in real-world conditions, is a key capability that enhances the submarine fleet's operational flexibility and effectiveness. Rattrap TTL&R provides substantial benefits to national security by enabling submarines to deploy and recover UUVs

discreetly thereby extending their tactical reach well beyond their covert position. This capability enables our naval forces to conduct more productive undersea activities with substantially reduced risk to the submarine, the crew and the United States government. Further, the technologically advanced capability substantially increases operational reach without compromising submarine stealth characteristics.

The committee commends the Navy and the Defense Innovation Unit for their investments to add this critical capability to the undersea warfare strategy and directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than December 31, 2026. The briefing should include information on the Navy's plans to integrate UUVs with Rattrap TTL&R functionality across the entire submarine fleet, including resource requirements for the acquisition and sustainment of TTL&R capable UUVs through future budget requests.

### Unmanned Surface Vessel Industrial Base

The committee notes the growing operational requirements for unmanned surface vehicles (USVs) across multiple mission areas, including maritime security, intelligence, surveillance, reconnaissance, logistics, and force protection. The committee is concerned that a lack of consistent requirements signaling from the Department of the Navy may negatively impact the USV industrial base, resulting in loss of skilled labor, supplier fragility, and increased costs to reconstitute production capacity during periods of crisis or rapid demand growth. The committee notes that consistency in priorities, communication, and acquisition strategy can help stabilize the industrial base and ensure a competitive vendor base. The committee therefore directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than December 1, 2026, that details its plan for communicating demand, requirements, and acquisition strategy to the USV industrial base. At a minimum, this briefing should include consideration of the following:

- (1) how the Department's approach can contribute to sustaining a distributed, competitive production capacity for USVs;
- (2) the relative merits of various procurement models including contractor ownership or operation of USVs;
- (3) the impact of the Department's approach on critical suppliers, tooling, and workforce skills; and
- (4) how lessons learned from submarine and surface shipbuilding sectors can be applied to maintaining a robust USV industrial base.

### Use Cases for Autonomous Undersea Platforms

The committee recognizes the growing operational importance of autonomous or unmanned undersea vehicles (UUVs) as an important element of future naval operations, particularly in contested maritime environments. The

committee supports ongoing experimentation and prototyping efforts as well as the test and evaluation of commercially available platforms, and the consideration of these platforms in novel configurations and use cases. The committee recognizes the enormous potential of UUVs in naval operations. Therefore, the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services by January 15, 2027. The briefing shall include the following:

(1) an evaluation of current gaps in combatant command requirements including logistics and resupply, payload and effects delivery, long-range fires, and countermine operations, for which UUVs could provide a bridging solution or a permanent capability;

(2) an evaluation of how the Navy is seeking to maximize the integration of UUVs into joint and combined concepts of operations in contested maritime environments;

(3) a summary of commercially available platforms in all size categories that the Navy is considering for use in filling the capability gaps described in (1);

(4) a review of the size categories of UUVs and a determination of whether an “ultra large” UUV would provide advantageous characteristics such as increased resilience, endurance, range, survivability, and operational flexibility;

(5) an evaluation of commercially available endurance enabling propulsion technologies, including hybrid electric systems, that could provide benefit in filling the capability gaps described in (1);

(6) for UUVs with the potential to fill capability gaps described in (1), an assessment of scalability and manufacturability, including production and supply chain considerations; and

(7) an evaluation of deployment flexibility and lifecycle cost considerations for the above described UUVs, including an assessment of relative sustainment burden and cost per effect as compared to other potential methods of filling these capability gaps.

## V-22 Safety Investments

The committee remains committed to the critical role of the V-22 Osprey fleet in executing joint force missions across the Navy, Marine Corps, and Air Force. The committee notes the December 2025 reviews conducted by the Government Accountability Office (GAO) and Naval Air Systems Command (NAVAIR) and recognizes the importance of implementing data-driven corrective actions to improve reliability, maintainability, and overall mission capability of the fleet. As the Department of Defense continues to assess and enhance the safety, readiness, and sustainment performance of the V-22, the committee emphasizes that modernization and safety investments must be aligned with operational demands and informed by the recommendations outlined in these reviews. The committee also recognizes the Nacelle Improvement (NI) Program as a purpose-built upgrade, that reflects the data driven recommendations of both the GAO and NAVAIR reviews. The committee further commends broader modernization initiatives within

the V-22 Joint Program Office, including mid-life upgrade planning, implementation of triple-melt X-53 steel improvements in proprotor gearboxes, and future avionics modernization efforts intended to enhance long-term aircraft safety, performance, survivability, and sustainment. The committee directs the Chief of Naval Operations, in coordination with the Chief of Staff of the Air Force and the Commandant of the Marine Corps, to provide a report to the House Committee on Armed Services not later than March 27, 2027, detailing the investment plan for each variant of V-22 Osprey. The report shall include, but is not limited to:

- (1) identification of expected mid-life upgrade plans to improve overall readiness, safety, and lethality;
- (2) funding profiles and resources required to accelerate NI for Navy and Marine Corps aircraft, Osprey Drive System Safety and Health Information, and the procurement of triple-melt X-53 steel for the manufacture of gears used in V-22 proprotor gearboxes;
- (3) an assessment of potential upgrades for V-22 avionics systems;
- (4) identification of remaining technical, supply chain, or industrial base risks affecting V-22 readiness and safety; and
- (5) an analysis of increased and improved communication across the military services with regard to maintenance procedures.

## AIRCRAFT PROCUREMENT, AIR FORCE

### Items of Special Interest

#### Active Protection for Aerial Refueling Tankers

The committee understand air power projection depends on a limited fleet of aerial refueling tankers to support offensive operations at extended ranges. The vulnerability of strike packages during refueling operations is a key operational consideration as adversaries develop capabilities to counter air power projection. Successfully targeting a single tanker effectively defeats four or more tactical aircraft that depend on refueling and can quickly unwind mission planning assumptions, as well as follow-on operations. The committee is aware of nascent efforts by the Air Force to address this vulnerability with both active and passive self-protect capabilities but is concerned that development and fielding timelines are not keeping pace with the risk to the fleet. Maturation of these capabilities would support organic integration with Next Generation Air Refueling System designs and also has broader application to the fleet of High Value Airborne Assets (HVAA). The committee directs the Secretary of Air Force to provide a report to the congressional defense committees not later than December 1, 2026, assessing options to integrate active and passive protection systems on tankers. This report shall be submitted in an unclassified form but may include a classified annex. The report shall include:

- (1) a threat assessment for current and future refueling platforms, as well as other HVAA, required to support extended range offensive operations against near peers;
- (2) a summary of relevant operational simulations and the probability of mission success with the loss of tankers and other HVAA;
- (3) an assessment of current technology readiness levels and relative effectiveness to address the threats identified in (1) for active and passive self-protect systems and subsystems;
- (4) the current Air Force plan to mature and field such systems in a common configuration, as proposed in the fiscal year 2027 budget request; and
- (5) funding required, by year, to achieve an initial operational capability of a passive system and an active system by December 31, 2031.

### Autonomous Intratheater Airlift

The committee remains supportive of the Air Force's efforts to integrate commercially available aircraft with capabilities that enable remotely piloted or autonomous operations in contested environments. The committee directs the Secretary of the Air Force, in coordination with the Commander of United States Transportation Command, to submit a briefing to the House Committee on Armed Services not later than March 1, 2027. The briefing shall include at a minimum the following:

- (1) information on the Air Force's progress in assessing the potential for remotely piloted or autonomous aircraft to meet operational requirements for airlift capabilities in distributed and austere operational environments;
- (2) the anticipated schedule for testing commercially available aircraft with remotely piloted or autonomous capabilities for use in air mobility operations;
- (3) the manner in which data and operational experience from applicable demonstrations in the U.S. Indo-Pacific region shall be used to inform the tactics, techniques, procedures and associated technology requirements necessary for implementation of these systems;
- (4) identification of available federated systems that could enable sustainment and modernization of commercially available aircraft with remotely piloted or autonomous capabilities and integrate with existing mobility aircraft operated by the Air Force; and
- (5) to the extent to which these technologies hold promise for supplementing air mobility requirements and a proposed timeline for development of an acquisition strategy, including, but not limited, to the use of rapid fielding or a rapid prototyping acquisition.

### Increasing B-21 Program of Record

The committee is concerned that the current program of record for the B-21 Raider may be insufficient to meet the requirements of the National Defense Strategy. The committee notes the B-21 program of record of 100 aircraft remains

unchanged since it was established in 2015, despite significant changes in the security environment. The committee further recognizes that a broad range of national security leaders have called for expanding the B-21 program of record, including the Chair of the Congressional Commission on the Strategic Posture of the United States and the Commander of United States Strategic Command. The committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services by December 1, 2026, that assesses how many B-21 aircraft are necessary to meet the requirements of the National Defense Strategy for both nuclear and conventional missions and, to the extent that there are additional B-21s required, evaluates the appropriate time frame for the procurement of these aircraft. The report may be classified.

### Looking Glass-Next Procurement

The committee is aware of the continued restructuring of the airborne Nuclear Command, Control, and Communications enterprise, shifting responsibilities for the Navy's Take Charge and Move Out mission supporting Submarines and the Air Force's Looking Glass mission. The committee is also aware that the Air Force has started the procurement process for the Looking Glass mission's replacement. The committee directs the Secretary of the Air Force to provide a briefing to the House Committee on Armed Services not later than January 1, 2027, detailing the timing and requirements for selection of Looking Glass-Next. The briefing should include the following:

(1) an assessment of the feasibility and affordability of a business jet solution to host associated Looking Glass-Next aircrew and required hardware and software, including cost, schedule, and performance parameters;

(2) an assessment of platform dependencies, including seating and workstation capacity, power, cooling, internal aircraft space, and offboard line-of-sight and beyond-line-of-sight communications, information technology, and security infrastructure; and

(3) a recommended acquisition strategy and multi-year funding profile for a Looking Glass-Next program of record.

### Retained KC-135 Basing

The committee notes the requirement to maintain the total aircraft inventory for air refueling tanker aircraft pursuant to section 141 of the National Defense Authorization Act for Fiscal Year 2026 (Public Law 119-60) and encourages the Secretary of the Air Force to prioritize the distribution and retention of KC-135 aircraft to Air Force and Air National Guard installations located in strategic proximity to the United States Indo-Pacific Command area of responsibility. The committee encourages consideration of installations that support the nuclear alert mission, provide recurring aerial refueling for trans-pacific fighter movement, and demonstrate the ability to recruit and retain personnel above authorized end strength levels to meet the requirements associated with additional aircraft

inventory. The committee directs the Secretary of the Air Force to provide a briefing to the House Committee on Armed Services not later than February 1, 2027, on the Air Force's plan to base retained KC-135 aircraft.

## TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

### RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, NAVY

#### Items of Special Interest

##### Concepts to Scale a Commercial Logistics Fleet

The committee supports the continued development and transition of unmanned surface vessels to meet fleet requirements. As the commercial industry makes advances in the technology and builds their own unmanned logistics fleet, the committee believes that autonomous unmanned surface vessels can provide logistics support to meet combatant command operational requirements. However, this effort would require further standardization of maritime logistics networks and methods to manage intra-theater surface vessels. To better understand efforts to develop enabling technologies that support intra-theater unmanned surface vessel logistics operations, the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than March 1, 2027. The briefing should include the following:

- (1) an assessment of current unmanned surface vessel enabling technologies and their ability to manage logistics focused operations; and
- (2) a summary of intra-theater maritime logistics requirements and how they could be met by commercial logistics fleets of unmanned surface vessels.

##### Continuity in Communications Degraded Environments

The committee recognizes the increasing requirement for secure, mobile-enabled command and control platforms for distributed maritime operations. Particularly for continuity of operations in environments where traditional communications may be denied, degraded, or intermittently available. The committee notes that recent operations across the Indo-Pacific and Middle East have demonstrated how adversarial use of electronic warfare, cyber disruption, global positioning system interference, and physical infrastructure targeting can significantly impair centralized decision-making, situational awareness, and force coordination.

The committee is concerned that the Navy lacks a consistent, accredited framework for rapidly fielding commercially developed mobile command and control tools that are engineered for tactical resiliency, including offline operation, peer-to-peer synchronization, and reconstitution of command coherence when connectivity is restored. To better understand the effort to field secure, mobile-enabled command

and control software for communications denied or degraded environments, the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than March 1, 2027. The briefing should include the following:

(1) a description of commercially developed mobile command and control platforms currently demonstrated or fielded aboard carriers, surface vessels, and shore commands, including an assessment of each platform's demonstrated performance in communications denied or degraded environments and compatibility with Zero Trust architecture requirements;

(2) an assessment of the operational benefits of mobile-first platforms accessible on Government and personal mobile devices, including any reductions in administrative burden and improvements in small-unit readiness observed during demonstration efforts; and

(3) information on any efforts to accredit, procure, and scale commercially developed mobile command and control solutions with demonstrated performance in communications denied or degraded environments.

#### Digital Combat Console for Aegis Baseline Integration

The committee is concerned about critical capability gaps in low altitude air defense identified in multiple combatant command areas of responsibility. The committee notes that Group 1 through 3 unmanned aircraft systems present asymmetric threats that challenge legacy air defense systems optimized for high altitude aircraft and ballistic missiles. Traditional naval sensors and combat systems were not designed to detect, track, and engage small unmanned systems that operate beneath conventional radar coverage and move in coordinated formations. The committee encourages the Secretary of the Navy to evaluate and incorporate digital combat console capabilities that address low altitude air defense gaps within Aegis Combat System baseline configurations. To better understand current efforts to incorporate digital combat console capabilities, the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than December 30, 2026. The briefing shall include information on:

(1) integration of digital combat console capabilities with existing Aegis architecture to provide predictive threat awareness for low altitude unmanned aircraft systems without requiring dry dock hardware modifications;

(2) efforts to fuse sensor data from electro optical, infrared, acoustic, and radio frequency sources delivered through a unified operator display;

(3) efforts to track data for Group 1 through 3 unmanned aircraft systems at ranges exceeding 5 kilometers with update rates of 1 Hz or better and accuracy above 99 percent;

(4) development of capability to provide over the air software update capability to deployed fleet units;

- and
- (5) capability enhancements to expand the defensive engagement envelope;
  - (6) associated deployment timelines.

### Unmanned Surface Vessel Operability in the Arctic Ocean

The committee recognizes the strategic importance of the Arctic Ocean and the challenges that weather and conditions pose for military and civilian operations. With increased investment in unmanned enabling capabilities, the committee believes that unmanned surface vessels (USV) could augment manned Arctic operations. The committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than March 1, 2027, on the operability of unmanned surface vessels in the Arctic Ocean. The briefing should include:

- (1) an assessment of any current cold weather limitations of USV ability to maneuver, seakeeping ability, ability to navigate, maritime domain awareness capability, and communications capability needed to support survey, monitoring, rescue, and maritime patrol missions;

- (2) analysis of possible technological or design solutions for aspects such as hull, topside structure (including the mast), sensor suites, communications equipment, material choices, and changes in naval architecture for manned ships, and how they can be applied to USVs with no personnel accommodations or requirements;

- (3) information on any ongoing efforts to develop technical solutions through analysis, modeling and simulation, and rapid prototyping to advance novel design concepts and component hardening solutions; and

- (4) information on potential controlled experiments with component technologies that would be needed to support USV operations in cold weather conditions.

## TITLE X—GENERAL PROVISIONS

### ITEMS OF SPECIAL INTEREST

#### At-Sea Vertical Launch System Rearming

The committee recognizes the operational need for near-term, expeditionary approaches to sustain naval surface-combatant operations in contested maritime environments. The committee notes that uncertainty regarding the availability of future at-sea rearming capabilities underscores the importance of identifying and advancing feasible, near-term rearming and rapid-replenishment concepts that can be executed using existing platforms and infrastructure.

The committee is aware of ongoing Department of the Navy efforts to evaluate forward, at-sea vertical launch system rearming and rapid-replenishment

options and believes additional clarity is needed regarding implementation plans, resource requirements, and operational timelines. Therefore, the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than March 1, 2027, on the Department's plans for near-term forward, at-sea vertical launch system rearming and rapid-replenishment capabilities. The briefing shall include:

- (1) an overview of current requirements and operational needs for forward at-sea rearming;
- (2) a description of near-term rearming and rapid-replenishment concepts executable with existing platforms and infrastructure; and
- (3) an assessment of risks, barriers, and enabling investments required to accelerate implementation of these capabilities.

### Recapitalization of the Oceanographic Research Fleet

The committee notes that the Auxiliary General Oceanographic Research (AGOR) Global-class oceanographic research vessels are nearing the end of their service lives. These vessels are vital to U.S. Navy research objectives and inform our understanding of the world's oceans which is needed to control the maritime domain. Because of this critical mission, the committee believes there is a need to increase research vessel availability through recapitalization. An overall fleet recapitalization strategy for the oceanographic research fleet is essential to maintain a balanced research fleet that meets growing national and scientific demands. Therefore, the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than March 1, 2027, on the strategy to complete design and construction of new AGOR Global-class research ships. The briefing should include the following:

- (1) information on efforts to maintain the operational capabilities of the AGOR Global-class fleet until they are replaced;
- (2) any limitations of the current AGOR Global-class fleet in the Arctic region;
- (3) a feasibility assessment of converting current civilian or military operational ship designs to meet the Global-class research vessel missions; and
- (4) an assessment of funding required to operate and recapitalize the Navy's oceanographic research fleet.
