

Request ID: 383

Project Name:	Barksdale ADAL Child Development Center	Request Nature:	Community Project Funding
Member Name:	Johnson, Mike(R-LA)	Member's Request: (in thousands, \$000)	\$22,000
Justification:	This project is an appropriate and necessary use of taxpayer funds as the existing CDC is inadequate in size, in poor physical condition, and limits to childcare services at Barksdale AFB. This project will allow a major step forward in reducing the overcrowding of the CDC and improving the environment for dependent children and their families. This project is on the Air Force FYDP and P&D that was provided by Congress in FY24. The project has a federal nexus because the funding provided is for purposes authorized by 10 U.S.C. Chapter 169.		
Project Purpose:	I am requesting \$22M in funding for the construction of a new ADAL Child Development Center (CDC) at Barksdale Air Force Base in Fiscal Year 2025. The entity to receive funding for this project is the United States Air Force (Barksdale Air Force Base), located at 147 Barksdale Blvd E, Barksdale AFB, LA, United States 71110. The funding would be used to construct a thirteen-room addition to the existing CDC. It is on the recently released FY25 Air Force Unfunded Priority List under project #AWUB155000.		
Project City or County:	Barksdale AFB	Project State:	LA

Dear Chairman Rogers and Ranking Member Smith:

I am requesting \$22M in funding for the construction of a new ADAL Child Development Center (CDC) at Barksdale Air Force Base in Fiscal Year 2025. The entity to receive funding for this project is the United States Air Force (Barksdale Air Force Base), located at 147 Barksdale Blvd E, Barksdale AFB, LA, United States 71110.

The funding would be used to construct a thirteen-room addition to the existing CDC. It is on the recently released FY25 Air Force Unfunded Priority List under project #AWUB155000. This project is an appropriate and necessary use of taxpayer funds as the existing CDC is inadequate in size, in poor physical condition, and limits to childcare services at Barksdale AFB. This project will allow a major step forward in reducing the overcrowding of the CDC and improving the environment for dependent children and their families. This project is on the Air Force FYDP and P&D that was provided by Congress in FY24.

The project has a federal nexus because the funding provided is for purposes authorized by 10 U.S.C. Chapter 169. I plan to pursue authorization for this project in the Fiscal Year 2025 National Defense Authorization Act. I certify that I have no financial interest in this project, nor does anyone in my immediate family. Thank you for your consideration of this important project to support the service members at Barksdale Air Force Base, Louisiana.

Sincerely yours,

Speaker Mike Johnson

Request ID: 334

Project Name:	Vertical Skills Instruction Facility	Request Nature:	Community Project Funding
Member Name:	Kim, Andy(D-NJ)	Member's Request: (in thousands, \$000)	\$15,000
Justification:	As set forth in the accompanying Form 1391, the project if funded will construct new Vertical Skills (Material Handling) and General Instruction Classroom facilities. Building will be of semi-permanent construction with concrete floor slabs; pre-engineered steel panels; low-slope or sloped roof; Heating, Ventilation and Air Conditioning (HVAC); and plumbing, mechanical, security and electrical systems. Supporting facilities include repairs to paving and fencing, and utility connections. Accessibility for the disabled will be provided. Antiterrorism force protection and physical security measures will be incorporated into the design including maximum standoff distances from roads, parking areas and vehicle unloading areas. Sustainability/Energy measures will be provided. Facilities will be designed to a minimum life of 25 years in accordance with DoD's Unified Facilities Criteria (UFC 1-200-02) including energy efficiencies, building envelope and integrated building systems performance. Dispose/Demolish 1 building at Joint Base McGuire-Dix-Lakehurst, NJ (4,960 Total SF).		
Project Purpose:	Updating the infrastructure at Joint Base McGuire Dix Lakehurst, especially on the Dix/Lakehurst side of the Joint base (JB) is critical both for retaining mission as well as recruiting new missions. The current training facility for vertical training (carpentry, masonry-building skills) is semi-permanent and is insufficient to meet the upcoming training requirements.

Project Name:	PDI: Defense Access Roads III	Request Nature:	Community Project Funding
Member Name:	Moylan, James C.(R-GA)	Member's Request: (in thousands, \$000)	\$241,880
Justification:	<p>If this project is not provided, there will be an increased rate of deterioration of the roads, bridges and utilities, with high risk of failure. In some situations, (i.e. failed cross culvert) a failure could render the road impassable. If a bridge were to catastrophically collapse or a culvert/utility were to collapse, injury, major property damage, and even death could occur. A collapsed bridge or a collapsed culvert/utility would disrupt the roadway network and cause significant inconvenience and economic impact to Guam, and greatly impact military operations for those who rely on Routes 1 and 3.</p> <p>Additionally, emergency services could be significantly impacted as detours of up to 35 miles would be required for some of the areas on Route 1. Furthermore, the level of service of traffic traversing through the Potts Junction intersection will be significantly degraded. The increased level of congestion is not acceptable and will contribute negatively to the successful completion of the new mission facilities required to support the relocation of Marines from Okinawa to Guam.</p>		
Project Purpose:	<p>This is a Defense Access Roads (DAR) project.</p> <p>Constructs a single lane roundabout at Potts Junction. Proposed construction includes removal and replacement of existing pavement as well as installation of new pavement.</p> <p>Constructs concrete bridges to replace existing bridges in same locations along Route 1, between Naval Base Guam and Finegayan Cantonment. Work for replacement of bridges includes demolition of existing bridges and construction of new vehicle bridges.</p> <p>Constructs strengthened roadways along Routes 1 and 3 to protect existing buried and surface utilities. Work for minimizing impacts on the utilities includes strengthening the pavement for one lane of travel in each direction. Pavement strengthening will consist of thickened asphalt, aggregate base course, subbase and geogrid. Manholes, vaults and surface utilities will be retrofitted or replaced as necessary.</p>

Dear Chairwoman Granger and Ranking Member DeLauro:

I am requesting funding for the PDI: Defense Access Roads III project in fiscal year 2025. The entity to receive funding for this project is the Defense Access Roads Program, to be used in Guam. Overseeing this project is Joint Region Marianas, located at PSC 455 Box 211FPO AP, Guam 96540. The funding would be used for roadway improvements in Guam.

The project is an appropriate use of taxpayer funds because it will make roadway improvements in Guam requested by the Department of the Navy, ground improving transportation between the port of Guam, Marine Corps Base Camp Blaz, and Andersen Airforce Base.

This project has a Federal nexus because it is for the purposes authorized in 23 USC 210.

I certify that I have no financial interest in this project, and neither does anyone in my immediate family.

Sincerely,

James Moylan
Member of Congress
Guam- At Large

Project Name:	Guided Missile Maintenance Building, Depot Level	Request Nature:	Community Project Funding
Member Name:	Rogers, Mike(R-AL)	Member's Request: (in thousands, \$000)	\$33,000
Justification:	Anniston Army Depot is the number-one employer in Chairman Rogers' district and will remain so for years to come. This facility is required to recertify the THAAD Missile for deployment to units. Facility will house a staff of 28 personnel to perform the taskers of recertification. Without this project, the THAAD Interceptor Maintenance Mission work will not be met and the THAAD Missiles cannot be recertified. Missile Defense Agency will not be able to meet National Defense Mission Requirements.		
Project Purpose:	Construct 41,000 SF THAAD Interceptor Maintenance Facility at Anniston Army Depot. Project will provide a complete and functional facility to house the testing functions to execute the THAAD Interceptor maintenance Mission. Facility will house 8 Stockpile Reliability Test (SRT) working bays, Missile Segment (MS) Testing, Missile Round Download, SRT Storage, Blast Cell, Control Room, Shipping & Receiving, and Building Systems to include HVAC, Electrical, and Communications. Facility will be located within the Restricted Area of Anniston Army Depot. Facilities will be designed to a minimum life of 40 years in accordance with DoD's Unified Facilities Criteria (UFC 1-200-02) including energy efficiencies, building envelope and integrated building systems performance.

Washington, D.C. 20515

Dear Chairman Rogers and Ranking Member Smith:

I am requesting funding for the planning and design of P909, Waterfront Emergency Power in fiscal year 2025. The entity to receive funding for this project is Naval Station Mayport, located at 1 Massey Avenue, Mayport, FL, 32228.

The funding would be used for designing an emergency power station and electrical grid improvements to sustain essential mission capability up to and including a Category 2 Hurricane. The objective of this project is to create an organic emergency electrical power generating capability sufficient to supply the waterfront independently within 72 hours of passage of a storm or immediately following an incident disrupting Jacksonville Electric Authority (JEA) power supply. This will allow Naval Station Mayport to remain fully mission capable to support returning ships upon clearing of the entrance channel and basin.

The project has a federal nexus because the requested funding would be for purposes authorized by 10 U.S.C. Chapter 169.

I certify that neither I nor my immediate family has any financial interest in this project.

Sincerely,

John H. Rutherford
Member of Congress

Request ID: 347

Project Name:	Human Performance Wing Laboratory	Request Nature:	Community Project Funding
Member Name:	Turner, Michael R.(R-OH)	Member's Request: (in thousands, \$000)	\$40,000
Justification:	The project was the highest priority for the Air Force science and technology projects included among the Unfunded Requirements for Laboratory Military Construction Projects provided to Congress in FY25. Without the new building, the directorate will continue to use inadequate laboratory space which does not meet modern standards required for professional research and development.		
Project Purpose:	The Human Performance Wing Laboratory building would house the Airman Systems Directorate of the 711th Human Performance Wing (711 HPW) of the Air Force Research Laboratory. The directorate studies developing technologies specific to the human element of warfighting capability, including training, bioeffects, and bioengineering. Work of the directorate is currently conducted in non-networked, sub-standard, and physically separated facilities that were constructed between 1942 and 1955 and which have long outdated laboratory standards. The current facilities are scattered over a mile throughout the base, preventing scientist and engineer interaction and coordination. The new facility will have classified laboratory space.

Michael R. Turner (OH-10)
Member of Congress

Request ID: 368

Project Name:	Advanced Materials Laboratory - C2A	Request Nature:	Community Project Funding
Member Name:	Turner, Michael R.(R-OH)	Member's Request: (in thousands, \$000)	\$9,200
Justification:	<p>Materials and Manufacturing research activities take place in Building 20654, a 1970s era facility with inefficiently configured geographical separation of personnel within the facility and failing systems. As research methods and technology have evolved, the existing physical structure is inflexible and does not compliment current research equipment. The facility cannot effectively be reconfigured to support research requirements. Critical research is significantly impeded by vibration, temperature and humidity fluctuations and inadequate infrastructure. AFRL is forced to rely on mission partners off base for some non-sensitive work because excessive vibrations in the building and fluctuations in temperature and humidity. Building 20654 is no longer suitable for housing state-of-the-art research equipment.</p> <p>Maintaining Building 20654 to meet even subminimal conditions is expensive. The HVAC system averages thirty service calls per year. More than \$20 million in repairs will be required in the next three to five years for improvements including replacing the roof, leaking windows and exterior, chilled water plant, energy recovery system, exterior stairwell and elevators. In addition, another \$20 million is needed to improve reliability of specialized systems for experimentation. The facility has been approved for demolition.</p> <p>Failure to replace the facility will continue to impede advanced collaborative research with academia, industry, government, and international allies that require standards beyond the capability of the current building.</p>		
Project Purpose:	Authorize \$9.2 million for Planning and Design (P&D) toward construction of the Advanced Materials Research Laboratory (C2A) of the Air Force Research Laboratory (AFRL) at Wright-Patterson

Dear Chairman Rogers and Ranking Member Smith,

I am requesting planning and design funding for the Advanced Research Laboratory (C2A) in the fiscal year 2025 National Defense Authorization Act. The entity to receive funding for this project is Wright Patterson Air Force Base, located at 5135 Pearson Rd. Bldg 10, Rm 206 Wright-Patterson AFB, OH.

The funding would be used to plan and design construction to house a new laboratory and research facility that will advance multiple research activities including specialty coatings, nuclear modernization, and microelectronics in support of state-of-the-art weapons systems.

I certify that neither I nor my immediate family has any financial interest in this project.

Sincerely,

Michael R. Turner (OH-10)
Member of Congress

Request ID: 353

Project Name:	NAS Jacksonville Child Development Center	Request Nature:	Community Project Funding
Member Name:	Waltz, Michael(R-FL)	Member's Request: (in thousands, \$000)	\$36,670
Justification:	Existing child care facilities will continue to operate at full capacity and turn away or place on a waiting list the large number of dependent children who need child care services. Military families will have to continue to use lesser quality and more expensive off-base facilities. Lack of adequate CDCs will continue to degrade the quality of life of eligible military families.		
Project Purpose:	Constructs a 43,164 square foot single-story Child Development Center with concrete foundation and floor slab, concrete masonry walls, steel roof framing, covered exterior walkways, entrance canopies, HVAC, mechanical and electrical utilities, fire alarm and fire protection systems, and CCTV.

Member of Congress

Request ID: 362

Project Name:	Marine Corps Blount Island Communications Infrastructure Modernization	Request Nature:	Community Project Funding
Member Name:	Waltz, Michael(R-FL)	Member's Request: (in thousands, \$000)	\$38,360
Justification:	<p>The MCSF-BI mission is to support the Blount Island Command's (BICmd) Maritime Prepositioning Force (MPF) program and its mission of supporting worldwide military operations through planning, coordinating, and executing the logistics efforts of the MPF program. This includes the loading and offloading of munitions, materiel, and combat equipment from Military Sealift Command (MSC) ships while they are moored in the slipway; and maintenance, replacement, and tracking of those items. MCSF-BI is a strategic national asset with irreplaceable intermodal infrastructure, marshalling space, waterfront facilities, and warehouse, maintenance, and administrative facilities.</p> <p>Military, government, and contractor personnel from MCSF-BI S-6 and BICmd Information Systems Management Branch comprise the communications function at Blount Island. They currently occupy space in Building 100 and temporary trailer TR002. Spaces are undersized for the requirement and scattered, leading to separating personnel and inefficient work environment which impacts their ability to meet their mission requirements.</p> <p>Current Communications Facility personnel and equipment are located within the minimum Explosive Safety Quantity Distance (ESQD) for ammunition operations aboard MCSF-BI. This is a major command and control vulnerability in the event of an explosive incident.</p> <p>The installation's ability to adequately supply communications capability to support BICmd operations will continue to be adversely affected as long as the operation resides in inadequate facilities. Inefficiencies associated with the facility and associated personnel will persist.</p> <p>Risk of communication outages due to deteriorated infrastructure and to lack of redundant communications supply will continue. Greater reliance on IT infrastructure to improve efficiency of prepositioning operations requires reliable, capable, and state of the art infrastructure. All shipboard materiel is tracked electronically--tens of thousands of items for each ship--and outages interrupt work in support of MPF mission and could delay its operations.</p>		
Project Purpose:	<p>Replaces and upgrades existing data and voice communication infrastructure throughout the installation to the entry point of buildings, including excavation of existing underground communication utility routes, installation of concrete-encased ductbank, replacement of deteriorated manholes and handholes, and replacement of fiber and copper cable. Installs new underground communication infrastructure to add redundant loops to the system.</p> <p>Provides a two-story concrete-framed Communications Center with reinforced concrete masonry unit walls, standing seam metal roof, and pile foundations.</p>

Request ID: 348

Project Name:	Academic Training Center	Request Nature:	Community Project Funding
Member Name:	Womack, Steve(R-AR)	Member's Request: (in thousands, \$000)	\$74,000
Justification:	The city, state, and local community all have demonstrated support for this mission and this project specifically. The Congressional Delegation along with the Governor strongly support the beddown of FMS F-35s. The community has shown strong support during the basing process and the EIS process. Please see attached letters of support from the mayor of Fort Smith, the Arkansas Economic Development Commission's Director of Military Affairs, and the President/CEO of the Fort Smith Regional Chamber of Commerce.		
Project Purpose:	Construct an F-35 Academic Training Center and Liquid Oxygen Supply Storage facility for the Foreign Military Sales F-35 program's Pilot Training Center. The facility will provide spaces for training classrooms, flight simulator spaces, conference rooms, and administrative support spaces for the F-35 FMS Pilot Training Center mission. A flight simulator training facility is required to support the beddown of FMS F-35s at Ebbing Air National Guard Base. The mission requires 4 simulator bays capable of supporting up to 3 simultaneous countries training. The liquid oxygen storage building is required to support the training mission.
