9 ongoing oversight projects related to United States
10 assistance to Ukraine across the Federal govern-
11 ment. The plan—available to Congress and the pub-
12 lic on the website of the Inspector General of the
13 Department of Defense—also details a comprehen-
14 sive set of oversight projects that Working Group
15 partners plan to conduct throughout the year, and
16 will continue to be updated as plans evolve to ad-
17 dress changing circumstances and requirements. In
18 creating the plan, the Offices of Inspector General of
19 the Department of Defense, the Department of
20 State, and the United States Agency for Inter-
21 national Development, along with other Federal
22 agency partners, identified strategic oversight areas
23 and selected projects to ensure accountability across
24 the full range of United States assistance efforts.

1 (5) On March 21, 2023, the Committee on
2 Armed Services of the House of Representatives held
3 a 9(c) briefing for cleared personal office staff in
4 which all of the Deputy Inspectors General of the
5 Department of Defense provided an update on their
6 oversight work and answered questions from member
7 office staff.

8 (6) The Inspector General for the Department
9 of Defense has personally committed to individually
10 brief committee members on his work and to appear
11 for additional testimony if requested.

12 (7) On March 27, 2023, the Department of De-
13 fense Inspector General, along with the Inspectors
14 General of the Department of State and United
15 States Agency for International Development sub-
16 mitted reports on their ongoing Ukraine Oversight
17 efforts, as required by section 1247 of the National
18 Defense Authorization Act for Fiscal Year 2023
19 (Public Law 117–263) and section 1707 of the Con-
20 solidated Appropriations Act, 2023 (Public Law
21 117–328).

22 (8) On March 29, 2023, the Committee on For-
23 eign Affairs of the House of Representatives held an
24 open hearing with all three Inspectors General of the
25 Department of Defense, Department of State and

1 United States Agency for International Development
2 to discuss the ongoing oversight of the U.S. response
3 to Russia's unprovoked war of aggression against
4 Ukraine.

5 (9) Congress appropriated \$42,000,000 to the
6 Inspectors General of the Department of Defense,
7 the Department of State, and the United States
8 Agency for International Development, as well as to
9 the Comptroller General of the United States, to
10 conduct oversight of the Ukraine response. These
11 funds support much of the Federal oversight com-
12 munity's Ukraine response-related work, providing
13 the basis for audits, inspections, reviews, and inves-
14 tigations of the Federal Government's Ukraine re-
15 sponse activities. The Inspector General of the De-
16 partment of Defense has used funds in excess of the
17 president's budget request provided by congress to
18 hire additional personnel and travel to Ukraine and
19 surrounding areas to conduct oversight.

20 (b) SENSE OF CONGRESS.—It is the sense of Con-
21 gress that—

22 (1) continued oversight and transparency for
23 United States security assistance made available to
24 Ukraine is essential to ensure effective and sus-
25 tained support;

1 (2) the executive branch has established the
2 interagency Ukraine Oversight Working Group,
3 which focuses on conducting comprehensive over-
4 sight, and issued the interagency U.S. Plan to
5 Counter Illicit Diversion of Certain Advanced Con-
6 ventional Weapons in Eastern Europe, a whole-of-
7 government effort to advance accountability and
8 end-use monitoring of weapons provided in response
9 to the Ukraine crisis, and continued attention and
10 regular briefings to relevant congressional oversight
11 committees on such efforts is imperative;

12 (3) each United States department and agency
13 providing or facilitating assistance to Ukraine should
14 continue to implement and institutionalize appro-
15 priate transparency, accountability, and end-use
16 monitoring measures, including exploring creative
17 approaches to overcoming the challenges associated
18 with delivering assistance during an active armed
19 conflict, as is detailed in the interagency Plan;

20 (4) Inspectors General must continue to carry
21 out comprehensive oversight and conduct reviews,
22 audits, investigations, and inspections of United
23 States support and activities carried out in response
24 to Russia's further invasion of Ukraine, and provide

1 regular briefings to the relevant congressional com-
2 mittees on their findings;

3 (5) the United States and its allies and part-
4 ners should continue to support Ukrainian anti-cor-
5 ruption institutions and platforms, including the Na-
6 tional Agency for Corruption Prevention, the Na-
7 tional Anti-Corruption Bureau of Ukraine, and the
8 Specialized Anti-Corruption Prosecutor's Office, in
9 their work to ensure effective assistance delivery and
10 prevent incidents of waste, fraud, and abuse; and

11 (6) Ukrainian authorities should also continue
12 to establish new transparency, accountability, and
13 end-use monitoring initiatives both independently
14 and in partnership with relevant United States de-
15 partments and agencies and other international
16 partners, and the United States should continue to
17 work with counterparts in Ukraine and other coun-
18 tries supporting their efforts to further mutual ef-
19 forts to strengthen and institutionalize account-
20 ability measures and mechanisms.

21 (c) REPORT.—

22 (1) IN GENERAL.—Not later than April 1,
23 2024, and every 180 days thereafter, the Inspector
24 General of the Department of Defense, in conjunc-
25 tion with the Inspector General of the Department

1 of State and the Inspector General of the United
2 States Agency for International Development and in
3 consultation with other Inspectors General as appro-
4 priate, shall submit an update to the report required
5 under section 1247 of the National Defense Author-
6 ization Act for Fiscal Year 2023 as well as com-
7 pleted oversight reports issued in accordance with
8 the Joint Strategic Oversight Plan described in sub-
9 section (a)(5).

10 (2) MATTERS TO BE INCLUDED.—The report
11 updates required by this subsection shall include at
12 a minimum:

14 oversight frameworks being used and whether
15 there are any gaps in oversight over the activi-
16 ties and funds for assistance to Ukraine.

17 (B) A notification of any failures by
18 United States, bilateral, or multilateral organi-
19 zations to work with such Inspectors General in
20 a timely and transparent manner.

21 (C) An updated description of the footprint
22 in Europe of such Inspectors General for pur-
23 poses of oversight of assistance to Ukraine, in-
24 cluding presence and access in Ukraine.

1 (D) A description of any known incidents
2 of the misuse of assistance to Ukraine, includ-
3 ing incidents of waste, fraud, abuse, diversion,
4 or corruption.

5 (E) Any lessons learned from the manner
6 in which oversight over assistance to Ukraine
7 has been conducted.

8 (F) Any findings or recommendations with
9 respect to assistance to Ukraine.

10 (G) A list of acquisitions in which the De-
11 partment of Defense used sole source con-
12 tracting authority.

13 (H) Any legislative or budgetary assistance
14 to better help conduct oversight of assistance to
15 Ukraine.

16 (d) DEFINITION.—In this section, the term “appro-
17 priate congressional committees” means—

18 (1) the congressional defense committees;

19 (2) the Committee on Foreign Affairs and the
20 Committee on Oversight and Accountability of the
21 House of Representatives; and

22 (3) the Committee on Foreign Relations and
23 the Committee on Homeland Security and Govern-
24 mental Affairs of the Senate.

3 **SEC. 1231. [LOG 77500] STATEMENT OF POLICY RELATING**
4 **TO NATO-RUSSIA FOUNDING ACT.**

5 It is the policy of the United States that the agree-
6 ment titled “Founding Act on Mutual Relations, Coopera-
7 tion and Security between NATO and the Russian Federa-
8 tion”, done at Paris on May 27, 1997 (commonly referred
9 to as the “NATO-Russia Founding Act”), does not—

10 (1) prohibit the establishment of a permanent
11 presence of the United States Armed Forces in Eu-
12 rope; or

13 (2) constrain in any manner the deployment of
14 United States Armed Forces or North Atlantic
15 Treaty Organization (NATO) forces.

1 **SEC. 1232. [LOG 77806] STRATEGY TO DELAY, DISRUPT, AND**
2 **DEGRADE ROSATOM'S PROLIFERATION AC-**
3 **TIVITIES AND OTHER REVENUE STREAMS.**

4 (a) FINDINGS.—Congress finds the following:

5 (1) Russia's state-owned nuclear energy cor-
6 poration, Rosatom, is providing the People's Repub-
7 lic of China highly enriched uranium for Chinese
8 Communist Party fast-breeder reactors.

9 (2) The Department of Defense's 2022 report
10 to Congress on the Military and Security Develop-
11 ments Involving the People's Republic of China
12 noted the key role that increased weapons-grade plu-
13 tonium production is key to China's nuclear pro-
14 gram, stating: "The PRC is also supporting this ex-
15 pansion by increasing its capacity to produce and
16 separate plutonium by constructing fast breeder re-
17 actors and reprocessing facilities.". The report also
18 cites the CFR-600 reactors and notes that each re-
19 actor will be capable of producing "enough pluto-
20 nium for dozens of nuclear warheads annually".
21 This buildup puts China in violation of Article VI of
22 the Treaty on the Non-Proliferation of Nuclear
23 Weapons, requiring states to make good-faith efforts
24 to cease an arms race and to engage in good-faith
25 arms control negotiations.

1 (3) There are also credible reports that “Rus-
2 sia’s state nuclear power conglomerate has been
3 working to supply the Russian arms industry with
4 components, technology and raw materials for mis-
5 sile(s)”. Specifically, a letter from a Rosatom de-
6 partment chief, dated October 2022, shows Rosatom
7 offering to provide goods to Russian military units
8 and to Russian weapons manufacturers that are
9 under sanctions.

10 (4) The United States Government has taken
11 steps against Rosatom, such as sanctioning three
12 Rosatom subsidiaries on February 24, 2023, and
13 speaking out publicly against Rosatom’s behavior.

14 (5) Assistant Secretary of Defense for Space
15 Policy, Dr. John F. Plumb, testified before the
16 House Armed Services Subcommittee on Strategic
17 Forces on March 8, 2023, that “It’s very troubling
18 to see Russia and China cooperating on this
19 . . .They may have talking points around it, but
20 there’s no getting around the fact that breeder reac-
21 tors are plutonium, and plutonium is for weapons.
22 So, I think the [Defense] Department is concerned.
23 And of course, it matches our concerns about Chi-
24 na’s increased expansion of its nuclear forces as

1 well, because you need more plutonium for more
2 weapons.”.

3 (b) STRATEGY.—Not later than 90 days after the
4 date of the enactment of this Act, the Secretary of De-
5 fense, in coordination with the Secretary of State, the Sec-
6 retary of the Treasury, and the Secretary of Energy, with
7 the assistance of the Director of National Intelligence,
8 shall submit to the appropriate congressional committees
9 a strategy to delay, disrupt, and degrade Rosatom’s and
10 other Russian state-owned entities’ proliferation activities
11 and other revenue streams that directly fund Russia’s
12 military forces.

13 (c) APPROPRIATE CONGRESSIONAL COMMITTEES DE-
14 FINED.—In subsection (b), the term “appropriate congres-
15 sional committees” means—

16 (1) the Committee on Armed Services, the
17 Committee on Foreign Affairs, the Committee on
18 Energy and Commerce, the Committee on Financial
19 Services, and the Permanent Select Committee on
20 Intelligence of the House of Representatives; and

21 (2) the Committee on Armed Services, the
22 Committee on Foreign Affairs, the Committee on
23 Energy and Natural Resources, the Committee on
24 Banking, Housing, and Urban Affairs, and the Se-
25 lect Committee on Intelligence of the Senate.

1 **SEC. 1233. [LOG 77624] BALTIC SECURITY INITIATIVE.**

2 (a) SENSE OF CONGRESS.—It is the sense of Con-
3 gress that—

4 (1) supporting and strengthening the security
5 of the Baltic states of Estonia, Latvia, and Lith-
6 uania is in the national security interests of the
7 United States;

8 (2) the United States and the Baltic states are
9 leaders in the mission of defending independence
10 and democracy from aggression and in promoting
11 stability and security within the North Atlantic
12 Treaty Organization (NATO), with non-NATO part-
13 ners, and with other international organizations such
14 as the European Union;

15 (3) the Baltic states are model NATO allies in
16 terms of burden sharing, investing over 2 percent of
17 their gross domestic product on defense expenditure,
18 allocating over 20 percent of their defense budgets
19 on capital modernization, matching security assist-
20 ance from the United States, frequently deploying
21 their forces around the world in support of allied
22 and United States objectives, and sharing diplo-
23 matic, technical, military, and analytical expertise on
24 defense and security matters;

25 (4) the United States should pursue consistent
26 efforts focused on defense and security assistance,

1 coordination, and planning, such as the United
2 States Baltic Dialogue, designed to ensure the con-
3 tinued security of the Baltic states and on deterring
4 current and future challenges to the national sov-
5 ereignty of United States allies and partners in the
6 Baltic region;

7 (5) the Secretary of Defense and Secretary of
8 State should seek to require matching funds from
9 those Baltic states in amounts commensurate with
10 amounts provided.

11 (b) STRATEGY.—Not later than one year after the
12 date of the enactment of this Act, the Secretary of De-
13 fense, with the concurrence of the Secretary of State, shall
14 submit to the appropriate congressional committees a re-
15 port setting forth a strategy to deepen security coopera-
16 tion with the Baltic states of Estonia, Latvia, and Lith-
17 uania to—

18 (1) achieve United States national security
19 strategy objectives;

20 (2) enhance regional planning and cooperation
21 among Baltic states, particularly with respect to
22 long-term regional capability projects; and

23 (3) enhance the Baltic states' defenses and re-
24 siliency.

1 (c) APPROPRIATE CONGRESSIONAL COMMITTEES DE-
2 FINED.—In this section, the term “appropriate congres-
3 sional committees” means—

4 (1) the Committee on Armed Services and the
5 Committee on Foreign Affairs of the House of Rep-
6 resentatives; and

7 (2) the Committee on Armed Services and the
8 Committee on Foreign Relations of the Senate.

6 (a) EXTENSION OF INITIATIVE.—Subsection (c) of
7 section 1251 of the William M. (Mac) Thornberry Na-
8 tional Defense Authorization Act for Fiscal Year 2021 (10
9 U.S.C. 113 note) is amended—

10 (1) by striking “the National Defense Author-
11 ization Act for Fiscal Year 2023” and inserting “the
12 National Defense Authorization Act for Fiscal Year
13 2024”; and

14 (2) by striking “fiscal year 2023” and inserting
15 “fiscal year 2024”.

16 (b) EXTENSION OF REPORT AND BRIEFINGS.—Sub-
17 section (d) of such section is amended—

18 (1) in paragraph (1)(A), by striking “fiscal
19 years 2024 and 2025” and inserting “fiscal years
20 2025 and 2026”; and

21 (2) in paragraph (2), by striking “fiscal years
22 2023 and 2024” each place it appears and inserting
23 “fiscal years 2025 and 2026”.

1 (c) EXTENSION OF PLAN.—Subsection (e) of such
2 section is amended by striking “fiscal years 2023 and
3 2024” and inserting “fiscal years 2025 and 2026”.

1 **SEC. 1302. [LOG 77713] SENSE OF CONGRESS ON SOUTH**
2 **KOREA.**

3 It is the sense of Congress that the Secretary of De-
4 fense should reinforce the United States alliance with the
5 Republic of Korea, including by maintaining the presence
6 of approximately 28,500 members of the United States
7 Armed Forces deployed to the country and affirming the
8 United States commitment to extended deterrence using
9 the full range of United States defense capabilities, con-
10 sistent with the Mutual Defense Treaty Between the
11 United States and the Republic of Korea, signed at Wash-
12 ington, October 1, 1953, in support of the shared objective
13 of a peaceful and stable Korean Peninsula.

1 **SEC. 1303. [LOG 77760] SENSE OF CONGRESS ON TAIWAN**
2 **DEFENSE RELATIONS.**

3 It is the sense of Congress that—

4 (1) the Taiwan Relations Act (Public Law 96–
5 8; 22 U.S.C. et seq.) and the Six Assurances pro-
6 vided by the United States to Taiwan in July 1982
7 are the foundation for United States-Taiwan rela-
8 tions;

9 (2) as set forth in the Taiwan Relations Act,
10 the United States decision to establish diplomatic re-
11 lations with the People’s Republic of China rests
12 upon the expectation that the future of Taiwan will
13 be determined by peaceful means, and that any ef-
14 fort to determine the future of Taiwan by other than
15 peaceful means, including boycotts and embargoes,
16 is of grave concern to the United States;

17 (3) the increasingly coercive and aggressive be-
18 havior of the People’s Republic of China toward Tai-
19 wan is contrary to the expectation of the peaceful
20 resolution of the future of Taiwan;

21 (4) as set forth in the Taiwan Relations Act,
22 the capacity to resist any resort to force or other
23 forms of coercion that would jeopardize the security,
24 or the social or economic system, of the people on
25 Taiwan should be maintained;

1 (5) the United States should continue to sup-
2 port the development of capable, ready, and modern
3 defense forces necessary for Taiwan to maintain suf-
4 ficient defensive capabilities, including by—

5 (A) supporting acquisition by Taiwan of
6 defense articles and services through foreign
7 military sales, direct commercial sales, and in-
8 dustrial cooperation, with an emphasis on capa-
9 bilities that support an asymmetric strategy;

10 (B) ensuring timely review of and response
11 to requests of Taiwan for defense articles and
12 services;

13 (C) conducting practical training and mili-
14 tary exercises with Taiwan that enable Taiwan
15 to maintain sufficient defensive capabilities, as
16 described in the Taiwan Relations Act;

17 (D) exchanges between defense officials
18 and officers of the United States and Taiwan at
19 the strategic, policy, and functional levels, con-
20 sistent with the Taiwan Travel Act (Public Law
21 115–135; 132 Stat. 341), especially for the pur-
22 poses of—

23 (i) enhancing cooperation on defense
24 planning;

1 (ii) improving the interoperability of
2 the military forces of the United States
3 and Taiwan; and

4 (iii) improving the reserve force of
5 Taiwan;

6 (E) cooperating with Taiwan to improve its
7 ability to employ military capabilities in asym-
8 metric ways, as described in the Taiwan Rela-
9 tions Act; and

10 (F) expanding cooperation in humanitarian
11 assistance and disaster relief; and

12 (6) the United States should increase its sup-
13 port to a free and open society in the face of aggres-
14 sive efforts by the Government of the People's Re-
15 public of China to curtail or influence the free exer-
16 cise of rights and democratic franchise.

3 (a) PROHIBITION ON PROCUREMENT PENDING CER-
4 TIFICATION REGARDING COMMERCIAL PROVIDERS.—The
5 Secretary of the Air Force may not issue a contract for
6 the procurement of a WGS-12 satellite until the Assistant
7 Secretary of the Air Force for Space Acquisitions and In-

9 certification that the requirements established by the De-
10 partment for the primary payload for the WGS-12 satellite
11 cannot be met by a commercial provider.

12 (b) PROHIBITION ON OPERATION OR LAUNCH.—

1 **SEC. 1606 [Log 77386]. LIMITATION ON USE OF FUNDS PEND-**
2 **ING SUBMISSION OF CERTAIN REPORTS ON**
3 **SPACE POLICY.**

4 (a) FINDINGS.—Congress makes the following find-
5 ings:

6 (1) Congress established the office of Assistant
7 Secretary of Defense for Space Policy in 2019 at the
8 same time as the Space Force was established.

9 (2) Despite elevating the position, the office has
10 repeatedly not responded to mandates by Congress
11 for unclassified reports on space policy topics.

12 (3) The threats to and from space by China
13 and Russia have only increased since the establish-
14 ment of the Assistant Secretary of Defense for
15 Space Policy and the Space Force.

16 (4) The Secretary of Defense has yet to submit
17 to the congressional defense committees the report
18 required by section 1609(c) of the National Defense
19 Authorization Act for Fiscal Year 2022 (Public Law
20 117–81; 10 U.S.C. 2271 note) or the report required
21 by section 1611(c)(1) of such Act.

22 (b) SENSE OF CONGRESS.—It is the sense of Con-
23 gress that—

24 (1) it is concerning that the office of the Assist-
25 ant Secretary of Defense for Space Policy has been
26 given responsibility for issues not directly related to

1 space policy, leading to the inability to complete the
2 primary duty of the office.

3 (2) The United States should have a well-estab-
4 lished and thoughtful national security space policy
5 that can be discussed and debated in unclassified
6 settings.

7 (3) Such a policy should be developed in con-
8 junction with, and taking into consideration, other
9 relevant national strategy documents, including re-
10 views regarding nuclear and missile defense.

11 (c) LIMITATION.—Of the funds authorized to be ap-
12 propriated by this Act or otherwise made available for fis-
13 cal year 2024 for the Department of Defense for travel
14 by the Assistant Secretary of Defense for Space Policy,
15 not more than 90 percent may be obligated or expended
16 until the Secretary of Defense submits both of the fol-
17 lowing reports:

18 (1) The report on classified programs managed
19 under the authority of the Space Force required by
20 section 1609(c) of the National Defense Authoriza-
21 tion Act for Fiscal Year 2022 (Public Law 117–81;
22 10 U.S.C. 2271 note).

23 (2) The report on the review of the space policy
24 of the Department of Defense required by section
25 1611(e)(1) of such Act.

1 (d) UPDATES OF SPACE POLICY REPORT.—Section
2 1611(c) of the National Defense Authorization Act for
3 Fiscal Year 2022 (Public Law 117–81) is amended by
4 striking paragraph (2) and inserting the following new
5 paragraph (2):

6 “(2) UPDATES.—The Secretary shall provide
7 for updates to the assessments, analyses, and eval-
8 uations carried out pursuant to such review in con-
9 junction with other national strategy documents, in-
10 cluding reviews regarding nuclear and missile de-
11 fense.”.

1 **SEC. 1607 [Log 77670]. NATIONAL SECURITY SPACE LAUNCH**
2 **PROGRAM PHASE THREE ACQUISITION.**

3 (a) SENSE OF CONGRESS.—It is the sense of Con-
4 gress that—

5 (1) the United States Space Force must con-
6 tinue to ensure assured access to space through
7 phase three of the national security space launch
8 program;

9 (2) the acquisition strategy covered in the brief-
10 ing provided to the Committee on Armed Services
11 and the Permanent Select Committee on Intelligence
12 of the House of Representatives in April 2023—

13 (A) includes a dual-lane approach that is
14 consistent with increasing competition for
15 launch services needed by the future national
16 security space architecture; and

17 (B) balances introducing new launch pro-
18 viders and systems with meeting all required
19 missions during the planned ordering period;

20 (3) as the Secretary of Defense, in consultation
21 with the Director of National Intelligence, completes
22 the final request for proposals, it should consider in-
23 cluding funding for launch services support for lane
24 1 missions that require specific national security
25 space launch requirements, such as the Global Posi-

1 tioning Services IIF satellites that are intended to
2 be included in the ordering period; and

3 (4) the Department should ensure that objective
4 readiness requirements are met by launch service
5 providers before basic award in either lane.

6 (b) PHASE THREE ACQUISITION STRATEGY.—In
7 competitively awarding and executing the phase three ac-
8 quisition strategy, the Secretary of the Air Force, in co-
9 ordination with the Under Secretary of Defense for Acqui-
10 sition and Sustainment, shall—

11 (1) maximize competition, to the extent prac-
12 ticable, for both lanes 1 and 2, as described in the
13 briefing on the acquisition strategy provided to the
14 Committee on Armed Services of the House of Rep-
15 resentatives in April 2023;

16 (2) use lane 1 task or delivery order contracts
17 to—

18 (A) launch national security space pay-
19 loads that require launch systems capable of
20 lifting a minimum of 20,000 pounds mass to
21 100 nautical miles; and

22 (B) provide opportunities for new and
23 emerging launch providers or systems to com-
24 pete for national security space launch missions
25 as such providers and systems become ready;

1 (3) use lane 2, firm fixed-price indefinite deliv-
2 ery requirements contracts to—

3 (A) award contracts to national security
4 space launch providers with launch systems
5 that are capable of meeting all national security
6 space launch design reference orbits; and

7 (B) launch national security space low-risk
8 tolerant payloads that require full mission as-
9 surance that—

10 (i) are performed by the national se-
11 curity space launch program or

12 (ii) have unique national security
13 space mission requirements; and

14 (4) in the case of any new or emerging national
15 security space launch-class mission that is author-
16 ized for any of fiscal years 2025 through 2029 and
17 is not identified in the phase three final request for
18 proposals reference manifest contract—

19 (A) assign such mission to the lane 1 con-
20 tract referred to in paragraph (2); or

21 (B) assign such mission to the lane 2 con-
22 tract referred to in paragraph (3), if the Sec-
23 retary determines that such a mission is has
24 unique national security space or other Govern-

1 ment requirements that could not be met if the
2 mission were assigned to the lane 1 contract.

3 (c) NOTIFICATION REQUIREMENT.—If the Secretary
4 assigns a mission to the lane 2 contract pursuant to sub-
5 section (b)(4)(B), the Secretary shall submit to the con-
6 gressional defense committees, the Permanent Select Com-
7 mittee on Intelligence of the House of Representatives,
8 and the Select Committee on Intelligence of the Senate
9 notification of such assignment and the reason for such
10 assignment.

11 (d) PHASE THREE ACQUISITION STRATEGY DE-
12 FINED.—In this section, the term “phase three acquisition
13 strategy” means the process through which the Secretary
14 of the Air Force—

15 (1) enters into phase three contracts during fis-
16 cal year 2025;

17 (2) orders launch missions during fiscal years
18 2025 through 2029; and

19 (3) carries out such launches under the national
20 security space launch program.

DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

TITLE I—PROCUREMENT

OTHER PROCUREMENT, ARMY

Items of Special Interest

Modernization of armored brigade combat teams

The committee is eager to learn the progress the Department of the Army is making on its efforts to modernize active armored brigade combat teams (ABCTs) in accordance with ABCT 2030, as well as outline the action plan to complete these modernization efforts.

Accordingly, the committee directs the Assistant Secretary of the Army for Acquisition, Logistics, and Technology, in coordination with the Commanding General of Army Futures Command, to submit a report to the congressional defense committees not later than March 1, 2024, that details the Army's progress incorporating the Joint Light Tactical Vehicle to the fleet, training exercises utilizing the M109A7 Paladin howitzer, fielding the M2A4 Bradley Fighting Vehicle, testing the Armored Multi-Purpose Vehicle, and transitioning the fleet from the M1A1 Abrams tank to the M1A2 Sepv3 Abrams tank.

AIRCRAFT PROCUREMENT, AIR FORCE

Items of Special Interest

C-40 aircraft

The committee supports the added funding to the C-40 aircraft. The committee is concerned about the aging fleet given the operational demands placed on the Active Duty, Air National Guard, and Air Force Reserve C-40 aircraft. The committee also understands that due to economic impacts on the commercial airline market, there may be affordable inventory that could be converted at a low cost to ensure aircraft availability for Government senior leaders, including combatant commanders. Therefore, the committee directs the Secretary of Air Force to submit a report to the congressional defense committees not later than October 1, 2023, that includes a market survey of available aircraft that could be modified for executive airlift, the total cost impact of such an action, and a recommendation on the future fleet size for all C-40 aircraft.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY

Items of Special Interest

Army Pathfinder program

The committee recognizes the critical role that soldiers play in the early identification of technological opportunities and threats relevant to future capability development. The committee supports the Army's efforts to implement programs like the Pathfinder-Air Assault program at the Army Research Laboratory which promote bottom-up innovation from the force as a basis for advanced soldier lethality capability research and development.

Therefore, the committee directs the Secretary of the Army to provide a briefing to the House Committee on Armed Services not later than December 1, 2023, on the Army's Pathfinder-Air Assault Program. The briefing should include:

- (1) outcomes from the Pathfinder-Air Assault program and impact of the program on soldier lethality technology development; and
- (2) the Army's strategy for incorporating the Pathfinder program into the budget request in future appropriations cycles.

Additionally, the committee recommends an increase of \$2.5 million in PE 0602143A for the Pathfinder program.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, AIR FORCE

Items of Special Interest

Air Force Agility Prime

The budget request contained \$83.3 million in PE 0604009F for the AFWERX Prime program.

The committee commends the Air Force Agility Prime program for its work to accelerate the investment and deployment of low-cost, safe, and reliable electric vertical take-off and landing (eVTOL) technologies for light mobility missions. Agility Prime has been successfully leveraging eVTOL capabilities that support mobility and sustainment in contested environments to enable agile, lower-cost, distributed logistics; humanitarian operations; disaster response operations; distinguished visitor transport; and communications capabilities. The committee understands the importance of future Agility Prime initiatives, which will leverage commercial technology and investment to advance the fielding of dual-use eVTOL capabilities, which will in turn bolster U.S. national security and economic leadership.

However, the committee is concerned that the Air Force does not have a sufficient plan for the transition, acquisition, and fielding of these eVTOL systems into the force in the near term.

Therefore, the committee directs the Secretary of the Air Force to submit a report to the House Committee on Armed Services not later than March 1, 2024, on

the Air Force's future acquisition strategy for eVTOL systems. The report should include the following elements:

- (1) the status of current and future eVTOL research and development programs;
- (2) plans and potential locations for testing eVTOLs with dual-use applications;
- (3) a summary of acquisition efforts to include planned and programmed funding to transition these capabilities from Agility Prime to fielded capabilities across the military services;
- (4) planned operational use cases for these aircraft across the military services;
- (5) issues and problems experienced or anticipated in the effort to acquire eVTOL aircraft at scale for operational use in the Air Force and other military services; and
- (6) any recommendations for needed changes to existing authorities or new authorities required to streamline the fielding and acquisition of eVTOL aircraft in the Department of Defense.

The committee recommends an increase of \$5.0 million in PE 0604009F for the Agility Prime program.

Counter directed energy weapon executive agent

The committee is concerned about the threat that adversarial directed energy weapons pose to U.S. weapon systems and service members. These weapons can inhibit and damage critical U.S. military systems and sensors, rendering them inoperable while also causing personal harm or injury to U.S. military personnel. The committee believes concerted investment and focus is needed in forward-fitting military systems with the necessary protections to counter adversarial directed energy weapon capabilities. Ensuring counter directed energy weapon (CDEW) protections are included at the onset of capability research, development, and production is vital to ensure the survivability and resiliency of U.S. weapon systems, protect our service members, and mitigate the costs associated with retrofitting existing military equipment. CDEW protections should not be an afterthought in weapon system development.

The committee understands the Air Force Research Laboratory has invested in needed research and development for CDEW protections to address specific capability gaps. The committee is concerned, however, that given the cross-cutting, and often classified, nature of CDEW challenges, adequate focus and prioritization of this issue has not extended across the Department of Defense and military services.

Therefore, the committee directs the Under Secretary of Defense for Research and Engineering, in coordination with the Secretaries of the military services, to submit a report to the House Committee on Armed Services not later than February 1, 2024, on the Department of Defense's strategy for CDEW research

and development and plans to integrate needed CDEW protections on future and current weapon systems. The report shall include, but not be limited to:

(1) an overview of how CDEW capabilities are developed, coordinated, and integrated into weapon system development across the military services and Department of Defense; and

(2) any organizational changes needed to ensure adequate prioritization and funding of CDEW technology development, including an assessment of the need for a dedicated CDEW Executive Agent at the Office of the Secretary of Defense to ensure unified advocacy for CDEW.

High mach turbine engine

The committee remains supportive of Air Force Research Laboratory's (AFRL) efforts to develop Mach 5 and Mach 6 aircraft, as this capability serves as a flexible, reusable means to overwhelm near-peer anti-access capabilities. However, the committee is concerned that the AFRL roadmap for the development of these capabilities has not been properly reflected in the level of funding requested in the budget request over successive fiscal years.

Therefore, the committee directs the Secretary of the Air Force to submit a report to the House Committee on Armed Services not later than December 15, 2023, on the following:

(1) the projected timetable for fielding hypersonic aircraft;

(2) an assessment of the test infrastructure necessary for the development of reusable hypersonic propulsion technology, including turbine-based combined cycle engines;

(3) the discretionary budget authority to be allocated for technology development; and

(4) the anticipated schedule for issuing requirements to industry.

Additionally, the committee encourages the military services and the Office of the Secretary of Defense to support investments in critical technologies including propulsion, advanced materials and fuels, and thermal management, all of which are necessary to rapidly develop, test, and field reusable high Mach capabilities.

Accordingly, the committee recommends \$189.9 million, an increase of \$5.0 million, in PE 0602203F, for high mach and multi mach turbine engines.

Items of Special Interest

Carbon nanotube technology

The committee is encouraged by the promise of aligned carbon nanotube technology as an enabler of predictable and efficient thermal interfaces in national security systems. Predictable system interfaces would increase performance, decrease the overall cost of mission critical systems, and eliminate a common and

costly failure mode in mission critical applications. The committee believes carbon nanotube technology, and the predictable system interfaces it enables, should be safeguarded by the Department of Defense, particularly given the advanced competition and investment by the Chinese government in carbon nanotubes.

Therefore, the committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services not later than March 1, 2024, detailing a plan for ensuring Department of Defense mission critical systems leverage predictable thermal interface solutions enabled with carbon nanotube technology to reduce redundancy, schedule, and costs.

Hypersonics workforce development

The committee continues to support the Department of Defense's development and fielding of hypersonic capabilities and supports the Department's hypersonics modernization strategy. However, the committee is concerned about the Department's ability to sustain the highly skilled workforce of scientists and engineers required to push the boundaries of hypersonic technology and realize the strategic imperatives of the National Defense Strategy.

While the committee commends the Department of Defense and specifically the Office of Naval Research for its science, technology, engineering, and mathematics and graduate program efforts, it believes those programs should be expanded and fully funded, particularly in the field of hypersonic technology.

Therefore, the committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services not later than December 1, 2023, on the Department's efforts to ensure the development and sustainment of its future hypersonic workforce. The report shall include:

- (1) an overview of hypersonic workforce development objectives and the personnel qualifications needed to sustain the development of hypersonic capabilities;
- (2) plans to strengthen partnerships with academic institutions, including service academies, research centers, and industry to promote and educate undergraduate- and graduate- level students in the field of hypersonic technology;
- (3) a plan for how the Department of Defense could establish a pilot program at select academic institutions to expand the hypersonics workforce through the development of graduate and pre-doctoral degree programs; and
- (4) plans to increase funding for advanced hypersonics facilities for research and graduate-level education.

Additionally, the committee recommends \$543.9 million, an increase of \$3.0 million, in PE 0601153N for hypersonic education efforts.

Identifying innovation organizations

The committee notes that with the success of the Defense Innovation Unit (DIU) in accelerating the adoption of commercial technology to transform military capabilities, other elements of the Department of Defense and military services

have launched similar non-traditional innovation fielding enterprises. While the committee is supportive of innovation organizations within the Department and military services, the committee believes that the unchecked proliferation of them could allow for significant duplication and confusion both inside and outside the Department.

Therefore, the committee directs the Director of the DIU to submit a report to the House Committee on Armed Services not later than December 31, 2023, that identifies each innovation organization and suggests a consolidation plan of those different organizations under a lead organization in each military service that has shown competence at engaging with non-traditional technology providers.

Venture advisory roles

The committee remains concerned with the challenges facing the Department of Defense in regards to developing, acquiring, and fielding emerging technologies and capabilities quickly in order to achieve the strategic objectives outlined by the National Defense Strategy. The Department is addressing a shortcoming in its understanding of venture capital and startup businesses through its establishment of the Office of Strategic Capital. However, the committee believes that there may be additional approaches that could aid the Department. In particular, the Department could benefit by utilizing expertise outside of its traditional Government focus areas through the creation of an advisory group made up of individuals from defense or dual-use focused venture capital funds and venture backed startups. Another possibility could be the creation of fellowships for individuals from defense or dual-use focused venture capital funds and venture backed startups within the Office of the Under Secretary of Defense for Research and Engineering. However, the committee recognizes that implementing such ideas may present unforeseen challenges.

Therefore, the committee directs the Under Secretary of Defense for Research and Engineering to submit a report to the House Committee on Armed Services not later than February 1, 2024, detailing an implementation plan for the creation of an advisory group focused on advising the Department in matters related to improving the Department's engagement with emerging technology communities to more rapidly adopt and field critical dual-use technologies. The report should include, but not be limited to, identification of any potential statutory or regulatory challenges in implementing such an advisory group; the size, structure, and scope of such an advisory group; any additional funding required to stand up such an advisory group; and a determination if such an advisory group should be a subcommittee of the Defense Innovation Board.

LOGISTICS AND SUSTAINMENT ISSUES

Radar Sustainment Industrial Base

The committee notes the critical importance of sustainment and repair activities across the Department of Defense's radar inventory, especially as many platforms transition from legacy to advanced, next-generation radar systems. The committee believes it is imperative for the Department to improve the reliability and resilience of the radar industrial base by ensuring adequate capacity and competition for maintenance and repair activities. The committee is concerned about potential lack of competition among sustainment providers and the risk this presents to the capability and speed of sustainment work.

Therefore, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services not later than March 1, 2024, on the Department's plans for current and future radar sustainment, which shall include:

- (1) an assessment of current industry capabilities in the legacy radar repair enterprise;
- (2) plans to ensure a maintained sustainment capability as programs transition to next-generation radar systems, specifically active electronically scanned array radars; and
- (3) plans to use full and open competition for radar sustainment solicitations to ensure requirements are met and control costs across the Department.

OTHER MATTERS

PFAS Non-Incineration Destruction Technologies

The committee directs the Assistant Secretary of Defense for Energy, Installations, and Environment to submit a report to the House Committee on Armed Services by March 1, 2024, on whether non-incineration technologies can be incorporated into the Department's strategy for disposal of PFAS and PFAS-containing wastes. The report shall include:

- (1) a description of any Department of Defense testing of these technologies to date to include location, specifics about the technology tested, and results of the testing;
- (2) opportunities for operational scale testing of these technologies within military departments for destruction of aqueous film forming foam and/or PFAS-contaminated wastes to include spent filters;
- (3) a list of sites that would be suitable for hosting operational testing of these technologies; and
- (4) a discussion of whether a formal pilot program for the testing of non-incineration PFAS destruction technologies would be useful for providing comparative data on these technologies.

Preservation of Ship Repair Industrial Base Capacity

The committee understands that the Navy has made investments to increase drydock capacity on the west coast of the United States to meet ship repair surge capacity requirements due to the growing threat posed by China. As the Navy makes these investments, the committee is concerned that the lack of clarity on how these drydocks will be used and administered could have unintended negative consequences on the critical private sector maintenance and repair capacity and will discourage private sector investment in shipyard infrastructure. The committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than December 1, 2023, on:

- (1) current private sector capacity at west coast drydocks;
- (2) policies for determining when to use government-owned or private sector drydocks for maintenance availabilities; and
- (3) effects of changing title 10, United States Code, to state that no government-provided drydock is eligible to compete in private sector non-nuclear surface ship maintenance unless there is not sufficient private sector dock competition.

TITLE V—MILITARY PERSONNEL POLICY

ITEMS OF SPECIAL INTEREST

Briefing on Law Enforcement Training

The committee notes the importance of law enforcement training, especially within the Military Criminal Investigation Organizations. Therefore, the committee directs the Secretaries of the military departments to provide a briefing to the House Committee on Armed Services not later than March 1, 2024, on the implementation of any new law enforcement training initiatives, including "train the trainer" and "train your trainer" programs, as of January 1, 2023; milestones for implementation of the new training; and the criteria used to evaluate the training.

Comptroller General Review on Improper Release of Service Member Records

The committee is concerned about whether the Department of Defense maintains sufficient safeguards for protecting service members' private information and preventing its unauthorized release. Therefore, the committee directs the Comptroller General of the United States to conduct a review of the policies and processes governing the Department's release of service member records pursuant to Freedom of Information Act requests or other requests. The review should address the following elements:

(1) the laws, policies, and processes for releasing military records to persons other than the military member, including political organizations, media organizations, and other private individuals;

(2) the Department and the services' policies on and processes for responding to Freedom of Information Act requests; and

(3) any recommendations to improve the Department's policies on and processes for releasing military records and responding to Freedom of Information Act requests deemed appropriate by the Comptroller General.

The committee further directs the Comptroller General to provide a briefing to the House Committee on Armed Services by March 1, 2024, with a report to follow by a date mutually agreed to at the time of the briefing.

Military Community Relations

The committee supports ongoing efforts by the Department of Defense to provide training to personnel who interact regularly with members of the Native Hawaiian community as part of their work. The committee recognizes that such training helps improve military relations with the Native Hawaiian community, which in turn improves service member and family experiences when stationed in Hawaii and contributes to the long-term success of relations between the military and the people of Hawaii.

The committee directs the Secretary of Defense, in coordination with the U.S. Indo-Pacific Command and the Secretaries of the Army, Navy, and Air Force, to submit a report to the House Committee on Armed Services by March 1, 2024, examining the feasibility of developing and implementing a program on Native Hawaiian customs for service members, families, and civilian personnel assigned to Hawaii. As part of the feasibility study the Secretary shall consult with Native Hawaiian community leaders and organizations.

Report on Unanimous Panels for Conviction, Sentencing, and Other Matters in General and Special Courts-Martial

The committee notes unanimous panels are not required for all convictions, sentencing, and other matters at general and special courts-martial. Although not currently applied to military courts, the Supreme Court of the United States in *Ramos v. Louisiana*, held that the Sixth Amendment to the Constitution requires unanimous jury verdicts for a criminal conviction. Therefore, the committee directs the Secretary of Defense to provide a report to the House Committee on Armed Services not later than March 1, 2024, on the following:

(1) A detailed plan on how the Secretary of Defense would implement unanimous panels for all convictions, sentencing, and other matters no later than December 31, 2024;

(2) A cost-estimate for implementation;

(3) A detailed explanation of any needed updates of, or improvements to, the law regulations, or the Uniform Code of Military Justice to implement the plan; and,

(4) A detailed cost annual revenue generated from fines and penalties associated with a conviction in military court over the past 10 years.

Review of the Department of Defense's Diversity, Equity, and Inclusion Programs

The committee notes the Chairman of the Joint Chiefs of Staff has calculated the total cost in dollars and man-hours for the Extremism Standdown on February 5, 2021, and training in diversity, equity, and inclusion (DEI) topics since January 21, 2021. Therefore, the committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services by March 1, 2024, that includes the following:

(1) total cost of DEI training in manpower hours for the last 5 fiscal years.

(2) total cost in dollars for all training conducted in DEI, equal opportunity, and extremism for the last 5 fiscal years.

(3) total civilian hires and salaries for DEI-related initiatives, trainings, and policies across the Department of Defense and military services in the last 5 fiscal years.

(3) how the objectives of the DEI and extremism training conducted in the last 5 fiscal years were satisfied by the training.

(4) if and how DEI and extremism training has impacted recruitment, accessions, promotions, and/or separations, to include administrative separations and/or courts-martial for violating extremism conduct orders or regulations.

(5) a description of the current (for fiscal year 2023) DEI training each service conducts, how the training curriculum is chosen and/or developed, and how the services measure its effectiveness.

Timely Adjudication of Service Member Complaints

The timely adjudication of service member complaints regarding sexual harassment or discrimination is essential to ensure the readiness of the military services. The committee is concerned that any undue delay in adjudication of these complaints may be harmful. Therefore, the committee directs the Under Secretary of Defense for Personnel and Readiness to provide a briefing to the House Committee on Armed Services by February 1, 2024, on the following:

(1) the number of substantiated investigations into sexual harassment and discrimination conducted in the last 3 years;

(2) the average amount of time that each type of investigation takes from initiation to final action;

(3) the reasons for delay; and

(4) any recommendations to ensure due process and timely adjudication of each complaint.

TITLE VI—COMPENSATION AND OTHER PERSONNEL BENEFITS

ITEMS OF SPECIAL INTEREST

Review of Mental Health Services Available at Schools Operated by the Department of Defense Education Activity

The committee is concerned about whether military children attending Department of Defense Education Activity Schools (DODEA) have adequate resources to meet their mental health needs. Therefore, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services by February 1, 2024, on the current state of mental health services available at schools operated by DODEA. The briefing should include the following information at a minimum:

- (1) number and type of mental health providers serving children attending schools operated by the DODEA, including staff such as school psychologists, school counselors, and other individuals providing mental health support;
- (2) an assessment of whether and to what extent the mental health services available at such schools align with the applicable national recommendations; and
- (3) an assessment of the ratio of students to mental health staff as described in (1) in such schools.

ITEMS OF SPECIAL INTEREST

Report on Affects to Beneficiaries from the Change in Policy regarding Reimbursement for Providers of Applied Behavior Analysis in Schools and Community Settings

The committee understands the application of Applied Behavior Analysis (ABA) as part of a holistic treatment plan for children diagnosed with Autism. The committee is concerned about the impact the Defense Health Agency's March 2021 change in policy related to the Agency's Autism Care Demonstration service in the school and community setting has had on beneficiaries. Therefore, the committee directs the Secretary of Defense to provide a report to the House Committee on Armed Services by March 1, 2024, on:

- (1) the scientific and analytical basis for having terminated these school and community services in the March 2021 TRICARE Operations Manual;
- (2) an assessment of how the change in policy directly affects beneficiaries, including: (a) the number of beneficiaries affected by the change in policy; (b) what services were terminated as a result of this policy change; (c) overall cost savings; and (d) the affects a service member's deployment has on the remaining spouse's requirement to take on the sole management and education of a child with autism;

- (3) cost estimates to reinstate the policy; and
- (4) why Applied Behavior Analysis (ABA) does not meet the Department of Defense's hierarchy of evidence to support medical necessity.

TITLE VIII—ACQUISITION POLICY, ACQUISITION MANAGEMENT, AND RELATED MATTERS

ITEMS OF SPECIAL INTEREST

Acquisition of Titanium

The committee understands that Defense Logistics Agency-Strategic Materials (DLA-SM) office has identified titanium as a priority national defense stockpile (NDS) material. Titanium is a high-strength, corrosion-resistant metal with properties that make it critical for use in aerospace applications, including structural components of military aviation platforms. The U.S. titanium industry has historically been reliant on imports of titanium sponge, a key feedstock used in the titanium production process. More than 90 percent of titanium sponge is sourced from Japan, a U.S. ally. The committee is aware that the last remaining titanium sponge manufacturing facility in the United States closed indefinitely in 2020.

The committee understands that DLA-SM has received authority and resources for a planned acquisition of titanium for the NDS. The committee supports efforts to stockpile titanium ingot as a cost-effective method to increase assured access to domestic supplies. A reserve supply will provide availability to meet national security needs, even in the event of a market disruption, and will bolster domestic titanium industry capabilities in the near term. Therefore, the committee directs the National Defense Stockpile Manager to provide a briefing to the House Committee on Armed Services not later than December 31, 2023, on progress toward the acquisition of titanium.

Artificial Intelligence Facilitated Supply Chain Visibility

The committee recognizes the need to secure supply chains supporting our defense industrial base. Further, the committee understands that supply chain visibility is a critical first step to identifying vulnerabilities and developing alternate and secure sources of strategic goods, components, and materials. The committee notes that supply chain visibility also promotes readiness and optimizes decision-making by improving end-to-end logistics processes and data integration. The committee notes that high fidelity supply chain visibility will result in increased strategic flexibility, supply chain security and resilience, production capacity margin, and elimination of single point failures.

Further, the committee recognizes that supply chain visibility has become increasingly difficult in a globalized market, with vendors drawing on materials and

components from across the globe to fulfill Department of Defense requirements. Given supply chain tracking and risk management requirements established in sections 857, 860, and 5949 of the James M. Inhofe National Defense Authorization Act for Fiscal Year 2023 (Public Law 117-263) and in other legislation, the committee recognizes supply chain visibility as a current requirement, and notes that it is a requirement that is likely to increase in the future.

The committee commends the Naval Supply Systems Command for its efforts to improve supply chain visibility within the Navy using its Naval Sustainment System-Supply best practices. However, the committee notes the need for a Department of Defense-led effort to address this issue across the defense industrial base. Therefore, the committee directs the Secretary of Defense to deliver a report to the House Committee on Armed Services not later than December 31, 2023, into the feasibility of leveraging artificial intelligence and industry best practices to develop a Department of Defense-wide, continuously monitored, multi-tiered supply chain visibility system capable of rapidly identifying and mitigating supply chain risks with the intent of maximizing efficiency and minimizing risk of interruption. The report should include at a minimum:

- (1) the feasibility and fiscal cost of implementing such a system;
- (2) whether an appropriate system is commercially available; and
- (3) the scope and extent of any strategic benefits from such a system, specifically efficiency and assurance against interruption and compromise.

Co-Production of Asymmetric Defense Capabilities with Taiwan

The committee is aware that Taiwan currently faces long lead times for delivery of defense articles purchased from the United States. The delays are largely due to limitations in the U.S. defense industrial base (DIB), including consolidation, cold lines, supply chain issues, staff shortages, a cumbersome foreign military sales process, and shipping delays due to COVID-19. Facilitating joint weapons production between the United States and Taiwan in the region could reduce strain on the U.S. defense industrial base, expedite the time to initial operating capability, and build the capacity of Taiwan to replenish its own stocks in a crisis. The negative impact on the domestic defense industrial base due to transfer of work overseas is a valid concern, but the James M. Inhofe National Defense Authorization Act for Fiscal Year 2023 (Public Law 117-263) provided significant support to the DIB to produce asymmetric munitions, and there are many capabilities for which the DIB is at maximum capacity.

Therefore, the committee directs the Secretary of Defense to provide a report to the congressional defense committees not later than March 1, 2024, on the benefits and challenges of co-production of weapons and munitions for Taiwan.

Division of Hardware and Software Contracts

The committee recognizes innovative software as essential to the lethality and overall capability of ground combat vehicles required to meet the changing

operational landscapes and threats of a multi-domain operations environment. Often, hardware and software for ground combat vehicles is developed in tandem in the early stage of production.

The committee is interested in the potential benefits of splitting the development of hardware and software during the early stages of weapons contracts. These potential benefits include the flexibility to adjust hardware or software requirements without impacting the other, the ability to assist the Army in staying agile and maintaining an open system architecture, and potential cost savings by avoiding vendor lock-in.

Therefore, the committee directs the Secretary of the Army to submit a report to the House Committee on Armed Services not later than December 1, 2023, which should include:

- (1) existing authorities on the division of hardware and software contracts;
- (2) the viability and potential benefits to the Army; and
- (3) the impact on maintaining overmatch by the division of hardware and software contracts for ground combat vehicles, including the Optionally Manned Fighting Vehicle.

Domestic Graphite Extraction and Processing Facilities

The committee understands that graphite is a critical mineral needed for military systems and strategic infrastructure, including handheld systems, battery materials, electric grids, and protective armor, among others. The United States has the potential to produce graphite domestically, but remains reliant on imports of upstream products to satisfy domestic consumption. Chinese firms account for the vast majority of global natural graphite output, creating significant supply chain risks for graphite. Existing domestic resources of natural graphite, including those that were previously used to support defense programs, offer the quickest and most cost-effective route to closing this supply chain gap.

Therefore, the committee directs the Secretary of Defense, in consultation with the Secretary of Commerce, to provide a briefing not later than December 31, 2023, on public and private sector activities to establish graphite mining and processing capabilities in the United States. Specifically, the briefing shall highlight:

- (1) programs of record within the Department of Defense that rely on secure and stable supplies of graphite;
- (2) perceived supply vulnerabilities associated with U.S. imports of graphite;
- (3) efforts by strategic adversaries to undermine efforts to develop graphite extraction and processing capabilities in the United States; and
- (4) efforts to mitigate short-term supply disruptions, including whether flake and amorphous graphite should be introduced in planned acquisitions and disposals by the National Defense Stockpile.

Early Stage Firm Pathway to Production Enhancement

The committee acknowledges the delta between accelerated or targeted acquisition programs for early-stage defense contractors and programs of record. Demand signals or signals of validation from the Department of Defense to industry are an essential communique. Therefore, the committee directs the Under Secretary of Defense for Research and Engineering, in consultation with the Secretary of the Army, Secretary of the Navy, and Secretary of the Air Force, to provide a briefing to the House Committee on Armed Services not later than December 1, 2023, that provides recommendations on how the Department can better assist participants in programs such as Agility Prime, Small Business Innovation and Research, and similar research, development, test, and evaluation programs, in bridging the gap between graduating from their requisite program and being incorporated into larger-scale Department acquisition frameworks. Specifically, the briefing should address how the Department can leverage non-committal signals of validation, such as letters of support and other mechanisms, to indicate the Department's interest in capabilities produced by firms in the early stages of development that fulfill needs that have not been met by other products.

Glass Fiber-Based Structural Composites Supply Chain Assessment

The committee is aware of the importance of glass fiber-based structural composite laminates in providing light weight ballistic resistant armor systems for wheeled and tracked combat vehicles, ships, and fixed-wing and rotating-wing aircraft. The committee notes recent investments by the Chinese in both incremental capacity and new technologies in the areas of:

- (1) high-performance glass fiber production;
- (2) advanced glass fiber weaving; and
- (3) polymer resin impregnation (prepregging) of the woven glass fiber products.

The committee further notes the importance of maintaining a competitive edge in the technology and security of supply in order to ensure warfighter advantage on the battlefield. Therefore, the committee directs the Under Secretary of Defense for Research and Engineering, in coordination with the service secretaries, to provide a briefing to the House Committee on Armed Services by January 31, 2024, which should include the Department's current strategy for glass fiber-based structural composites research, development, and production. This briefing should also include an assessment of the existing domestic glass fiber-based structural composites supply chain.

Inclusion of Other Transaction Past Performance in Certain Department of Defense Systems

The committee emphasizes the importance of maximizing practicable opportunities for small businesses in federal contracting and including contractor performance assessments as a key factor in the Department's source selection decisions. Small businesses, non-traditional entities, and new entrants to

Department of Defense contracting are agile, often ingenuitive, and can deliver new and innovative technologies quickly. The Department often leverages this category of contractor through Other Transaction Authority (OTA) awards which are not subject to Federal Acquisition Regulations (FAR). Exemption from FAR enables acceleration of capability fielding for the warfighter. However, the Department does not provide small businesses with a contractor performance assessment for OTA contracts, since the Contractor Performance Assessment Reporting System (CPARS) is reliant on FAR requirements for its assessments. A consequence for new entrants that successfully execute an OTA is not receiving a demonstrated performance assessment that is required for program of record contracts. The committee appreciates the value of rapid fielding of OTAs and is interested in applying performance assessments to OTA contractors without applying FAR requirements or impairing the agility of OTAs. Therefore, the committee directs the Under Secretary of Defense for Acquisition and Sustainment to submit a report to the House Committee on Armed Services and the Senate Committee on Armed Services not later than February 1, 2024, on the feasibility of applying performance assessments to OTAs. The report should include assessments of the following:

- (1) the feasibility of applying FAR regulations required for CPARS to OTAs;
- (2) the feasibility of applying FAR regulations required for CPARS to OTAs on an optional basis for the contractor;
- (3) the Department's ability to provide its own performance assessments for OTAs without adding FAR requirements;
- (4) the impact on speed and agility of OTA contracts if a Department performance assessment was required or optional; and
- (5) the impact on the ability of OTA contractors without a CPARS score to compete for programs of record.

Microelectronics Security of Supply

The committee notes that the Department of Defense is charged with implementing parts of section 841 of the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021 (Public Law 116-283) and section 851 of the National Defense Authorization Act for Fiscal Year 2022 (Public Law 117-81) not later than January 1, 2026, in order to provide additional security to U.S. microelectronics supply chains by 2027. The committee is aware that rulemakings surrounding electronics security can be time-consuming and complex.

The committee therefore encourages the Department to expedite this rulemaking in order to receive industry input from suppliers and consumers of printed circuit boards and substrates. The committee further directs the Under Secretary of Defense for Acquisition and Sustainment to brief the House Committee on Armed Services not later than September 30, 2023, on the following information:

- (1) the expected timeline for promulgations of rules to implement section 4873 of title 10, United States Code;

(2) outreach plans to nongovernmental organizations, including private industry and trade associations, in order to build a knowledge base about existing supply chains, security vulnerabilities, and developing capabilities;

(3) plans for the Department of Defense to directly incentivize the domestic production of printed circuit boards and substrates, either through direct investment or through other authorities; and

(4) discussions between the Department of Defense and the Department of Commerce regarding investments into domestic capabilities to produce printed circuit boards and substrates.

Report on Secure Spaces for Small Businesses

For contractors to work on classified contracts, they must have access to sensitive compartmented information facilities (SCIFs). The committee recognizes that the construction of a SCIF is costly, time intensive, and often prohibitive for small and emerging technology companies. The committee also recognizes that SCIF accessibility can be a barrier to entry for small businesses who seek business with the Department of Defense. Small businesses are agile and can rapidly prototype technology, providing emerging technology products and services to the Department of Defense.

Therefore, the committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services not later than December 1, 2023, that includes:

(1) options for, feasibility of, and security risks of granting access to already existing government-owned SCIF space to small companies that have been issued a Facility Clearance and selected for work requiring performance in secured facilities is granted; and

(2) options for, feasibility of, and security risks to communities with military installations and government programs to apply for government-funded SCIF space to be developed in an already-cleared location.

Report on Vulnerabilities in Chemical and Basic Material Supply Chains

The committee remains concerned that certain chemical and other basic material supply chains supporting the Department of Defense are dominated by foreign sources, most significantly China and Russia, which presents significant strategic risks unless they are fully mitigated. The committee urges the Department to identify vulnerable chemical and basic material supply chains and communicate those gaps to the biomanufacturing industrial base. Further, the committee directs the Under Secretary of Defense for Acquisition and Sustainment to provide a report with a classified annex to the congressional defense committees not later than December 31, 2023. At a minimum, the report shall include:

(1) a comprehensive strategic vulnerability assessment of the Department's supply chain for specialty chemicals (also known as effect chemicals), excluding the discussion of: fuel or fuel alternatives, including biofuels, and chemicals or chemical

categories previously identified in recent Defense Production Act Title III funding efforts related to critical chemicals production, unless relevant to vulnerabilities in specialty chemical supply chains;

(2) a list of the Department's top five most supply chain-vulnerable specialty chemical categories, including an identification of the specific chemicals in each category and volumes of those chemicals which were consumed by the Department in the last three fiscal years;

(3) a discussion of the following supply-chain vulnerable specialty chemical categories: construction chemicals, corrosion inhibitors, specialty polymers, and biocides; and

(4) the identification of capability and supply chain gaps, including future concerns which inhibit the domestic manufacturing of the Department's needed specialty chemicals.

Secure Supply Chains for Tungsten

The committee is aware that the Department of Defense has taken several actions to reduce the risks of inorganic chemical and critical mineral supply from China, Russia, and other non-allied foreign nations. However, risks of supply disruptions remain salient for tungsten ores and concentrates. Therefore, the committee directs the Administrator of the National Defense Stockpile to provide a briefing to the House Committee on Armed Services not later than December 31, 2023, on the efforts of the Department of Defense to ensure that these materials are available to the National Defense Stockpile and to U.S. industry in quantities to maintain production. The briefing shall include:

(1) the Department's plan to maintain sufficient tungsten ores and concentrates in the National Defense Stockpile while also ensuring adequate non-Chinese feedstocks for U.S. industry;

(2) a five-year plan detailing the Department's projected acquisitions and disposals of tungsten ores and concentrates in the National Defense Stockpile; and

(3) the Department's plans to support the maintenance of domestic tungsten production.

Strategic Sources of Magnesium Metal for Defense Systems

The committee recognizes that magnesium metal is a critical material essential to many military systems and strategic commercial industries. China currently dominates magnesium metal production, accounting for over 88 percent of global output, according to the U.S. Geological Survey. Increasing domestic magnesium production therefore eliminates foreign dependence on this critical resource. The committee is aware of domestic enterprises making significant strides in innovative production of magnesium using feedstock from brines processed through electrolysis. The committee urges the Department of Defense to incentivize further development of domestic magnesium production.

Additionally, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services not later than December 31, 2023, on public and private sector activities to develop carbon-neutral magnesium production capabilities in the United States. Specifically, the briefing should include:

- (1) the development status of domestic magnesium metal production capabilities, and Department of Defense efforts to support further domestic expansion;
- (2) programs of record within the Department of Defense that rely on secure and stable supplies of magnesium metal; and
- (3) efforts by strategic adversaries to undermine efforts to develop magnesium production capabilities in the United States.

Study on Noncombat Department of Defense Needs

In 2022, the U.S. Government Accountability Office (GAO) reported that the Office of the Secretary of Defense had not monitored the Defense Commissary Agency's and the military exchanges' compliance with policies for preventing the resale of goods produced with forced labor. GAO also found that the military exchanges had not consistently implemented all requirements related to resale goods that may have been produced by forced labor. The committee notes that concerns regarding the use of forced labor linked to China's Xinjiang Uyghur Autonomous Region have prompted the U.S. Government to take steps to restrict or prevent the importation of goods from that region. The committee is concerned that the Department of Defense could be procuring other noncombat goods — noncombat goods other than those procured for the purposes of the defense resale system — that have their manufacturing origin in China.

Therefore, the committee directs the Comptroller General of the United States to conduct an evaluation of the Department of Defense's processes for identifying whether the other noncombat goods it procures might have been manufactured in China. Specifically, this evaluation should include an examination of the extent to which:

- (1) the Department tracks information about the manufacturing origin of the noncombat goods it procures, other than goods procured for the defense resale system;
- (2) the Department conducts risk assessments and considers alternative manufacturing sources for these noncombat goods when there are potential concerns regarding their manufacturing origin; and
- (3) the Department has examined the feasibility and advisability of transitioning the manufacturing of these noncombat goods to United States-based manufacturers when there are such concerns.

The committee further directs the Comptroller General to provide a briefing to the House Committee on Armed Services not later than April 30, 2024, on the

Comptroller General's preliminary findings and present final results in a format and timeframe agreed to at the time of the briefing.

Trusted Foundry Program

The committee has long recognized the need for secure, trusted supply chains for defense and intelligence microelectronic components. The Defense Microelectronics Activity's Trusted Foundry program has been tasked with accrediting suppliers in the microelectronics value chain as Trusted, providing the U.S. Government with an assured path for microelectronics acquisition. The program has a long history of providing a cost-effective means to assure the integrity and confidentiality of integrated circuits during design and manufacturing while providing the U.S. Government with access to state-of-the-practice and state-of-the-art microelectronics technologies for both Trusted and non-sensitive applications.

However, the committee is aware that the requirement for sourcing microelectronics from accredited Trusted suppliers is often waived for reasons such as cost. Threats to the United States defense and intelligence infrastructure posed by cyber threats to microelectronics such as intellectual property theft, and the risk of overproduction parts falling in adversaries' hands, continues to increase. The committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services not later than December 31, 2024, detailing the criteria and rationale used on each waiver for Trusted microelectronics acquisitions requirements in fiscal years 2023 and 2024.

Utilization of Middle Tier of Acquisitions and Other Transaction Authority Across Services

Data is sparse on service-to-service trends and utilization of products and services provided by Other Transaction Authority (OTA) contracts. Existing data is promulgated by Federal Procurement Data System (sam.gov) and usaspending.gov. The level of granularity is insufficient to implement a first-use policy for OTAs and Middle Tier of Acquisitions (MTA).

The committee recognizes that OTAs and MTAs have proven to accelerate rapid fielding of capability for the warfighters, but their production utility has yet to be fully studied and subsequently the power of that tool has yet to be fully acknowledged and normalized by Congress and the Department. Production and understanding of OTA and MTA data will inform Congress on what is being fielded at a speed of relevance through both authorities at the Department. Most critical to this are:

(1) the production based demonstrating what is actually being purchased;
and

(2) the technology-focused enterprises to ensure the data isn't skewed by contracts that are used for food or landscaping, for example.

Therefore, the committee directs the Under Secretary of Defense for Acquisition and Sustainment to provide a report to the House Committee on Armed Services by December 1, 2023, that measures and quantifies the use of production OTAs and MTAs across the Department and the Armed Forces with non-traditional, technology-focused vendors. The report should include:

(1) data on the production OTA and MTA contracts across the Department by service and by product-type;

(2) what products and services the Department is procuring using OTAs and MTAs;

(3) composition of the entities the Department is contract with using OTAs and MTAs, including size (revenue and employees), type (filing status), geography, and industry;

(4) data on the trends in defense OTA and MTA obligations by service and buyer for the past 5 years;

(5) data on the competition for production OTA and MTA contracts for each fiscal year beginning with fiscal year 2018; and

(6) data on trends in OTA and MTA production contracts transitions to programs of record.

Women-Owned Small Businesses Contracting with the Department of Defense

The committee recognizes that the Women-Owned Small Business Contracting Program aids the Federal agencies in meeting the statutory goal of awarding five percent of all prime Federal contracts to women-owned small businesses. Contracts are reserved for specific industries where women-owned small businesses are substantially underrepresented, including numerous that are key to U.S. national security interests.

The committee further appreciates the Small Business Administration's recent work to improve the performance of the Women-Owned Small Business Contracting Program, including implementing efficiencies to improve the user experience, reduce processing times, and promote outreach and marketing to provide women business owners with the education and resources to compete for set-aside awards under the program.

The committee is concerned, however, that the Federal Government has only met the statutory goal twice in history. The committee is also concerned that there continues to be a backlog of applications and little visibility into how many firms are being certified by any of the four national certifying entities approved by the Small Business Administration.

The committee directs the Director of the Department of Defense Office of Small Business Programs to submit a report to the congressional defense committees, not later than May 1, 2024, on the concerns of women-owned and -controlled small businesses. This report shall include, for the fiscal year preceding the date of the report, the following:

(1) the number of Department applications for certification as a concern of women-owned and -controlled small business that have sufficient information for the Administrator to make a certification determination. This information should be disaggregated by the number of applications certified, the number of applications denied, and the number of applications for which a determination has not been made;

(2) the number of concerns certified as concerns of women-owned and -controlled small businesses by a national certifying entity approved by the Administrator;

(3) the amount of fees, if any, charged by each national certifying entity for such certification; and

(4) the total dollar amount and total percentage of Department prime contracts awarded to concerns of women-owned and -controlled small businesses, pursuant to item (2) of this list.

TITLE X—GENERAL PROVISIONS

ITEMS OF SPECIAL INTEREST

COUNTERDRUG ACTIVITIES

Joint Interagency Task Force South Capabilities

The committee remains focused on U.S. military posture and strategic competition in the U.S. Southern Command area of responsibility, as well as around the globe. Further, the committee remains committed to ensuring U.S. Southern Command, operating through Joint Interagency Task Force South (JIATF-S), has the appropriate assets to detect and monitor transnational criminal organizations' activities to exploit maritime and aerial shipment routes of narcotics and support interagency efforts to illuminate the illegal transport of precursor chemicals of fentanyl, bulk cash, persons, and weapons. The committee understands that JIATF-S is reliant on intelligence, surveillance, and reconnaissance assets for detection and monitoring of a vast area of responsibility, including in the Pacific Ocean where fentanyl precursors are predominantly transported.

Therefore, the committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services not later than December 31, 2023, that includes capabilities upgrades required to better enable JIATF-S to support the interdiction of narcotics, precursor chemicals of fentanyl, fentanyl, bulk cash, human trafficking, and weapons, including platforms, vessels, and equipment.

OTHER MATTERS

Gaps in Writings on Joint Chiefs of Staff History

The committee acknowledges that the history of the Joint Chiefs of Staff is rich and complex, and that many areas may remain to be explored by historians. The committee encourages and supports collaboration between historians and the Joint Staff History Office to help preserve its unique history. Therefore, the committee directs the Chairman of the Joint Chiefs of Staff to submit a report to the House Committee on Armed Services by March 1, 2024, that lists any identified gaps in the existing canon of Joint Chiefs of Staff history to assist historians' efforts to document the past more holistically.

Gaps in Writings on Office of the Secretary of Defense History

The committee acknowledges that the history of the Office of the Secretary of Defense is rich and complex, and that many areas may remain to be explored by historians. The committee encourages and supports collaboration between historians and the historians of the Office of the Secretary of Defense to help preserve its unique history. Therefore, the committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services by March 1, 2024, that lists any identified gaps in the existing canon of the Office of the Secretary of Defense history to assist historians' efforts to document the past more holistically.

Implementation Plan for Identifying Resources Required for Achieving Materiel Readiness Objectives

The committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services not later than December 1, 2023, on the remediation plan to provide the details for the first year of the implementation plan described in section 118 of title 10, United States Code, for identifying the fiscal resources required to meet materiel readiness objectives, and the progress that is underway to satisfy the requirements to submit with the fiscal year 2025 budget request as the second year of the implementation plan.

Report on Congressional Increases to Defense Spending

The committee directs the Secretary of Defense to submit a report to the congressional defense committees, as an unclassified appendix to the fiscal year 2025 Department of Defense budget request, on the programs and activities of the Department for which Congress provided authorization or appropriations levels in the National Defense Authorization Act for Fiscal Year 2024 or the fiscal year 2024 Defense Appropriations Act that exceeded the amount requested for such program or activity in the budget for the Department of Defense submitted to Congress by the President for fiscal year 2024.

The report shall include information on:

(1) any program or activity that the Department of Defense sought to divest from entirely or in part, or requested zero or a reduced number of units, but that was restored wholly or in part by Congress;

(2) any program or activity that Congress authorized or appropriated at a level exceeding the amount requested by the Department of Defense in its fiscal year 2024 budget request by \$20.0 million or more, and the sum of these increases expressed as a percentage of the Department of Defense's total enacted budget; and

(3) each program or activity listed in this report shall include an assessment of whether and how the program or activity does or does not meet requirements in support of the priorities articulated in the 2022 National Defense Strategy.

In addition to being appended to the Department of Defense's fiscal year 2025 budget request, this report shall be made publicly available on the website of the Under Secretary of Defense (Comptroller).

Report on Streamlining the Approval Process for Low-Risk Reprogramming Requests

The committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than March 1, 2024, which should include:

(1) a description, assessment, and recommendation of the feasibility of cutting specific

Department of Defense internal vetting steps for transfer or reprogramming requests (DD Form 1414, DD Form 1415-3, DD Form 1415-1);

(2) a description, assessment, and recommendation of possible means of decreasing processing time for vetting at each step of the request process;

(3) a description, assessment, and recommendation of possible mandatory time limits for vetting at each step of the request process; and

(4) identify any commonalities or characteristics of previous requests approved by congressional committees without modification that would assist in identifying future requests that may qualify for fast-track processing.

TITLE XI—CIVILIAN PERSONNEL MATTERS

ITEMS OF SPECIAL INTEREST

Shortage of Civilian Simulator Instructors

The committee remains concerned about the Air Force's pilot shortage. In particular, the committee is concerned by the shortage of General Schedule (GS) civilian simulator instructors (CSIs). The lack of CSIs draws experienced military pilots away from their mission in order to fill in as instructors, further exacerbating the pilot shortage.

The committee notes the value of GS CSIs and the importance of paying instructors a competitive rate to recruit and retain this highly qualified workforce. The committee also notes that the Air Force has employed several incentives to recruit and retain CSIs, but a shortage remains. The committee supports the Air Force in its efforts to prioritize immediate action to recruit and retain CSIs to prevent mission failure.

Therefore, the committee directs the Secretary of the Air Force to submit a report to the House Committee on Armed Services not later than December 31, 2023, on authorities the Air Force may use to improve recruitment and retention of GS CSIs. This report should include:

- (1) an analysis of how base pay for CSIs compares to base pay for equivalent jobs within the airline industry;
- (2) a list of authorities used and the remaining pay gap between GS CSIs and the equivalent job within the airline industry;
- (3) an analysis of the benefits and difficulties in tailoring pay toward location, and an analysis of how payment caps influence recruiting and retaining CSIs;
- (4) information on the amount of time it takes for the Air Force to obtain requested pay modifications for CSIs, including an analysis of how the timeline influences recruiting and retaining CSIs; and
- (5) prioritization of authorities that may be employed to modify pay, including any barriers to using these authorities.

TITLE XII—MATTERS RELATING TO FOREIGN NATIONS

ITEMS OF SPECIAL INTEREST

Access to New Technology for Foreign Military Sales

Emerging and evolving technologies can play a critical role in combat. For many such technologies, their value stems from the speed with which front-line combatants can access them, use them, and replenish them. The committee is aware of U.S. companies that can develop and manufacture this class of products and technologies with speed and efficiency. The committee is concerned that today's foreign military sales (FMS) processes may present barriers for new entrants and traditional entities that provide non-Program of Record defense articles.

Therefore, the committee directs the Under Secretary of Defense for Policy, in consultation with the Under Secretary of Defense for Acquisition and Sustainment, to provide a briefing to the House Committee on Armed Services not later than December 1, 2023, on methods to improve the acquisition of emerging and evolving technology non-Program of Record defense articles and services for FMS. Accordingly, the briefing shall include:

- (1) recommended concepts for new pathways, potentially including centers of excellence or dedicated program offices;

(2) methods for U.S. companies to inform government customers about capabilities and access to resources for testing and certification; and

(3) any other recommendations from the Under Secretary to provide critical capabilities in accordance with the intended purposes and goals of the FMS program.

Mission Support to Ukraine

The committee seeks to better understand how the Department of Defense is prioritizing and approving or disapproving requests from the Government of Ukraine for smaller dollar value and lower quantity capabilities made by small businesses or non-traditional providers. To ensure that these requests are given due consideration, the committee directs the Secretary of the Defense to provide a briefing to the House Committee on Armed Services not later than December 1, 2023, on outstanding or denied requests for support made by the Government of Ukraine. At a minimum, this briefing shall include:

(1) details on any request made by the Ministry of Defense or National Police that have not been adjudicated within 90 days of submission or request;

(2) any request for support for systems, capabilities, or platforms made by the Government of Ukraine and denied;

(3) justification for denied or partially denied requests for support; and

(4) methods to improve the acquisition of non-programs of record defense articles and services for the provision to Ukraine under the Presidential Drawdown Authority or the Ukraine Security Assistance Initiative.

Report on Pre-Positioning Precision-Guided Munitions in Israel

A robust supply of munitions within War Reserves Stock Allies-Israel (WRSA-I) that can address regional challenges is critically important to Israel's security. The committee prioritizes the replenishment of WRSA-I, following the Department of Defense's drawdown of its weapons stocks for transfer to the Government of Ukraine to defend against Russia's illegal and unjustified invasion.

The committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services not later than December 1, 2023, that includes:

(1) the current quantity and type of precision-guided munitions in the WRSA-I;

(2) the quantity and type of munitions that the Department of Defense transferred from WRSA-I to the Government of Ukraine;

(3) the Department of Defense's plan for replenishing the stockpile;

(4) the quantity and type of precision-guided munitions with which the Department of Defense plans to replenish WRSA-I;

(5) an assessment of whether the current stockpile of Israel's precision-guided munitions within WRSA-I meets the requirement of providing Israel a qualitative military edge; and

(6) any other information the Secretary determines appropriate.

U.S.-Israel Defense Assessment

The committee notes the increased regional threats posed to Israel and U.S. forces stationed in the Middle East. Furthermore, the committee is interested in new technological opportunities that could be achieved through enhanced collaboration between the United States and Israel. Therefore, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services not later than December 1, 2023, on Israel's evolving security needs and prospective areas for future U.S.-Israel cooperation. The briefing shall include:

(1) an assessment of the potential for increased U.S.-Israel defense collaboration, particularly in emerging technologies including but not limited to artificial intelligence, machine learning, cybersecurity, directed energy, and automation; and

(2) a summary of existing U.S.-Israel defense collaboration in emerging technologies, including active memorandums of understanding on research and development and ongoing research programs conducted by the Irregular Warfare Technical Support Directorate.

Ukraine Security Assistance for Army Tactical Missile Systems

Of the funds authorized for the Ukraine Security Assistance Initiative (USAI) elsewhere in this Act, the committee intends that not less than \$80.0 million be used for the procurement of Army Tactical Missile Systems (ATACMS) for the Armed Forces of Ukraine. The committee directs the Secretary of Defense to provide a briefing to the congressional defense committees, not later than December 31, 2023, on the progress of using USAI for the procurement of and availability of ATACMS to the Armed Forces of Ukraine.

TITLE XIII—OTHER MATTERS RELATING TO FOREIGN NATIONS

ITEMS OF SPECIAL INTEREST

Acquisition and Cross Servicing Agreements with Pacific Island Countries

Acquisition and Cross Servicing Agreements (ACSAs) provide the Department of Defense and partner countries with the ability to exchange equipment and logistical support during operations and exercises. The ACSA program is a means to strengthen relationships with foreign partners as well as to provide combatant commanders with increased flexibility in addressing logistical requirements. It may benefit the Department to enter into an ACSA with certain Pacific island countries. Therefore, the committee directs the Secretary of Defense to assess the potential benefits and the feasibility of entering into an Acquisition

and Cross Servicing Agreement or an Acquisition Only Agreement with each of the following countries: the Federated States of Micronesia, the Marshall Islands, Palau, Fiji, Kiribati, Nauru, Tonga, Tuvalu, Papua New Guinea, the Solomon Islands, Vanuatu, Samoa, the Cook Islands, and Niue. The assessment shall consider each of the potential partner country's interests and needs, which could be satisfied by such an agreement. The committee further directs the Assistant Secretary of Defense for Industrial Base Policy to provide a briefing to the House Committee on Armed Services by June 1, 2024, on the assessment's findings.

Extreme Weather Wargames

The committee acknowledges that extreme weather conditions pose considerable challenges to military operations. Weather conditions can affect combat operations, logistics, movement of personnel, command and control, infrastructure, humanitarian assistance and disaster relief, and other military operations. The Indo-Pacific area of operations is susceptible to environmental risks such as typhoons, cyclones, earthquakes, tsunamis, intense rainfall, floods, and mudslides.

The committee is further aware that the U.S. Indo-Pacific Command Center for Excellence in Disaster Management and Assistance conducted a wargame entitled “Ho’okele Mua” in 2022 for the purpose of informing the command on opportunities to incorporate certain environmental risk considerations, including considerations pertaining to increasingly frequent, extreme weather events, more thoroughly in planning processes, strategy development, and engagements. The results of the wargame may provide lessons learned regarding the effects of extreme weather conditions on military and naval operations, which could be applied throughout the Indo-Pacific and other regions.

Therefore, the committee directs the Commander, U.S. Indo-Pacific Command, in consultation with the Director for Joint Force Development, Joint Staff, to conduct a review of the results of the Ho’okele Mua wargame. The review shall include a discussion of the feasibility and advisability of conducting additional wargames related to the impact of extreme weather conditions on the planning and execution of military and naval strategies and operations at Department of Defense educational institutions and centers of excellence and at federally funded research and development centers, and, if advisable, recommendations regarding the scope, scale, and conditions of such additional wargames and recommendations regarding the applicability of such wargames to a spectrum of hypothetical scenarios involving other geographic areas of operation, multiple warfare domains, interagency cooperation, and coordination with allies and partners. The committee further directs the Commander, U.S. Indo-Pacific Command, in consultation with the Director for Joint Force Development, Joint Staff, to provide a briefing to the House Committee on Armed Services on the findings and recommendations associated with the review by March 1, 2024.

TITLE XV—CYBERSPACE-RELATED MATTERS

ITEMS OF SPECIAL INTEREST

Tracking Cyber Skill Sets amongst Department of Defense Components

The committee notes with concern the findings from the Comptroller General of the United States' 2022 report titled "Military Cyber Personnel: Opportunities Exist to Improve Service Obligation Guidance and Data Tracking" (GAO-23-105423). Most notably of all the findings was the disconnect in the skills and qualifications monitored and tracked between the military services and U.S. Cyber Command (USCYBERCOM). The Comptroller General found that "while the military services track cyber personnel staffing levels by career fields, USCYBERCOM uses work role designations to assign personnel to cyber mission teams. However, the Army, Air Force, and Marine Corps do not track staffing data by work role. As a result, military service officials cannot determine if specific work roles are experiencing staffing gaps."

To that end, the committee directs the Principal Cyber Advisor, Department of Defense, in coordination with the Principal Cyber Advisors of the Army, Navy, and Air Force, to submit a report to the Senate Committee on Armed Services and the House Committee on Armed Services not later than January 31, 2024, on present courses and timelines for addressing the present obstacles inhibiting the military services from persistently tracking USCYBERCOM work roles for their cyber-focused officer and enlisted career fields.

TITLE XVI—SPACE ACTIVITIES, STRATEGIC PROGRAMS, AND INTELLIGENCE MATTERS

ITEMS OF SPECIAL INTEREST

SPACE ACTIVITIES

Naval Air Station Pensacola Feasibility Study on Demonstrated Spaceport

The committee is aware that Naval Air Station (NAS) Pensacola has been an important support facility for spacecraft recovery operations from the Gulf of Mexico. NAS Pensacola provided robust seaport, aviation, military, communication, security, and medical support for recovery operations of the first manned SpaceX Crew Dragon. NAS Pensacola and NAS Whiting Field have a long history of astronaut medical and flight training support. The committee encourages the U.S. Space Force to work within the Department of Defense to identify opportunities to establish partnerships with other services and bases as necessary to support spaceport activities with a focus on sea-based recovery needs. The committee directs the Chief of Space Operations to provide a briefing to the House Committee on

Armed Services by March 1, 2024, on the feasibility of establishment of additional spaceports that focus on sea-based recovery of both personnel and assets.

NUCLEAR FORCES

Report on Maximum Deployable Capacity

The committee directs the Commander of U.S. Strategic Command, in consultation with the Assistant Secretary of Defense for Space Policy, to provide a briefing to the House Committee on Armed Services not later than March 1, 2024, describing, should current commitments to existing arms control treaties no longer be in effect, the maximum deployable capacity of the nuclear forces of Russia, China, and the United States, including an assessment of the readiness of U.S. strategic nuclear forces to meet such capacity.

MISSILE DEFENSE PROGRAMS

Homeland Missile Defense Options

The committee is concerned about the growing missile threats to the homeland, and notes that in testimony on March 8, 2023, the Commander of U.S. Northern Command stated: “Today, I remain confident in my ability to defend against a limited attack from an ICBM from North Korea on the homeland. I am concerned going forward based on what we saw in their parade on the 8th of February and what we've seen on their capacity and capability that they could exceed my ability to defend against a limited attack.”

While the committee recognizes the significant investment in missile defense and missile defeat programs contained in the budget request, it remains concerned about the evolving threat environment. Therefore, the committee directs the Director of the Missile Defense Agency to submit a report to the congressional defense committees not later than March 1, 2024, on options for enhanced missile defense protection of the United States to hedge against the uncertainty of the future missile threats and technical risk in U.S. missile defense development plans. The report shall include the following elements:

- (1) an assessment of the current position of the homeland missile defense posture relative to missile threats;
- (2) a description of hedge options for increasing the homeland missile defense posture, including for each option, an estimation of the associated cost, development timelines, and infrastructure requirements for deployment; and
- (3) any other information the Director considers appropriate.

OTHER MATTERS

Report on Department of Defense Spending for Track 1.5, Track 2 Dialogues

The committee notes the evolving strategic nuclear arms control landscape, including the Russian Federation’s decision to suspend participation in New START (Strategic Arms Reduction Treaty) and China’s continued opposition to formal diplomatic arms control talks. Therefore, the committee directs the Under Secretary of Defense (Comptroller), in coordination with the Assistant Secretary of Defense for Space Policy, to submit a report to the congressional defense committees, not later than January 31, 2024, identifying the costs, participants, and any relevant outcomes related to unofficial strategic dialogues (Track 1.5 or Track 2) pertaining to global or regional weapons of mass destruction threats and risks for fiscal years 2022 and 2023.

DIVISION B—MILITARY CONSTRUCTION AUTHORIZATIONS

TITLE XXVIII—MILITARY CONSTRUCTION GENERAL PROVISIONS

ITEMS OF SPECIAL INTEREST

Briefing on Naval Air Weapons Station China Lake and Military Construction Process

Naval Air Weapons Station (NAWS) China Lake is the Navy’s largest landholding, which includes more than 1 million acres of land. Within NAWS China Lake, there are different commands with different roles and responsibilities related to infrastructure maintenance and military construction projects. The committee is concerned that multiple jurisdictions with opaque boundaries do not provide a clear path to move proposed military construction projects forward for consideration.

The committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than December 1, 2023, on the following:

- (1) areas of responsibilities for the installation and each tenant command related to military construction projects and infrastructure maintenance;
- (2) for the installation and each tenant command, outline the process for advancing military construction projects from the beginning of the process, through the Navy chain of command;
- (3) outline any barriers that prevent these projects from moving forward;
- (4) outline any reforms that have been made to improve the process; and
- (5) develop recommendations on reforms that could be made to streamline the process and whether additional legislative authorities are needed to achieve these objectives.

Defense Laboratory Modernization Pilot Program

The committee continues to support the nation's defense laboratories and understands the importance of laboratory revitalization and expediting the construction of new facilities. The committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services not later than March 31, 2024, on the Defense Laboratory Modernization Pilot Program (DLMPP). The report shall include:

- (1) an assessment of the current military construction requirements and acquisition process for facilities that meet the DLMPP;
- (2) the process for each service to consider projects under this authority;
- (3) the challenges or barriers to utilization of DLMPP; and
- (4) recommendations on how to improve the authority, which may include legislative changes.

Naval Air Station Lemoore Assessment

The committee recognizes the significance of Naval Air Station Lemoore and its invaluable mission as the Navy's largest master jet base. As a result, the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than December 1, 2023, on base operations at Naval Air Station Lemoore. The briefing shall address:

- (1) the installation's successes and opportunities to enhance the installation's mission;
- (2) the date of the most recently completed installation masterplan and housing requirements and market analysis reports;
- (3) the condition of utility infrastructure, water security planning, encroachment issues, housing, and transportation; and

The committee appreciates the report to Congress titled Naval Air Weapons Station (NAWS) China Lake Modernization dated June 2022 as required by the committee report accompanying the National Defense Authorization Act for Fiscal Year 2022 (H. Rept. 117-118). Because of the important issues addressed, the committee directs the Secretary of the Navy to submit an updated report to the congressional defense committees not later than March 31, 2024. This report shall include the following related to NAWS China Lake:

- (1) an estimated construction timeline on the earthquake recovery effort and the estimated cost to complete this effort;
- (2) date of completion of the most recent installation master plan and housing requirements and market analysis for NAWS China Lake;
- (2) information on water security planning;
- (3) information on the condition of utility infrastructure;
- (4) information on the condition of the roadways;

(6) the current and future use of the Cuddeback Range, as well as any barriers to usage, for both the installation and NAWCWD.

For the elements listed above, the Secretary of the Navy should address how the Navy is resolving these issues.

Report on Western Range Interoperability

The committee is aware of the need for expanded test areas for hypersonic, autonomous systems, and new aerospace developments that require access to restricted air, land, and sea space. The need to expand ranges for seamless interoperability is paramount to address the complexity of weapon systems. The committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services not later than March 31, 2024. The briefing shall address:

(1) a plan to maximize existing western ranges, including steps needed to improve the existing western ranges;

(2) a plan to address the western range interoperability, including current challenges and gaps; and

(3) estimated cost and schedule for execution of the plan.
